shall be the net or register tonnage of vessels not propelled by engines and unriggered craft upon which tolls and other charges based upon tonnage shall be paid by vessels of commerce, Army and Navy transports, colliers, supply ships, and hospital ships (as defined in Article I) for passage through the Panama Canal. One hundred cubic feet, or 2.83 cubic meters, shall constitute one gross or net ton.

Spaces for the use, or possible use of passengers (as defined in Article VI) shall not be deducted from the gross tonnage, except in so far as their deduction may be specifically provided for in the following sections (1 to 10) of this article of these rules.

Spaces available for the stowage of stores (other than boatswain's stores) or cargo

shall not be deducted from gross tonnage. In case of Army and Navy transports, colliers, supply ships, and hospital ships, as defined in Article I, the term "Stores (other than boatswain's stores) or Cargo" shall include, in addition to goods or cargo ordinarily carried as freight on vessels of commerce, the following articles:

On transports, food, stores, luggage, accouterments, and equipment for passengers.

On colliers, coal, coaling gear, and fuel oil not for the use of the colliers.

On supply ships, stores, supplies of all kinds, distilling machinery and distilled water (other than feed water stored in double bottom compartments), machines, tools, and material for repair work, mines and mining material, torpedoes, arms, and ammunition.

On hospital ships, food stores for passengers, medical stores, and hospital equipment.

Guns mounted on transports and supply ships, for defense of the ships, and ammunition required for use in such guns shall not be classed as cargo.

SECTION 1. The tonnage of the spaces or compartments occupied by, or appropriated

to the use of, the officers and crew of the vessel shall be deducted. The term "Officers and crew" shall

include the personnel inscribed on the ship's rolls, i. e., the ship's officers, engineers, doctors, apothecary, sick attendants, sailors, apprentices, firemen, mechanics, and wireless operators, but shall not include clerks, pursers, stewards, and other members of the personnel provided by the ship for the care of the passengers. The spaces or compartments occupied by the officers and crew shall include their berthing accommodations, spaces provided for medical attention, mess rooms, ward and dressing rooms, bath and wash rooms, water closets, latrines, lavatories, or privies for their exclusive use, and passageways exclusively serving these spaces.

SECTION 2. On hospital ships, the spaces or compartments occupied by doctors, apothecary, and sick attendants duly inscribed on the ship's rolls, shall form part of the deduction under Section 1 of this article. Spaces provided for the medical attention of the officers and crew of a hospital ship shall likewise be deducted, but spaces fitted for the transportation, or for the medical attention, of other persons than those duly listed in the ship's rolls shall not be deducted.

SECTION 3. The space occupied by the master's cabin shall be deducted.

SECTION 4. Cook houses, galleys, bakeries, laundries, and rooms for ice machines, when

used exclusively to serve the officers and crew, and the condenser space, and distilling rooms, when used exclusively for condensing and distilling the water for the officers and crew, shall be deducted.

SECTION 5. Spaces used for the anchor gear, steering gear, and capstan; the wheel house, the dynamo rooms; the chart room used exclusively for keeping charts, signals, and other instruments of navigation; lookout houses; spaces for keeping electric searchlights, and wireless telegraph appliances; and other spaces actually used in the navigation of the ship, shall be deducted. Such spaces upon vessels of commerce as may be devoted to the mounting of guns and to the stowage of ammunition for the guns thus mounted shall be deducted. The deduction of all spaces, other than those devoted to the mounting of guns, enumerated in this section must be reasonable in extent and be subject to the limitations stipulated below in Article XI.

SECTION 6. In case of a ship propelled wholly by sails, any space, not exceeding 2½ per cent of the gross tonnage, used exclusively for storage of sails shall be deducted.

SECTION 7. Spaces used exclusively for boatswain's stores shall be deducted. The deduction is not, however, to exceed one per cent of the gross tonnage in ships of 1,000 tons gross and upward, nor more than 75 tons in any ship however large. In vessels from 500 to 1,000 tons gross the limit is fixed at 10 tons and in vessels from 150 to 500 tons at not more than two per cent of the gross tonnage. In vessels under 150 tons at not more than three tons.

SECTION 8. The space occupied by donkey engine and boiler shall be deducted if the donkey engine and boiler are connected with the main pumps of the ship, or if they are located in a permanently covered or closed-in structure on or above the upper deck.

SECTION 9. Passages and passageways shall be deducted if they serve deducted spaces exclusively for the officers and crew.

SECTION 10. Water ballast spaces, other than spaces in the vessel's double bottom, shall be deducted if they are adapted only for water ballast, have only ordinary manholes for access and are not available for the carriage of cargo, stores, or fuel. If used to carry oil or other fuel, these spaces shall be regarded as part of the vessel's fuel space and shall not be subject to separate deduction.

ARTICLE XI. Each of the spaces enumerated in Article X, Sections 1 to 10, unless otherwise

specifically stated, shall be subject to such conditions and requirements as to marking or designation and

use or purpose as are contained in the navigation or registry laws of the several countries, but no space, other than fuel spaces deducted under Article XIII of these rules, shall be deducted unless the use to which it is to be exclusively devoted has been appropriately designated by official marking. In no case, however, shall an arbitrary maximum limit be fixed to the aggregate deduction made under Article X.

(B) DEDUCTIONS FOR VESSELS PROPELLED BY ENGINES.

ARTICLE XII. The net or register tonnage upon which tolls and other charges based upon tonnage shall be paid by vessels of commerce, Army and Navy transports, colliers, supply ships, and hospital ships, as defined in Article I, propelled by engines, for passage through the Panama Canal, shall be the tonnage remain-

ing after the following deductions have been made from the gross tonnage. One hundred cubic feet, or 2.83 cubic meters, shall constitute one gross or net ton. Vessels propelled partly by sails and partly by engines shall be classed as "Vessels propelled by engines."

SECTION 1. The spaces specified above in Article X shall be deducted from the space

included in gross tonnage in the case of vessels propelled by engines as in the case of vessels not propelled by engines.

SECTION 2. The space occupied by the engines, boilers, coal bunkers, fuel oil tanks, double bottom fuel and feed water compartments, shaft trunks of vessels with screw propellers, spaces, within a closed-in side-to-side erection, that are framed in around the funnels, or that are required for the introduction of light and air to the engine room to the extent that the framed-in spaces around the funnels and the light and air casings are located below the deck or covering of the first or lowest tier of such erections, if any, on the upper deck, as defined in Article IV, Section 3, and are contained in closed-in side-to-side erections, spaces necessary for the proper working of the engines, and spaces occupied by the donkey engine and boiler when situated within the boundary of the engine room or within the light and air casings above the engine room, and when used in connection with the main machinery for propelling the vessel. When the shafts of screw propellers pass through open spaces not enclosed within tunnels, the spaces allowed in lieu of the tunnels must be of reasonable dimensions suitable for the vessel in question. When any portion of the engine or boiler rooms is occupied by a tank for fresh water, the space thus taken up shall not be deducted.

Donkey engine and boiler spaces, when deducted according to Article XIV below, shall not be made a separate deduction. The portion of the framed-in spaces around the funnels and of the light and air casings that extend above the deck or covering of the first or lowest tier of side-to-side erections, if any, on the upper deck, as defined in Article IV, Section 3, and surrounding the said space or spaces are exempted from measurement and form no part of the space deducted under this section.

SECTION 3. The deductions made for propelling power, including all those provided for in Section 2 of this article, shall in no case exceed 50 per cent of the gross tonnage, except in case of tugs employed exclusively as tugs. In other respects the spaces enumerated in Section 2 shall, except as otherwise specifically stated, be subject to the requirements as to designation or marking and use or purpose contained in the navigation or registry laws of the several countries.

SECTION 4. The deductions made for propelling power provided for in Section 2 of this article shall be made according to the provisions of Article XIII, or of Article XIV, as the owner of the vessel may elect.

SECTION 5. Double bottom compartments that are set aside to be used exclusively for the stowage of feed water for the ship's boilers shall be deducted.

ARTICLE XIII. In ships that do not have fixed bunkers, but transverse bunkers with movable partitions, with or without lateral bunkers, and in ships with fuel tanks of

propelling power deduction for vessels with bunkers having movable par-

titions, or having fuel oil compartments that may be used to stow cargo or stores.

double bottom fuel compartments which may be used to stow cargo or stores, measure the space occupied by the engine rooms, and add to it for vessels with screw propellers 75 per cent and for vessels with paddle wheels 50 per cent of such space.

By the space occupied by the engine rooms is to be understood that occupied by the engine room itself and the boiler room, together with the spaces strictly required for the working of the engines and boilers, with the addition of the spaces taken up by shaft trunks (in vessels with screw propellers), the spaces which enclose the funnels and the casings necessary for the admission of light and air into the engine room to the extent that such spaces are located below the upper deck or below a deck with openings (usually designated as tonnage openings) which may be so closed as to permit the carriage of cargo or stores under the deck or a portion thereof, and donkey engine and boiler spaces when the donkey engine and boiler are situated within the boundary of the main engine room or of the light and air casing above it, and when they are used in connection with the main machinery for propelling the vessel. When the shafts of screw propellers pass through open spaces not enclosed within tunnels, the spaces allowed in lieu of tunnels must be of reasonable dimensions suitable for the vessel in question. When a portion of the space within the boundary of the engine or boiler rooms is occupied by a tank or tanks for fuel oil or fresh water, the space considered to be within the engine room shall be reduced by the space taken up by the tank or tanks for fuel oil or fresh water.

The cubical contents of the abovenamed spaces occupied by the engine room shall be ascertained in the following manner: Measure the mean depth of the space occupied by the engines and boilers from its crown to the ceiling at the limber strake; measure also three, or, if necessary, more than three, breadths of the space at the middle of its depth, taking one of such measurements at each end and another at the middle of the length; take the mean of such breadths; measure also the mean length of the space between the foremost and aftermost bulkheads or limits of its length, excluding such parts, if any, as are not actually occupied by or required for the proper working of the engines and boilers. Multiply together these three dimensions of length, breadth, and depth, and the product will be the cubical contents of the space below the crown. Then, by multiplying together the length, breadth, and depth, find the cubical contents of the space or spaces, if any, which are framed-in for the machinery, for enclosing the funnels, or for the admission of light and air, and which are located between the crown of the engine room and the uppermost deck or covering of the first or lowest tier of side-to-side erections, if any, on the upper deck, as defined in Article IV, Section 3. Add such contents, as well as those of the space occupied by the shaft trunk and by any donkey engine and boiler located within the boundary of the engine room or of the light and air casing above the engine room, and used in connection with the main engines for propelling the ship, to the cubical contents of the space below the crown of the engine room; divide the sum by 100 or by 2.83, according as the measurements are taken in feet or meters, and the result shall be deemed to be

the tonnage of the engine and boiler room and shall be the tonnage taken as the basis for calculating the deduction for propelling power.

If in any ship in which the space for propelling power is to be measured the engines and boilers are in separate compartments, the contents of each compartment shall be measured separately in like manner, according to the above method; and the sum of the tonnage of the spaces included in the several compartments shall be deemed to be the tonnage of the engine and boiler rooms, and shall be the tonnage taken as the basis for calculating the deduction for propelling power.

ARTICLE XIV. When vessels are fitted with fixed coal bunkers or with fuel oil tanks or double bottom fuel compartments which cannot be used to stow cargo or stores, and when such bunkers, tanks, and fuel compartments have been certified by official marking to be spaces for the vessel's fuel, the deduction for propelling power may either be in accordance with the provisions of Article XIII above, or by deducting the actual tonnage of the spaces enumerated in Article XII, Section 2 as measured in accordance with the following provisions, as the owner of the vessel may elect: Measure the mean length of the engine and boiler room, including the coal bunkers. Ascertain the area of three transverse sections of the ship (as set forth in the rules given in Articles VIII or IX for the calculation of the gross tonnage) to the deck which covers the engine. One of these three sections must pass through the middle of the aforesaid length, and the two others through the two extremities. Add to the sum of the two extreme sections four times the middle one, and multiply the sum thus obtained by the third of the distance between the sections. This product divided by 100 if the measurements are taken in English feet, or by 2.83 if they are taken in meters, gives the tonnage of the space measured. If the engines, boilers, and bunkers are in separate compartments, measure each compartment, as above set forth, and add together the results of the several measurements. The bunkers measured for fuel deductions shall include only those bunkers that are absolutely permanent, from which the coal can be trimmed directly into the engine room or stokehole, and into which access can be obtained only through the ordinary coal chutes on deck and from doors opening into the engine room or stokehole. Thwartship bunkers that can be in any way extended are not to be included in the measurements for deductions. When any portion of the engine or boiler rooms is occupied by a tank for fresh water, the space considered to be within the engine and boiler rooms shall be reduced by the space taken up by the tank for fresh water.

Propelling power deduction for vessels with fixed bunkers, or having fuel oil compartments that can not be used to stow cargo or stores.

The contents of the shaft trunk shall be measured by ascertaining, and multiplying together, the mean length, breadth, and height. The product divided by 100, or 2.83, according as the measurements are taken in English feet or in meters, gives the tonnage of such space. When the shafts of screw propellers pass through open spaces not enclosed within tunnels, the spaces allowed in lieu of tunnels must be of reasonable dimensions suitable for the vessel in question.

The tonnage of the following spaces below the deck or covering of the first or lowest tier of side to-side erections, if any, on the upper

deck, as defined by Article IV, Section 3, is ascertained by the same method, viz: (a) The spaces framed-in around the funnels. (b) The spaces required for the admission of light and air into the engine room. (c) The spaces, if any, necessary for the proper working of the engines. (d) Spaces occupied by the donkey engine and boiler when used in connection with the main engines for propelling the ship and when situated within the boundary of the engine room or of the casing above the engine room. (e) Fuel oil tanks and double bottom compartments fitted for the stowage of fuel oil.

No space may be deducted unless included in gross tonnage.

ARTICLE XV. Under no circumstances shall any space which has not been included in the gross tonnage be deducted from gross tonnage.

The use of the whole or any portion of a deducted space, other than fuel spaces deducted under Article XIII, to stow cargo of any kind or stores other than boat-swain's stores, or to provide passenger accommodations, shall be evidence that the entire space thus wholly or partially occupied is a part of the actual earning capacity of the ship, and the entire space shall be added to, and become a permanent part of, the net tonnage upon which Panama Canal tolls shall be collected.

ARTICLE XVI. Only such officials as are authorized in the several foreign countries and in the United States to measure vessels and to

issue tonnage certificates for purposes of national registry, and such other officials as are authorized by the President of the United States, or by those acting for him, to measure vessels and to issue Panama Canal tonnage certificates, shall have authority to measure vessels for Panama navigation or to issue Panama tonnage certificates.

ARTICLE XVII. Tonnage certificates presented at the Panama Canal shall be subject to correction by the official or officials authorized by the President of the United States, or by those acting for him, to administer these measurement rules, in so far as may be necessary to make the certificates conform to these rules.

ARTICLE XVIII. The Panama Canal tonnage certificates issued by the measurement authorities of the United States and the

Panama Canal shall correspond in substance and form to the sample certificate appended to these rules. Blank certificates in English will be furnished by the Secretary of War or the Governor of the Panama Canal upon request of the measurement authorities of foreign countries. The measurement authorities of any foreign country may also provide themselves with Panama Canal measurement certificates printed in English, or in the language of the foreign country, provided such certificates strictly correspond in substance and form to the sample certificate appended to these rules.

Rules Applying to Vessels of War, Other Than Army and Navy Transports, Colliers, Supply Ships, and Hospital Ships.

ARTICLE XIX. The toll on warships, other than Army and Navy transports, colliers, supply ships, and hospital ships, shall be based upon their tonnage of actual displacement at

Tolls upon war-ships shall be levied upon actual displacement upon arrival at Canal.

Tolls upon warships shall be levied upon actual displacement upon arrival at Canal. The displacement tonnage of such warships shall be their displacement before the vessels have taken on such coal, fuel oil, stores, or supplies, as may be purchased and taken on board after arrival at the Canal for transit through the same.

ARTICLE XX. "Warships" in the meaning of Articles XIX to XXIV shall be considered to be all vessels of war, other than Army and "Warships" de- Navy transports, colliers, hospital ships, and supply

ships, as defined in Article I. Warships are vessels of Government ownership that are being employed by their owners for military or naval purposes.

ARTICLE XXI. Every warship, other than Army and Navy transports, colliers, supply ships, and hospital ships (as defined in Article 1) upon applying for passage through the Panama Canal shall, in order to facilitate the ascertainment of its mean draft, be anchored or placed at such station or location as shall be designated by the Governor of the Panama Canal or by the officials authorized to act for him.

ARTICLE XXII. The commander of every warship, other than Army and Navy transports, colliers, supply ships, and hospital ships (as defined in Article I) applying for passage through the Panama Canal, shall exhibit for examination by the Governor of the Panama Canal or by the officials authorized to act for the Governor of the Panama Canal an official document containing the vessel's curve of displacement, its curves for addition to displacement for change of trim, and a scale so arranged that the displacement at any given mean draft is shown. Such document or documents shall be issued and be certified as correct by competent authorities of the Government to which the vessel belongs.

ARTICLE XXIII. The actual displacement of warships shall be determined from their official displacement scale and curves, and shall be expressed in tons of 2,240 pounds. Should the displacement scale and curves of a warship show or state the vessel's displacement tonnage in metric tons of 2,204.62 pounds, the tonnage so expressed shall be multiplied by 0.9842 for the purpose of converting the tonnage into tons of 2,240 pounds.

ARTICLE XXIV. Should any warship, other than Army and Navy transports, colliers, supply ships, and hospital ships (as defined in Article I) apply for passage through the Panama Canal and, for reasons satisfactory to the Governor of the Panama Canal, not have on board the duly certified document or documents specified in Article XXII, the Governor of the Panama Canal, or the officials authorized to act for him, shall then determine the displacement of the vessel, using such reliable data as may be available, or by taking such dimensions of the vessel and using such approximate methods as may be considered necessary and practicable. The displacement tonnage so determined shall be considered to be the displacement of the vessel.

PANAMA CANAL TONNAGE CERTIFICATE
FOR THE

SHIP

Name of ship..... Official number or signal..... Port of registry..... Tonnage on certificate
of national registry: Gross..... Net..... Register length..... Register breadth.....
Register depth.....

DETAILS OF PANAMA CANAL GROSS TONNAGE.

The spaces measured for gross tonnage in this ship comprise the following and no others, viz:

	Tons of 100 cubic ft.	Cubic ft. or cubic meters.	Tons of 100 cubic ft.
1. Space or spaces under the tonnage deck, viz:			
(a) Space between tonnage deck and double bottom.....			
(b) Double bottom compartments available for fuel, cargo, feed water, or stores.....			
Total space under tonnage deck.....			
2. Space or spaces between the tonnage deck and uppermost full length deck....			
3. Closed-in spaces under or in permanent constructions on or above the uppermost full length deck, viz:			
(a) Forecastle.....			
(b) Bridge space.....			
(c) Poop.....			
(d) Break or breaks.....			
(e) Turret space.....			
(f) Trunk space.....			
(g) Round houses.....tons... tons... tons... tons... tons... tons }			
Round houses.....tons... tons... tons... tons... tons... tons }			
(h) Side houses.....tons... tons... tons... tons... tons... tons }			
Side houses.....tons... tons... tons... tons... tons... tons }			
(i) Companion house or companionway (dimensions and tonnage of part used as smoking room or for other special purpose)			
(j) Passageways serving measured spaces.....			
(k) Cookhouses, galleys, bakeries, and condenser spaces.....			
(l) Lavatories, water closets, latrines, privies, toilets, wash and bath rooms.....			
(m) Wheelhouses, chart house, house for donkey engine and boiler, spaces for anchor gear, steering gear and capstan, lookout houses, and other closed-in spaces used in working the ship.....			
(n) Sail room.....			
(o) Boatswain's stores.....			
(p) Hatchways..... tons... tons... tons... tons... tons... tons }			
Hatchways.....tons... tons... tons... tons... tons... tons }			
Excess above one-half per cent of the gross tonnage as figured above.....			
Total closed-in spaces on or above the uppermost full length deck.....			
Panama Canal gross tonnage*.....			
*For spaces not included in gross and net tonnage, see other part of this certificate.			
DEDUCTIONS FROM GROSS TONNAGE.†			
1. Crew accommodations, viz:			
(a) Berthing accommodations and passageways serving them (name them):— Seamen.....tons, firemen.....tons, quartermasters.....tons,tons,tons,tons.....			
(b) Mess rooms, ward and dressing rooms, bath and wash rooms, medical attention rooms, etc., if separate from berthing accommodations.....			
2. Officers' accommodations and passageways serving them. (State dimensions and tonnage.)			
(a) Berthing accommodations: (Name them): Chief officer.....tons, Second officer.....tons, Chief engineer.....tons, Second engineer.....tons, Third engineer.....tons, Boatswain.....tons, carpenter.....tons,tons,tons.....

.....(Official position.)

Decorative Trees and Plants for Permanent Townsites.

The decorative trees and plants required at Balboa and other permanent townsites will be propagated at a nursery to be started at the Corozal farm, and handled in connection with the other operations at that point under Mr. N. E. Coffey, the farm superintendent. It is estimated that about 15,500 trees and plants will be necessary, comprising the greater part of well-known species indigenous to the tropics, and a number of nonindigenous varieties, which, it has been found by experimentation, will thrive on the Isthmus. The list, which was prepared by Mr. W. L. Phillips, the landscape architect, includes the following:

Three thousand Royal palms, 50 Porto Rico Royal palms, 500 coconut palms, 150 Royal poinciana, 400 Frangipani, 50 *Pritchardii Pacifica* (fan palm), 1,500 *Tabernaemontana coronaria* (crepe jessamine), 500 *Aralia Guilfoylei*, 50 *Artocarpus incisa* (bread-

fruit), 300 *Caladium*, 400 *Casapina pulcherrina* (dwarf poinciana), 400 *Carludovica palmata* (Panama hat palm), 24 *Caryota urens* (fern palm), 24 *Cedrela odorata* (Jamaica cedar), 100 *Citrus acida* (lime), 300 *Citrus Aurantium dulcis* (sweet orange), 50 *Citrus Dancy* (tangerine), 24 *Cycas revoluta* (sago palm, one variety), 24 *Cycas circinalis* (sago palm, another variety), 200 *Dracena lindenii* (dragon tree), 24 *Enterolobium cyclocarpum* (corutu), 1,000 *Euphorbia pulcherrima* (poinsettia), 24 *Ficus indica* (india rubber), 200 *Gardenia florida* (Cape jessamine), 500 *Glabra bougainvillea* (bougainvillea), 1,500 *Hibiscus rosea*, varieties, 50 *Ipomea bona-nox* (moonflower), 100 *Ipomea tube-rosa* (yellow morning glory), 24 *Ipomea horsfallii* (red morning glory), 100 *Jasminum gracillimum* (graceful jessamine), 50 *Jasminum grandiflorum* (Spanish jessamine), 24 *Latonia borbonica* (fern palm), 500 *Lausonia alba* (henna), 48 mangoes, 1,000 *Murraia exotica*, 60 *Pandanus utilis* (screw pine), 12

Pandanus regalis, 60 *Passiflora quadrangula* (grenadilla), 60 *Passiflora laurifolia* (water lemon), 60 *Persea gratissima* (avocado), 24 *Phoenix dactylifera* (date palm), 800 *Phyllanthus nivassus* (snowflake), 60 *Jobo de Igua-na*, 24 *Psidium guava* (guava), 12 *Swietenia mahogani* (mahogany), 300 *Yucca elephantoides* (Spanish bayonet), 24 *Tamarindus indica* (tamarind), 500 *Zingiber officinale* (ginger), 150 *Eucalyptus alba* (eucalyptus), 100 *Bambusa vulgaris* (bamboo).

Shoots from the greater part of the trees and plants mentioned above can be obtained on the Isthmus, but some, such as the date palm, etc., will have to be brought from abroad. Most of the varieties are found in the Ancon Hospital grounds; there is an eucalyptus tree at Empire, which was set out some years ago, and the East Indian bamboo, from which fishing rods are made, has been introduced, an excellent type of this tree existing at Culabra. It is expected that some of the trees and plants will be ready for transplanting by the first of next July, although they will not be required until the building operations at the new townsites have advanced to such an extent that they can be planted with safety.

Net Emigration in Five Months Over 10,000.

The excess in the number of persons leaving the Isthmus during the month of December, according to the figures of the quarantine service, as compared with the number landing, amounted to 1,970, making the net emigration from the Isthmus during the past five months 10,766, the most of which consisted of laborers on the Canal.

The total number of steamship passengers embarking from the ports of Colon and Cristobal for foreign ports during December was 4,338, consisting of 1,339 cabin, and 2,999 steerage passengers. The number of persons landing from foreign ports was 2,457, consisting of 1,625 cabin, and 832 steerage passengers. The number of persons who embarked over those who landed at these ports was 1,881. The number of steerage passengers landing from foreign ports was 159 less than in November. The immigration from the West Indian ports in respect to steerage passengers, which are mostly of the laborer class, continues to fall off, only 387 arriving at the above ports in December, as compared with 505 in November. There was a large exodus of West Indians from the Isthmus at holiday time, but some of these will probably return. Of the deck passengers from other countries, Costa Rica contributed 108, Colombia, 104, the United States 33; only 90 came from all of Europe. The number of persons arriving "In transit" during the month of December, nearly all tourists, was 1,618, exactly the same number as arrived in November.

The number of persons arriving at the ports of Ancon and Panama from foreign ports during the month was 518, consisting of 343 cabin, and 175 steerage passengers. The number of persons embarking for foreign ports was 607, consisting of 208 cabin, and 399 steerage passengers. The number of those who embarked over those who landed was 89.

The total number of vessels arriving at Colon during December was 113, of which 10 were United States naval vessels, or naval vessels of other countries. The number of vessels arriving at the port of Ancon was 24.

LOCK ENTRANCE CAISSON.

Keel for the First Structure Laid at the Works of the Contractor.

The keel for the first lock entrance floating caisson was laid at the plant of the Union Iron Works in San Francisco in the latter part of December, and the erection of the caisson is proceeding. Up to that time, very little actual construction work on the caisson had been performed, the contractor having been engaged in ordering materials and preparing the contract drawings. Over 80 per cent of the drawings have been checked and approved by the representative of the Isthmian Canal Commission stationed at the works of the contractor; of the drawings in connection with the pumping system, about 25 per cent have been checked and approved.

All of the structural steel has been ordered from rolling mills in the East; over 90 per cent of it has been shipped and over 50 per cent has been received at the construction plant. Orders have also been placed for all the electric motors, pumps, anchor chain, and miscellaneous fittings. Many of the fittings, such as valves, valve stands, end reaction castings, etc., are being manufactured in the Union Iron Works shops. Work is in progress on the making of the wood templates necessary for laying out the structural steel for the caisson, and the laying off of some of the steel from the templates is under way. The cast steel castings that will be used in the construction of the caisson are being made by the Columbia Steel Company, of Pittsburg, Cal., a town on the Sacramento River about 60 miles from San Francisco, and an inspector for the Commission has been stationed at that plant.

A few minor modifications in the plans for the caisson structure have been made since the publication of a description of the caisson in THE CANAL RECORD of December 3, 1913. The most notable of these are in the size of the end peak longitudinal trimming compartments, which have been changed from the 31-foot breasthooks to the deck 16 feet above the keel; and in the end peak bulkhead, which has been moved to frame No. 22, below the 37-foot deck, from its former position on frame No. 24. These changes will allow trimming the structure from a greater angle of longitudinal inclination.

Opinion in an Injunction Suit.

An opinion was given by Justice W. H. Jackson in the Circuit Court of the Second Judicial Circuit at Empire, on Tuesday, January 6, in the case of Encarnación Rangel, Edwin Holeness, and Manuel Gonzalez *versus* Frank Feuille and Guy Johannes praying that the defendants be restrained from complying with the following order:

"You are hereby notified that it will be necessary for you to remove from this land, and to remove or destroy this building before January 1, 1914.

"It will be necessary for the Isthmian Canal Commission to destroy this building if it is not removed before January 1, 1914.

FRANK FEUILLE,
Head of the Department of Law."

In his opinion, Justice Jackson stated that the question involved in this case was solely as to the jurisdiction of the court. He contended that the Executive Order of the President in reference to the acquisition of private lands in the Canal Zone conferred authority only "To acquire title by agreement, and failing so to do, to take possession of the property

by expropriation proceedings before a joint commission, which necessarily, under the obligation of the Treaty, presupposed the existence of such a commission.

"For the reasons stated herein, it must, therefore, be held that the threatened seizure and destruction of the properties of the plaintiffs would be taking of property without 'due process of law', and that under such circumstances this court is not without jurisdiction in the premises.

"It follows that the plea to the jurisdiction of the court must be denied and the injunction allowed, with leave to the defendants to move to vacate the same, when a joint commission may be organized for the hearing of claims."

Official Moving Pictures of the Canal.

An exhibition of moving pictures of the Canal construction and operation, made by Mr. Roscoe G. Searle, a Government photographer stationed at the capitol in Washington, was given before officials of the Isthmian Canal Commission at Culebra on the night of January 7. The film shows the blowing up of Gamboa dike, steamshovel operations, the passage of vessels through the locks, etc., in unclassified sequence, just as taken, and it has been sent to the Commission photographer to be divided up in order and supplied with legends. This film is about 6,000 feet long, and several more are to follow as they are developed in the United States.

Steamshovel Operations in December.

During the month of December, the total amount of material excavated by the Fourth Division in Culebra Cut was 161,000 cubic yards. All of this amount was primary excavation for the Canal; 74,127 cubic yards were classified as earth excavation, and 86,873 cubic yards as rock excavation.

In addition thereto, the Fourth Division excavated at Sosa Hill 59,100 cubic yards of rock for use on the Naos Island breakwater.

All the yardage handled by this division was excavated by steamshovels.

Concrete in the Locks and Auxiliary Works.

The following is a statement of the concrete laid in the Canal locks and auxiliary works up to January 1, 1914:

Gatun Locks.....	2,068,089
Gatun spillway.....	231,410
Gatun hydroelectric station.....	7,167
Gatun control house, ducts, etc.....	2,993
Pedro Miguel Lock.....	923,438
Miraflores Locks.....	1,500,525
Miraflores dam and spillway.....	79,004
Pedro Miguel-Miraflores duct line.....	6,193
Total.....	4,818,819

Oil Supply to Permanent Shops at Balboa.

Two fuel oil tanks, one of 2,500 and the other of 600 barrels capacity, have been erected on the saddle between Sosa High and Sosa Low Hills, for supplying the burners in the permanent shop buildings at Balboa. Excavation on the site of the larger dry dock makes it impracticable at present to connect the tanks directly with the shops, and a temporary 6-inch line about 4,000 feet long, is being constructed around the south side of Sosa High, to reach the terminal site about opposite the Balboa dispensary.

Superseding a provision that each prisoner discharged from the Canal Zone penitentiary be given \$7.50 to provide himself with clothing and maintenance until he finds remunerative employment, the Isthmian Canal Commission

has adopted by letter ballot, a resolution to the effect that the sum paid to the discharged convict shall vary between \$5 and \$25, according to the circumstances. The amount in each case will be determined by the warden.

The "Eye-glass account" in connection with the eye, ear, nose, and throat clinic of Ancon Hospital has been abolished. Hereafter, patients requiring glasses will be given a prescription, which may be filled locally, or by mail order.

Following the withdrawal of most of the Canal employees, and their families, from the villages of Bas Obispo and Las Cascadas, and the destruction or removal of the native houses in the vicinity, the dispensaries at those points have been closed.

OFFICIAL CIRCULARS.

Vacation of Family Quarters After Termination of Service,

CULEBRA, C. Z., January 13, 1914.

CIRCULAR, No. 134-C:

Hereafter, employees whose service is terminated will be expected to vacate family quarters within 10 days after the termination of service.

GEO. W. GOETHALS,
Chairman and Chief Engineer.

Reimbursement for Meals Taken at Ancon.

CULEBRA, C. Z., January 13, 1914.

CIRCULAR No. 265-A:

On account of the establishment of an I. C. C. hotel at Ancon, no reimbursement in excess of 30 cents will be allowed for meals taken at Ancon or Panama, effective January 15, 1914.

GEO. W. GOETHALS,
Chairman and Chief Engineer.

Cash Deposit Required Prior to Performance of Work for Employees or Others, with Exceptions Noted.

CULEBRA, C. Z., December 31, 1913.

CIRCULAR No. 519:

1. Effective January 1, 1914, no manufacturing or repair job shall be undertaken or miscellaneous service rendered for employees or other private individuals or companies until a cash deposit has been made to cover the cost of such work or services, including the usual surcharges, with the following exceptions:

Bond acceptable as security for payment—

(a). Services for contractors with the Isthmian Canal Commission and Panama Railroad Company, or steamship companies and others in cases in which the payment for such services is secured by a bond in form and with sureties satisfactory to the Examiner of Accounts and sufficient in amount to cover all credit granted by the Commission and conditioned for the payment for material, supplies, equipment, and services furnished by the Commission within thirty days from the end of the month within which delivery of the material, supplies, and equipment is made or the services rendered.

Indebtedness to Commission or Panama railroad. Security for payment—

(b). Services rendered contractors with the Isthmian Canal Commission or the Panama Railroad Company, and steamship companies in cases in which the Isthmian Canal Commission or the Panama Railroad Company is indebted to such contractors or companies for material furnished or services rendered by them to the Commission or the railroad company in an amount equal to or in excess of the value of any material, supplies, and equipment sold or services rendered by the Commission to such contractors or steamship companies.

Hospital services—

(c). Necessary hospital, surgical, or medical treatment furnished on account of employees or furnished to others in emergency cases.

Quarantine services—

(d). Quarantine services, which, until otherwise provided, may be handled as at present.

Electric current—

(e). Electric current. A deposit to cover payment for same will be required under regulations to be hereafter prescribed.

Charges for boarding animals collected on pay roll month service rendered—

(f). Boarding animals in Commission corrals. This service shall be governed by the following rules:

Effective with the month of January, charges for boarding animals in the corrals will be deducted from employees' salaries for the month in which the service is rendered.

District quartermasters, immediately on the receipt of this circular and on the first day of each month thereafter, will forward to the Chief Quartermaster a certified statement, in triplicate, of employees having animals in the corrals, showing the privileges extended to each. One copy of each statement, after proper charges are inserted therein, will be forwarded to the Examiner of Accounts and the other copy to the Chief Timekeeper, who will deduct the amount certified on the pay rolls for the month in which the statement is received.

Whenever an animal is placed in the corral during any month immediate report thereof, in triplicate, shall be made to the Chief Quartermaster. Such reports shall be disposed of in the same manner as is provided for the monthly statements above. In addition, one copy shall be forwarded direct to the Examiner of Accounts.

Changes in corral privileges will only be made effective the first of each month. No reduction will be made in the monthly charge for corral services unless an employee is leaving the service and the animal is removed from the corral.

Rent of quarters to silver employees—

(g). Rent of quarters to silver employees. Rental shall be collected in advance by the district quar-

termaster and remitted to the Disbursing Officer. Cash abstract and other reports shall be submitted to the Examiner of Accounts as provided in Section 9. Special rules applicable to the rental of quarters will be issued hereafter.

METHOD BY WHICH SUFFICIENT SECURITY WILL BE MAINTAINED.

2. No work shall be undertaken until full and complete authority has been received. In the Quartermaster's Department, district quartermasters and storekeepers, and in the shops, the foreman and the costkeeping accountant, are charged with the duty of preventing the performance of any work for outside parties prior to the receipt of evidence in the prescribed form that payment for such work is adequately provided for. If in any case it is ascertained that the cost of the work will exceed the estimate, deposit, or other security, immediate steps must be taken to secure the deposit of an additional amount, additional authority for such additional work being required in the same form the first authority was issued. Reference on the second authority for work must be made to the first one issued and show that a deposit is required and made to continue the work.

PROCEDURE FOR SECURING PERFORMANCE OF WORK.

3. Requests for the performance of work shall be made and authority therefor shall be issued, as follows:

Chief Quartermaster will issue authority to district quartermasters—

(a). In the case of work to be performed by the Quartermaster's Department, request should be made upon the Chief Quartermaster, who, upon approval, will issue authority for the work to the proper district quartermaster.

Shop work restricted to dry dock, Empire and Balboa shops. Authority for work obtained from foreman of shop—

(b). The performance of work by shops of the Mechanical Division shall be restricted to the dry dock, Empire, and Balboa shops. Requests for the performance of work shall be made to the foreman of the shop at which the work is to be done, who will issue the order therefor after he has obtained general or specific authority to do the work contemplated.

Form of authority and amount of deposit—

(c). Authority for the performance of work shall be issued on consecutive numbered forms in such number of copies as may be necessary. Each authority shall specify the nature of the work, where and by whom it is to be done, the estimated cost, including the usual surcharge and the amount necessary to be deposited to insure payment, which amount shall exceed the estimate by about 10 per cent. The authority shall also designate the person with whom the deposit is to be made.

Disposition of copies of authority where deposit is made—

(d). Copies of each authority for work shall be disposed of, as follows: The original and first two copies will be sent to the person designated to receive the deposit, the quadruplicate to the party for whom the work is to be performed, with instructions to forward same to the designated receiving clerk with his deposit. Upon receipt of the deposit all copies will be receipted, the quadruplicate returned to the party for whom the work is to be done, the original forwarded to the district quartermaster or foreman, who is to perform the work, the duplicate to the Examiner of Accounts, the triplicate being retained in the files of the person receiving the deposit.

PROCEDURE NECESSARY TO SECURE PERFORMANCE OF WORK WHEN SPECIFIC DEPOSIT NOT MADE.

4. In case the work is to be performed without a special deposit under conditions specified in Section 1, paragraphs (a) or (b), four copies shall be forwarded to the Examiner of Accounts who, after determining that the security available is sufficient, will forward the original to the person who is to perform the work, the quadruplicate to the person for whom the work is to be done, returning the triplicate to the officer issuing the authority and fixing the estimate of cost.

PERSONS WITH WHOM DEPOSITS WILL BE MADE.

5. Deposits shall be made, as follows:

(a.) Deposits in excess of \$100 will be made direct with the Disbursing Officer.

(b.) In other cases the official granting authority for the performance of the work may designate the proper bonded district quartermaster, shop receiving clerk, or other receiving officer to accept the deposit.

RENDITION OF BILLS.

6. Bills shall be rendered in the required number as soon as the work is completed, one copy to be forwarded to the Chief Quartermaster, or to the Superintendent of the Mechanical Division, as the case may require, the original and remaining copies to the Examiner of Accounts. Bills shall show the total charges for labor and material, and the usual surcharges, with reference to the authority for the work by number and date.

REFUNDMENT OF BALANCES IN EXCESS OF AMOUNTS DEPOSITED.

7. Upon receipt of the bill any refund necessary to be made by the Disbursing Officer will be made upon the certificate of the Examiner of Accounts specifying

the amount to be refunded. In cases in which the amount to be refunded is less than \$10, and the district quartermaster or other receiving clerk has an amount on deposit sufficient to cover, he will make the refund, taking a receipt on the prescribed form.

DISPOSITION OF RECEIPTS BY RECEIVING CLERKS.

8. District quartermasters and other receiving clerks will remit the amount of bills for work completed at least once each week, and often when the amount equals \$50. The regular form of remittance letter shall be used for this purpose, reference thereon being given to the authorities for the work and the numbers of the bills rendered therefor. In all cases in which the amount on deposit to secure the payment for various jobs exceeds \$200, the district quartermaster or receiving clerk shall remit that amount to the Disbursing Officer to be carried as a special deposit.

REPORTS REQUIRED TO BE MADE BY RECEIVING CLERKS.

9. Each district quartermaster and receiving clerk will submit to the Examiner of Accounts on the first day of each month a cash abstract of the business transacted by him during the preceding month. The abstract will show the cash balance on hand at the beginning of the month, the amount received during the month, the remittances and refunds, and the balance on hand at the end of the month. If the details of the receipts and disbursements are not shown on the cash abstract, a detailed statement of same shall accompany the report. The abstract shall be accompanied by duplicates of all receipts issued by the receiving clerk and also by the original of all receipts taken by him for amounts refunded.

The receipts of the Disbursing Officer for amounts remitted to him should not accompany the abstract.

ABOVE REGULATIONS NOT APPLICABLE TO OTHER DEPARTMENTS OF THE UNITED STATES GOVERNMENT, CANAL ZONE GOVERNMENT, PANAMA RAILROAD, OR COMMISSION CLUBHOUSE.

10. The above regulations will not be applied to services performed for other departments of the United States Government, the Canal Zone Government, the Panama Railroad Company, or Commission clubhouses. Authority for the performance of work for such interests will be made upon work request, form C. E. 159.

EXAMINER OF ACCOUNTS TO PRESCRIBE FORMS.

11. The Examiner of Accounts shall prescribe all forms and may change the details of the procedure fixed herein, should circumstances require such action.

GEO. W. GOETHALS,
Chairman and Chief Engineer.

New General Accounts.

EMPIRE, C. Z., January 6, 1914.

CIRCULAR No. 52:

Effective July 1, 1913, the following new general accounts are authorized:

No. 3—STORES.

This account will be opened with a charge for the value of all material on hand July 1, 1913, as shown by the inventory of the Chief Quartermaster as of June 30, 1913. The account will thereafter be charged for the value of all material accepted by the Depot Quartermaster as shown by weekly abstracts of certified U. S. bills, with the amount of audited vouchers for purchases made by the Purchasing Officer on the Isthmus, with the value of manufactured articles taken into stock, material and supplies returned to stock, and with payments made for freight charges on account of transportation of material to the Isthmus.

The account will be credited for the value of all material issued from stock to divisions and departments and for the proceeds of sales.

The balance in this account will represent the value of material carried in stock by the Quartermaster's Department.

After the account has been subdivided and a separate account established for each warehouse of the Quartermaster's Department these accounts will be individually debited and credited for all receipts and issues of material and supplies.

No. 5—UNDELIVERED PLANT AND EQUIPMENT.

To this account will be charged partial payments made to manufacturing companies or other contractors engaged in furnishing plant or equipment, prior to final delivery including inspection and all other expenses entering into the final cost of such plant or equipment.

The account will receive credit when the plant or equipment is accepted and the cost is charged to the proper plant account, or otherwise disposed of.

The account will be maintained in such detail as will show at any time the amount of cumulative charges against each contract.

No. 23—VOUCHERS PAYABLE.

This account will be credited for the amount of all vouchers audited for payment on the Isthmus and charged for all payments made thereon by the Disbursing Officer.

No. 24—INVOICES PAYABLE.

This account will be credited for the value of all

material taken into account by the Depot Quartermaster after June 30, 1913, as shown by weekly abstracts of certified U. S. bills. The account will also be credited for the amount of invoices certified for service only, such as repairs to surgical and survey instruments, etc., on account of which charges are made against Chairman's Office, pending proper distribution.

The account will be charged for payments made by the Disbursing Officer at Washington, or by Treasury settlements.

The amount of difference between certified U. S. bills and the amount of payment thereon will be carried in suspense for future adjustment.

No. 25—DIVISION STORES.

The account will be opened with a charge for the value of unissued material in the hands of divisions and departments (other than Quartermaster's stock) on July 1, 1913. It will also be charged with the value of all material issued from Quartermaster's stock, commissary-subsistence supplies, rock, sand, gravel, and other material as a result of manufacturing operations, material transferred from other divisions, and for payments to contractors where the expenditures are carried currently to division expenditure accounts.

The account will be credited with material issued as reported on monthly statement of expenditures, Form 132 C. E., and with material transferred to other divisions and departments.

The account will be maintained in detail by sub-headings for each division and department as may be found necessary. The balance in of general account No. 5, "Material and Supplies, Subsistence Department," will be carried on this account.

H. A. A. SMITH,

Examiner of Accounts.

Approved:

Geo. W. GOETHALS,

Chairman and Chief Engineer.

Amendments to Rules for Government of Prisoners.

DEPARTMENT OF CIVIL ADMINISTRATION,

DIVISION OF POLICE AND PRISONS,

ANCON, C. Z., December 26, 1913.

The rules and regulations for the government of prisoners in the Canal Zone penitentiary are amended to read, as follows:

ARTICLE 30.

Punishments—

1. Reprimand.
2. Loss of tobacco privilege.
3. Loss of letter writing privilege.
4. Solitary confinement on diet of bread and water.
5. Solitary confinement on diet of bread and water and handcuffed to door.
6. Reduction in grade.
7. Loss of all, or part, of "Good time."
8. Wearing of ball and chain for such period as in the judgment of the warden, or deputy warden, may be desirable.

ARTICLE 34.

Prisoners assigned to outside work upon beginning their terms of imprisonment shall be clothed in stripes and shall be known as Grade A prisoners. When a prisoner of this grade has earned a total of 90 good conduct points, he shall be transferred to Grade B, or Grade E, as conditions may require.

ARTICLE 35.

Grade B prisoners shall be clothed in stripes, and shall be assigned to outside work. When any prisoner of this grade shall earn a total of 90 good conduct points in the grade, he shall be transferred to Grade C, or Grade E, as conditions may require.

GUY JOHANNES,

Acting Warden.

Approved:

RICHARD L. METCALFE,

Head of Department of

Civil Administration.

Approved: GEO. W. GOETHALS,

Chairman, Isthmian

Canal Commission.

Placing of Derrail in Service on Pacific Spur, Old Main Line P. R. R.

PANAMA RAILROAD COMPANY,

OFFICE OF GENERAL SUPERINTENDENT,

COLON, R. P., January 5, 1914.

G. S. BULLETIN No. 33:

All concerned—A derail, pipe connected to the switch stand, will be put in service at 12.01 p. m., on Tuesday, January 6, on the Pacific spur located three-fourths of a mile north of Bridge 57½ on the old main line.

F. MEARS,

General Superintendent.

Addition to P. R. R. Signal Service.

PANAMA RAILROAD COMPANY,

OFFICE OF GENERAL SUPERINTENDENT,

COLON, R. P., January 2, 1914.

G. S. BULLETIN No. 29:

All concerned—A southward automatic signal at the north end of Monte Lirio passing track will be added

to the present scheme of signalling and placed in service at 5 p. m. on Saturday, January 3, 1914. This signal will be numbered 1409.

F. MEARS,
General Superintendent.

Bas Obispo Block Signal.

PANAMA RAILROAD COMPANY,

OFFICE OF GENERAL SUPERINTENDENT,

COLON, R. P., January 7, 1914.

G. S. BULLETIN No. 35:

All concerned—As Bas Obispo is the initial point for all southward trains on the old main line, effective Friday, January 9, 1914, the arms and lamps will be removed from the block signal.

F. MEARS,

General Superintendent.

Closing of Doors on Block Telephone Boxes.

PANAMA RAILROAD COMPANY,

OFFICE OF GENERAL SUPERINTENDENT,

COLON, R. P., January 8, 1914.

G. S. BULLETIN No. 36:

All concerned—The doors on outside block telephone boxes are being left open by train crews. This practice must be discontinued at once.

F. MEARS,

General Superintendent.

Supplies for the Canal.

The following steamers, with supplies for the Isthmian Canal Commission and Panama Railroad Company, arrived at the ports of Balboa, Colon, and Cristobal, during the week ending January 10:

Allianca, January 5, from New York, with 26 cases incandescent lamps, 156 cases plumbing material, 418 packages conduit and fittings, 24 cases electrical machinery, 40 bundles spring plates, for Mechanical Division; 25 cases woodwork, 60 cases window glass, for Administration Building, Balboa; 356 packages roofing material, 367 packages electrical machinery, for First Division; 95 pieces steel plates, 334 bundles steel bars, 100 pieces angle steel, 15 cases tacks, 546 slabs spelter, 120 kegs nails, 100 kegs rivets, 53 boxes valves, 34 barrels pipe-fittings, for stock; and a miscellaneous cargo, the whole consisting of 3,249 packages, weighing 242 tons.

Heredia, January 5, from New Orleans, with 75 pieces of car castings, for Mechanical Division; 1,059 bales hay, 22 crates hammer handles, for stock.

American, January 5, from New York, with 19 barrels gasoline, for stock.

Astec, January 5, from San Francisco, with 58 bales rubber hose, for stock.

Carl Schurz, January 5, from New York, with 46 kegs bolts and nuts, for First Division; 250 pieces steel bars, for stock; eight barrels silica wash, Mechanical Division; 65 kegs bolts and nuts, 14 boxes zinc plates, for stock.

Portinglis, January 7, from Baltimore, with 11 boxes medical supplies, for Sanitary Department; 97 packages dredging machinery, for Sixth Division; 300 packages chain fender material, for First Division; 63 boxes window glass, 334 bundles brooms, 20 bales oakum, 15,111 pieces sewer pipe, 225 bundles brooms, 785 cases gasoline, 20 cases benzine, for stock.

Metapan, January 7, from New York, with 37 cases structural material; 186 crates insulators and parts, 60 barrels paint, 81 packages electrical material, 34 packages pipe-fittings, 23 boxes bolt and washers, for First Division; 175 pieces steel sheets, 53 barrels pitch, for stock.

Atenas, January 8, from New Orleans, with 212 pieces oak lumber, for Mechanical Division; 30 pieces oak lumber for Atlantic Division; four pieces castings, for Sixth Division; 80 pieces oak lumber for stock.

Fort Gaines, January 9, from Mobile, with 1,356 cases powder, for fortifications.

The following ships arrived at, or departed from, the port of Balboa, during the week ending January 10:

Arrivals—January 5, *Guatemala*, from Callao; January 7, *Quito*, from intermediate ports; January 7, *City of Sidney*, from San Francisco; January 10, *Harlesden*, from Puget Sound.

Departures—January 5, *Pachitea*, to Callao; *Polena*, to Valparaiso; January 9, *Peru*, to San Francisco; January 10, *Ecuador* to Guayaquil; *Rupanco*, to intermediate ports.

Lost—On New Year's Eve, a mate's license, and marine discharges, a \$15 hotel coupon book and a year's passes on the Panama railroad. The finder will be rewarded upon return of the above to Jack Swan, Building 68, Cristobal.

Lost—Gold medal attached to watch fob with the name "Thaddeus Smith" first prize, April, 1912, Gatun Y. M. C. A., engraved upon it. Reward for return to the Y. M. C. A., or to Mr. T. D. Smith, Corozal.

COMMISSION CLUBHOUSES.

Activities of the Young Men's Christian Association.

GENERAL.

The moving picture schedule for the week January 19 to 24 is, as follows: Monday, Culebra; Tuesday, Balboa; Wednesday, Empire; Thursday, Cristobal; Friday, Gatun; Saturday, Corozal.

COROZAL.

Among the high scores in duckpins so far this month, are the following: Hartshorne 103, Owens 100, Garrett 101, Regan 109, 106, 102, 101, Lenow 101, 100, Parkis 101, Edwards 105, 101, Beall 100, 106, Smith 117, 114, Davis 109.

The Cristobal boys visited the Corozal boys on Saturday, staying all day. The boys played baseball, ran relay races, bowled, played basketball, and swam in the Canal. Corozal won the relay race and bowling matches.

During the past week, several members of the artillery, encamped in Corozal, have joined the Y. M. C. A.

CULEBRA.

On Monday night, the "Blues" defeated the "Reds" in the local duckpin tournament by the score of 1,274 to 1,215. On Thursday night, the "Orange" team was defeated by the "Blacks" by the score of 1,258 to 1,214. On Friday night, the "Reds" defeated the "Orange" team by the score of 1,267 to 1,256.

High scores for the week in duckpins are, as follows: Worsley 104, Chaddborne 103, Schmeck 123, Brown 106, 105, Bechlem 103, 101, 106, 101, 102, 105, Hill 106, Palmer 106, Fitzpatrick 100, Kiernan 103, 111, 101, Davis 107, Case 120, 116, 104, 100, Barnes 111, E. Koperski 105, DeCora 105, A. R. Brown 103, Kronmiller 111, Cornthwaite 101.

On Monday night, January 19, the reel showing the world's series baseball games will be shown.

GATUN.

Interest is being shown in the study of Spanish. There are now five classes, which are taught by Madame de Hess of Colon. All classes meet on Tuesday and Thursday of each week. The schedule of hours is, as follows: Class No. 1, ladies' advanced, 4 p. m. to 5 p. m.; class No. 2, ladies' beginners, 5 p. m. to 6 p. m.; class No. 3, men's advanced, 6 p. m. to 6.45 p. m.; class No. 4, men's intermediate, 6.45 p. m. to 7.45 p. m.; class No. 5, men's beginners, 7.45 p. m. to 8.45 p. m. New students may enter at any time. The tuition fee is \$2 per month.

The Español Conversational Club was organized recently as an adjunct to the Spanish classes. Mr. Haber has loaned the club an I. C. S. phonograph, with a full set of Spanish language records. There is no charge for membership in the club; any Y. M. C. A. member may join. The club will meet about twice a week.

An athletic tournament is being organized for the members of the junior department. The contest will begin on January 19, and end about March 1. The boys will compete, as follows: Twenty-yard dash, 100-yard dash, one-half mile run, potato race, high jump, broad jump, shot put, pole vault, running high jump, running hop, step, and jump, pull-ups, push-ups, rope climbing, and goal throwing. Medals will be given as prizes. Any member of the junior department of the Y. M. C. A. may compete. Physical Director Kjellander will be in charge.

A first-aid-to-the-injured class was started on Saturday, January 10. At the end of the lessons the elementary examinations will be conducted and the successful students will be presented with certificates from the National Red Cross Society. A class for men will be organized if a sufficient number of men are interested. Mr. Kjellander, the physical director, is the teacher.

Swimming lessons will be given any member of the association who cares to learn.

A 2-man ragtime duckpin tournament was started on Saturday, January 10.

The Ernest Gamble concert company will appear at Gatun on Thursday, January 15.

CRISTOBAL.

Lieut.-Col. E. T. Wilson's address on "Tolls and traffic of the Panama Canal" proved of interest, and was attended by a large number of men. Colonel Wilson explained minutely the different kinds of tons; also, the different methods of measurements, and expressed the opinion that in the course of a few years the Canal will be self-supporting.

Prof. Gomez will start another beginners' class in Spanish on Thursday night, January 15. The class will meet each Tuesday and Thursday, from 8 to 9 o'clock. With the opening of this class, Mr. Gomez will have classes five nights in the week.

Mr. Thos. F. Cahill, president of the Bank of the Canal Zone, will address the discussion club on Thursday, January 22, on "The new currency law."

The Gamble concert party, will be at Cristobal on Friday night, January 16.

COMMISSARY DEPARTMENT.

The commissary stores are open during the following hours:

Cristobal, 8 a. m. to 12.30 p. m., and 2 to 7 p. m.
 Balboa, 8 a. m. to 12.30 p. m., and 2.30 to 7 p. m.
 Ancon, 8 a. m. to 1 p. m., and 3 to 6 p. m.
 All others, 8 a. m. to 1 p. m., and 3 to 7 p. m.

Retail prices of cold storage provisions for the week beginning January 11, 1914:

FRESH MEATS.	Price.
Mutton—Stewing, per pound.	7
Shoulder, neck trimmed off (4 pounds and over), per pound.	9
Entire forequarter (not trimmed, 10 pounds and over), per pound.	8
Legs (8 to 10 pounds), per pound.	17
Cutlets, per pound.	18
Short cut chops, per pound.	20
Lamb—Stewing, per pound.	8
Entire forequarter, neck trimmed off, per pound.	10
Legs (5 to 8 pounds), per pound.	20
Chops, per pound.	24
Cutlets, per pound.	24
Veal—Stewing, per pound.	10
Shoulder, for roasting (not under 4 pounds), per pound.	13
Chops, shoulder, per pound.	17
Chops, per pound.	26
Loin, for roasting, per pound.	26
Cutlets, per pound.	30
Beef—Suet, per pound.	2
Soup, per pound.	5
Stew, per pound.	8
Plate, per pound.	9
Corned, No. 1, per pound.	14
Corned, No. 2, per pound.	12
Chuck roast, 3 lbs., and over, per pound.	12
Rib roast, second cut (not under 3½ pounds), per pound.	16
Rib roast, first cut (not under 3 pounds), per pound.	18
Pot roast, per pound.	19
Rump roast, per pound.	19
Porterhouse roast, per pound.	20
Steak, Chuck, per pound.	12½
Round, per pound.	13
Rib, per pound.	18
Sirloin, per pound.	19
Rump, per pound.	19
Porterhouse (not less than 1½ pounds), per pound.	20
Tenderloin (Western), per pound.	30
Pork—Hams, fresh, per pound.	\$20
Loin chops or roast, per pound.	19
Shoulders, fresh, per pound.	\$17
Spare ribs, per pound.	15
Backbones, per pound.	15
Pigs' feet, each.	7
Pigs' heads, whole.	60
Pigs' heads, ½-head.	30
Sausage, homemade, per pound.	20
MISCELLANEOUS.	
Livers—Beef, per pound.	11
Calf, each.	60
Half, each.	30
Steak, Hamburger, package.	13
Sausage—Bologna, per pound.	13
Frankfurter, per pound.	13
Lieberwurst, per pound.	13
Devonshire Farm, per pound.	20
Sweetbread, beef, per pound.	*27
Eggs, fresh, per dozen.	*40
per ½-dozen.	*20
Bluefish, per pound.	11
Halibut, fresh, per pound.	12
Salmon, per pound.	12
Roe shad, each.	75
Shad roes, per pair.	40
Oysters, per quart.	28
per gallon.	1 52
POULTRY AND GAME.	
Chickens—Fancy roasting, milk fed, large, each.	1.40
Fancy roasting, milk fed, med., each.	1.10
Fancy roasting, corn fed, about 5½ pounds, each.	1.25
Fancy roasting, corn fed, about 4½ pounds, each.	1.00
Fowls, each.	††60, 70, 80, 90, and 1.00
Ducks, Western (about 4½ pounds), each.	1.25
Capons, about 8½ pounds, each.	3.00
Broilers, milk fed, each.	70
Broilers, corn fed, each.	60
Turkeys, per pound.	25
Squabs, each.	50
Rabbits, skinned and unskinned, each.	30
Partridges, per pair.	1.30
Grouse, per pair.	1.30
Pheasants, per pair.	1.30
CURED AND PICKLED MEATS.	
Ham—Real York and Cumberland, per pound.	37
Genuine Westphalia, per pound.	40
Sugar cured, per pound.	20
Sliced, per pound.	22
Half, (for boiling), per pound.	21
Boiled, per pound.	28
Hocks, per pound.	18
Beef, salt, family, per pound.	12
Bacon—Breakfast, whole piece, per pound.	25
Sliced, per pound.	26
Ham, lunch, per pound.	32
Pork, salt, family, per pound.	14
Ox tongues, each.	1.00
Pigs' feet, per pound.	7
Tongues, per pound.	18

DAIRY PRODUCTS.

	Price.
Butter—Creamery special, per pound.	40
Sheffield Farms, extra fancy, per lb.	46
Cheese—Philadelphia cream, cake.	10
Rougefort, per pound.	35
Young America, per pound.	22
Swiss, per pound.	28
Edam, each.	75
Edam, tin.	25
Parmesan, per pound.	35
Gouda, per pound.	30
Snappy, per cake.	10
Milk (certified), per bottle.	**20
Fer-mil-lac, per bottle.	**20
Ice cream, quart.	125
½-gallon.	150
Cream (certified), per pint.	45

VEGETABLES AND FRUITS.

	Price.

Grapes, Malaga and Tokay, per pound.	4
Cranberries, per pound.	*18
Grape fruit, American, each.	80
tropical, each.	7
Lemons, per dozen.	3
Limes, per hundred.	12
Pears, per pound.	2
Papayas, per pound.	3
Oranges, Jamaican, per dozen.	12
Tangerines, each.	2

*Indicates reduction from last list.

**Indicates 5 cents allowed for return of bottle.

†Indicates advance on last list.

††Fowls weight each, about, as follows: 3, 3½, 4, 4½, and 5 pounds. Prices are based accordingly; when size ordered is not in stock, next lightest weight is supplied and refund note sent for difference.

‡Sold only from commissaries; no orders taken for delivery.

§Not less than half of a fresh ham or shoulder will be sold.

Family Quarters.

Applications for married quarters on file on December 31, were, as follows:

DISTRICT.	List No. 1.	List No. 2.
Ancon.	31 (26)	130 (50)
Ancon Hospital.		6 (1)
Balboa.	10 (9)	67 (21)
Corozal.	12 (9)	149 (54)
Cristobal.		97 (12)
Culebra.	3	52 (12)
Empire.	4 (1)	66 (11)
Gatun.		71 (6)
Paraiso.		90 (21)
Porto Bello.	2 (2)	9 (7)
Toro Point.		3 (3)
Total.	62 (47)	740 (198)

NOTE—The figures in parentheses show the number of applicants already occupying regular or nonhouse-keeping family quarters at stations other than those at which applications are filed.

Misdirected Letters.

ANCON, C. Z., January 14, 1914.

The following insufficiently addressed letters, originating in the United States and its possessions, have been received in the office of the Director of Posts, and may be secured upon request of the addressee:

Clark, Frank L.	Lohmann, Mr. and Mrs. C.
Creager, Gay H.	Rose, Win. H.
Dominquez, J. R.	Schroter, Mrs. Lucy Douglas
Fabregas, José Rafael	Seahouse, Joseph (parcel)
Hull, Corina (pkg.)	Stout, Arthur G.
Hutchinson, Mrs. K. E.	Townley, Carrie L. (pkg.)
Jack, Thos. H. (parcel)	

LOST—Small black cloth bound book left on street car in Panama, morning of January 9. Finder requested to return article to office of THE CANAL RECORD.

Reward.

LOST—Ladies' black bathing suit, red collar, in Indian fibre bag, at Bella Vista pavilion on Sunday, January 11. Finder please communicate with office of THE CANAL RECORD.

Panama Railroad Company's steamers sail from Pier 11, Cristobal, at 3 p. m.

Royal Mail steamers leave for New York on alternate Tuesdays at 2 p. m.; for Southampton, on alternate Tuesdays at 10 a. m.

United Fruit Company's ships for New Orleans direct, leave on Thursdays and Saturdays at 3 p. m.; ships for New York via Kingston, on Thursdays at 2 p. m.; for New York, via Limon and Havana, on Sundays at 5 p. m.; for Limon and Bocas del Toro, on Tuesdays at 3 p. m.; and for Bocas del Toro direct, on Mondays at 5 p. m.

Hamburg-American steamers sail for New York, via Kingston, Santiago de Cuba, and Fortune Island, on Tuesdays, the *Prinz August Wilhelm* and the *Prinz Joachim* at 10 a. m.; the *Carl Schurz* and the *Emil L. Boas* at 2 p. m.

CANAL

RECORD

Volume VII.

ANCON, CANAL ZONE, WEDNESDAY, JANUARY 21, 1914.

No. 22.

The Canal Record

Published weekly under the authority and supervision of the Isthmian Canal Commission.

The Canal Record is published free of charge, one copy each to all employees of the Commission and Panama Railroad Company whose names are on the gold roll. Extra copies and back numbers can be obtained from the news stands of the Panama Railroad Company for five cents each.

Address all Communications,
THE CANAL RECORD,
Ancon, Canal Zone,
Isthmus of Panama.

No communication either for publication or requesting information, will receive attention unless signed with the full name and address of the writer.

NOTES OF PROGRESS.

Transfer of Vessels in Dredging Service.

The seagoing suction dredge *Culebra*, launch *Sanidad*, and claret No. 9, were transferred from the Pacific entrance to Culebra Cut during the forenoon of Tuesday, January 20. On the same date, the launch *Louise* was transferred from the Cut to the Pacific entrance for general service in Balboa harbor, and in carrying supplies to the Hotel Aspinwall on Taboga Island. The *Sanidad* is to be used as a supply boat for the dredging vessels in Culebra Cut and Gatun Lake. The *Culebra* is at present excavating near Gamboa in the removal of gravel washed into the channel by the Rio Chagres.

The transfer of the *Culebra* to Gatun Lake leaves only the pipeline dredge No. 85, the drill barge *Teredo*, and the rock breaker *Vulcan* in excavation work in the Pacific entrance and harbor. The French ladder dredge *Gopher* is dredging sand at Punta Chame; the barges in this service are towed by the tug *Chame*. The tug *Bolivar* is engaged in general work around the Pacific entrance.

Alignment of Tracks Through Central Division Dumping Area.

The track of the relocated line of the Panama railroad is now being reestablished on its original alignment between Caimito and Gamboa. When this line was first built through this section it was projected for fast single track service, and track and roadbed were constructed accordingly. The Central Division found it necessary to double track this section of the line in order to successfully operate the Lidgerwood trains between Culebra Cut and the spoil dumps. This was done by lining over the single track to be used as a northbound main and building a new track for the south main. In the development of the various dumps, numerous spur tracks and yard tracks were installed. When the relocated line between Gatun and Tower R was opened for traffic on February 15, 1912, it was found that the numerous switches

in this section interfered with fast service, but as it was necessary to leave them in, trains were operated under a slow order of 20 miles an hour, pending completion of the dry excavation in the Cut. The use of this section for dumping purposes was discontinued between October and December of 1913, and at the beginning of the dry season, forces of the Panama Railroad Company were put in the field to reestablish the track. A few switches will be left to give access to the sidings on which rolling stock is stored, but the line will be placed on permanent center, raised to final grade, fitted with 90-pound rails, and heavily ballasted for fast service.

Taboga Sanitarium Becomes "Hotel Aspinwall."

Beginning January 16, the Subsistence Department assumed charge and operation of the former sanitarium on Taboga Island, and is now conducting it as a public hotel under the name of "Hotel Aspinwall." The rates and rules of the hotel are published among the official circulars in this issue.

Dredging in Culebra Cut.

The ladder dredges *Badger* and *Marmot* have been transferred from Cucaracha slide to the channel north of it and are engaged, with the ladder dredges *Coronal* and No. 5, along the section between Gold Hill and a point south of the Empire suspension bridge. This transfer is due to recent movements of the east Culebra slide and the fact that the dipper and pipeline suction dredges are making good progress at Cucaracha slide.

The dipper dredges *Cardenas*, *Chagres*, and *Mindil* are removing the heavy rock along the north side and center of the slide and the pipeline suction dredges No. 86 and No. 4 are excavating clay and loose rock at the south side. In order to expedite their work, by sluicing to them the clay and loose stone from higher levels while leaving the heavy rock for ladder and dipper dredges, pipeline suction dredge No. 82 has been transferred from Gamboa to a point near No. 86, and is pumping water up to a monitor installed about 15 feet above the water level, near the south side of the slide.

The suction dredges take out rock as large as 10 inches in diameter, a considerable part of which is too heavy to be lifted through the relay station to the course of the Rio Grande, selected originally as their dumping ground; accordingly a "Y" line has been connected to the discharge pipe beyond the relay station and when the heavy rocks are encountered they are switched through the branch and discharged on the slope of the east bank, above the 95-foot berm. As a good deal of clay goes with the rock, a retaining dike of timber is being built along the east bank, above the berm, between station No. 1853 and station No. 1860 plus 50 feet, on the north side of a slight knoll, and provided with a discharge

outlet south of the knoll, at station No. 1863.

When the suction dredges are handling clay and light stone, the discharge is made in the watercourse of the Rio Grande and carried away by the natural fall of the stream. The waters of the Rio Grande have been diverted into the Canal above the point at which the discharge pipes enter the valley, in order to eliminate their interference with the handling of the pipelines. The Rio Grande is a tributary of Miraflores Lake, but the washing of sediment into the Canal channel in the lake is prevented by the damming of the Rio Grande west of Pedro Miguel Lock. This has formed a lake in which all sediment settles before the water is released into Miraflores Lake. The dike across the Rio Grande was built about two years ago for the Sanitary Department, in order to flood a swamp west of the lock and facilitate the work of preventing mosquito breeding. At that time the water was raised to elevation 40 feet above sealevel; the dike has been raised and strengthened recently to make the water level about five feet above the normal surface of Miraflores Lake and afford a larger basin for the disposal of spoil.

Departure of the Marine Corps.

The battalion of the United States Marine Corps stationed at Camp Elliott, Bas Obispo, and designated as the "Panama Battalion," sailed from Colon for Vera Cruz, Mexico, on Wednesday, January 21, on the United States battleship *Minnesota*, sent down from Mexican waters for its transport. The battalion on embarking consisted of 12 officers and 375 enlisted men. The officers are Maj. Smedley D. Butler, commanding; Capt. J. C. Beaumont, Past Assistant Surgeon B. H. Dorsey, U. S. N., Captains E. P. Fortson and J. F. Dyer; Lieutenants H. W. Stone, E. A. Ostermann, C. L. Gawne, J. C. Smith, C. C. Riner, A. A. Vandegrift, and A. J. White. Capt. Russell H. Davis, post quartermaster, will remain behind temporarily with 27 enlisted men for the purpose of packing materials and closing the camp. The buildings in Camp Elliott, numbering now about 45, will be turned over to the Isthmian Canal Commission. On account of the assembling on the Isthmus of forces of the Army and Navy it is anticipated that the services of the Marine Corps will not be required hereafter for the protection of the Canal, and the Canal Zone will not be a Marine Corps station. The project for the erection of permanent barracks for it, at a cost of \$400,000, for which an appropriation was approved on March 4, 1913, has been abandoned.

With the departure of this battalion, the Marine Corps terminates services on the Isthmus which have been continuous since the insurrectionary period preceding the revolution of 1903, and the independence of Panama. In 1903, a detachment was detailed to keep the Panama railroad open to transit and pro-

tect its property. There were then 1,400 men of the command on the Isthmus, in charge of Brigadier General Elliott, for whom the camp at Bas Obispo was named. The present camp was occupied early in 1905, the forces having been previously stationed at Mount Hope, Diablo, and Empire. Though mobilized several times on occasions of threatened disorders in Panama, they have seen no active service on the Isthmus; several expeditions were sent to points in Central America, in which the forces were actively engaged and suffered casualties.

Sightseeing Barge in Gatun Lake.

The sightseeing barge of the Panama Railroad Company, in tow of the tug *Cocoli*, was locked through at Gatun on Sunday morning, January 18, and was then moored at the landing for small lake craft near the railroad station. It carried as passengers Lieut. Frederick Mears and party. After the lockage the *Cocoli*, with a party of Panama railroad employes, and others, continued on through the lake and cut sections to Paraiso.

The tug *La Boca* was passed from the lake to the Atlantic channel, for repairs at the Cristobal dry dock, immediately after the lockage of the sightseeing barge.

Labor Trains to Be Discontinued North of Empire.

Effective Monday, January 26, I. C. C. labor trains will not be operated north of Empire.

Canal Excavation in December.

The grand total of Canal excavation to January 1, 1914, was 215,458,272 cubic yards, leaving 16,894,728 cubic yards remaining to be excavated under the revised estimate of July 1, 1913.

The total excavation for the month of December was 1,581,726 cubic yards. The wet excavation amounted to 1,274,683 cubic yards, and the dry excavation to 307,043 cubic yards.

In the Atlantic section, the total excavation for December was 300,554 cubic yards. Of this amount, all but 2,168 cubic yards was wet excavation, consisting of 221,474 cubic yards dredged from the Atlantic entrance, 50,256 cubic yards dredged from the permanent coaling basin, and 26,656 cubic yards charged to "Plant" excavation, 14,318 cubic yards of which were removed from the harbor at Coco Solo Point, and the remainder from the slip and approach to the Cristobal coal dock.

The total excavation in the territory of the old Central Division aggregated 860,429 cubic yards. Of this amount, 161,000 cubic yards were removed by Fourth Division steamshovels to relieve the pressure on the banks of Culebra Cut in the zone of slides; 140,622 cubic yards were removed by suction dredge in the Chagres River section; 417,807 cubic yards were taken out by dredges working on slide material, and 141,000 cubic yards were handled by the Gold Hill sluicing plant.

In the territory of the old Pacific Division, operations by Sixth Division dredges resulted in the removal of 144,601 cubic yards from the Canal prism. 37,676 cubic yards from the channel in Miraflores Lake, and 94,591 cubic yards from the terminal basin, and berths at the Panama railroad wharf. Steamshovels dug 25,900 cubic yards at Miraflores spillway, 4,520 cubic yards from the channel below the spillway, and 112,620 cubic yards from the site of the dry dock. In addition, the shovels took out 829 cubic yards, charged

to "Plant" excavation, from the coal pocket incline, coal pocket tracks, and dry dock ditches.

A detailed statement of excavation, and a summary of the work on the locks and dams, follow:

Mean rainfall along Canal (nine stations), 3.57 inches.

By "Work" excavation is meant excavation actually made for one of the constituent parts of the Canal, such as prism, diversions, or locks, etc., that is, it represents material taken from the area to be occupied by the Canal and constitutes excavation useful for the completed Canal.

By "Plant" excavation is meant excavation outside any of the constituent parts of the Canal, such as prism, diversions, or locks, etc. It includes material necessary to be excavated for construction purposes only, and is chargeable against the particular plant item for which it is performed, such as prism, diversions, locks, etc.

Upon the request of the commanding officer at Camp Otis, the material in the old Gorgona hotel has been transferred to the Tenth Infantry, and will be used in the erection of a recreation hall and gymnasium along the general lines of the Commission clubhouses. It is probable that the building containing

the post exchange will be enlarged for the purpose.

Messrs. C. W. Fisher, A. O. Herman, and M. L. Padgett have been appointed a committee to work out the details of a system for keeping the cost of work done in the car shop at Balboa, under the permanent organization.

The Panama Government has been granted the privilege of operating a F. I. A. T. automobile, model AKG, engine No. 30316, owned by it, and used by the President, over the streets and roads of the Canal Zone without the payment of the customary license tax.

PERSONAL.

Lieut.-Col. William V. Judson will sail for New York on the *Ancon* on Friday, January 23, on his annual leave of absence.

Coating Gas Buoys.

The Canal Commission has contracted with the American Bitumastic Enamels Company for the coating of 40 gas buoys with bitumastic solution and bitumastic enamel, at \$25 each. The surface to be covered on each buoy amounts to about 271.2 square feet. There are 43 of these buoys in Gatun Lake, and the three not included in the above contract have been, or will be, covered with other paints and coatings for experimental purposes. The Binswinger moisture-proof paint has been applied to one of these; also to two buoys stationed in the Pacific entrance. The action of the water in Gatun Lake on the different kinds of coatings will be carefully observed with a view of determining the most lasting material.

Removal of Offices.

The offices of the chief quarantine officer, Panama health office, and office for the collection of water rents, formerly located in the old administration building fronting the Plaza de la Independencia in Panama, were moved on Monday, January 19 to a one-story building in the Panama railroad yard just north of the freight house. The building was formerly used by the railroad company as a carpenter shop, and was remodeled to serve its new requirements.

Visit of the "Minnesota."

The United States battleship *Minnesota* arrived at Colon on Saturday, January 17, from Philadelphia, via Vera Cruz, Mexico. The sailors were given shore leave and on Sunday, were taken to Gatun, thence to Culebra Cut on a special train. The vessel sailed for Vera Cruz, with the local battalion of the United States Marine Corps, on Wednesday, January 21.

Missing Men.

Any one having knowledge of the present whereabouts of Richard W. Jones of Syracuse, Kansas, formerly employed as a boilermaker in the Mechanical Division, is requested to communicate with the office of the Chairman, Culebra.

Any one having information regarding the whereabouts of Mr. William Booth Carlyle, or Carlie, of Pulaski City, Virginia, is requested to communicate with the American Legation, Panama.

Any one having information regarding the present whereabouts of William H. Harrington, who was last heard from at Ancon on December 29, 1913, is requested to communicate with THE CANAL RECORD.

SOCIAL LIFE OF THE ZONE.

Woman's Clubs.

At the meeting of the Ancon Study Club on Thursday afternoon, January 15, the program of study decided upon for the next six months was the history of England and English literature. There will be provision for one original paper each month by a club member. It is proposed to present a more varied program for the term. Speakers from the outside will be invited from time to time and discussions of current events will be held. Plans are under way for library extension work among the young girls of Ancon and these will be announced as soon as they are perfected. The new course of study will be begun at the meeting on January 22, with Mrs. Morley as leader.

Church Notes.

The executive committee of the Panama federation of societies of women for Christian work met at St. Luke's Hospital chapel, Ancon, on Wednesday afternoon, January 14, Mrs. Stokoe, provisional chairman, presiding. The following representatives of Canal Zone societies were present: Mrs. E. H. Westerdorf of the ladies' aid society of the Union Church, Cristobal; Mrs. H. A. A. Smith of the ladies' auxiliary to the Empire Christian League; Miss Kate Feuille of the woman's altar guild, St. Luke's Church, Ancon, and Mrs. Stokoe of the Woman's Foreign Missionary Society of the Methodist Episcopal Church, Panama. The board accepted an invitation of the ladies' auxiliary of Empire to hold the first general convention in Empire, and arrangements for that meeting were made, as follows: The date fixed upon was Friday, March 6. The meeting will be held in the Commission chapel. Luncheon will be served to the visiting societies on arrival of the train at 12.50 p. m., and the program will begin as soon thereafter as possible. The program will consist of reports from the societies, two addresses, and music. The general topic for the afternoon will be mission work.

Mr. Earl Taylor, senior corresponding secretary of the board of foreign missions of the Methodist Episcopal Church, was a visitor to the Isthmus last week in connection with his tour around the world, inspecting evangelistic work in all countries. Mr. Taylor is accompanied by his wife and son. They arrived from New York on the steamer *Danube* on Sunday, January 11, and left on Monday, January 19, on the *Aysen* of the Chilean Line, for Callao. They will go from Callao to Argentina and Brazil, thence to northern Africa and through the countries of Europe. Mr. Taylor has obtained some unique photographs of the Canal, and of the flora and fauna of the Isthmus. He delivered a lecture on his travels at the seawall church in Panama on Saturday evening, January 17, illustrating his talk with photographs taken by himself on a similar trip in 1909, and preached in the same church on Sunday morning.

The Methodist evangelist, Mr. James Taylor, is also a visitor to the Isthmus and is holding meetings in the seawall church and in the newly opened church for negroes in Guachapali.

The evening service at the Union Church, Cristobal, on Sunday, January 18, was conducted by Col. Charles Rothwell, chief officer of the Salvation Army in the West

Indies and the Republic of Panama, who is here on an inspection tour of the divisional work in Panama and the neighboring islands.

The newly organized Catholic Club of St. Mary's, Star of the Sea, Balboa, held its first public entertainment in the National Theatre, Panama, on Saturday evening, January 17. The theatre was well filled, and many Americans from the line were present. In addition to the regular program, Father McDonald, priest in charge of the parish of Balboa, delivered an informal address. The receipts, amounting to about \$700, will be used for the benefit of the church.

Banquet of the Society of the Chagres.

The third annual banquet of the Society of the Chagres was held at the Hotel Washington, Colon, on Saturday evening, January 17. Three hundred and fifty Canal men sat down to dinner in the temporarily arranged dining room on the roof at the north end of the hotel. A projecting wall of canvas, 10 feet high, was erected, and the space within the enclosure was decorated with palms and tropical plants and lighted by colored electric lights arranged in garlands. Lieut.-Col. William L. Sibert, Engineer Corps, U. S. A., 1907, was toastmaster. Speeches were made by Edward Schildhauer, electrical department, 1906, F. G. Swanson, Mechanical Division, 1905, Thomas E. Brown, Jr., judiciary, 1907, and William F. Morrison, Mechanical Division, 1906. A vaudeville program was given during the progress of the dinner in which Messrs. Emery, Pearsall, Shuber, Downe, and Britt took part. Music was furnished by the Tenth Infantry band of 24 pieces, with Chas. Coe as leader.

The banquet committee consisted of W. F. Shipley, chairman; D. W. MacCormack, seating arrangements; Mr. S. M. White, lighting and decorations; Mr. E. A. Keeling, entertainment, Mr. J. J. Jackson, printing; Mr. L. E. Willson and Mr. F. G. Swanson. Mr. White was assisted in his work by Messrs. F. J. Jury and P. W. Reese. The chairman of the banquet committee desires to express his thanks to the above persons for their assistance and cooperation.

The menu printed by the I. C. C. Press at Mount Hope was neatly executed and received favorable mention. The year book for 1913, published by Mr. John O. Collins, under the supervision of Messrs. W. F. Shipley, R. H. Wardlaw, and G. D. Bliss, was distributed at the dinner. It was a departure from the previous year books, containing many interesting and amusing articles. Members who did not attend the banquet will receive their copies in a few days.

The present officers of the society of 6-year Canal employees are: President, Capt. R. E. Wood, U. S. A., 1905; vice-president, A. B. Herrick, 1904; secretary, W. F. Shipley, 1905. The executive committee is composed of John Burke, 1905; C. A. McIlvaine, 1905; A. S. Zinn, 1906, and Roy F. Watson, 1907. While this is probably the last banquet of the society of similar size that will be held on the Isthmus, calls will be issued for annual reunions and the year book will continue to be published.

Election of Officers.

The following officers were elected at the December meeting of Orchid Chapter, No. 1, Order of the Eastern Star; Worthy matron, Minnie H. Kosier; worthy patron, David

R. Wolverton; assistant matron, Marion Stanner; secretary, Katherine R. Casey; treasurer, Columbia Reimann; conductress, Anna Lucchesi, assistant conductress, Lydia Whitaker; chaplain, Annie L. Calvit; organist, Grace Dowell; Adah, Dora Westerdorf; Ruth, Nina Brown; Esther, Lucy von Pflug; Martha, May Jordan; Electa, Adeline Sweet; warder, Cecil Lowe; sentinel, William Jordan.

Colonel Gorgas Nominated for Surgeon General.

Col. William C. Gorgas, Chief Sanitary Officer of the Canal Zone, has been nominated by President Wilson to be Surgeon General of the United States Army Medical Corps, with the rank of brigadier general, to succeed the late Gen. George H. Torney. Col. Gorgas left the Isthmus for Johannesburg, South Africa, on October 13, on special leave of absence. He has just been granted additional leave of 30 days, which advances the date of his return to about April 15.

Isthmian Tennis Association.

At the meeting of the Isthmian Tennis Association held at Gatun, January 11, officers were elected for the season of 1914, as follows: President, board of governors, George R. Goethals; members of board of governors, B. C. Poole, R. W. Runyan, F. E. Pearman; secretary and treasurer, E. F. Ohlson.

The schedule of tournaments for the 1914 season is, as follows:

Place.	Date	Play.
Gatun.....	January 11.....	Doubles.
Empire.....	January 18.....	Singles.
Culebra.....	February 8.....	Doubles.
Ancon.....	February 22-23.	All comers, singles.
Gatun.....	March 8.....	Singles.
Empire.....	March 22.....	Doubles.
Ancon.....	April 10-12.....	All comers, doubles.
Culebra.....	May 3.....	Singles.
Gatun.....	May 17.....	Doubles.
Ancon.....	May 30-31.....	Free for all, singles.
Empire-Culebra	June 7.....	Singles.

The results of the first tournament, held on January 11, appeared in THE CANAL RECORD of January 14.

Knights of Columbus Dance.

The first annual joint ball of Panama and Cristobal councils, Knights of Columbus, will be held in the Hotel Washington, Colon, on Saturday evening, January 24. A special train for the accommodation of guests from the line will leave immediately after the dance.

The regular meeting of both councils will occur on Sunday, January 25.

Obituary.

William Simpson, a member of the United States Marine Corps formerly stationed at Camp Elliott, received fatal injuries in a railroad accident which occurred between Empire and Culebra on Friday, January 9. He was standing on the footboard of engine No. 271, when it collided with engine No. 403, coming from the opposite direction. Owing to the fact that it was raining at the time, it is thought he did not notice the approach of engine No. 403 in time to save himself by jumping, as did three negro employees, also standing on the footboard. He was unmarried and had been on the Isthmus 19 months. His mother, Mrs. Margaret Simpson, lives at Glenshaw, Pa.

Married.

MULLER-EYRING—In Christ Church, Colon, on December 24, 1913, Margaret T. Eyring of Brooklyn, N. Y., to Jack A. Muller of Corozal, C. Z., the Rev. E. J. Cooper, officiating. Canal Zone residence, Corozal.

FIRE SERVICE AT NEW PIERS.

Protective Measures at Cristobal Include Installation of Additional Water Mains and Laterals.

A committee, consisting of Messrs. George M. Wells, Charles E. Weidman, J. D. Tysinger, and O. G. Tubby, appointed to consider protective measures to be taken against fires at the new Cristobal piers, has submitted its recommendations, and the same have been approved, as follows:

1. The existing 8-inch main from the head of Pier 8 to the present 10-inch main will be replaced by a 10-inch cast iron pipe line.

2. An additional 8-inch main, using the 8-inch pipe above referred to, will be laid along the bay side of Roosevelt avenue, from Eleventh and Front streets, and connected with the proposed 10-inch main at the head of Pier 9.

3. A 10-inch branch main will be laid into Pier 9 from the intersection of the 8 and 10-inch mains, for a distance of about 250 feet. At Pier 9, this main will be reduced to six inches, and will supply a 6-inch galvanized iron main-laid the length of the pier. From this line, five 4-inch galvanized iron laterals will branch off, at intervals of about 200 feet, along the face of the pier to points directly below and inside the main building wall. At these points, 4-inch standpipes, each provided with 2½-inch standard fire hose connections, will be installed, extending about four feet above the floor of the pier. The existing 4-inch service line, with its 2½-inch metered laterals, will be retained, but it will be cross-connected with the new 6-inch fire main near the center of the pier.

4. For Pier 8, the new 10-inch main will be connected with the existing 6-inch main the entire length of the pier on the south side of the depressed track. A new 6-inch main will be laid along the north side of this track, connected into the first 6-inch main at the extreme outer end of the pier. At the head of the pier, this new line will connect with the new 10-inch main, which will be cross-connected with the two 6-inch lines at intervals of about 200 feet. From the 6-inch line on the south side of the track, five 4-inch laterals, provided with standpipes, will branch off, and from the one on the north side of the track, there will be four 4-inch laterals, also with standpipes. The standpipes will each be equipped with 2½-inch fire hose connections as in the case of Pier 9. From the standpipes on Pier 8, 2½-inch water service lines, ending in 2½-inch hose connections, will be run to the extreme face of the pier. On each of these lines there will be installed a 2-inch water meter, so located as to be conveniently read from the floor of the pier.

5. The new 6-inch main for Pier 9 will be extended along Dock 10 to a point approximately opposite house No. 220, and there

connected with the present Cristobal water system. Two 4-inch laterals will lead off from this 6-inch main extension, which will be equipped with 2½-inch metered branches for combined fire and water service.

6. A new 10-inch Venturi meter, with a maximum recording capacity of 2,200 gallons a minute, will be installed at Eleventh and Front streets.

7. The necessary shelving will be installed and five 50-foot lengths of standard fire hose will be placed on same, on the inside face of the building walls of the piers directly above each 4-inch standpipe.

The estimated cost of the work follows:

Complete installation on Piers 9 and 10, exclusive of the 10-inch main branch.....	\$3,385.00
Complete installation on Pier 8.....	3,725.00
Laying new 10-inch main, and taking up and relaying present 8-inch main, and making necessary connections.....	2,300.00
Installation of new 10-inch meter, and removal of old one.....	950.00
Total.....	\$10,360.00

The construction of Pier 7, recently decided on, will necessitate the laying of a 12-inch main in place of the proposed 10-inch main, which, it is estimated, will cost the additional sum of \$240.

All of the above work lying within the limits of the piers will be done by forces of the Panama railroad; all work between Eleventh and Front streets, and the heads of the piers, will be done by forces of the Division of Municipal Engineering.

Committee on La Boca Townsite Work.

Col. J. L. Phillips, Capt. R. E. Wood, George M. Wells, and W. L. Phillips have been appointed a committee to consider the completion of the new permanent silver camp at La Boca. It is expected that all work at this point will be advanced as much as possible during the present dry season, and the committee will, therefore, give consideration to the final grading underneath the houses, as well as in the vicinity thereof, the location of future buildings, the construction of suitable footpaths or walks connecting the houses with the streets, and any additional provision that may be deemed necessary to take care of the surface drainage. The matter of lighting facilities, and the setting out of trees, flowers, and plants will also be considered.

The practice heretofore in vogue of furnishing free railroad transportation to regularly organized baseball teams, composed of Canal Commission or Panama railroad employees, will be continued during the present season.

The force engaged on townsite work at Balboa has been increased by the addition of one foreman on water main installation at \$150; one foreman on sewer work at \$150; and one at \$125; one road foreman at \$150; one team foreman at \$125; one property and material clerk at \$137.50; one silver foreman

at \$75; seventy-five laborers at 10 cents, and 50 laborers at 13 cents.

The resurfacing of Las Sabanas road from a point in front of the orphan asylum to the Corozal road has been authorized.

Rainfall, Jan. 1 to Jan. 17, 1914, Inclusive.

COMMISSION CLUBHOUSES.

Activities of the Young Men's Christian Association.

GENERAL.

Moving picture schedule for the week January 26 to 31 is, as follows:

Monday, Cristobal; Tuesday, Empire; and Balboa, Wednesday, Pedro Miguel; Thursday, Gatun; Friday, Corozal; Saturday, Culebra.

List of moving picture reels, January 19 to 24:

11809, When John brought home his wife.
11556—11557, Millionaire cowboy.
11807, The spring of life—Tightwad's predicament.
11662, Beau Brummell.
11471, Ma's apron strings.
11415, The three black bags.

January 26 to 31:

11643, Wild man for a day—Training Mr. Tightwad.
11571, The will of the people.
11801, The misjudging of Mr. Hubby.
11586—11587, The last black house.
11498, Plot and counterplot.
11574, Keeping up appearances.

BALBOA.

At the motion picture entertainment held on Tuesday, January 20, special piano music was furnished by C. C. Pearsall, former accompanist for the "College Girls." A cigar counter has been installed and will be open all day and evenings.

The following members have entered the pool tournament which was started on January 17: Messrs. Brugge, Johnson, Potter, Grund, McDaid, Huff, Dubenburd, Skinner, O'Hagen, Lydon, Hulsebosch, Cook, Engelke, Tomey, McEwen, Wendler.

COROZAL.

About 260 people attended the last regular moving picture show. Miss Lindley gave three vocal selections. The next pictures will be shown on Saturday, January 24.

Medals for the 3-man team bowling tournament have been received by the winners, Messrs. Emerson, Smith, and Taylor. H. F. Edwards was also awarded medal for the high score average, and John Albert for the high score.

Suggestions are being received for new library books to be ordered from the United States.

The scores of 100 and over for the week ending January 17 were, as follows: Parkis, 113, 100, 106, 104; Sims, 105, 107, 110, 103; Smith, 100, 100; Davis, 112, 107; Phillips, 100; Edwards, 110; Owens, 106.

The standing in the "Ragtime" tournament is, as follows: High doubles, two games, Parkis and Smith, 388; high average, Parkis, 93; high score, Smith, 117.

PEDRO MIGUEL.

The clubhouse will be opened with appropriate exercises on Tuesday evening, January 27. Members from all the other clubhouses, and the public generally, are invited to attend. The address of the evening will be made by Mr. H. A. Gudgey, Chief Justice of the Supreme Court. There will be a musical program by the Ernest Gamble Concert Company.

On Saturday evening, January 24, there will be "Open house," with tournaments and games.

CULEBRA.

Dr. Frederic Poole gave his third lecture to a good-sized audience on Tuesday, January 13. Colored slides and moving pictures were shown, illustrating the Canton Chinese at various occupations. The canals were also described and in a moving picture was shown the method of raising and lowering boats through the locks by hand power. A double-edged sword was also exhibited, which Dr. Poole obtained from an executioner, who, it was stated, had beheaded more than 5,000 Chinamen with it. A reel showing a portion of the Panama Canal and local Panamanian scenes, was also shown by Dr. Poole.

At the moving picture exhibition on Friday night, Mr. F. J. Shubert sang several popular songs.

A "Smoker" will be held in the schoolhouse on Friday night, January 23. A program has been arranged and refreshments will be served. All men are invited.

On Saturday night, January 17, a chess "Fest" was held at which the Empire and Corozal players were present. In the individual championship series, Mr. H. A. A. Smith of Empire won one game and lost one with Mr. F. V. Fields of Corozal. The gold medals won by the Culebra chess team in the all-Isthmian tournament were presented to Messrs. Wm. Dubois, J. F. Warner, A. M. Warner, A. E. McClure, and Geo. W. Strong. Refreshments, consisting of ice cream, cake, and lemonade, were served.

The following high scores were bowled during the week: Case, 101, 105; E. Koperski, 105; Bechlem, 117; Palmer, 104, 100; Kiernan, 106, 103, 100; DeCora, 101, 102, 117; Rudolph, 101; Perkins, 104; Wood, 118; Jefferies, 105; Ferguson, 100.

The following are the total scores for five games each in the recent duckpin tournament: "Greens" (Kiernan,

captain) 6,478; "Blues" (DeCora, captain) 6,342; "Orange" (Palmer, captain) 6,271; "Blacks" (Cornthwaite, captain) 6,226; "Reds" (Koperski, captain) 6,177; "Whites" (Ferguson, captain) 6,067. E. Koperski won the high score medal, with a score of 126. Mr. DeCora won the high average medal with a score of 95.4-5. The five men in the winning team were Messrs. Kiernan, Whiting, E. Koperski, Worsley, and Brown.

EMPIRE.

The class in fencing was held twice last week with a good attendance. Mr. Russell has charge of the class.

Twenty-seven men have entered the "Ragtime" duckpin tournament. Each man rolls three games with each other player. It is requested that the men who have entered roll their games as rapidly as possible, so as to complete the tournament without delay.

The Empire clubhouse membership was 387 on January 1, 1914. This was the best record of any of the clubhouses, and is considered high on account of the many changes taking place in Empire.

GATUN.

The Ernest Gamble Concert Company, which appeared at Gatun on Thursday evening, January 15, returned and gave a sacred concert on Sunday evening, January 18.

Several fancy drills by the children of Gatun will be given in connection with the motion pictures on Friday evening, January 23.

A handicap pool tournament limited to seven men was started on Monday, January 19.

Entries are still being received for the "Ragtime" duckpin tournament.

Violin and piano lessons are now taught under the supervision of the Y. M. C. A. Any one interested may call on the secretary for particulars.

CRISTOBAL.

L. E. DuBois played C. R. Logan of Gatun in the opening game of the all-Isthmian chess championship, on Saturday, January 17. Mr. DuBois won the match by the score of 1½ to ½. On January 18, William DuBois of Culebra played L. E. DuBois, the match resulting in each winning a game.

Ensign, D. L. Dickson addressed a large audience at the discussion club meeting on Thursday, January 15. He gave a history of the submarine boat, described in detail the manner in which they are handled, and answered a number of questions at the close of the talk. The meeting set for January 19 will be in the nature of a debate between Messrs. Morrison and Swanson of Empire and Messrs. Verner and Wempe of Cristobal. The subject will be "Socialism."

The band from the United States battleship *Minnesota* gave a concert on Saturday night, January 17.

Mr. F. L. Bernsee, the checker player, will play a simultaneous checker match against all comers on Saturday, January 24. Much interest is being shown both in checkers and chess.

On Monday night, January 12, the monthly married folks tournament was bowled on the local alleys. The scores were, as follows:

CLASS A.

Mr. H. A. Collins.....	93....	112....	97
Mrs. Collins.....	70....	76....	527
Mr. Cotton.....	89....	80....	88
Mrs. Cotton.....	96....	75....	507
Mr. Sloan.....	89....	88....	85
Mrs. Sloan.....	76....	72....	488
Mr. Barte.....	72....	94....	96
Mrs. Barte.....	64....	58....	441

CLASS B.

Irvin Buser.....	85....	85....	81
Mrs. F. H. Buser.....	71....	66....	70.... 457
Mr. Vaughn.....	71....	84....	76
Mrs. Vaughn.....	66....	62....	54.... 413
Mr. Butters.....	56....	80....	70
Mrs. Butters.....	72....	70....	55.... 403

During the week ending January 17, the following high scores were made in duckpins: Collins, 112, 101, 105; Russell, 106, 108; Farr, 104, 100, 105; D. Raymond, 101; Herrington, 106; Pinney, 110, 111, 117, 104, 111, 106, 113, 100, 105; Smith, 102, 107.

The monthly single folks bowling tournament will be held on Monday night, January 26. It is requested that entries be made early.

PORTO BELLO.

A pleasant social evening was spent on Wednesday night, January 14, when Mr. Chas. Ray, the banjo player, and Mr. William Christian, alternated in entertaining the crowd. Mr. Ray played several selections and Mr. Christian sang several baritone solos. Refreshments were served. The rest of the evening was utilized by the local dancing club.

The Ernest Gamble Concert Company will give a concert in the local clubhouse on Saturday night, January 24.

Movement of Vessels, Port of Balboa.

The following vessels arrived at, or departed from, the port of Balboa, during the week ending January 17, 1914:

Arrivals—January 12, *Montaro*, from Callao; January 13, *Harlesden*, from north ports, *Santa Rita*, from Port Harford; January 14, *Aysen*, from Valparaiso, *Peru* (PSN), from Guayaquil; January 16, *Lyro*, from San Francisco, *Cyprus*, (yacht), from north ports.

Departures—January 11, *Rupanco*, to intermediate ports; January 12, *Guatemala*, to Callao; January 14, *Quito*, to intermediate ports; January 15, *Santa Rita*, to north ports; January 16, *Astec*, to San Francisco; January 17, *City of Sydney*, to San Francisco.

WEATHER CONDITIONS, CANAL ZONE, YEAR 1913.

The rainfall for the year 1913 was deficient at all stations except Brazos Brook, Colon, and Porto Bello. The annual totals ranged from 59.54 inches at Balboa to 171.19 inches at Porto Bello. The average annual precipitation in the Pacific section was 65.96 inches, in the Central Section 84.93 inches, and in the Atlantic Section 138.50 inches.

The dry season rainfall amounted to but four per cent of the annual total in the Pacific Section, six per cent in the Central Section and 10 per cent in the Atlantic Section. May was the rainiest month in all sections, and March the month of least rainfall.

The maximum 24-hour rainfall recorded during the year was 10.65 inches, at Porto Bello on May 14-15.

Air temperatures and wind movement were generally slightly above normal, while the atmospheric pressure and cloudiness were generally deficient. During a rain squall at Culebra on November 19, the wind reached a velocity of 40 miles an hour from the northeast, establishing a new maximum wind velocity record for this station.

The following table summarizes the weather conditions for the year:

STATIONS.	Pressure (reduced to mean of 24 hours).	Temperature.				Mean relative humidity.	Precipitation.			Wind.		
		Mean.	Maximum.	Date.	Minimum.	Date.	Total inches.	Station average.	Number of rainy days.	Av. hourly movement (in miles).	Prevailing direction.	Date.

OFFICIAL CIRCULARS.

Changes in Organization.

CULEBRA, C. Z., January 20, 1914.

CIRCULAR No. 183-2-6:

Effective February 1, 1914, the following changes in the organization of the Department of Construction and Engineering will be made:

1. The Atlantic and Fifth Divisions will be abolished.
2. The property accountability of these divisions will be transferred to the Quartermaster's Department.
3. The Fourth Division will take charge of the records.

4. Breakwater construction and the operation of Porto Bello quarry will be transferred to the Second Division.

5. The work remaining at Gatun Dam, El Caño saddle, backfill at Miraflores, the Miraflores spillway channel, Ancon quarry, and sluicing at Gold Hill, will be completed under my direction as Chief Engineer, the personnel being carried on the rolls of the Fourth Division.

6. The Sixth Division will, effective February 1, 1914, be designated the Dredging Division, Department of Construction and Engineering.

Geo. W. GOETHALS,
Chairman and Chief Engineer.

Transfer of Timekeeping, Subsistence and Commissary Departments.

CULEBRA, C. Z., January 20, 1914.

CIRCULAR No. 183-2-5:

Effective February 1, 1914, the timekeeping for the Subsistence Department of the Isthmian Canal Commission and the Commissary Department of the Panama Railroad Company will be transferred to the Office of the Chairman and Chief Engineer, Fourth Division.

Geo. W. GOETHALS,
Chairman, Isthmian Canal Commission,
President, Panama Railroad Company.

Rating of Boys "A" and "B."

CULEBRA, C. Z., January 14, 1914.

CIRCULAR No. 229-2-9:

My attention has been invited to the fact that the intention of Circular No. 229 in regard to the ratings of boys "A" and "B" is not being carried out, it apparently being the usual practice to rate all boys as "Boy B" at seven cents an hour, regardless of the duties which they are required to perform. Effective January 16, 1914, therefore, the standard rating for all boys shall be "Boy A" at five cents an hour, and boys will not be rated under "Boy B" at seven cents an hour, except in special cases. General Superintendent G. A. Greenslade of this office may be consulted in regard to ratings of "Boy A" and "Boy B" in case of doubt.

Geo. W. GOETHALS,
Chairman and Chief Engineer.

Acting Superintendent of Transportation, Second Division.

CULEBRA, C. Z., January 16, 1914.

TO ALL CONCERNED:

Effective at once, and until the return of Superintendent W. J. Holmes to duty, Assistant Superintendent W. T. Snyder will act as superintendent of transportation, Second Division, Chief Engineer's Office. Please be governed accordingly.

H. H. ROUSSEAU,
Assistant to the Chief Engineer.
Approved: Geo. W. GOETHALS,
Chairman and Chief Engineer.

Rates and Rules for Hotel Aspinwall, Taboga Island.

SUBSISTENCE DEPARTMENT,
CRISTOBAL, C. Z., January 19, 1914.

CIRCULAR No. 494:

The following rates and rules for the Hotel Aspinwall are published, effective January 22, 1914:

Rates for bed and board—Employees, \$2.25 per day; nonemployees, \$3 per day; servants and children under 12 years \$1 per day.

The daily bed and board rate will be divided, as follows: Three meals at 50 cents each and bed, 75 cents, for employees; Three meals at 50 cents each, and bed, \$1.50, for nonemployees; three meals at 25 cents each, and bed, 25 cents, for servants, or for children under 12.

Persons at bed and board rate must pay for all meals unless one day's meals, or more, are missed consecutively, in which case notice must be given to the clerk in advance to secure credit.

When stay terminates in the morning, breakfast will be included in bill.

An extra charge of 25 cents per person will be made for meals served in room.

Nonemployees after staying 30 days, will, for the rest of their stay, be given employees' rate.

Rates for meals.—Breakfast, 50 cents; lunch, 75 cents; dinner, \$1.

Meal tickets will be purchased at the office before

entering dining room by all persons without rooms.

Charge on supply launch between Balboa and Taboga, one way.—Employees, 25 cents; nonemployees, 50 cents; children under five years, free.

Open accounts will not be permitted.

Guests will be required to pay their bills upon leaving. Accounts of employees unpaid at time of leaving will be made up at the nonemployees' rate and sent to the Examiner of Accounts. Bills will be made up on the 7th, 14th, 21st, and last day of the month, and presented to all guests who have been at the hotel a week. All bills are due and payable on presentation. No variations from this rule will be made without authority from the Subsistence Officer.

No employee of the hotel has authority to make any other rates, or to modify any of the foregoing rules.

EUGENE T. WILSON,
Subsistence Officer.

Work for Individuals and Companies.

EMPIRE, C. Z., January 14, 1914.

CIRCULAR No. 53, (Amendment to Chairman's circular No. 519):

1. Authority for the performance of work in the Mechanical Division for private individuals and companies will be issued by the assistant superintendent of the Mechanical Division in the form of a shop work order. Work may be begun in the dry dock and Balboa shops immediately upon receipt of instructions to that effect, without waiting for receipt of formal authority.

2. Deposits in excess of \$100 may be made with the bonded clerk at either dry dock or Balboa shops, if it is found impracticable to require that deposit in excess of that amount be made with the Disbursing Officer.

3. Refunds of the balance of deposits found after the work is completed, may be made at the dry dock and Balboa shops without reference to the Examiner of Accounts.

H. A. A. SMITH,
Examiner of Accounts.

Transportation Department Organization, P. R. R.

PANAMA RAILROAD COMPANY,
OFFICE OF GENERAL SUPERINTENDENT,
COLON, R. P., January 16, 1914.

CIRCULAR No. 341:

Heads of Departments—The following organization of the transportation department, to be effective at once, is announced for the information and guidance of all concerned:

All station agents, with the exception of the agent at Colon depot, and the agent at Panama depot, will report to the trainmaster, on all matters pertaining to administration, personnel, transportation, accidents, etc. They will continue to be guided by the instructions received from the freight and passenger agent and the local auditor, regarding tariffs, rates, ticket sales, cash reports, etc.

The chief dispatcher will have jurisdiction over all dispatchers and operators, and over all transportation crews while on the road, and will report to the trainmaster.

The general yardmasters, Colon and Cristobal, and Panama and Balboa, will report to the trainmaster.

The general foreman of engine houses will have jurisdiction over all local shop and engine house employees and over all locomotive engineers and firemen while at terminals. He will handle the personnel of these employees, advertise for runs, and assign engine crews. He will report to the trainmaster.

The traveling engineer will supervise the work of all engine crews and assist and advise in regard to the economical use of fuel and supplies. He will act in an advisory capacity to the roundhouse foreman and trainmaster.

All conductors and collectors will be under the supervision of the trainmaster and report to the chief dispatcher while on the road.

F. MEARS,
General Superintendent.
Approved: Geo. W. GOETHALS,
President.

Ramapo Signal Near Culebra Removed.

PANAMA RAILROAD COMPANY,
OFFICE OF GENERAL SUPERINTENDENT,
COLON, R. P., January 19, 1914.

G. S. BULLETIN No. 39:

All concerned—The ramapo signal governing northward trains and located at a point about 300 feet north of Culebra station will be disconnected and taken out of service at noon Tuesday, January 20.

F. MEARS,
General Superintendent.

Derail on Obispo Diversion Track In Service.

PANAMA RAILROAD COMPANY,
OFFICE OF GENERAL SUPERINTENDENT,
COLON, R. P., January 19, 1914.

G. S. BULLETIN No. 40:

All concerned—The derail on the Obispo Diversion

track, which was formerly controlled by the interlocking plant, will be connected to the switch stand and put in service at 12 o'clock noon, Wednesday, January 21.

F. MEARS,
General Superintendent.

Sailing of the "Ancon."

PANAMA RAILROAD COMPANY,
OFFICE OF GENERAL SUPERINTENDENT,
COLON, R. P., January 16, 1914.

CIRCULAR No. 342:

All concerned—The sailing of the steamship *Ancon* has been set for Friday, January 23, 1914, at 3 p.m., from Pier 8 (old No. 17), Cristobal, C. Z.

F. MEARS,
General Superintendent.

Train Order Signal at New Culebra Moved.

PANAMA RAILROAD COMPANY,
OFFICE OF THE GENERAL SUPERINTENDENT,
COLON, R. P., January 20, 1914.

G. S. BULLETIN, No. 41:

All concerned—The train order signal at New Culebra will be moved at 12 o'clock noon, January 21, and located across the main and passing track opposite the cabin.

F. MEARS,
General Superintendent.

Supplies for the Canal.

The following steamers with supplies for the Isthmian Canal Commission and Panama Railroad Company, arrived at the ports of Colon, Balboa, and Cristobal, during the week ending January 17:

Danube, January 11, from New York, with three reels wire rope, for stock.

Alexandria, January 11, from Liverpool, with 115 casks tile, for administration building, Balboa.

Prinz August Wilhelm, January 12, from New York, with 11 barrels silica wash, for Mechanical Division; 658 bundles galvanized sheet iron, for stock.

Parismina, January 12, from New Orleans, with 14 packages electrical machinery, 254 pieces oak lumber, for Mechanical Division; two pieces machinery, for Sixth Division; 25 rolls cotton duck, 120 bags feed, for stock.

Colon, January 12, from New York, with four cases castings, 89 packages structural material, 15 cases electrical machinery, seven reels cable, 276 kegs red lead, 474 crates roofing tile, for First Division; 11 bags pipe-fittings, 13 boxes armament, for fortifications; 23 barrels copper sulphate, six cases electrical machinery, for Mechanical Division; 65 cases fire plugs, for Division of Municipal Engineering; 28 cases hard wood, for administration building, Balboa; 102 kegs red lead, for emergency dams; 10 bundles derrils, for Panama Railroad Company; 121 rolls wire reinforcing, for permanent quarters, Balboa; 50 cases turpentine, 69 drums lubricating oil, 17 boxes trucks, 27 cases paint, 43 barrels glassware, 16 boxes brushes, 60 rolls wire fencing, 126 cast iron fittings, for stock; and a miscellaneous cargo, the whole consisting of 1,877 packages, weighing 120 tons.

*Indicates reduction from last list.

**Indicates 5 cents allowed for return of bottle.

†Indicates advance on last list.

††Fowls weight each, about, as follows: 3, 3½, 4, 4½, and 5 pounds. Prices are based accordingly; when size ordered is not in stock, next lightest weight is supplied and refund note sent for difference.

‡Sold only from commissaries; no orders taken for delivery.

§Not less than half of a fresh ham or shoulder will be sold.

Examinations by Board of Local Inspectors.

BOARD OF LOCAL INSPECTORS.

ANCON, C. Z., January 15, 1914.

The Board of Local Inspectors will conduct examinations at the Administration Building, Ancon, on Wednesday, January 28, 1914, beginning promptly at 2 p. m., for persons desiring to secure the following classes of licenses: Pilots, masters, mates, marine engineers, chauffeurs, and navigators of motor boats. All applicants for licenses must procure from the Executive Office, Ancon, forms of application and information respecting the filling out of same, not later than the day previous to the examination. In addition, all applicants for chauffeurs' licenses must provide themselves with automobiles with which to demonstrate their ability properly to operate the same.

NOTE.—The demonstration test for applicants for chauffeurs' licenses will be given on Tuesday, the day preceding the regular examination, at 2 p. m., at the Administration Building, Ancon; for out-of-town applicants, on the day of the regular examination, at 2 p. m., at the Administration Building, Ancon. No demonstration test will be given at Cristobal, except by appointment.

W. V. JUDSON,

Chairman, Board of Local Inspectors.

Sale of Doors, Sash, Blinds, Etc.

OFFICE OF DEPOT QUARTERMASTER,
MOUNT HOPE, C. Z., January 19, 1914.

Sealed proposals will be received at the office of the Depot Quartermaster, Mount Hope, until 2 p. m., February 7, 1914, when they will be opened in the presence of attending bidders, for the purchase of all doors, blinds, sash, screens, window casings, frames, banisters, etc., which are now stored at the Cristobal shop stores.

Detailed list and full information relative thereto can be procured upon application to this office.

Proposals must be accompanied by a guarantee for 25 per cent of amount bid. The right is reserved to reject any or all bids. Bids must be plainly marked "Proposals for the purchase of doors, sash, blinds, etc., to be opened February 7, 1914", and addressed to

C. H. MANN,

Depot Quartermaster.

MOVEMENT OF OCEAN VESSELS.

The following is a list of sailings and scheduled arrivals of the Panama Railroad Steamship Line; of the Royal Mail Steam Packet Company; of the Hamburg-American Line, and of the United Fruit Company's Line:

*Will carry mail from the United States.

†Will carry mail to the United States.

‡Will carry mail for Alabama, Arkansas, Louisiana, Mississippi, and Texas.

Panama Railroad Company's steamers sail from Pier 11, Cristobal, at 3 p. m.

Royal Mail steamers leave for New York on alternate Tuesdays at 2 p. m.; for Southampton, on alternate Tuesdays at 10 a. m.

United Fruit Company's ships for New Orleans direct, leave on Thursdays and Saturdays at 3 p. m.; ships for New York via Kingston, on Thursdays at 2 p. m.; for New York, via Limon and Havana, on Sundays at 5 p. m.; for Limon and Bocas del Toro, on Tuesdays at 3 p. m.; for Bocas del Toro direct, on Mondays at 5 p. m.; and for Boston, on Sundays at 3 p. m.

Hamburg-American steamers sail for New York, via Kingston, Santiago de Cuba, and Fortune Island, on Tuesdays; the *Prinz August Wilhelm* and *Prinz Joachim* at 10 a. m.; the *Carl Schurz* and the *Emil L. Boas* at 2 p. m.

The Canal Record

Published weekly under the authority and supervision of the Isthmian Canal Commission.

The Canal Record is published free of charge, one copy each to all employees of the Commission and Panama Railroad Company whose names are on the gold roll. Extra copies and back numbers can be obtained from the news stands of the Panama Railroad Company for five cents each.

Address all Communications,

THE CANAL RECORD,

Ancon, Canal Zone,

Isthmus of Panama.

No communication either for publication or requesting information, will receive attention unless signed with the full name and address of the writer.

NOTES OF PROGRESS.

New Canal Government.

The official announcement is made by cable from Washington that, on Tuesday, January 27, President Wilson signed an Executive Order putting the Canal Act of August 24, 1912 into effect on April 1, 1914. The full text of this Act was published in THE CANAL RECORD of August 28, 1912. The effect of the Executive Order will be to abolish the Isthmian Canal Commission on April 1. By the terms of the Canal Act, "The President is authorized thereafter to complete, govern, and operate the Panama Canal, and govern the Canal Zone, or cause them to be completed, governed, and operated through a Governor of the Panama Canal, and such other persons as he may deem competent to discharge the various duties connected with the completion, care, maintenance, sanitation, operation, government, and protection of the Canal and the Canal Zone."

The Act provides that the "Governor of the Panama Canal shall be appointed by the President by and with the advice and consent of the Senate commissioned for a term of four years and until his successor shall be appointed and qualified. He shall receive a salary of \$10,000 a year."

Fill at Site of Cristobal Substation.

A fill of from 10,000 to 12,000 cubic yards will be necessary in preparing the site for the Cristobal substation in the rear of dock No. 13. The fill will be made by suction dredge, and it is planned to use dredge No. 83, at present engaged at the coaling plant nearby, by working the vessel at the coaling plant between the hours of 6 a. m. and 6 p. m., and on the substation fill from 6 p. m. to 6 a. m. This arrangement in working hours is made, because it will be necessary to stretch a pipeline across the French canal to carry the material to the substation site, thereby blocking the channel south of dock No. 11. The fill

will reclaim a portion of the tidal area between the Cristobal yard tracks, and docks Nos. 13 and 14.

All Deck Beams of Pontoon Barge in Place.

The last deck beam in the pontoon barge being constructed next to the dry dock at Cristobal, for use in crossing the Canal by rail, was placed during the morning of Monday, January 26, and the deck is 80 per cent complete. The bottom sheathing is about 20 per cent complete, and progress on the entire structure has been so satisfactory that the barge will probably be launched during the first part of March. The trestle to support the railroad and highway will be built upon the barge after the launching.

Dredging Operations in Culebra Cut.

The dredges excavating in Culebra Cut are in practically the same position as described in THE CANAL RECORD of last week. At Cucaracha slide, a second hydraulic monitor is being installed in connection with the sluicing operations carried on by means of water pumped up by pipeline suction dredge No. 82. This monitor is to be placed about 75 feet north of the one now in service, and on about a level with it, which is approximately 30 feet above the present water level in the Cut. The channel at the base of Cucaracha slide is now about 165 feet wide at its narrowest point. The slide has shown increased motion during the past week along its north edge, adjoining Gold Hill, and rock masses have been breaking off the face of the hill.

Berth for Oil Vessels at Balboa.

A permanent berth, for oil vessels discharging their cargoes at Balboa, will be dredged along the east bank of the Canal just south of the Panama Railroad Company's steel pier. It is expected that a berth about 75 feet wide, 1,800 feet long, and from 40 to 45 feet deep at mean sealevel, will serve the requirements. Its length has been tentatively fixed at 1,800 feet, because this will permit of the docking of three vessels at one time, allowing 600 feet of space to each ship. If soundings and borings develop an excessive amount of hard rock at the point selected, the location may be varied to some extent to reduce the dredging cost. The Dredging Division has been requested to make the necessary surveys, and prepare an estimate of the cost.

Panama Railroad Storage and Demurrage Rates.

The old rate of five cents a package a day on material stored in the sheds of the Panama railroad docks, and the car demurrage rate of \$5 a car a day, have been superseded by a reduced schedule effective until notice of change is given. In the past, and at the present time, a considerable quantity of goods has been brought to the Isthmus for transshipment to another steamer which may not

arrive in port for several days after the cargo is discharged. This necessitates storing the freight in the dock sheds pending an opportunity for reloading. Under the new schedule, a charge of 10 cents a ton a day, weight or measurement, according as the freight charges are assessed, will be made on all goods stored in the dock sheds, with a minimum charge of 50 cents a ton for a single day's storage. For car demurrage, a rate of \$2.50 a car a day has been fixed, with no free allowances, storage to begin on departure of the steamer from the wharf, and when loaded in cars for demurrage, holidays to be included. The railroad assumes no responsibility for loss or damage while freight is in storage on dock, or in cars, or for breakage in handling. The present rate of 50 cents a ton for the transfer of freight from one vessel to another will be maintained.

First of the Towing Locomotives Arrives.

The first towing locomotive of the order for 40 of the amended type, placed with the General Electric Company, arrived on the *Cristobal*, which docked on Tuesday, January 27. The machine was carried from the company's works at Schenectady to Jersey City on a special flat car, and was lifted to the deck of the *Cristobal* by the Merritt-Chapman Company's tug *Century*, which has a lifting capacity of 125 tons. The locomotive, which weighs about 50 tons, was placed in a specially constructed cradle on board the steamship, and lashed to the No. 4 hatch. The remaining 39 locomotives are to be delivered at the rate of four a month.

Limestone for Soil Treatment.

The use of limestone for the treatment of the soil in the vicinity of New Frijoles, where the Subsistence Department is planning to grow citrus fruits, is being considered. A report has been made by Mr. A. B. Nichols, office engineer at Culebra, on the available deposits of limestone in the Canal Zone. "Most prominent among these," he states, "is the so-called 'Emperador' limestone. Outcrops of this formation are found at Peña Blanca, along the relocated line of the Panama railroad, between New Frijoles and Caimito; on the Chagres River above Gamboa, near Cruces; on the Rio Chilibre; at Empire, and in the Culebra Cut, near Las Cascadas. Traces occur near Pedro Miguel, and in the swamps near El Diablo. The two locations which appear most favorable for working are at Empire and along the Panama railroad relocation, north of Caimito. The Empire deposit is found about 600 feet west of the railroad, behind the public market. It was worked by the Canal Commission some years ago for road material, and under the French, some of it was burned for lime for use in constructing the masonry foundations for buildings. The surface of this deposit is weathered and

broken, but underneath it is fresh and hard. Some exploration may be necessary to determine the volume available. The deposit north of Caimito forms a layer on the surface, for about 1,200 feet along the railroad. It is a bedded deposit of coarse limestone, containing coral and shells. The limestone at Peña Blanca and Rio Chilibre presents the same appearance. The 'Caimito' formation of McDonald embraces a lime-bearing material which is very common along the route of the Canal. It is a fine sandstone, more or less rich in lime. It may be seen at Pedro Miguel, at Empire, behind the railroad station; at sundry places along the Panama railroad relocation, and along Rio Chagres."

Automobile and Motorcycle Licenses.

A total of 217 automobile and 74 motorcycle licenses have been issued by the Collector of Revenues up to and including January 23, 1914. The first license for an automobile was issued on December 3, 1910, and for a motorcycle on November 16, 1911. When licenses expire without renewal, the old numbers are permanently vacated, and on this account no one is holder of license No. 1, at the present time, either for an automobile or motorcycle. The total licenses issued, however, may not represent the actual number now in use, as some of the machines probably have been abandoned, others sold and shipped away, and it is likely that few have taken out licenses good only on Panamanian territory.

Under the existing regulations, an automobile owner may take out a license in Panama, paying the established rate of \$25 for a pleasure car, and \$50 for a machine used for commercial purposes. If he wishes to operate the machine on the streets and roads of the Canal Zone, he is required to take out a reciprocal license, the charge for which in the case of pleasure cars is \$5, and in the case of machines for commercial use, \$30. For motorcycles, the license tax is \$10, either in Panama or the Canal Zone, and the charge for a reciprocal license is \$2. For both automobiles and motorcycles, a charge of \$1 extra is made in Panama and the Canal Zone for each numbered tag. The Canal Zone police are furnished with a record of the licenses as they are issued, and a lookout is kept for machines operated without license, or renewal of license; the infractions in the latter case are more or less frequent.

The record of licenses issued for automobiles and motorcycles, during stated periods, up to an including January 23 is, as follows:

AUTOMOBILES.		No.
PERIOD.		
December 3, 1910 to January 23, 1912.....	54	
January 23, 1912 to January 23, 1913.....	81

Building Operations at Ancon.

Four one-family, Type 17 quarters, transferred from Bas Obispo, have been reerected, repainted, and occupied on the west side of the highway leading to Bishop's Hollow, across the road from the recently opened Commission hotel, transferred from Pedro Miguel. At the south end of this row of houses a 2-family, Type-1 house has been erected and occupied; two other houses of this type are being erected on the other side of

the road, adjoining the hotel, and a fourth is under construction opposite the office of the district quartermaster.

The foundations and first floor of the new concrete commissary building at Ancon have

been completed, and the forms for the columns of the first story, and for the concrete eaves, are practically completed. The placing of concrete in these forms began on Tuesday, January 27.

LABOR FORCE AND QUARTERS IN DECEMBER.

The force report for December 31 shows the actual working force of the Canal Commission on that date to have been 26,953; of the Panama railroad, 5,195, and of the contractors, 415, a total effective working force of 32,563, a decrease of 2,404, as compared with the statement for November. The gold force on the Canal work, composed almost exclusively of white Americans, was 3,744, an increase of 49, as compared with the previous month. A statement of the Canal force, by divisions, follows:

DEPARTMENT OR DIVISION.	SILVER EMPLOYES*														Total silver.	Total gold.	Grand total.

Gold force of contractors (included above): eight families, 134 bachelors.

UNION CHURCH WORK.

Permanent Organization Effected at Corozal on January 25, 1914.

A permanent organization for union church work was placed in effect at a general meeting held at the Commission clubhouse at Corozal on Sunday afternoon, January 25, when a constitution was adopted and officers elected for the year 1914-1915. The new organization will be known as the Union Church of the Canal Zone. Its object is to engage in church work along undenominational lines; its teachings will be evangelistic and the activities nonsectarian. A central governing body has been provided in the form of an executive council, which is composed of the officers of the organization and representatives from each community, chosen by members in their community, the number allowed being proportioned by the local membership.

Membership is of two classes, active and associate. Persons may enter into active membership by presentation of a church letter, by statement of present or former church connection, or by accepting the tenets of Christian living as laid down in the New Testament. The second requirement takes care of those applicants who are residing temporarily in the Canal Zone, and those who do not desire to sever their regular church connection in the United States. Persons who are in sympathy with the objects for which the organization is formed, and yet do not fill the requirements for active membership, may become honorary members upon application. Only active members are entitled to vote, or to hold office. The control of the organization will be central; it is expected, however, that members of local Christian leagues and church societies, the purposes of which are in accord with the Union Church of the Canal Zone, will transfer their membership to the central organization. This membership will in no way interfere with the local organization, which may be carried on as usual. The organization expects to call a minister as chaplain to the union church work of the Canal Zone. He will serve in the local communities, under the direction of the executive council.

The initiative for the movement for the re-establishment of union church work in the Canal Zone was taken by the council of the Union Church at Cristobal, when the Commission chaplains, formerly maintained by the sanitary department, were dispensed with. A call was issued by this body for a general meeting, when the needs for the continuance of such undenominational work among the Americans in the Canal Zone was discussed. Following that meeting, which was held at Corozal on December 21, the council of the Cristobal church, consisting of Mr. J. M. Weaver, Mr. Leander Larson, and Mr. W. H. Kromer, continued its work, taking active part in the preparations for the perfecting of the organization.

The officers of the new Union Church are, as follows: President, Mr. H. A. A. Smith, Empire; vice-president, Mr. J. F. Warner, Culebra; secretary, Mr. W. E. Hoffman, Empire.

The monthly meeting of the Woman's Altar Guild of St. Luke's Hospital Chapel will be held at the home of Mrs. Gorgas on Tuesday afternoon, February 3, at 4 o'clock. Lent begins this year on Wednesday, Feb-

ruary 25, so it will be necessary to make plans for the meetings during the six weeks. A full attendance of the members is, therefore, urgently requested.

The Salvation Army announces the coming of its evangelistic preacher, Lieutenant-Colonel Roberts. He will arrive on the Isthmus on Sunday, February 1, and preach at the various stations in the Republic of Panama and the Canal Zone, until February 16.

Woman's Clubs.

The Ancon Study Club will have as the special feature at the third annual meeting on Thursday afternoon, January 29, a talk on woman's suffrage in California by Mrs. James Bowdry. The business meeting, with election of officers, will begin promptly at 2.30 o'clock; tea will be served at 3 o'clock, and the program will follow. The club calendar for February is, as follows:

February 5, study of English history and literature, Mrs. Morley, leader.

February 12, native woods, with an exhibition of specimens of woods and wood fibres.

February 19, English history and literature.

February 26, general meeting, with speaker.

The Cristobal Woman's Club has "Literature" as its subject for the February meetings. The speaker for the meeting on Wednesday afternoon, February 4, is Dr. E. G. Dexter, director of the Panama Institute; his subject will be modern literature for children. On February 18, the club will discuss recent books, with Mrs. C. M. Butters as leader. At the meeting on January 21, papers on the social problem were read by Mrs. C. A. Hearne, Mrs. Numa Nunn, and Mrs. L. Williamson. An open discussion of the subject followed.

PERSONAL.

Col. H. F. Hodges returned from his annual leave of absence on the *Panama*, which docked at Cristobal on Sunday, January 25.

Maj. Smedley D. Butler, commanding the United States Marine Corps formerly stationed at Camp Elliott, who left with his battalion for service in Mexican waters on Wednesday, January 21, has been assigned to duty on the staff of Rear Admiral Frank F. Fletcher, commanding the Third Division of the Atlantic Fleet. He will have charge, as divisional commander, of all the United States Marines ordered to Mexican waters. Major Butler received his commission as captain on July 23, 1900, and his present commission on May 13, 1908. He was detailed for duty on the Isthmus on December 2, 1909.

Mr. Harry O. Cole, resident engineer of the Fifth Division, has resigned, effective at the close of business on January 31, and, accompanied by his family, will sail for the United States on the *Cristobal*, on Friday, February 6. He received his appointment with the Isthmian Canal Commission on September 10, 1908, arriving on the Isthmus on September 18. From that date until September 1, 1909, he was engaged as assistant engineer in the office of the division engineer of the old Pacific Division, in charge of all office engineering and designing of plants and equipment for the division. On the latter date he was placed in charge of the Third (municipal engineering) District of the Pacific Division, a post he held until

April 20, 1911, when he was made resident engineer, in charge of the Pacific locks and dams, and Canal excavation in the dry, south of Pedro Miguel, succeeding Mr. W. B. Corse. When the Pacific Division was abolished on December 12, 1912, he was placed in charge of the Fifth Division, newly created. Mr. Cole was graduated from West Virginia University in the class of '98, with the degree of bachelor of science in civil engineering, and in the same year entered the office of the Keystone Bridge Company as draftsman. In 1901, he was a draftsman for the National Steel Company, and in the following year for the Structural Steel Company. Later, he was with the American Bridge Company, and from 1903 to 1907, he was assistant engineer in the office of V. G. Bogue, a consulting engineer in New York City. In 1907, he became bridge engineer for the Oaxaca and Pacific Railway in Mexico, and subsequently served on the investigating committee of the Blackwell's Island bridge in New York City. He is a member of the American Society of Civil Engineers.

Mr. A. S. Zinn, formerly resident engineer in charge of the Fourth Division of the Chief Engineer's Office, has accepted a position, effective January 21, as consulting engineer with the Department of Public Works of the Republic of Panama. He will sail for New Orleans on Saturday, January 31, to spend a vacation of six weeks in the United States, returning afterward to Panama.

Mr. Zinn came to the Isthmus on October 21, 1906, as resident engineer of the Culebra Division, in charge of steamshovel excavation and railway construction. Under the reorganization of July 1, 1908, when the Central Division was created, with Lieut.-Col. D. D. Gaillard at its head, Mr. Zinn became resident engineer in the Central Division, remaining in charge of his former work. He held this position until October 10, 1913, when the Central Division was abolished. On that date he was made resident engineer in charge of the Fourth Division, which position he held until it was abolished on January 1, 1914.

Prior to coming to the Isthmus, Mr. Zinn had been engaged for 17 years in varied railway engineering and construction work. Shortly after graduation from Rose Polytechnic Institute, he became a draftsman in the office of the Illinois Central Railroad in Chicago, and the principal positions he occupied later were assistant engineer for three and one-half years in track elevation in Chicago; division engineer of the Oklahoma division of the Rock Island Railway; principal assistant engineer of the Rock Island system, and engineer of construction of the Michigan Central Railway in Canada, completing the second main track between Detroit and Buffalo. His coming to the Isthmus was on the invitation of Mr. John F. Stevens, former Chief Engineer, who was second vice-president of the Rock Island system when Mr. Zinn was its principal assistant engineer. He is a member of the American Society of Civil Engineers, the Western Society of Engineers, and the American Railway Engineering Association.

Mr. Charles L. Parker, accompanied by Mrs. Parker, returned from his annual leave of absence on the *Panama*, which docked at Cristobal on Sunday, January 25.

COMPLETION OF LOCK GATES.

End of Canal Work by McClintic-Marshall Construction Company.

The last of the equipment used by the McClintic-Marshall Construction Company in the erection of the lock gates and the spillway caissons was shipped to the United States on January 23. This shipment, on the *Ancon*, consisted principally of hand tools; previous shipments, consisting of locomotive cranes, truss bridges used in spanning the lock chambers, air compressors, motors, riveters, and miscellaneous field and shop machinery, amounted to several full vessel loads. The small remaining force at work at Miraflores Locks was withdrawn on January 22, and the entire force at work now for the contractor on the Isthmus is a gang of about nine laborers, clearing some concrete foundations for field buildings off the east backfill at Gatun Locks, and five office men. Most of these will leave within a short time; Mr. W. H. Sterrett, who has been in charge of the contractor's work on the Isthmus since September 1, 1912, will remain until everything has been cleaned up.

The following tabulation summarizes the progress of the miter gate erection at the three locks:

	Gatun.	Pedro Miguel.	Miraflores.
First girder laid.	5-27-11	8-7-11	9-10-12
Last work completed.	1-19-14	1-3-14	1-17-14
No. of leaves.	40	24	28
*Tons of steel—			
2,600 lbs.	25,180	14,764	17,608
No. of field rivets.	2,506,000	1,475,000	1,749,000

*Exclusive of fixed parts.

Further Extension of Colon.

An extension of Colon to afford sites for buildings devoted to manufacturing and warehouse purposes is being effected by filling in parts of three blocks east of Broadway, between Thirteenth and Sixteenth streets. This area is just north of the site now occupied by the Consumers' Electric Light and Refrigerating Company, which has recently opened a laundry. The blocks contain seven lots each, measuring 40 feet wide by 150 feet deep. It is estimated that about 29,900 cubic yards of material will be required to bring the area up to grade. The spoil will be furnished by the Panama railroad, from its borrow pit near Mount Hope.

Sales of Material and Equipment.

The following sales of equipment and material belonging to the Canal Commission were made by the Quartermaster's Department during the first six months of the fiscal year 1913-14:

Obsolete equipment.....	\$45,765.30
Obsolete material.....	75,794.15
American scrap—screening, rope, rubber, etc.....	21,052.18
French scrap (collected under French scrap contract).....	8,395.48
Old French buildings.....	6,373.91
Stock material, including stationery.....	51,927.55
Total.....	\$209,308.57

Results in Tennis Tournament.

The tennis tournament in singles was held at Empire on January 18, and the finals were played off on January 25. Results are summarized, as follows:

Preliminary round.—Tivoli (D. T. Edwards) defeated Pedro Miguel (H. Bartholomew), 6-2, 5-7, 10-8; Pacific (C. E. Nevius) defeated Gatun by default; Camp Otis

(Lieut. Swartz) defeated Ancon Hospital (A. L. Fessler), 7-5, 6-3; Empire (R. M. Smith) defeated Culebra (J. B. Shropshire) 10-8, 6-4.

Semifinals.—Pacific defeated Tivoli, 6-2, 6-1; Empire defeated Camp Otis, 6-3, 6-3.

Finals.—Pacific defeated Empire 7-5, 6-2.

For the Recovery of Lost Articles.

Articles lost on the trains or premises of the Panama railroad and found by employees of the company are turned in at the general offices at Colon. A record of their finding is made and if the article is not claimed within three months it is given to the finder. Many valuable articles, including a wallet containing over \$1,300 in currency, have been restored to their owners by this system; on the other hand, so prevalent is the belief that a lost umbrella is irretrievable that some of the collectors in the passenger service have as many as a dozen of these articles which have been turned back to them after the allotted time.

It is proposed to extend the scope of the system as far as practicable, and to this end the management of the railroad invites all finders of lost articles, anywhere on the Isthmus, or on vessels coming into Isthmian ports, to send such articles to it under the same conditions; that is, the finder will be given a receipt, and, if the article is unclaimed within three months, he will receive the article himself. Letters and parcels may be addressed to F. R. Blunt, trainmaster, Panama railroad office, Cristobal, C. Z., or left at Mr. Blunt's office, Colon.

Ancon Crusher.

Following is a statement of rock crushed at Ancon quarry during the two weeks ending January 24:

DATE.	Hours worked.	Cubic yards.
Jan. 12.....	8.15	1,934
Jan. 13.....	8.25	2,722
Jan. 14.....	7.05	2,103
Jan. 15.....	8.15	2,299
Jan. 16.....	8.25	2,148
Jan. 17.....	8.15	1,807
Total.....	48.40	13,013
Jan. 19.....	8.25	2,232
Jan. 20.....	7.10	2,157
Jan. 21.....	8.30	2,652
Jan. 22.....	6.30	1,404
Jan. 23.....	7.15	1,598
Jan. 24.....	8.00	1,995
Total.....	45.50	12,038

American Institute of Electrical Engineers.

The next regular meeting of the Panama section of the American Institute of Electrical Engineers will be held in the Panama railroad offices in Colon on Sunday, February 1, at 2.30 p. m. Mr. W. H. Fenley will present a paper on "Interlocking and automatic signals," and Mr. A. B. Kratz will present a paper on "How the telephone helped to build the Panama Canal."

W. R. McCANN,

Secretary-Treasurer.

CULEBRA, C. Z., January 24, 1914.

Fire Bursts Oil Pipe Line.

A fire, originating in the dry grass around the the pipeline of the Union Oil Company at El Diablo hill, on Thursday, January 22, at 12.02 p. m., expanded the pipe and caused it to burst. The oil company was pumping through the line at the time, but as soon as possible after the alarm was given, the valves

in either direction were closed and the flow stopped. With the bursting of the pipe, the oil ignited, but the fire was extinguished by shoveling dirt over it. Hose Company No. 6, and 10 volunteer firemen from Corozal, responded to the alarm. The damage is estimated at \$120.

Red Cross Finances.

The financial statement of the Canal Zone Chapter, American National Red Cross, for the month of December, 1913, follows:

RECEIPTS.	
December 1, On hand.....	\$3,808.54
DISBURSEMENTS.	
December 6, Postage.....	\$10.00
16, Relief of destitute ex-employee, Ancon Hospital.....	3.00
16, Relief of destitute American sailor, Cristobal.....	2.25
22, Relief of destitute ex-employee, Ancon.....	2.00
Total disbursements..	\$ 17.25
December 31, Balance on hand.....	\$3,791.29

JOHN L. PHILLIPS,

Treasurer.

Approved:

EDW. SCHILDHAUER,

Chairman.

Smoking in Hospital Wards Prohibited.

During the past few days two fires have occurred in the sick wards at Ancon Hospital, caused by burning cigar stumps coming into contact with inflammable material. It has been decided to post notices in each of the wards calling the attention of patients to the fact that smoking therein is positively forbidden, and that a second violation of the rule will be considered sufficient ground for the suspension in pay of the offending person, if an employee, for a period of from five to 10 days.

The residence formerly occupied by Lieut.-Col. D. D. Gaillard at Culebra has been demolished for transfer to Balboa. In its reconstruction, several minor changes will be made in the interior arrangements and its supporting columns will be set in flaring cups of metal or concrete, well above the ground, which will be filled with some noninflammable oil to prevent the invasion of ants and rats. The new site of the building will be on the slope of Ancon Hill, southward of the new administration building.

Tide Table.

The following table shows the time of high and low tides at Panama for the week ending February 7, 1914:

DATE.	High	Low	High	Low	High
	A.M.	A.M.	A.M.	P.M.	P.M.
February 1.....	1.34	7.26	1.44	7.44	
February 2.....	2.11	7.57	2.19	8.18	
February 3.....	2.31	8.34	2.57	8.56	
February 4.....	3.38	9.20	3.47	9.46	
February 5.....	4.36	10.24	4.54	10.53	
February 6.....	5.44	11.45	6.14	
February 7.....	12.10	6.53	1.04	7.21

75th meridian time.

Movement of Vessels, Port of Balboa.

The following vessels arrived at, or departed from, the port of Balboa, during the week ending January 24, 1914:

Arrivals.—January 19, *Huallaga*, from Callao; January 20, *Mexico*, from Callao; January 21, *Manavi* from Guayaquil; January 23, *Barracouta*, from Central America; January 24, *Pennsylvania*, and *San José* from San Francisco.

Departures.—January 19, *Mantaro*, to Callao, *Aysen*, to Valparaiso; January 20, *Peru* to Guayaquil; January 23, *Ilarkesden*, to south ports, *Cyprus* (yacht), to San Francisco.

CANAL WORK IN DECEMBER.

Monthly Report of the Chairman and Chief Engineer to the Secretary of War.

CULEBRA, C. Z., January 17, 1914.

The Honorable the Secretary of War,
Washington, D. C.

SIR: I have the honor to submit the following report of operations on the Isthmus for the month of December, 1913:

Department of Construction and Engineering.

The following table summarizes the principal items of work accomplished by the construction divisions during the month:

ITEM.	Unit.	Atlantic.	2d. Div.	4th Div.	5th Div.	6th Div.	Total.
Work excavation, dry.	Cubic yds...	2,168	112,626	161,000	30,420		306,214
Work excavation, wet.	Cubic yds...				141,000	1,107,027	1,248,027
Total work excavation	Cubic yds...	2,168	112,626	161,000	171,420	1,107,027	1,554,211
Plant excavation, dry.	Cubic yds...		829				829
Plant excavation, wet...	Cubic yds...					26,656	26,656
Total.....	Cubic yds...		829			26,656	27,485
Total Canal excavation.....	Cubic yds...	2,168	113,455	161,000	171,420	1,133,683	1,581,726
Concrete placed, locks, dams, and spillways.	Cubic yds...	120			3,024		3,144
Fill placed in dams.....	Cubic yds.	20,485			10,635		31,120
Explosives used.....	Tons (Gross)	10.24	12.15	20.45	12.97	55	110.81
Rock drilled.....	Feet.....	9,995	42,569	70,882	22,427	35,603	181,476
Tracks removed.....	Miles.....	2.40	2.69	17.01	0.93		23.03
New tracks laid.....	Miles.....	1.68	2.95	4.31			8.94
Rock crushed.....	Cubic yds.				37,355		37,355
Cement used.....	Barrels.....	433	7,144				7,577
New roads built.....	Miles.....						
Water mains laid.....	Feet.....	1,000					1,000
Sewers laid.....	Feet.....						
Open drains and ditches dug.....	Feet.....		4,960				4,960
Average daily force.....		1,595	2,509	2,184	1,079	2,298	9,665
Average rainfall.....	Inches.....	7.30	3.72	2.03	2.14	3.48	3.57

First Division—Office of the Chief Engineer.

LOCK GATES AND PROTECTIVE DEVICES.

The erection, reaming, and riveting of all the lock gates was complete at the end of the month, and only a small amount of painting and finishing remained. At Gatun, the gates are 99.7 per cent completed; Pedro Miguel, 100 per cent; Miraflores, 99.5 per cent.

A portion of the iron for the chains of the chain fenders was shipped to the Boston Navy Yard during the month, and six of the 24 chains are about 10 per cent completed. Out of the 46 operating valves, 21 right hand and 24 left hand valve bodies have been cast. Practically no progress was made on the 92 resistance valves, and it has been decided that stronger material must be used for the valve stems.

Approximately 50 per cent of the structural steel for the lock entrance caisson has been delivered to the contractor's plant in the United States, and approximately 90 per cent of the material ordered from the steel contractors has been passed for shipment.

TESTING.

Gatun Spillway.—The 14 spillway gates and machines were operated satisfactorily during the month with the lake at elevation approximately 84.5 feet above sealevel.

Gatun Locks.—Eleven lockages were made at Gatun Locks. During the month, 20 rising stem valves were tested on the east wall and 17 were accepted as complete for local control. All miter gates in the east chambers, 16 in number, were operated during the month and found to function satisfactorily. Ten cylindrical valves in the lower level were tested and nine accepted as complete. The remaining 20 cylindrical valves for this lock

cannot be given final test until the last lock is watered.

Six control cables were tested to allow the permanent connection of sample layout of control board; these stood the test satisfactorily.

Pedro Miguel Lock.—Two lockages were made at Pedro Miguel. The three remaining transformer rooms at Pedro Miguel were tested and put in service. All rising stem valve, cylindrical valve, and auxiliary culvert valve machines in the west lock were operated from permanent local control. All miter gate moving machines in the west chamber were tested, and all gates not having water pressure

The control house at Gatun is practically completed; that at Pedro Miguel 94 per cent, and that at Miraflores 75 per cent.

Erection of the main control board at Gatun Locks is about 35 per cent completed, and the erection of the Pedro Miguel board was begun during the month.

Track-span bridges for the transisthmian transmission line have been completed along 18 miles of the Panama railroad. Foundations for the substations at Gatun and Miraflores have been completed, and are ready for the steel contractor to begin his work.

EMERGENCY DAMS.

Riveting on both emergency dams at Miraflores was completed, and the final tests on the east dam were made on December 29. The dams at Gatun and Pedro Miguel have been completed.

AIDS TO NAVIGATION.

Construction of towers, making soundings for, and placing of gas buoys, surveys, and other routine work were carried on during December.

Second Division—Office of the Chief Engineer.

BALBOA TERMINALS.

Dry docks.—On dry dock No. 1 contractor's drawings for the granite work were completed and checked, contractor's plans for the pumping plant were made, plans for the reinforcement of the caisson seats were completed, and a detail plan of masonry for the stairs and slide was practically completed. Studies were made on the final design for the side walls and adjoining wharf structures of dry dock No. 2, and on a simpler filling system; and contractor's plans were prepared for the granite work. Excavation for the dry docks and entrance basin amounted to 80,350 cubic yards.

Permanent shops.—The work of preparing drawings, specifications, and requisitions for various features of the shops was continued. The contractor completed the erection of steel in the sand house, the machine shop, and erecting shop. With the exception of a small amount of finishing work, this contract is completed. The tile contractor has completed the manufacture of tile, and the placing of tile on the buildings was carried forward. Three 60-ton, two 25-ton, and two 20-ton overhead electric traveling cranes were placed on their runways, and assembling was begun. All of the machines, furnaces, and other equipment to be installed in the foundry have been completed, with the exception of the sandblast plant. Forty-nine machines, out of a total of 178 machines, have been installed in the machine shop; three out of a total of 37 in the boiler and shipfitter shop; four out of a total of 35 in the forge shop, one of which has been put into service; and 49 out of a total of 57 in the planing mill, of which 47 have been put in operation. Excavation for the shop tunnel amounted to 200 cubic yards, foundations 79 yards, and machine footings, floors, and tunnels, 1,469 yards. Concrete placed in machine footings amounted to 1,272 cubic yards, and in other parts of the shops to 739 cubic yards. One hundred and fifty-nine thousand four hundred and thirty pounds of reinforcing steel were placed, in the foundations for the turntable, 1,980 linear feet of concrete pile, and 1,908 linear feet of pipe were driven.

Pier No. 1.—Designs were made for anchorages of bumping post and columns of pier

against them were operated. The west chamber is ready for use.

Miraflores Locks.—Four lockages were made. Transformer room 771 was tested and put in service, and the feeders for operation of the west emergency dam at Miraflores from transformer room 774 were also tested and put in service.

OPERATING MACHINERY AND ELECTRICAL EQUIPMENT.

Mechanical work connected with the rising stem, cylindrical, and auxiliary culvert valve machines has been completed, and the installation of electrical apparatus for these machines is respectively 83 per cent, 95 per cent, and 90 per cent completed; and electrical installation 35 per cent.

Ninety-eight per cent of the mechanical, and 65 per cent of the electrical installation has been completed on the miter gate moving machines. Mechanical erection of miter gate forcing machines is 76 per cent completed, and electrical installation 57 per cent.

All track material for the towing system of the locks has been delivered, and 92 per cent of the track has been finished. Fifty-four per cent of single, and 83 per cent of double cross-overs, have been placed.

All spillway gate machines have been received and mechanical erection is complete. Electrical installation is 95 per cent complete at Gatun, and 80 per cent at Miraflores.

Work on transformer room equipment is 87 per cent complete at Gatun, 85 per cent at Pedro Miguel, and 85 per cent at Miraflores.

About 96 per cent of the 2,503,296 feet of cable on order has been received, and 946,587 linear feet have been pulled into ducts.

shed; and a bill of material was prepared for the anchorage for pier shed columns. Excavation amounted to 2,470 cubic yards; 469 cubic yards of concrete were placed in the substructure, 362,956 pounds of reinforcing steel were used, 130 caissons, out of a total of 201, have been sunk to rock, the penetration in December being 1,020 linear feet.

Quay wall g-h-i.—The substructure was completed and backfill placed. The superstructure was also completed, with the exception of the paving. Five hundred and ninety-four linear feet of track were placed and grouted in, and the track laying is practically completed. Paving was done between the track and the water edge of the dock. Effort has been made to have the brick pavement laid in such manner as to give a very smooth and solid surface. The sand cushion has been rolled and the brick have been rolled in place before grouting. Twenty-two thousand and five hundred and sixty-five square feet of dock floor were paved during the month.

Quay wall e-f.—Six thousand six hundred and ten linear feet of piles were driven for construction trestle, and one steel caisson was put in place.

Bulkhead wall i-j-m-n.—Only 20 caissons were sunk into rock during the month, making for this section 57 caissons in rock to date, eight yet to be started, 46 filled to date with concrete, and there are 11 caissons still uncompleted.

Caisson manufacturing plant.—Six hundred and eighty-seven linear feet of caisson were manufactured during the month, and this is thought to be all that will be required for the present proposed piers. The plant was therefore shut down.

COALING PLANTS.

Cristobal.—Surveys were begun preparatory to making a working map for the layout of the coal dock. The design of the substructure was carried forward and partially checked. Excavation amounted to 50,256 cubic yards.

Balboa.—A final design for the supports for the berm cranes and a reinforced concrete retaining wall carrying girders for the conveying system was started. Studies were made of the seawall in front of the coal plant and designs were worked out to find the most economical arrangement of beams and girders. Studies for the support of the berm cranes through the Government pile were also made. Excavation in the coal pocket amounted to 27,094 cubic yards, coal pocket incline 728 cubic yards, coal pocket tracks 56 cubic yards.

RADIO STATION.

Surveys were continued at the site of the Darien radio station at Caimito; towers were located, topography was finished, and work was begun on laying out tower No. 1 for construction. Detail plans for the masonry footings were completed.

METEOROLOGY AND HYDROGRAPHY.

Rainfall.—Dry season weather prevailed during the greater part of the month, and rainfall was below station average at all stations except Ancon.

Gatun Lake.—During the month, Gatun Lake rose from 82.01 to 84.80 on the 30th, being 84.48 on the last of the month, or a storage increase of 11.24 billion cubic feet for the month. At 10 a. m., on the 27th, gate No. 7 of the spillway was opened and during the day each of the 14 gates was raised and

lowered, one at a time. Water was also discharged on the 29th, 30th and 31st between 7 a. m. and 5 p. m. On the 30th, seven gates were open long enough (three hours) to enable the measurement of discharge in the concrete channel. Velocity was obtained by timing 26 floats, thrown from the east wall and the footbridge, over a 440-foot course. The maximum velocity was 44 feet per second, and the discharge 63,200 second-feet, or an average of 9,030 second-feet per gate. The lake was at elevation 84.66 while the elevation of the water at the spillway water gage was 14.6. Gagings taken at the cable station with two gates open showed a discharge of a little over 9,000 second-feet per gate for lake elevation around 84.5.

Fourth Division—Office of the Chief Engineer.

Culebra Cut.—Steamshovel excavation from slides, and on high levels as a preventive against slides, amounted to 161,000 cubic yards, and the daily average number of steamshovels at work was 7.9.

Sosa Hill quarry.—At Sosa Hill quarry, 59,100 cubic yards were excavated.

Naos Island trestle.—The total dumpage on Naos Island trestle at the end of the month was 1,707,516 cubic yards, of which 74,708 yards were dumped during December.

Fifth Division—Office of the Chief Engineer.

Excavation at all points amounted to 62,115 cubic yards; filling and embankment to 56,518 cubic yards.

Pedro Miguel.—The work of backfilling the northeast core wall was completed during the month and the permanent track laid across the same, joining the construction tracks on the east side of the Pedro Miguel Lock with the old Panama railroad main line just north of the Pedro Miguel station.

Miraflores.—Steamshovel excavation south of the spillway was continued by two shovels; borrow pit work was carried on by two shovels to supply material for completing the junction of the west dam with the locks and for furnishing backfill and resurfacing the west dam; and one shovel excavated rock near Corozal for the backfill between the north east wing wall and the core wall of the spillway dam at Miraflores. A steamshovel began excavating old dikes and high ground for the purpose of diverting the Rio Grande into the Canal three-quarters of a mile south of the locks.

Ancon crusher.—The rock crusher plant at Ancon quarry produced 37,355 cubic yards of crushed rock.

Gold Hill hydraulic and sluicing project.—The total excavation during the month was 141,000 cubic yards, of which 77,000 cubic yards were classified as earth, and 64,000 cubic yards as rock. The installation of the additional (or third) boiler unit was completed. Excavation in the middle and south flume districts was continued, and the cutting extended into the active slide area. The work of cutting through saddle No. 1 was continued. On account of encountering trap rock in the base of the cut, the sluicing was changed to a higher elevation and the work of unloading the softer material of the saddle was continued. Sluicing was started in saddle No. 2 during the latter part of the month and worked back into the edge of the middle back portion of the Cucaracha slide, after which work was temporarily suspended, in order to drill and blast a deeper sluiceway for the purpose of

making available a greater volume of the active slide.

Sixth Division—Office of the Chief Engineer.

Miraflores Locks to the sea.—Three dredges removed 134,937 cubic yards of earth and 9,664 cubic yards of rock from the Canal prism; in addition, 8,075 cubic yards of earth were removed from berths at the Panama railroad wharf. There remain to be excavated in this section 2,090,388 cubic yards, of which 549,629 yards are rock. Two dredges removed 84,991 cubic yards from the inner harbor at Balboa.

Miraflores Lake.—A suction dredge removed 37,676 cubic yards, and 328,872 cubic yards remain to be excavated.

Culebra Cut.—Nine dredges removed 131,695 cubic yards of earth and 302,507 cubic yards of rock from the Canal prism, of which 321,193 yards were from Cucaracha slide. All material from the dredges was dumped north of Gamboa, with the exception of 56,665 cubic yards of earth and 53,193 cubic yards of rock, which were excavated during the period December 1 to 14 by the dredges *Corozal* and *Marmot*, and dumped in the Canal and drainage ditch near Station 1860. There remained to be excavated by dredges 4,263,528 cubic yards.

Atlantic Ocean to Gatun Locks.—The dredge *Caribbean* removed 221,474 cubic yards of earth from the prism, and there remained to be removed 461,973 cubic yards, all but 1,204 of which is earth.

At Cristobal coaling station site, 50,256 cubic yards of rock and sand were dredged. At Margarita Bay, 71,898 cubic yards of coral sand were removed; at Coco Solo Point 14,318 yards, and in the slip and approach to the coal dock 12,338 cubic yards of earth.

Gatun Lake.—Two dredges, working in the prism near Gamboa, removed 124,227 cubic yards of earth, and a ladder dredge removed 2,300 cubic yards of gravel from the Chagres River gravel beds.

Division of Municipal Engineering.

Northern District.—Construction of the new waterworks for Colon and Cristobal was practically completed during December. There remain only some finishing work and the installation of electric pumps, which are expected to arrive the latter part of January.

Southern District.—At the new townsite of Balboa, construction of the storm sewer was continued, and 1,011 linear feet were completed. At the new townsite of La Boca, the work was about 85 per cent completed. In the new townsite of Pedro Miguel, sanitary sewers were 67 per cent completed; storm sewers, 41 per cent; curb and gutter, 40 per cent; water system, 87 per cent; drainage system, 63 per cent; and placing of macadam, eight and a half per cent.

New Panama water works.—At Miraflores pump station No. 1, the setting of valves in the intake house was completed, and the walls of the main building were prepared for the roof trusses. At the filtration plant, excavation in the clear water basin, aeration basin, and head house was completed; and floor and walls of the wash water tank were completed and forms for the roof were erected ready for concrete. The high service reservoir was 50 per cent completed. Excavation for the Ancon pump station was started. Work was begun on the laying of the 30-inch main from Miraflores to Panama, and the 16-inch

main from Ancon pump station to the high service reservoir.

Atlantic Division.

Gatun Locks.—Grading was continued, 34,613 square yards being finished to final grade on December 19, when all work on the backfill was stopped.

Gatun Dam.—The placing of fill in the dam was discontinued on December 19, when there had been placed 20,485 cubic yards for the month, and the total fill amounted to 22,073,151 cubic yards of which 10,124,082 yards are wet fill. The work of smoothing the slopes of the dam was extended by 44,845 square yards, making a total of 390,765 square yards of surfacing when the work was discontinued on December 19.

Transmission lines.—Two hundred and nineteen cubic yards of plain, and 74 of reinforced concrete were laid in the duct lines from the hydroelectric station to the substation, and at the locks, making the total 2,272 cubic yards. Excavation for the duct line amounted to 2,367 cubic yards for the month, backfill to 1,924 cubic yards; total, 3,211 yards.

Gatun-Mindi levee.—The levee was further raised by the addition of 20,451 cubic yards of borrow pit material.

Caño Saddle dam.—A channel 50 feet wide was cleared through the lake to the site of the Caño saddle dam, and material and equipment were transported to the site for the contractor.

West breakwater.—Porto Bello rock unloaded on the breakwater at Toro Point amounted to 18,595 cubic yards; total to December 31st 386,234 cubic yards. The total fill at the end of the month was 3,108,277 cubic yards.

East breakwater.—Preliminary work was continued on railroad track and docks; surveys and borings of the proposed quarry were made, and dredging at Coco Solo harbor was continued.

Quartermaster's Department.

Working force.—The force report of December 24 shows a decrease of 2,491 men from the previous month, 1,251 from the Commission, 613 from the Panama railroad, and 627 from contractors' forces. The total number at work on that day for the Commission was 20,516 of whom 2,706 were Americans, 1,979 European laborers, and 15,831 negro laborers. Contractors' employees numbered 496.

Quarters.—The Bas Obispo-Las Cascadas district was vacated at the end of the month. Quarters at Bas Obispo have been removed to Balboa and Ancon.

Material and supplies.—A new system of financial accounting to take the place of the physical accounting at the storehouses went into effect January 1, 1914. Material received in December was valued at \$813,442.04.

Subsistence Department.

Subsistence operations during December were conducted with a net loss of \$1,820.28, of which \$1,795.20 was on the Hotel Tivoli. The total number of meals served at line hotels was 172,923; at laborers' messes, 245,037; at the Hotel Tivoli, 9,839; grand total, 427,799 meals. Fourteen employees' line hotels and two restaurants; 12 messes for laborers, and the Hotel Tivoli were conducted.

Department of Civil Administration.

Courts.—In the circuit courts 75 civil and 40 criminal cases were disposed of, and in the district courts 54 civil and 420 criminal cases.

Police and prisons.—Arrests numbered 427 of whom 41 were women. Three convicts were committed to the penitentiary, 34 were discharged, and on December 31 there were 94 in confinement. The cost of guarding and subsisting the prisoners was \$2,869.09, and the value of their work was \$1,842.40. Twenty-six criminal characters were deported from the Canal Zone.

Posts, customs, and revenues.—Money order sales amounted to \$354,654.96. Postage receipts were \$10,094.11. Postal savings deposits amounted to \$118,689; withdrawals, \$169,445. Revenue collections amounted to \$23,297.31; court fines and fees, \$2,227.94. Thirty estates were settled, and 57 remained in course of settlement at the end of the month.

Fire protection.—Three fires occurred during the month, one of them causing a loss of \$50 to Government property.

Schools.—The net enrollment in the schools

for white children was 1,147; colored children, 1,161.

Department of Sanitation.

The total number of deaths from all causes among employees was 29 divided, as follows: Disease 22, and violence seven, giving an annual average per thousand of 5.24 and 1.67, respectively. Among employees during the month, deaths from the principal diseases were, as follows: Lobar pneumonia, three; malaria fever E.A., two; tuberculosis, eight, leaving nine deaths from all other diseases, and seven deaths from external violence.

The case of smallpox reported last month recovered and has been discharged from the hospital. No case of yellow fever, smallpox, or plague originated on or was brought to the Isthmus during the month.

Respectfully,

GEO. W. GOETHALS,
Chairman and Chief Engineer.

CANAL ZONE BIRD SPECIES.

Estimated that they Number about 900—Many Kinds of Hummingbirds.

From various sources short lists of the bird species of the Isthmus of Panama have been recorded from time to time, but prior to the construction of the Panama railroad such lists were neither complete nor authentic. Any scientific handling of the subject was left to the years succeeding the opening of the railroad in 1855. Since that time collectors have made considerable progress in recording the ornithological history of the Isthmus.

As to the number of the species, it is estimated that a larger variety is to be found within the limits of the Canal Zone than in any one state in the United States—about 900. Lion Hill, one of the settlements on the old line of the Panama railroad, now a small island in Gatun Lake, is said to have furnished more type species of birds than any one locality in the Americas. Mr. E. A. Goldman of the Biological Survey at Washington, has made two short collecting trips to Panama within the last few years, and procured about 300 different species of birds in the Canal Zone. Mr. L. L. Jewel, a private collector, from whom the following list was obtained, has recorded about 250 different species found in the immediate vicinity of Gatun.

Up to the present time there has been no published work on the ornithology of the Isthmus, but Mr. Robert Ridgeway's work on the birds of North and Central America, now in the course of publication, will contain practically all the authentic records as far south as the line of the Panama railroad. This work is purely scientific. The economic and popular side of local bird life has not yet been treated in any published work.

The following list is not complete, but it contains practically all authentic record of bird species in the Canal Zone territory. The nomenclature is after Ridgeway. All species that are winter visitors from the United States and the north are marked with an asterisk.

Family Fringillidae, or Sparrows.

1. *Astragalinus psaltria* croceus.....Central American gold-finch
2. **Spiza americana*.....Dickcissel
3. *Arremonops c. conirostris* Lafresnaye's sparrow
4. *Arremon aurantiostris* Orange-billed sparrow
5. *Volatinia jacarina* splendens.....Blue-black grassquit
6. *Tiaris olivacea* pusilla.....Mexican grassquit
7. *Sporophila grisea* schistacea.....Slate-colored seed-eater

(Only one specimen known—taken at Lion Hill about 1862.)

8. *Sporophila minuta* minuta.....Minute seed-eater
9. *Sporophila gutturalis*.....Yellow-bellied seed-eater
10. *Sporophila aurita*.....Hick's seed-eater
11. *Ammausospiza concolor*.....Cabanis's seed-eater (One record taken at Paraiso in 1867)
12. *Cyanocampa concreta* cyanescens.....Panama blue grosbeak
13. *Oryzoborus lunereus*.....Lesser rice grosbeak
14. **Zamelodia ludoviciana*.....Rose-breasted grosbeak
15. *Pitylus grossus*.....Slate-colored grosbeak
16. *Caryothraustes polio-gaster* scapularis.....Lesser bishop grosbeak
17. *Salpator atriceps* lacertus.....Panama black-headed saltator
18. *Salpator intermedius*.....Panama buff-throated saltator
19. *Salpator striaticeps* isthmicus.....Panama striped saltator

Family Tanageridae or Tanagers.

20. *Euphonia fulvica*.....Fulvous-vented euphonia
21. *Euphonia luteicapilla*.....Yellow-crowned euphonia
22. *Euphonia minuta* humilis White-vented euphonia
23. *Euphonia crassirostris*.....Thick-billed euphonia
24. *Tangara javina*.....Lavinia's tanager
25. *Tangara larvata* fanny.....Mrs. Wilson's tanager
26. *Tangara inornata*.....Plain tanager
27. *Thraupis cana* cana.....Blue tanager
28. *Thraupis palmarum* melanoptera.....Black-winged tanager
29. **Piranga rubra* rubra.....Summer tanager
30. **Piranga erythromelas*.....Scarlet tanager
31. *Heterospingus rubrifrons* Lawrence's tanager
32. *Ramphocelus icteronotus* Yellow-rumped tanager
33. *Ramphocelus luciana*.....Bonaparte's tanager
34. *Ramphocelus dimidiatus* isthmicus.....Crimson-backed tanager
35. *Tachyphonus rufus*.....Boddaert's tanager
36. *Tachyphonus luctuosus*.....White-shouldered tanager
37. *Tachyphonus delatrii*.....Tawny-crested tanager
38. *Eucometis cristata*.....Gray-crested tanager
39. *Phoenicotheraps f. fuscauda*.....Dusky-tailed Ant. tanager
40. *Mitrospingus cassial*.....Cassia's tanager

Family Icteridae, or Troupials (Blackbirds and Orioles.)

41. *Zarhynchus w. wagleri*.....Wagler's oropendola
42. *Gymnostinops montezuma*.....Montezuma oropendola
43. *Ostinops decumanus*.....Crested oropendola
44. *Cacicus vitellinus*.....Lawrence's cacique
45. *Cacicus microbrychus* Small-billed cacique
46. *Amblycercus holosericeus* Prevost's cacique
47. *Cassidix oryzivora* violacea Rice grackle
48. *Megaquiscalus major* macrourus.....Great-tailed grackle
49. **Icterus spurius*.....Orchard oriole
50. *Icterus gairaudii*.....Giraud's oriole
51. *Icterus mesomelas* salvini Salvini's oriole
53. **Icterus galbula*.....Baltimore oriole
53. *Leistes militaris*.....Red-breasted blackbird
54. **Dolichonyx oryzivorus* Bobolink

Family Coerebidae, or Honeycreepers.

55. *Chlorophanes spiza* exsul Northern green honey-creeper
56. *Cyanerpes cyaneus*.....Blue honey-creeper
57. *Cyanerpes lucidus* isthmicus.....Shining honey-creeper

58. *Dacnis cayana ultramarina*..... Ultramarine honey creeper
59. *Dacnis veauista*..... Scarlet-thighed honey-creeper
60. *Coereba mexicana*..... Mexican banana-quit
- Family Mniotiltidae, or Wood Warblers.*
61. **Mniotilta varia*..... Black and white warbler
62. **Protonotaria citrea*..... Prothonotary warbler
63. **Helminthophila chrysop-tera*..... Golden-winged warbler
64. **Helminthophila pere-gritia*..... Tennessee warbler
65. **Dendroica a. aestiva*..... Yellow warbler
66. *Dendroica erithachorides*..... Panama yellow warbler
67. **Dendroica maculosa*..... Magnolia warbler
68. **Dendroica coronata*..... Myrtle warbler
69. **Dendroica virens*..... Black-throated green warbler
70. **Dendroica rara*..... Cerulean warbler
71. **Dendroica blackburniae*..... Blackburnian warbler
72. **Dendroica pensylvanica*..... Chestnut-sided warbler
73. **Dendroica castanea*..... Bay-breasted warbler
74. **Oporornis formosa*..... Kentucky warbler
75. **Oporornis philadelphia*..... Mourning warbler
76. **Oporornis tolmiei*..... Macgillivray's warbler
77. **Seiurus aurocapillus*..... Oven-bird
78. **Seiurus motacilla*..... Louisiana water-thrush
79. **Seiurus n. noveboracen-sis*..... Water-thrush
80. **Wilsonia mitrata*..... Hooded warbler
81. **Wilsonia canadensis*..... Canadian warbler
82. **Setophaga ruticilla*..... American redstart
83. *Basileuterus rufifrons me-sochrysus*..... Scater's warbler
84. *Basileuterus semicervinus veraguensis*..... Buff-rumped warbler
85. *Rhodinocichla rosea ex-imia*..... Panama thrush-warbler
- Family Motacillidae, or Wagtails and Pipits.*
86. *Anthus parvus*..... Panama pipit
- Family Hirundinidae, or Swallows.*
87. *Prognechalybeachalybea*..... Grey-breasted martin
88. **Petrochelidon lunifrons*..... Lesser cliff swallow
89. *Stelgidopteryx ruficollis uropygialis*..... Panama rough-winged Swallow
90. *Neochelidon tibialis*..... White-thighed swallow
91. *Pygochelidon cyanoleuca*..... Blue-and-white swallow
92. **Riparia riparia*..... Bank swallow
93. **Hirundo erythrogastra*..... Barn swallow
94. *Iridoprocne albilinea*..... Mangrove swallow
- Family Ampelidae, or Waxwings.*
95. **Ampelis cedrorum*..... Cedar waxwing
- Family Vireonidae, or Vireos.*
96. *Vireosylva f. flavoviridis*..... Yellow-green vireo
97. **Vireosylva olivacea*..... Red-eyed vireo
98. **Laniivireo flavifrons*..... Yellow-throated vireo
99. *Pachysylva decurtata*..... Gray-headed vireo
100. *Pachysylva a. auranti-frons*..... Lawrence's vireo
101. *Pachysylva viridiflava*..... Yellow-green pachysylva
102. *Vireolanus pulchellus vi-ridiceps*..... Panama shrike-vireo
- Family Corvidae, or Crows and Jays.*
103. *Cyanocorax affinis zeledoni*..... Talamanca jay
- Family Troglodytidae, or Wrens.*
104. *Heleodytes albobrun-neus*..... White-headed cactus wren
105. *Phlegopodius fasciata-ventris albigularis*..... Panama black-bellied wren
106. *Phlegopodius hypery-thrus*..... Tawny-bellied wren
107. *Troglodytes musculus inquietus*..... Panama house wren
108. *Hemecorhina prostheleu-ca pittieri*..... Pittier's wood wren
109. *Thryophilus c. casta-nous*..... Bay wren
110. *Thryophilus rufalbus castanonotus*..... Chestnut-backed wren
111. *Thryophilus g. galbrai-thii*..... Galbraith's wren
111. *Thryophilus modestus elutus*..... Panama wren
113. *Microcerulus luscini-a*..... Panama nightingale wren
114. *Leucopis lawrencii*..... Lawrence's musician wren
- Family Sylviidae, or Warblers.*
115. *Polioptila supercilialis*..... Lawrence's gnatcatcher
- Family Turdidae, or Thrushes.*
116. **Hylocichla ustulata evinsonii*..... Olive-backed thrush
117. **Hylocichla f. fuscescens*..... Wilson's thrush
118. *Planesticus obsoletus*..... Lawrence's thrush
119. *Planesticus grayi casius*..... Bonaparte's thrush
- Family Mimidae, or Mocking Birds.*
120. **Galeoscoptes carolin-en-sis*..... Cat-bird
- Family Tyrannidae, or Flycatchers.*
121. *Copurus leucotis*..... White-backed copurus
122. *Onychorhynchus mexi-caus fraterculus*..... Colombian royal fly-catcher
123. *Oncostoma cinereigulare*..... Bent-billed flycatcher
124. *Oncostoma olivaceum*..... Lawrence's bent-billed flycatcher
125. *Todirostrum cinereum finitimum*..... Northern tody-flycatcher
126. *Todirostrum nigriceps*..... Black-headed tody-flycatcher
127. *Todirostrum schistacei-ceps*..... Slate-headed tody-flycatcher
128. *Atalotriccus p. pilaris*..... Pygmy fly-catcher
129. *Placostomus supercilialis*..... Lawrence's spade-bill
130. *Craspedopron aequinoctialis*..... Equinoctial fly-catcher
131. *Rhynchocyclus flavo-olivaceus*..... Yellow-olive fly-catcher
132. *Rhynchocyclus margin-at-us*..... Yellow-margined fly-catcher
133. *Rhynchocyclus cinerei-ceps*..... Gray-headed fly-catcher
134. *Myiopagis placens ac-cola*..... Panama placid fly-catcher
135. *Tyranniscus vilissimus parvus*..... Lesser paltry fly-catcher
136. *Campostoma pusillum flaviventre*..... Yellow-bellied camposto-toma
137. *Sublegatus glaber*..... Smooth fly-catcher
138. *Elaenia martinica sub-pagana*..... Northern elaenia
139. *Elaenia c. chiriquensis*..... Lawrence's fly-catcher
140. *Legatus albigollis*..... Striped fly-catcher
141. *Myiozetetes c. cayanen-sis*..... Cayenne fly-catcher
142. *Myiozetetes texensis co-lumbianus*..... Colombian fly-catcher
143. *Myiozetetes grandis*..... Gray-capped fly-catcher
144. *Pipromorpha oleaginea parca*..... Bang's pipromorpha
145. *Mionectes o. olivaceus*..... Olivaceous mionectes
146. *Leptopogon pileatus*..... Brown-capped leptopogon
147. *Leptopogon flavovirens*..... Yellow-green leptopogon (One taken near Panama in 1862.)
148. *Capsiempis flavicola*..... Yellow fly-catcher
149. *Cnipodectes subbrunne-us*..... Brown fly-catcher
150. *Cnipodectes minor*..... Little brown fly-catcher
151. *Myiobius barbatus atri-caudus*..... Black-tailed myiobius
152. *Myiobius xanthopygus sulphureipygus*..... Sulphur-rumped myiobi-us
153. *Terenotriccus erythrurus fulvularis*..... Fulvous-throated fly-catcher
154. **Myiochanes virens*..... Wood pewee
155. **Myiochanes r. richard-sonii*..... Western wood pewee
156. *Myiochanes brachytar-sus*..... Short-legged wood pewee
157. *Myiophobus fasciatus furiosus*..... Bran-colored fly-catcher
158. **Empidonax flaviventris*..... Yellow-bellied fly-catcher
159. **Empidonax virescens*..... Acadian fly-catcher
160. **Empidonax t. traillii*..... Traill's fly-catcher
161. **Empidonax alburnum*..... Alder fly-catcher
162. **Empidonax minimus*..... Least fly-catcher
162. **Myiarchus cineritus*..... Crested fly-catcher
163. **Myiarchus ferox panamensis*..... Panama fly-catcher
164. *Myiarchus nigriceps*..... Black-crested fly-catcher
165. *Myiodynastes luteivent-ris*..... Sulphur-bellied fly-catcher
166. *Myiodynastes maculatus nobilis*..... Noble fly-catcher
167. *Megarynchus pitangua mexicanus*..... Boat-billed fly-catcher
168. *Coryphocircus albovit-tatus*..... White-ringed fly-catcher
169. *Pitangus lictor*..... Lictor fly-catcher
170. **Tyrannus tyrannus*..... King-bird
171. *Tyrannus melancholicus satrapa*..... Lichtenstein's king-bird
172. *Tyrannus d. dominican-sis*..... Gray king-bird
173. *Muscivora tyrannus*..... Swallow-tailed fly-catch-er
- Family Pipridae, or Manikins.*
174. *Manacus vitellinus*..... Gould's manikin
175. *Chloropion lanceolata*..... Sharp-tailed manikin
176. *Pipra mentalis ignifera*..... Yellow-thighed manikin
177. *Pipra lutitina*..... Velvety manikin
178. *Scotothorus amazonus stenorrhynchus*..... Russet manikin
179. *Laniocera rufescens*..... Rufous manikin
- Family Cotingidae, or Cotingas.*
180. *Cotinga nattererii*..... Natterer's cotinga
181. *Microticercus brunnea-pillus*..... Brown-capped tyrannu-let
182. *Tyrannulus elatus regu-loides*..... Riker's yellow-crowned tyrannulet
183. *Elainopsis gaimardii macilvini*..... Macilvaine's cotinga
184. *Attila c. citreopygus*..... Slater's cotinga
185. *Syrictes albobiceps*..... Panama cotinga
186. *Lipaugus b. holerythrus*..... Rufous cotinga
187. *Lathria unirufa clara*..... Panama lathria
188. *Pachyrhampus poly-chropterus cinereiventris*..... Gray-bellied becard
189. *Pachyrhampus dorsalis Bogota*..... becard
190. *Pachyrhampus cinereus cinereus*..... becard
191. *Pachyrhampus cinna-momeus*..... Cinnamon becard
192. *Platyparis homochrous*..... One-colored becard
193. *Erator albitorques*..... Fraser's erator
194. *Tityra semifasciata cos-taricensis*..... Costa Rican tityra
195. *Querula purpurata*..... Fruit crow
- Family Formicoriidae, or Ant-birds.*
196. *Cymbilaimus lineatus fasciatus*..... Fasciated ant-sbrake
197. *Taraba t. transandana*..... Holland's ant-sbrake
198. *Thamnomphus radiatus nigricristatus*..... Black-crested ant-sbrake
199. *Erirotus punctatus atri-nucha*..... Slaty ant-sbrake
200. *Myrmotherula surina-mensis*..... Surinam ant-wren
201. *Myrmotherula pygmaea*..... Pygmy ant-wren
202. *Myrmopagis melaena*..... Black ant-wren
203. *Myrmopagis fulvivent-ris*..... Lawrence's ant-wren
204. *Microtopias boucardi virgata*..... Panama ant-wren
205. *Ramphocaeus r. rufi-ventris*..... Northern long-billed ant-wren
206. *Microbatas cinereivent-ris semitorquatus*..... Half-collared ant-wren

CHANGES IN ORGANIZATION.

Atlantic and Fifth Divisions Cease to Exist February 1—Brief Review of Their Activities.

Another important step in the consolidation of the remaining work on the Canal will be taken on February 1, when the Atlantic and Fifth Divisions will be abolished. The Atlantic Division is the last of the three great construction organizations, among which, on July 1, 1908, the Canal work was divided. The Pacific Division, which included all that territory south of the north end of Pedro Miguel Lock, passed out of existence on December 12, 1912, and the Central Division, with a territory extending from Pedro Miguel Lock to Gatun Dam, was abolished on October 10, 1913, the date of the blowing up of the Gamboa dike. When the Atlantic Division was first created, its limits comprehended everything north of Tabernilla, a village in the lake area abandoned with the rise of water. On December 12, 1908, this territory was reduced by the assignment to the Central Division of all territory between Pedro Miguel Lock and the south toe of Gatun Dam. This has been the only change in the boundaries of the three divisions since their creation.

Upon the organization of the Atlantic Division, which was the successor on the Atlantic side of the old Department of Locks and Dams, and Excavation and Dredging, Lieut.-Col. (then Major) William L. Sibert was appointed division engineer, and established his headquarters at Gatun. Maj. Chester Harding was made assistant division engineer, and later, Maj. George M. Hoffman was assigned to the building of Gatun Dam and Spillway, Maj. James P. Jervy to the masonry work of the locks, and Maj. Edgar Jadwin to the dredging operations in the Atlantic entrance, work on the west breakwater, and the sand and stone transportation service between Porto Bello and Nombre de Dios and Gatun Dock. This arrangement continued, with the exception of one or two changes in the working heads, until May 1, 1913, on which date all dredging was consolidated under the Sixth Division.

During the life of the Atlantic Division, and under Lieut.-Col. William L. Sibert, Gatun Locks, Dam, and Spillway were mostly built, although the early preparatory work was partly accomplished under the old Department of Locks and Dams, of which Lieut.-Col. (then Major) Sibert was the Head. The Gatun Dam, which stretches across the lower valley of the former Chagres River for a distance of one and one-half miles, and to a height of 105 feet above mean sealevel, was completed on December 19, 1913. The wet fill, amounting to 10,124,082 cubic yards, was completed in September, 1912; the dry fill amounts to 11,949,069 cubic yards, or a total for the entire dam of 22,073,151 cubic yards. The masonry work at the locks and spillway was practically completed in September, 1913, the remaining portion at the locks consisting principally of small lots here and there, which are placed as the work of the machinery installation is advanced. On October 15, 1913, the remaining concrete work at the locks and spillway was taken over by forces of the First Division, and since that time the activities of the Atlantic Division have been chiefly confined to completing the backfill at the locks, cleaning up around the locks, surfacing the Dam, completing the Gatun-Mindi levee, continuing

the work of armoring the west breakwater, and preparatory work on the proposed east breakwater. Within the past few months the Atlantic Division force has been materially reduced; on January 14, 1914, there were 125 gold employees and 1,012 silver employees on its pay roll, as compared with 282 gold employees and 3,000 silver employees as shown by the force report of June 25, 1913.

As announced in the official circular of the Chairman and Chief Engineer of January 20, the breakwater construction and the operation of the Porto Bello quarry in the production of armor rock for the west breakwater, will be continued as a part of Second Division operations, while the remaining work at Gatun Dam, and the dike at Caño saddle, will be under the supervision of the Chairman and Chief Engineer. The west breakwater should be completed about April 15, 1914.

The Fifth Division, which will also be abolished on February 1, was created when the Pacific Division went out of existence on December 12, 1912. The work of the old Pacific Division was divided, the Assistant to the Chief Engineer, Mr. H. H. Rousseau, in charge of the Second Division, assuming the direction of the work at the Pacific terminals, including dry dock, shops, docks, and coaling station. At the same time, Mr. W. G. Comber, resident engineer of the Sixth Division, was charged with dredging operations in the Pacific channel, the operation of the shipways at Balboa, and the Punta Chame sand service. This left Mr. H. O. Cole, resident engineer, who was appointed resident engineer in charge of the newly created division, with the task of completing the construction of Pedro Miguel and Miraflores Locks, the construction of Miraflores Spillway, dry excavation south of Pedro Miguel Lock, the operation of Ancon quarry, the municipal work within the limits of the old Pacific Division, the electrical department, the transportation department, and the division office. When the sluicing plant at Gold Hill was established, its management was also turned over to the Fifth Division. The municipal work of the Fifth Division, and all other divisions, was transferred to the new Division of Municipal Engineering, under Mr. George M. Wells, as resident engineer, on July 16, 1913.

Under the new arrangement, the Gold Hill sluicing plant, and the operation of Ancon quarry, will be directly under the Chairman and Chief Engineer. The present offices of the division at Corozal will probably be abandoned, and the present office force will be transferred as far as possible to other divisions.

Death of Ricardo M. Arango.

Ricardo Manuel Arango, consulting engineer for the Republic of Panama, died at his home in Panama City on Saturday, January 24, after a prolonged illness. He was the son of José Augustin Arango, one of the members of the original junta of separation, who died May 10, 1909, and was graduated as civil engineer from the Rensselaer Polytechnic Institute at Troy, N. Y., in 1887. He then returned to Panama and shortly afterward received an appointment as assistant engineer with the Panama Railroad Company. On September 1, 1904, soon after the Americans took up the work of municipal improvement in the cities of Panama and

Colon, he was appointed consulting engineer in the service of the Canal Commission, and on March 1, 1905, he was made assistant engineer. He was promoted to division engineer on June 2, 1905, and upon the organization of the old Bureau (afterward Division) of Meteorology and River Hydraulics on June 14, 1905, he was placed in charge of this department of the work, remaining there until the division was abolished on October 12, 1908. His service with the Canal Commission terminated on November 29, 1908, and within a short time afterward he was appointed Minister Plenipotentiary and Envoy Extraordinary, for the Republic of Panama, to the Court of St. James, a post he was compelled to relinquish about a year later on account of poor health. On his return to Panama, he was appointed consulting engineer for the Panama Government, a position he filled up to the time of his death. He was a member of the American Society of Civil Engineers, the Instituto de Ingenieros de Chile, the Seismological Society of America, and the National Geographical Society. He is survived by his wife, who was Miss Maria Lewis, and five children.

Immigrant Inspector Examination.

An examination is scheduled to be held at Empire, probably on February 22, for immigrant inspector. The supply of announcements received was limited and has been distributed to the clubhouses at Cristobal, Gatun, Empire, Pedro Miguel, Corozal, and Balboa, and the post-offices at Culebra, Paraiso, Miraflores, Ancon, and Balboa; full information may be obtained from the announcement.

Applications should be secured from and filed with this office. Applications will not be received after February 14; this date may be changed if necessary.

The optional subject of stenography and typewriting will be given probably on February 23.

A copy of the immigration and Chinese exclusion laws will be sent to each person whose application is approved.

ISTHMIAN CIVIL SERVICE BOARD.

CULEBRA, C. Z., January 27, 1914.

Meeting of Canal Builders.

A meeting of the Association of the Panama Canal Builders will be held in the Corozal Y. M. C. A., on Friday evening, January 30, 1914, beginning at 8 o'clock sharp.

At this time the question of longevity pay will be discussed, with the view of ascertaining the attitude of as many individuals as possible. After the meeting, a representative committee will be appointed to furnish information and to advise the association in its endeavor to secure back longevity pay for all gold employees.

The question of changing the style of the certificate will be taken up also.

All gold employees, whether members of the association, or not, are requested to be present at this meeting, if they are interested and desire to attend.

FRANK T. HAMLIN,
Secretary-Treasurer.

COROZAL, C. Z., January 28, 1914.

Will the lady who took a mandarin coat by mistake, from the ladies' dressing room, at the Tivoli dance, on the evening of January 24, please communicate with E. S. Van Brunt, Culebra, C. Z.

GATUN CABLEWAYS.

Two Remaining Strands Being Removed to Prevent Obstruction to Vessels.

After the practical completion of Gatun Locks, three of the four duplex cableways extending over the locks, which had been used for handling most of the concrete and other material placed in the lock walls and floors, were taken down. The fourth, which was the upper set, was left intact for the transportation of material to the west side of the locks after the removal of rail connections on September 2. There being no further need of the cableways, and as they would interfere with the passage through the locks of vessels having masts extending more than 71 feet above the water level, the two remaining strands are now being removed. The work of taking them down began on January 26. No instructions have been given to dismantle the 85-foot operating and tail towers, situated on the backfills, between which the strands were supported. The one single and two duplex cableways used for unloading material west of the locks, are left in place; there is no present occasion for their removal, though they have about finished the reclamation of surplus rock and sand from the lock storage piles for use at the spillway mixing plant.

The cableways of Gatun, over the locks and on the west side, were furnished by the Lidgerwood Manufacturing Company of New York for \$309,000, under a contract let in August, 1908. The first of the strands over the locks was placed in service in April, 1909. Each strand was 2½ inches in diameter, extended a distance of 800 feet between towers, with an operating length of 670 feet, with greatest vertical lift of 170 feet, and capacity of handling not less than six tons at a time in at least 20 trips an hour over the full operating length.

Panama Pinball.

A new game has been originated by H. Darnell Brittin, physical director of the Cristobal Y. M. C. A., which has been given the name of "Panama Pinball." The game is suitable for the playground or the gymnasium, and requires two teams, each team composed of eight players. It has been introduced in the boys' gymnasium class of the Cristobal clubhouse, and is played in the public schools at Winnetka, Ill. The rules of the game, with accompanying diagram, are, as follows:

Each team consists of two pin forwards, one pin guard, one center, two forwards, and two guards. (See diagram for positions of players).

Object—To knock over opponent's ten pin or Indian club with basketball.

Rules—A. A. U. basketball rules will govern, with the following added:

Pin forwards and pin guards are not allowed to step over the lines of their respective boxes. The pin guard is not allowed to step inside the pin circle. The forwards and center are not allowed to step over the 8-foot mark. Stepping over a line by any player constitutes a foul.

The pin forwards are the only players eligible to knock over the opponent's pin or Indian club. A try for a pin goal by another player constitutes a foul.

A pin or Indian club knocked over by a pin guard (either with ball or person) counts two points for the opposing team. Play is resumed at center by the referee after this offence.

The pin forward is allowed to hold the ball but three seconds. (The referee can count three slowly). He can try for a pin goal, can pass the ball to the other pin forward, or pass the ball to one of his team mates in the playing field.

But three consecutive passes are allowed between the pin forwards (example, R. P. F. to L. P. F.—1—L. P. F. to R. P. F.—2—R. P. F. to L. P. F.—3). The pin forward must then make a try for a pin goal, or

pass the ball to one of his team mates in the playing field. Any infringement of the above constitutes a foul.

A goal can be made by "Back-boarding" *i. e.*, hitting the wall with the ball so that it rebounds against the pin or Indian club.

A goal counts two points.

When a foul is committed, a try is made from center, by rolling the ball in an endeavor to knock the pin or Indian club over. If successful, one point is scored.

if a miss, play goes on as usual. The ball must not be interfered with when trying for a foul. If the pin or Indian club is knocked down by the ball rebounding from the wall it does not count and play is resumed at center by the referee.

Time of halves, 10 or 15 minutes.

Obituary.

George Edward Arthur, the son of Mr. Allan Arthur, died at his home at Paraiso on January 18, 1914. He was six years of age, and had been on the Isthmus since his birth.

Mrs. Clinton McPherson, the wife of Clinton McPherson, living at Pedro Miguel, died in Ancon Hospital on January 23, 1914. She was 43 years of age, and had been on the Isthmus six years.

Miscellaneous Notes.

House No. 74 at Ancon, situated near the fire station, has been entirely turned over to the bachelor women employees. Formerly, the upper floor only was thus occupied, a family having the lower part. An increase in the number of bachelor women employees at the Pacific end has made this arrangement necessary. House No. 105 had been used recently to accommodate those who could not be housed at No. 74.

Mr. H. S. Whiting has been employed by the Canal Commission as illuminating engineer, and will have charge of the designs for all interior and exterior illuminating in the permanent buildings, as well as public lighting arrangements at the permanent town-sites.

The tug *La Boca*, which had been in dry dock at Cristobal for a few days, was locked up again into the lake on Sunday, January

25. The tug *Gatun*, used in the Culebra Cut dredging service, was locked down on the same day, and has been placed in dry dock for minor repairs.

Lieut.-Col. Chas. F. Mason, Mr. H. A. A. Smith, and Mr. C. A. McIlvaine, have been appointed members of the Corozal Farm Board, with Lieutenant-Colonel Mason as chairman. The board will have charge of all matters relative to the operation of the farm.

Improved Order of Red Men.

All Red Men are cordially invited to be present at Ancon Hall on the thirty-first sleep of cold moon. Corn and venison.

R. H. HULL, *Chief of Records.*

PARAISO, C. Z., January 23, 1914.

I. B. of S. S. and D. M.

The regular meeting of Local No. 19, International Brotherhood of Steamshovel and Dredge Men, will be held in Ancon lodge hall on Sunday, February 1, at 1.30 p. m. All members are requested to attend.

Order of Isthmian Conductors.

There will be a regular meeting of the Order of Isthmian Conductors at Ancon lodge hall on Sunday, February 1, at 9.30 a. m. All members are urgently requested to be present as matters of importance will be brought before the meeting. GEO. B. ALLEN, *Secretary.*

COROZAL, C. Z., January 24, 1914.

Monitors Cutting Into Cucaracha Slide.

The two hydraulic monitors which have been excavating earth and rock from the southeast slope of Gold Hill, in rear of Cucaracha slide, have advanced to the edge of the slide and will soon be sluicing material, now involved in the slide, back into the valley toward which Gold Hill slopes on the east. The men at the monitor nearest Gold Hill are working directly beside the sheer drop which marks the present outer edge of the break, and when they have cut through a narrow section will be in the slide and able to wash away to the rear a considerable portion of it. In order to go in as low as possible, the monitors began their advance at elevation 425 feet above sealevel, which is about 160 feet below the rims of the saddles through which they are cutting. They uncovered on the way heavy masses of rock, which will have to be broken up partly by blasting, in order to make channels for the flumes. Drilling for this purpose is now in progress. The rock masses are so large and of such firm material that it is believed they mark a definite outer limit to the breaking back of the slide, at the points where they occur.

Two other monitors operated by the Gold Hill sluicing plant are removing material from the top of the east Culebra slide, and loose earth on the northeast slope of Gold Hill, which has lately become involved in the slide. The plant began operations on June 17, 1913, and, therefore, has been in use for over seven months. Up to January 1, it excavated 732,074 cubic yards of material, and since that time has removed about 100,000 cubic yards more, making an aggregate of about 832,074 cubic yards, of which approximately 40 per cent has been rock.

OFFICIAL CIRCULARS.

Acting Chairman, Board of Local Inspectors.

CULEBRA, C. Z., January 23, 1914.

CIRCULAR No. 522:

Capt. Hugh Rodman, U. S. N., will act as chairman of the Board of Local Inspectors during the absence, on leave, of Lieut.-Col. Wm. V. Judson, U. S. A., effective this date.

GEO. W. GOETHALS,
Chairman and Chief Engineer.

Observance of Regulations Regarding Timekeeping and Requests for Coupon Books.

CULEBRA, C. Z., January 22, 1914.

CIRCULAR No. 521:

Some of our foremen, part of whose duty it is to keep time for the men under their orders and to see that the men are supplied with coupon books in accordance with the regulations, do not appear to have a proper sense of responsibility regarding these duties.

Each man who enters time in a time book must make it his personal concern to see that the time book is in his hands early in the morning and that it is forwarded to the time office promptly at the close of business. If he does not receive his time book promptly in the morning, he must take immediate steps to find out where it is and get it.

Foremen will also make it their business to see that the men under their charge comply with the regulations regarding requests for coupon books, which are pasted in each time book. Requests must be forwarded as promptly as the regulations permit.

Hereafter, a written reprimand will be placed on the record of any employee who neglects his duty in the above respects, and these reprimands will constitute sufficient reason for selecting the employee for discharge when the force is reduced or reorganized.

GEO. W. GOETHALS,
Chairman and Chief Engineer.

Surveys for Retired Equipment.

CULEBRA, C. Z., January 24, 1914.

TO ACCOUNTABLE OFFICERS:

The question of retiring locomotives from service has caused considerable confusion recently on account of the failure of accountable officers to put through the necessary survey papers.

Traveling Engineer Craig has been instructed to give this matter attention, and I have authorized him to instruct accountable officers to submit surveys for such equipment as in his opinion should be retired from service. Please be governed accordingly.

GEO. W. GOETHALS,
Chairman and Chief Engineer.

Involving of Charges for Locomotive Service.

CULEBRA, C. Z., January 23, 1914.

CIRCULAR No. 169-Q:

Effective January 1, 1914, locomotive service furnished by the transportation division of the Chief Engineer's office will be invoiced against various departments and divisions of the Commission, including the Government of the Canal Zone, at the actual cost of the service for the month as ascertained by the cost sheets.

No change will be made in the rates for engine service furnished the Panama railroad and individuals and companies, nor in the rates for engine service furnished by the Atlantic Division.

GEO. W. GOETHALS,
Chairman and Chief Engineer.

List of Nonexpendable Property.

CULEBRA, C. Z., January 21, 1914.

ALL ACCOUNTABLE OFFICERS:

It is contemplated that a standard list of nonexpendable property will be published in the near future, and, in order to compile such a list it is respectfully

requested that you have your property clerks go over their property returns and prepare a list of what should be classed as nonexpendable property, you to forward this list to this office with such comments and recommendations as you may desire to make.

This list should be prepared in alphabetical order, on paper 8 1/2 by 10 1/2 inches, in double space typewriting, two columns to a sheet. It is further requested that lists be submitted to this office on or before January 31, 1914.

By direction of the Chairman.

C. A. MCLVAINE,
Chief Clerk.

Derail at Cucaracha Spur.

PANAMA RAILROAD COMPANY,
OFFICE OF GENERAL SUPERINTENDENT,
Colon, R. P., January 13, 1914.

G. S. BULLETIN No. 37:

All concerned.—A derail pipe connected to the switch stand will be installed at Cucaracha spur, or what is sometimes called the Chicago House Wrecking Company's spur, about one mile north of Bridge 57 1/2, and put in service at 5 p. m., Wednesday, January 14, 1914.

F. MEARS,

General Superintendent.

Installation of Derails, P. R. R.

PANAMA RAILROAD COMPANY,
OFFICE OF GENERAL SUPERINTENDENT,
Colon, R. P., January 26, 1914.

G. S. BULLETIN No. 42:

All concerned.—Two derails, both of which are pipe-connected to the switch stand will be installed and placed in service 12 o'clock noon Wednesday, January 28, 1914, on the incline track leading to the settling plant at North Cabin. The main line switch stand must be thrown for the turnout, in order that a train may enter the main track from either of these two tracks.

F. MEARS,

General Superintendent.

Notice to Water Users, Colon and Cristobal.

GATUN, C. Z., January 27, 1914.

Water will be shut off from Colon and Cristobal on Sunday, February 1, from 7 a. m., until 2 p. m., on account of change in installation of Venturi meter.

GEO. M. WELLS, Resident Engineer,
In charge of Division of Municipal Engineering.

Supplies for the Canal.

The following steamers with supplies for the Isthmian Canal Commission and Panama Railroad Company arrived at the ports of Colon and Cristobal during the week ending January 24:

Advance, January 19, from New York, with 474 crates roofing tile, 90 crates roofing tile, 38 cases woodwork, 18 cases window glass, for Administration Building, Balboa; 192 pieces sewer pipe, for Division of Municipal Engineering; 157 bundles reinforcing steel, four cases electrical machinery, 31 reels cable for First Division; 39 packages structural material, for fortifications; 10 spring frogs, for Panama railroad; 10 boxes malleable iron, seven reels cable, for Mechanical Division 45 kegs horseshoes, 12 cases rubber packing, 47 barrels coal tar, 20 cases putty, 20 barrels soda ash, 20 cases stationery, 14 barrels salt, 17 packages air brake material, 721 steel plates, for stock, and a miscellaneous cargo, the whole consisting of 2,190 packages, weighing 368 tons.

Emil Boas, January 19, from New York, with 32 kegs bolts and nuts, for First Division; 352 steel rods and turnbuckles, for Second Division; seven reels cable, for Panama railroad; one case electrical material, for Mechanical Division; 200 cases soap polish, 22 kegs machine bolts, for stock.

Almirante, January 21, from New York, with 16 cases castings, 37 cases electrical machinery, 33 reels cable, 42 boxes structural material, 98 packages

structural material, for First Division; two reels cable, for Mechanical Division; 20 pieces steel plates, for Sixth Division; 20 cases varnish, nine packages plumbing material, 62 steel angles, for stock.

Abangorez, January 22, from New Orleans, with 32 pieces plumbing fittings, for Division of Municipal Engineering; 182 pieces oak lumber, for Atlantic Division; 63 pieces oak lumber, for stock.

Carlago, January 23, from New Orleans, with one box brass valves, 84 bales cotton waste, for stock.

Colamarez, January 24, from New York, with 39 cases electrical machinery, three reels cable, for First Division; three reels cable, five reels cable, 17 packages electrical material, for Mechanical Division; 24 packages structural material, for fortifications; 99 bundles shovels, for stock.

Rainfall, Jan. 1 to Jan. 24, 1914, Inclusive.

COMMISSION CLUBHOUSES.

Activities of the Young Men's Christian Association.

GENERAL.

The moving picture schedule for the week February 2 to 7 is, as follows: Monday, Empire; Tuesday, Corozal and Balboa; Wednesday, Gatun; Thursday, Culebra; Friday, Pedro Miguel; Saturday, Cristobal.

COROZAL.

High scores in bowling for the past week were, as follows: Ruggles, 101; Ragan, 107, 100; Beall, 101, 100; Parkis, 108, 110, 100, 115; Taylor, 104; Sims, 109, 100; Smith, 115; Safferstein, 100; Davis, 105.

About 300 hundred people were present to see the moving pictures on Saturday, January 24, when a 2-reel feature "The millionaire cowboy" was shown. Miss Lindley, accompanied by Miss Otis, sang two solos.

Moving picture dates have been exchanged with Pedro Miguel for this week—Corozal, Wednesday; Pedro Miguel, Friday.

CULEBRA.

One hundred and fifty men attended the "Smoker" on Friday night, January 23. The following program was given: Selection by Davis' orchestra; moving pictures, "How Fatty made good"; black face and comedy act by Emery and Shubert; selections by the Culebra tropical instrumental tribulation trio, composed of Messrs. Ramsey, Sullivan, and De La Mater; "Every little bit added" sung in concert; moving picture, "The skuli"; solo by Mr. Cantor; fancy dancing by Mr. Brittin; song "Peg 'my heart," sung in concert; singing act by Mr. Schaeffer; fencing exhibition by Messrs. Brittin and Cantor; song "When it's apple blossom time in Normandy," sung in concert; moving picture "The landlord and his family"; popular songs by Shubert; "The trail of the lonesome pine," sung in concert. The pianist for the evening was Mr. C. C. Pearsall. Ham and cheese sandwiches, home made cake, coffee, and cigars were served.

The following scores were bowled during the week: Perkins, 103; Schneck, 105, 102, 103, 104; Case, 101, 103; Hansli, 101, 100; Chadbourn, 101; Davis, 112, 103, 123; Koperski, 102; Jefferies, 110; Kiernan, 115, 107.

A set of Baltimore rubber band duckpins and balls have been added to the bowling alley equipment. A local tournament will be begun, and all are invited to get into practice.

EMPIRE.

Mr. Smith of Empire, who is representing the Empire clubhouse in the isthmian chess tournament, has won five games and lost but one; he has now two more games to play. On Wednesday, January 21, he played Mr. DuBois of Cristobal and won both games, and on Saturday, January 24, he played Mr. DuBois of the Culebra club, and won both games. Mr. Smith will play Mr. Logan of Gatun on Saturday, January 31, at Empire.

All those having games to bowl in the "Ragtime" tournament are requested to do so as soon as possible, as it is desired to finish the tournament this month. The five high average men are: Sims, 94-6; Potter, 93-19; Gustaveson, 92-15; Barrett, 92; King, 91-18.

GATUN.

The regular men's gymnasium classes were held on Monday and Friday evenings.

The band from the U. S. S. *Minnesota* gave a concert at the clubhouse on Tuesday evening, January 20. After the regular concert, an informal program was given by the band, and several local artists, in the reading room.

A boys' informal Salamagundi pool tournament was held on Saturday, January 24. The tournament was won by Franklin Sisson, with Paul Hansen second, and Essex Griffith, third.

Mr. C. C. Pearsall accompanied the glee club at its rehearsal on Thursday evening.

A gymnasium class for schoolgirls over 13 years of age will be formed during the coming week. The class will meet on Tuesday afternoons from 3.30 to 4.45.

In the chess tournament, C. R. Logan of Gatun took two games from Mr. Fields of Corozal on Saturday evening, January 24.

A first aid class for boys was organized last week, with 14 members. Permission has been requested from the American Red Cross for holding examinations for first aid certificates.

CRISTOBAL.

The simultaneous checker match between Mr. F. L. Bernsee and all comers on Saturday night, January 24, proved interesting. Twenty-two men participated in the match, which resulted in Mr. Bernsee winning 66 games, he lost two and had four draws. Messrs. Herrington and Hodgson each won a game, and Messrs. Rattiner, Carter, Hersher, and Larson furnished the draws.

A picked team from the battleship *Minnesota* played

the Cristobal team at basketball on Monday night, January 19. By a strong rally in the second half, the sailor boys defeated Cristobal 28 to 22.

A new gymnasium class to reach the men 25 years of age, and over, will be started on Friday night, January 30. The middle aged men are especially urged to join this class.

Poles have been erected in the lot adjoining the association building and volleyball games after working hours until dusk will be in order during the pleasant evenings of the dry season. The members of the boys' department have been playing indoor baseball out of doors for a number of weeks. A league is planned.

Captain John C. McArthur of the Tenth Infantry at Camp Otis will address the discussion club on Thursday, February 5; subject, "Our standing Army."

COMMISSARY DEPARTMENT.

The commissary stores are open during the following hours:

Cristobal, 8 a. m. to 12.30 p. m., and 2 to 7 p. m.
Balboa, 8 a. m. to 12.30 p. m., and 2.30 to 7 p. m.
Ancon, 8 a. m. to 1 p. m., and 3 to 6 p. m.
All others, 8 a. m. to 1 p. m., and 3 to 7 p. m.

Commissary Cold Storage.

No changes are reported in the list of cold storage supplies sold at the commissaries published in THE CANAL RECORD of January 21.

Misdirected Letters.

OFFICE OF THE DIRECTOR OF POSTS,
ANCON, C. Z., January 28, 1914.

Panama American Corp.

Sale of Doors, Sash, Blinds, Etc.

OFFICE OF DEPOT QUARTERMASTER,
MOUNT HOPE, C. Z., January 19, 1914.

Sealed proposals will be received at the office of the Depot Quartermaster, Mount Hope, until 2 p. m. February 7, 1914, when they will be opened in the presence of attending bidders, for the purchase of all doors, blinds, sash, screens, window casings, frames, banisters, etc., which are now stored at the Cristobal shop stores.

Detailed list and full information relative thereto can be procured upon application to this office.

Proposals must be accompanied by a guarantee for 25 per cent of amount bid. The right is reserved to reject any or all bids. Bids must be plainly marked "Proposals for the purchase of doors, sash, blinds, etc., to be opened February 7, 1914", and addressed to

C. H. MANN,
Depot Quartermaster

Lost—On Wednesday morning, January 21, between Ancon and Panama, a silver locket, monogrammed, "J. M. B.," on long silver chain. Reward for return to Miss Beattie, office of THE CANAL RECORD.

MOVEMENT OF OCEAN VESSELS.

Royal Mail steamers leave for New York on alternate Tuesdays at 2 p. m.; for Southampton, on alternate Tuesdays at 10 a. m.

United Fruit Company's ships for New Orleans direct, leave on Thursdays and Saturdays at 3 p. m.; slips for New York via Kingston, on Thursdays at 2 p. m.; for New York, via Limon and Havana, on Sundays at 5 p. m.; for Limon and Bocas del Toro, on Tuesdays at 3 p. m.; for Bocas del Toro direct, on Mondays at 5 p. m.; and for Boston, on Sundays at 3 p. m.

Hamburg-American steamers sail for New York, via Kingston, Santiago de Cuba, and Fortune Island, on Tuesdays; the *Prinz August Wilhelm* and *Prinz Joachim* at 10 a. m.; the *Carl Schurz* and the *Emil L. Boas* at 2 p. m.

CANAL

RECORD

Volume VII.

ANCON, CANAL ZONE, WEDNESDAY, FEBRUARY 4, 1914.

No. 24.

The Canal Record

Published weekly under the authority and supervision of the Isthmian Canal Commission.

The Canal Record is published free of charge, one copy each, to all employees of the Commission and Panama Railroad Company whose names are on the gold roll. Extra copies and back numbers can be obtained from the news stands of the Panama Railroad Company for five cents each.

Address all Communications,

THE CANAL RECORD,

Ancon, Canal Zone,

Isthmus of Panama.

No communication either for publication or requesting information, will receive attention unless signed with the full name and address of the writer.

NOTES OF PROGRESS.

Gatun Lake Attains Elevation 85 Feet—Spillway Gates Opened.

The surface of Gatun Lake reached an elevation of 85 feet above sealevel, at Gatun, at 9 a. m., on Tuesday, February 3, and at 9.30 a. m. of that day the opening of seven gates at the spillway was begun. Seven, or one-half the total number of gates, were opened for test of the remote control system, operated from a switchboard at the south end of the hydroelectric station. Two gates will be left open during working hours each day until the surface of the lake is lowered to approximately 84.3 feet above sealevel. It is estimated that the gates will be opened during three or four successive days.

Eighty-five feet is the maximum elevation attained to date by the lake surface, the highest prior mark having been made at elevation 84.76 feet, on December 27, 1913. The gates were opened on that date, to lower the surface to about 84 feet above sealevel.

Completing the Voyage Around South America.

The tug *Reliance* was passed through Gatun Locks to the Atlantic entrance on Sunday, February 1, for repairs at the Cristobal dry dock. The *Reliance* sailed from Colon for Balboa, via the Strait of Magellan, on February 11, 1912, and completed the 10,500-mile journey in 126 days, arriving in Panama Bay on June 17, 1912. It was transferred from the Pacific entrance to Culebra Cut on December 2, 1913, and passed Cucaracha slide on December 14. Captain R. C. Thompson has been in command of the *Reliance* prior to and since its departure from Colon, and is thus the first commanding officer to sail a vessel around the continent of South America via the Canal. His chief engineer, Mr. L. Lamont, is the only other member of the present ship's company who has been with the *Reliance* throughout the voyage.

The tug *Cocoli*, which had been undergoing repairs at the dry dock, was raised to Gatun

Lake on Sunday. This vessel was formerly engaged in the Pacific entrance; was raised to Culebra Cut with the *Reliance*, and was transferred to the Atlantic entrance, for repairs, on January 29. Its chief engineer, Mr. William Stone, was on the *Reliance* during its voyage from Colon to Balboa, via the Strait of Magellan, and is thus the first man to have completed the journey around the continent by water.

The *Cocoli* had in tow, on its passage to Gatun Lake on Sunday, two new 1,000-cubic yard steel dump barges, which arrived at Colon on January 30, in tow of the Merritt and Chapman Derrick and Wrecking Company's tug *Rescue*. These barges are part of an order for six from the Maryland Steel Company. Two others had previously arrived, and two are yet to come.

Employees to be Allowed to Spend Leave at Taboga.

When the permanent conditions of employment go into force, it has been planned to permit the taking of leave on the Isthmus and in periods of any length of time convenient to the employee and his superior. This will permit employees to spend whatever time they can get off, at Taboga, if they so desire.

The Chairman has stated that there is no objection now to employees taking a week or two off if they can be spared, without pay, to go to Taboga. With the rules in effect at present relative to accumulated leave, the time off spent at Taboga will not deprive employees of any pay for accumulated leave which would be granted them on termination of service, except that no additional leave is earned while on leave without pay.

No Further Assignments to Gold Married Quarters at Empire and Culebra.

Instructions were issued to the district quartermasters at Empire and Culebra from the office of the Chief Quartermaster, on Tuesday, January 27, to discontinue making further assignments to gold married quarters in those villages as of that date. The number of applications on file in the offices of the district quartermasters at Empire and Culebra on January 27 were, as follows: Empire, No. 1 list, one; No. 2 list, 72; total, 73. Culebra, No. 1 list, one; No. 2 list, 42; total, 43.

Following the receipt of the above instructions by the district quartermasters, notices were sent out to the various applicants advising them of the decision, and requesting information as to the disposition they wished made of their applications. At the present time assignments to gold married quarters are made only at Ancon, Balboa, Corozal, Pedro Miguel, Paraiso, Gatun, Cristobal, Porto Bello, and Toro Point. It is probable that the quarry at Porto Bello will be closed down with the completion of the armor-ing of the west breakwater, in which case the

American settlement there will likely be abandoned.

The work of dismantling family quarters at Empire and Culebra has begun, and will be prosecuted steadily, as it is now expected to abandon these two villages by July 1, or as soon thereafter as possible. One Type-4 two-family house at Culebra was torn down last week, and two other Type-4 houses in the same row are to be removed. At Empire, the carpenters of the Quartermaster's Department are taking down a Type-10 one-family house, and will shortly begin the dismantling of the quarters formerly occupied by Mr. A. S. Zinn. All of the above buildings will be reerected at Balboa.

Nomination of Colonel Goethals Sent to the Senate.

President Wilson sent the nomination of Col. Geo. W. Goethals, as first governor of the Panama Canal, to the Senate, on Thursday, January 29.

Rent of Silver Married Quarters.

The silver married quarters at Camp Bierd, Folks River, Gatun, Paraiso, and Cucaracha, which represents about all of them on the east side of the Canal, will be placed on a rental basis as soon as the repairs to make the houses properly habitable have been made. The cost of these repairs is estimated at \$7,500, divided among the several camps mentioned above. A detailed inspection of the above quarters made by Mr. C. C. McColley of the Quartermaster's Department, in January, showed that at Camp Bierd 25 houses were occupied, 22 single room cottages, and three 4-room cottages, containing a total of 33 apartments, as now arranged. At Folks River, there are 16 houses, consisting of nine 6-room buildings, and seven 10-room buildings, with a total of 177 rooms, as now arranged. It is planned to leave all the 6-room buildings at Folks River as they are now, making only the repairs necessary to place them in suitable condition, and to convert all of the 10-room buildings into 6-room quarters. The rent for these quarters will probably be on a uniform basis, and employees will be permitted to rent two rooms at the single room rate, where the size of the family warrants. At Camp Bierd, no alterations will be made to the present silver married quarters, but they will be thoroughly repaired. It is proposed to convert laborers' barracks Nos. 189, 190, and 191 at this point into silver married quarters, thereby furnishing accommodations for 12 additional families. The rate to be charged at this camp will vary according to the amount of space occupied. Making the changes as above proposed will give accommodations for 28 additional families in the Camp Bierd-Folks River district.

At Gatun, there are five buildings used as silver married quarters, each containing 10 rooms, the total of 50 rooms providing ac-

commodations for 47 families. It is proposed to amplify these accommodations by allowing each family two rooms, with a front and back porch, instead of a single room, with only one porch, as at present.

At the Paraiso and Cucaracha labor camps, there are 15 old French houses used for silver married quarters, and one 10-room building of American construction, making a total of 83 rooms available. The rental charge at these points will vary slightly.

The renting of silver married quarters in the old Las Cascadas-Bas Obispo district, on the west side of the Canal, has also been decided on. The new permanent silver camp at La Boca was the first to be placed on the monthly rental basis, the rates having been fixed at \$5 and \$9 per apartment per month.

Revised List of Tourist Steamers.

A number of changes have been made in the list of tourist steamers scheduled to visit the Isthmus during the present season, which was published in THE CANAL RECORD of November 12, 1913. A list of such vessels, showing their arriving and departing dates, revised to January 29, has been made up by the Panama Railroad Company, as follows:

Steamship.	Line.	Arrive.	Depart.

KEY.—U. F. C.—United Fruit Company. W. S.—White Star Line. C. A. and P.—Canada, Atlantic, and Plant Steamship Company. H. A.—Hamburg-American Line. N. G. L.—North German Lloyd.

The *Victoria Louise* of the Hamburg-American Line, which docked at Cristobal on Monday, January 26, was the first of the special steamers to arrive this season. It brought 298 tourists. The Canada, Atlantic, and Plant Line cancelled the sailing of the *Evangeline*, which was scheduled to arrive on Saturday, January 31.

Changes in Sightseeing Schedule.

Effective February 5, 1914, on Tuesdays, Thursdays, and Saturdays, special sightseeing trains, made up of observation coaches, will leave the Colon passenger station at 8.30 a. m., for a trip to Gatun, taking in the Gatun Locks, where view may be had of the Gatun Dam and Spillway, and the Atlantic scale level section of the Canal. This train will return at Colon about 11.45 a. m. Fare for this trip, \$1.50, United States currency. Tourists from Panama desiring to make this trip, will take regular train No. 4 from the Panama passenger station at 7.30 a. m., transferring to the special sightseeing train at Gatun.

On Mondays, Wednesdays, and Fridays, special sightseeing trains, made up of observ-

ation coaches, will leave the Panama passenger station at 8.45 a. m., for the observation platform on Contractor's Hill, overlooking Culebra Cut and Cucaracha slide, returning over the construction tracks of the Pacific scale level section, taking in Pedro Miguel and Miraflores Locks, and Balboa, arriving at Panama about noon. A short lecture on the lock models will be given at the model room near Hotel Tivoli on arrival of train. Fare for this trip is \$1.50, United States currency. Tourists from Colon desiring to make this trip, will take regular train No. 3 from the Colon passenger station at 7.30 a. m., transferring to the special sightseeing train at Pedro Miguel.

Competent guides accompany all special sightseeing trains.

Special Excursion Through Gatun Lake by Sightseeing Barge.

The new Panama railroad sightseeing barge, which can accommodate 300 people, will leave Gamboa at 8.40 a. m., Sunday, February 8, for an excursion trip through the lake. The barge will arrive at the concrete dock, Gatun, at about 12 o'clock, noon. Train No. 3, the early passenger train out of Colon, and train No. 4, the early passenger train out of Panama, will both deliver passengers at Gamboa in time for this trip.

There will be an afternoon excursion, with the sightseeing barge leaving the concrete dock, Gatun, at 2 p. m., going through the lake to Gamboa, arriving at 5.15 p. m. At Gamboa, passengers can connect with trains Nos. 7 and 8, leaving for Panama and Colon, respectively.

Passengers from Panama desiring to make the afternoon trip through the lake, Gatun to Gamboa, can take passenger train No. 6, which leaves Panama at 11 a. m., and arrives at Gatun at 12.34 p. m., giving time for lunch.

Passengers from Colon who desire to make the afternoon trip, can take train No. 5, which leaves Colon at 11 a. m., and arrives at Gatun at 11.16 a. m., giving time for lunch.

The fare for this trip will be \$1.50 U. S. currency, one way.

Civil Service Examinations.

A supply of the Manual of Examinations for the spring of 1914 has been received.

Examinations for the following-named positions are scheduled to be held, probably on March 15: Assistant, Philippine Service; assistant engineer, Reclamation Service; assistant geologist, geologic aid, Geological Survey; assistant inspector of boilers, assistant inspector of hulls, local inspector of boilers, local inspector of hulls, Steamboat-Inspection Service (not for appointment in Canal Zone); civil engineer and superintendent of construction, Quartermaster Corps; clerk, Isthmian Canal Service; copyist topographic draftsman, topographic draftsman, nonapportioned Departmental Service; junior engineer draftsman, Engineer Department; forest assistant, Forest Service; industrial teacher, Philippine Service; junior chemist, nonapportioned Departmental Service; junior engineer, Reclamation Service; land law clerk, matron, Indian Service; pharmacist, Public Health Service; physician, all services; teacher, Philippine Service; telegraph operator, nonapportioned Departmental Service; veterinarian.

Announcement will be made later of the examinations to be held in April. Applica-

tions should be secured from and filed with this office. In requesting information, the kind of examination desired should be stated.

The examination will be held probably in Empire, in the Commission clubhouse, but the place and date of examination should be omitted in application forms. A card of admission will be sent to those found eligible to be admitted, just before the examination.

In answer to questions as to residence, applicants must show residence in a State or Territory of the United States, and county thereof, up to the time of filing application.

ISTHMIAN CIVIL SERVICE BOARD.

CULEBRA, C. Z., January 31, 1914.

Lockages to be Made on Sundays.

In order to advance the finishing of all the lock work, it has been decided that until March 1, lockages shall be made only on Sundays. The last official operation of the locks on a week day was at Gatun on Thursday, January 29, when the tug *Gatun* and a motor dory for the use of Lieut. R. N. Crenshaw, U. S. N., in connection with the radio station work at Caimito, were raised to Gatun Lake from the Atlantic entrance, and the tug *Cocoli* was transferred down, for repairs at the Mount Hope dry dock.

Obituary.

A cable message was received on January 27 announcing the death of Elhanan Zook, formerly superintendent of construction for the Panama Railroad Company, which occurred at Philadelphia, on Monday, January 26. He was born in Chester County, Pennsylvania, and was graduated from the Pennsylvania Polytechnic College on June 25, 1875. He entered the employ of the Chicago, Burlington, and Quincy Railroad as a civil engineer, with headquarters at Nebraska City, Neb., and was later successively roadmaster and trainmaster for the same company at Denver, and other points. He entered the service of the Isthmian Canal Commission in March, 1905, as assistant engineer, and continued in that capacity under Mr. W. E. Dauchey, then division engineer in charge of the old Culebra Division, until October, 1906. On December 17, 1906, he entered the employ of the Panama Railroad Company as supervisor; was promoted to roadmaster in June, 1907, and to engineer of maintenance on December 1, 1909, a position he held until June 15, 1913, when it was abolished and he was made superintendent of construction. He sailed for the United States on vacation leave early in October, 1913, and on December 15, forwarded his resignation, which became effective January 4, 1914. His home was at No. 1728 North Nineteenth street, Philadelphia. He is survived by his wife, and two daughters, the Misses Leah and Ruth Zook.

Etta Pollard, the 10-year old daughter of Mr. W. H. Pollard, living at Corozal, died at 11 p. m., on Saturday, January 31. She was born in Los Angeles, Cal., and had been on the Isthmus two years.

As a result of the practice of many people living in Panama of making short cuts through the yards of the Panama railroad in order to catch passenger and labor trains, rendering themselves liable to injury, the management of the road has caused trespass signs to be placed at the track gates, and Panama policemen are detailed to prevent the passage of unauthorized persons.

SOCIAL LIFE OF THE ZONE.

Empire Young People's Society of Christian Endeavor.

The Empire Young People's Society of Christian Endeavor held its semiannual election of officers on Friday evening, January 30. As this evening was the regularly scheduled monthly business meeting and social of the society, the usual program of voting in new members and reading of committees' reports was first attended to. The following officers were elected for the ensuing six months: President, Mr. V. Koontz of Empire; vice-president, Mr. H. A. Jackson of Empire; secretary, Mr. J. Sack of Culebra; treasurer, Mr. D. L. Johnson of Empire; pianist, Miss Kathryn Moore of Empire. Immediately after the election, refreshments were served, followed by a number of impromptu speeches and humorous recitations.

The Empire Christian Endeavor Society is the third one in the Canal Zone. It is similar to the Cristobal Young People's Society and the former Gorgona Christian Endeavor Society, admitting as it does, professing Christians, as active members, and others interested in the work, as associate or honorary members. It was organized in July, 1913, with a membership of 14. The first meeting was held in the I. C. C. chapel at Empire on the morning of July 20, and every Sunday morning since then a meeting has been conducted just after the Sunday school session. Combined business meetings and socials are held monthly, or oftener, to which all friends are invited. The first six months saw an increase of 150 per cent in the membership, which is now 38. The people of Empire and neighboring towns are invited to attend the meetings.

Visit of Bishop Knight.

The Right Reverend Albion W. Knight, D. D., bishop of the Episcopal Church, will make his usual visit to the Panama mission, arriving from Kingston, February 21. The following schedule for the episcopal visitations to the various churches of the mission has been arranged by the clergy: Sunday, February 22, St. Luke's Hospital chapel, at 10 a. m.; St. Paul's, Panama, at 7.30 p. m.; Tuesday evening, St. Augustine's, Paraiso; Wednesday evening, St. Mark's, Culebra; Thursday evening, St. James', Empire; Friday evening, St. Stephen's, New Gatun; Sunday morning, Christ Church, Colon. On Saturday morning, there will be a convocation at Christ Church, Colon. The bishop will leave the Isthmus on Sunday afternoon, March 1.

Call for Christian Endeavor Society at Corozal.

There will be a meeting of those interested in the organization of a Christian Endeavor Society on Sunday morning, February 8, at 11 o'clock, in the hall of the Corozal clubhouse. Young people are especially invited to attend.

Changes in Roman Catholic Church Work.

A number of changes have taken place in the administration of the Roman Catholic churches in the Canal Zone. The churches at Balboa and Cristobal have passed over to the administration of the priests of the congregation of missions, the Reverend Father McDonald, C. M., being in charge of both missions. Father DeGraaf, C. M., of Paris, and Father Hafner, C. M., of German-

town, Pa., are detailed to work in the various missions along the line. Father Collins of Culebra has gone to the interior for a short time, his post being supplied in the interim by the new priests. A church building, which was removed from Rio Grande, has been erected in Corozal and will be dedicated early in February by Father McDonald, who will have charge of the parish. The priests of the congregation of missions are in residence in the parish house, St. Ferdinand's Church, Empire.

PERSONAL.

Naval Constructor Daniel C. Nutting, Jr., has been appointed superintendent of the Mechanical Division of the Isthmian Canal Commission, effective January 26. He was born August 17, 1869; appointed to the United States Naval Academy at Annapolis in May, 1889; was graduated first in the engineering division of his class of six members, or third by multiple in the entire class; took two years' post graduate course in naval architecture at the University of Glasgow, Scotland; was in the construction department of the Norfolk Navy Yard for three years and three months; was superintending constructor for the Fore River Shipbuilding Company, and the George Lawley and Sons Corporation, for three years; was senior assistant to the naval constructor at the New York Navy Yard for four years and 10 months; and was with the Bureau of Construction and Repair, in charge of the repair desk, for four years and 11 months, having been one of the senior assistants to the chief constructor. Since July, 1911, he has been construction officer at the Puget Sound Navy Yard. Mr. Nutting arrived on the Isthmus on January 26. His headquarters will be at Culebra until February 25, when the office of the superintendent of the Mechanical Division will be moved to Balboa.

Surgeon J. C. Perry has been granted special leave of absence for a few days to accompany President Porras of Panama on a trip into the interior of the republic for the purpose of inspecting a prospective site for a tuberculosis sanitarium.

Capt. Charles W. Barber, accompanied by Mrs. Barber, returned from his annual leave of absence on the *Cristobal*, which docked on Tuesday, January 27.

Mr. W. K. Jackson returned from his vacation on the *Panama*, which arrived on Sunday, January 25.

Mr. Edward J. Williams, formerly Disbursing Officer of the Isthmian Canal Commission, has accepted the position of treasurer of the firm of McCord and Company of Chicago and New York.

Red Cross Election.

Please send ballot, electing officers of the Americal National Red Cross Association for the year 1914, to Mr. E. E. Lee, Culebra, C. Z.

Dues of \$1 for each member should accompany ballot. ERNEST E. LEE,

Chairman, Nominating Committee.

CULEBRA, C. Z., February 2, 1914.

Changes in Culebra School for White Children.

The teaching force in the school for white children at Culebra will be reduced by one teacher on account of the small number of pupils enrolled at that point, namely, 29 at the close of the month. The third grade will

be transferred to Miss Dunn, and, in addition, she will teach the first and second grades, about 17 pupils in all. The fourth grade, with three pupils, and the fifth grade, with five pupils, will be transferred to Empire, going to and from school in the Commission brake. Miss Davis, the teacher relieved from duty at Culebra, will be placed in charge of the fifth and sixth grades at the Cristobal school.

Knights of Columbus.

The date of exemplifying the third and fourth degrees, Knights of Columbus, has been changed to Sunday, March 22. The ceremonies of the first and second degrees will take place in Panama, on February 22. Regular meetings of both councils will be held on February 8.

Pacific Lodge, No. 4, I. O. O. F.

The regular meetings of Pacific Lodge, No. 4, Independent Order of Odd Fellows, are held at Ancon Hall, on Thursday nights. The officers of the lodge extend an invitation to all visiting brothers to be present.

Immigrant Inspector Examination.

In a letter received to-day the Civil Service Commission states that the immigration laws are undergoing revision and the immigrant inspector examination, announced to be held February 22, has, therefore, been postponed indefinitely; it is probable the examination will be held in May. No more applications will be issued until the examination is re-announced, a notice of which will appear in THE CANAL RECORD. Requests for applications already received in this office will be kept on hand until the examination is re-announced, but request for application should not be made until that time.

Applications already received in this office will be kept on file and will be good for the examination if announced to be held within six months from the date of the applications.

ISTHMIAN CIVIL SERVICE BOARD.

CULEBRA, C. Z., January 31, 1914.

Change in Office Hours, P. R. R.

Effective February 2, 1914, the present office hours at the general office building of the Panama railroad at Colon, and the receiving and forwarding agency, Colon, are abolished, and the following hours will be observed: Morning hours, 8 to 12 noon; afternoon hours, 1.30 to 5.

The roadmaster's office, 'phone 107, Colon, and the office of superintendent bridges and buildings, 'phone 104, Colon, will be open from 7.30 a. m. to 11 a. m., and from 1 p. m. to 5 p. m.

All offices will be closed at 4 p. m. on Saturday afternoons.

F. MEARS,

General Superintendent.

COLON, R. P., January 28, 1914.

Sale of Munitions.

A sale of munitions belonging to the Government of Panama, used at the time a standing army was maintained, was held at the office of the Treasurer-General in Panama on December 27. The bid of Pinel Brothers for 1,141,000 rapid fire gun and rifle shells at \$2,396.10, and that of Mr. Pedro Illueca for 246 projectiles for cannon, were accepted. The 1,000 Gras rifles, for which bids were asked, were not sold.

Informal dances at the Strangers Club will be held on alternating Thursdays until further notice. Dances in February occur on the 5th and 19th.

EXECUTIVE ORDER

Providing Conditions of Employment for the Permanent Force for the Panama Canal.

Cable advice has been received that the President has signed the following Order, to become effective April 1, 1914:

By virtue of authority vested in me by law, it is hereby ordered that the general conditions of employment governing employees on the Isthmus of Panama, necessary for the completion, care, management, maintenance, sanitation, government, and operation of the Panama Canal, the Canal Zone, the Panama railroad, and other adjuncts, shall be, as follows:

APPOINTMENTS AND COMPENSATION.

1. The salaries or compensation of employees shall in no instance exceed by more than twenty-five per centum the salaries or compensations paid for the same or similar services to persons employed by the Government in the continental United States, as determined by the Governor of the Panama Canal.

2. Service must be satisfactory to the head of the department in which employed, and employees are subject to the regulations of the Governor.

3. Compensations and conditions of employment of persons employed in the United States will be specified in provisional appointments. The compensations of such persons will begin upon date of embarkation at the port of departure from the United States, and they will be granted free transportation from the port of departure, including meals on the steamer, but no compensation or expenses for the journey to the port; but former employees from the United States whose next preceding service with the Panama Canal was less than one year shall be paid only from the date of entry into service on the Isthmus, and will be allowed only such reduced rates of transportation to the Isthmus as may be available for Government employees. Employees appointed at an hourly rate will be paid for the period of transit to the Isthmus on the basis of an 8-hour day, exclusive of Sundays. Except in case of discharge or other separation from the service beyond the employee's control, payment of salary from date of embarkation to date of arrival on the Isthmus will not be made unless service on the Isthmus continues for 30 days.

4. All officers and employees in the service of the Panama Canal, except those who are to perform duties of clerk, bookkeeper, stenographer, typewriter, surgeon, physician, trained nurse, or draftsman, shall be exempt from examination under civil service rules, and appointments to clerical positions on the Isthmus of Panama paying \$75 per month, or less, may also be made without examination. Officers and employees now in the service of the Panama Railroad Company on the Isthmus may be transferred to and retained in the service of the Panama Canal without examination, whenever any work now performed independently by the Panama railroad is consolidated with similar work performed by the Panama Canal.

5. When employees in the present organization are transferred to the permanent organization, they shall retain their seniority as regards questions of civil service, quarters, and other privileges or considerations, provided, however, that the seniority granted to em-

ployes by this Order shall not be operative in any case, so as to form any claim involving the payment of funds of the United States.

6. All employees who receive over \$75 per month, or over 40 cents per hour, must be citizens of the United States, or the Republic of Panama, and such citizens will be given preference for employment in all grades. Aliens may not be employed in such grades unless

(a) they have occupied similar positions during the construction of the Canal for two years or more, or

(b) in case of emergency, in which latter case they must be replaced by citizens of the United States, or Republic of Panama, as early as practicable.

7. The Governor shall prescribe regulations, when not otherwise fixed in this Order, setting forth the qualifications necessary for appointment of the various classes of employees, including physical fitness for work on the Isthmus. The age limit shall in all cases be under 45 years, but the Governor may waive this limit, when, in his judgment, such action is for the good of the service.

8. All appointments shall be made by the Governor of the Panama Canal, or by his authority, except the district judge, district attorney, marshal, clerk of district court, and his assistant.

9. Assignment to duty is vested in the respective heads of the departments, and employees will be expected to perform such duties as may properly be assigned to them. The Governor may discharge an employee at any time for cause, and terminate a provisional appointment when the exigencies of the service require.

10. The Government reserves the right to pay in any money the value or parity of which is guaranteed by the United States.

11. Employees whose salaries are fixed on a monthly or annual basis will receive no pay for overtime work.

12. Employees above the grade of laborer, appointed with rates of pay per hour, or per day, will not be employed over eight hours in any one calendar day, except in case of emergency. The time such employees work over eight hours in one calendar day, and time worked on Sundays and regularly authorized holidays, including January 1, February 22, May 30, July 4, Labor Day, Thanksgiving Day, and December 25, shall be considered overtime for which time and one-half will be allowed. Such employees who work on the days prior and subsequent to the holidays specifically named above will be allowed their regular pay for eight hours for such days, in addition to pay for any work performed.

13. An employee whose compensation while on duty carries with it subsistence will not be entitled to same or commutation thereof while on leave of absence, and no commutation of quarters shall be paid.

TRANSPORTATION.

14. Employees and dependent members of their families will be granted the regular Government rate upon commercial steamship lines with which arrangements for such rates can be made. While the United States operates a steamship line, either directly or through the Panama Railroad Company, employees and the dependent members of their families will be granted transportation at the same rates and under the same conditions as are at present in effect. The rates and conditions

are subject to change at any time in the discretion of the Governor.

15. After three years service, employees who are citizens of the United States will be entitled to free transportation for themselves only, on termination of service, to any port of the United States, except that when such transportation costs the Government more than \$40 the employee must pay the excess.

16. Employees on the gold roll will be granted one complimentary round trip pass on the Panama railroad each calendar month. Mileage books for use of such employees and dependent members of their families, or relatives temporarily residing with them, will be furnished at one-half regular tariff rates.

QUARTERS.

17. Where practicable, such bachelor quarters on the Isthmus as may be available from time to time will be assigned all employees desiring them. Family quarters, when available, will be assigned under such rules as may be prescribed by the Governor. A charge will be made for rent, fuel, and electric current at such time and in accordance with such regulations as the President may hereafter establish.

MEDICAL CARE.

18. Employees injured will be compensated in accordance with such regulations as are prescribed by law.

19. All employees in case of illness and injury will receive free medical care and attendance in the hospitals, except in cases of alcoholism or venereal disease. If medical attendance is furnished in quarters, a charge may be made under regulations to be prescribed by the Governor. Employees will be charged for medical care and attendance furnished members of their families at the hospitals and at their quarters at such rates and under such regulations as may be prescribed by the Governor.

LEAVE REGULATIONS.

20. All employees who are citizens of the United States, and aliens whose compensation is more than \$75 per month, or 40 cents per hour, shall be entitled to leave privileges.

21. Leave will be divided into three classes, viz: (1) annual leave, (2) cumulative leave, and (3) travel leave.

ANNUAL LEAVE.

22. Twenty-four days annual leave will be allowed each employee for each year after entry into service, and, if not granted prior to the close of the year, is forfeited and may not be accumulated, except that any annual leave remaining to an employee's credit in a year in which he is granted cumulative leave may be added to the cumulative leave if taken within two months after the close of his service year.

23. The service year shall date from the day on which an employee's pay in the permanent organization begins.

24. Absences of one-half day or more, when regularly authorized, will be charged against annual leave; also, absences on account of illness or injury, upon the certificate of an authorized physician in the service of the Panama Canal, except that in the following classes of cases no payment shall be made for time lost, but the time shall be charged against the annual leave:

(a) Illness due to the fault of the employee, as venereal disease and alcoholism.

(b) Injury due to the employee's wil-

full intention to bring about the injury or death of himself or another.

(c) Elective surgical operations to relieve conditions existing prior to service on the Isthmus.

25. In the case of hourly or per diem employes, annual leave on account of sickness or injury shall be based upon a day of eight hours.

26. Not more than 14 days annual leave may be taken during the first six months of a service year. In case of illness or injury in the first six months, to cover which no annual leave remains to the employe's credit, the time lost will be charged against the annual leave remaining for the year, and payment will be made after completing 10 months of the service year. After the entire 24 days annual leave has been used, additional leave in that service year on account of illness or injury will be deducted from the cumulative leave for that year, and when the cumulative leave becomes due the employe will be paid.

27. After exhausting both annual and cumulative leave for the year, additional absence on account of illness or injury will be without pay, except such compensation as may be prescribed by law for employes receiving personal injuries.

CUMULATIVE LEAVE.

28. Thirty days cumulative leave will be allowed each employe paid on a monthly or annual basis for each year of his service, and 20 days to each employe paid on an hourly basis. This leave will be due after completing 10 months' service each year and may be taken when the employe's service can be spared. It may be taken annually or left to accumulate to the credit of the employe, provided, however, that leave may not be accumulated, for more than three years. If it is not desired to take the entire leave accumulated, the leave earned for the first year, or the first and second years, may be taken, provided that no employe, except at termination of service, may be granted more than 90 days leave with pay at one time. Employes will be paid for cumulative leave at the rate earned when the leave becomes due at the end of the tenth month of each respective year.

29. In case an employe serves part of a year on the monthly or annual basis and part on the hourly basis, he will be allowed 20 days cumulative leave, except that if he has served eight months or more on the monthly or annual basis during the year he will be granted 30 days cumulative leave.

TRAVEL LEAVE.

30. Employes who travel to points outside the tropics, when on cumulative leave, will be allowed seven days additional leave (or travel leave) with full pay. Travel leave may be allowed approximately once a year and is not cumulative.

31. Employes will be compensated for travel leave and annual leave taken in conjunction with cumulative leave at the rate earned when cumulative leave last became due.

32. After accumulating leave for three years, an employe ceases to earn additional cumulative leave until he is granted all or part of the cumulative leave already earned, unless he shall enter on cumulative leave within two months after completing the third year, or be ordered by the Governor to defer taking leave for official reasons.

33. When an employe's services are ter-

minated on account of misconduct or unsatisfactory service, any annual leave due and travel leave will be forfeited, and cumulative leave will also be forfeited unless written notification has been given that the employe has accumulated the leave, or the four months period within which the employe may enter on leave has passed. Such written notice must be given by employes as soon as possible after cumulative leave becomes due.

34. When an employe's service is terminated, a cash payment in commutation of leave will be made to him for the number of days' cumulative leave due, plus the annual leave due. In the event of his death his estate will be paid the sum due.

35. Employes must enter on cumulative leave within four months after the date when it becomes due, except when accumulated or unless otherwise authorized by the Governor.

36. Employes must report from leave within one week after the authorized leave expires, or forfeit pay for the leave. In case of unavoidable delay, the Governor will decide whether the circumstances warrant an exception to this rule.

37. No restrictions are placed on the localities where leave may be spent.

38. Any employe transferred from the present force to the permanent operating force will be paid at the time of transfer, in addition to his regular compensation, the amount he would have received in payment for leave had he been separated from the service at the time of transfer.

39. Leave may be taken only at the convenience of heads of departments, who may direct an employe to accumulate his leave if necessary for the conduct of the work.

40. Leave without pay may be granted by the Governor to all employes, including laborers, for such period as may be prescribed by him.

OFFICE HOURS AND HOURS OF LABOR.

41. Office hours and hours of labor will be fixed by the Governor within the limits prescribed by law.

WOODROW WILSON.

EXECUTIVE ORDER

To Prevent the Corrupt Influencing of Agents, Employes, or Servants.

By virtue of the authority vested in me, I hereby establish the following Executive Order for the Canal Zone:

Section 1. It shall be unlawful for any person to give, offer, or promise to an agent, employe, or servant, any gift or gratuity whatever without the knowledge and consent of the principal, employer, or master of such agent, employe, or servant with intent to influence his action in relation to the business of his principal, employer, or master; or for any agent, employe, or servant, without the knowledge and consent of his principal, employer, or master, to request or accept a gift, or gratuity, or the promise of any gift or gratuity whatever beneficial to himself, under an agreement or with an understanding that he shall act in any particular manner in respect to the business of his principal, employer, or master; or for any agent, employe, or servant authorized to procure materials, supplies, or other articles, either by purchase or contract, for his principal, employer, or master, or to employ servants or labor for his principal, employer, or master, to request or accept or agree to accept, for himself or another, directly or indirectly, a commission, discount, or bonus

from the person who makes the sale or contract, or furnishes such materials, supplies, or articles, or from the person who renders such service or labor; or for any person to give or offer to such agent, employe, or servant such commission, discount, or bonus.

A violation of any of the provisions of this Order shall be punished by a fine of not less than ten dollars nor more than five hundred dollars, or by imprisonment in jail for not more than one year, or both such fine and imprisonment in the discretion of the Court.

Section 2. This Order shall take effect thirty days from and after its publication in THE CANAL RECORD.

WOODROW WILSON.

THE WHITE HOUSE,
January 21, 1914.

[No. 1880.]

EXECUTIVE ORDER

Naming Total Compensation for Prof. Emory R. Johnson.

By direction of the President, it is ordered that the total compensation of Prof. Emory R. Johnson, who was appointed a Special Commissioner by Executive Order, dated September 1, 1911, is hereby fixed at twenty-five thousand, three hundred dollars (\$25,300), from which shall be deducted any payments on account of actual expenses and per diem heretofore made to him under the provisions of the Executive Order of September 1, 1911, such compensation covering the period from September 1, 1911, to October 4, 1913, inclusive.

The Isthmian Canal Commission is directed to provide the funds needed in the execution of this Order.

LINDLEY M. GARRISON,
War Department, Secretary of War.
Washington, D. C.,
January 20, 1914.

Relieving Congestion on Central Avenue, Panama.

Forces of the Division of Municipal Engineering have recently paved the portion of Avenue B, Panama, between Thirteenth and Fourteenth streets, with concrete, and are now engaged in similarly covering the surface of Seventeenth street, from Central avenue to Avenue B. From the Panama railroad passenger station to Thirteenth street, Avenue B is covered with macadam in good condition, and the supplementary paving noted is for the purpose of diverting to it some of the traffic with which Central avenue is ordinarily congested.

Twenty-third street, from Central avenue to Avenue B, which it crosses opposite the exit for carriages from the first-class part of the Panama railroad passenger station, has been widened 10 feet, by moving the east pavement back into the plaza on which the station fronts. This section is to be paved with brick. The exit for carriages is on a continuation of Twenty-third street, built at the expense of the railroad as part of the station grounds.

COMMISSION CLUBHOUSES.

Activities of the Young Men's Christian Association.

GENERAL.

The moving picture schedule for the week February 9 to 16 is, as follows: Monday, Corozal; Tuesday, Gatun and Balboa; Wednesday, Culebra; Thursday, Pedro Miguel; Saturday, Cristobal. The pictures to be shown during the coming week are, as follows: "The price of gold;" "The sheriff's baby;" "He answered the ad.;" "The Mississippi tragedy;" "The Hardup family's bluff;" "In the grip of a charlatan;" "The Duke's dilemma."

For the week February 9 to 14, the following pictures will be shown: "War time sorrow; the spy's defeat," in two reels; "Let 'em quarrel;" "The stolen bride;" "A lucky mistake;" "His widow;" "Collecting the bill."

A vaudeville company has been organized among the talent on the Isthmus, and the first show will be given at the Empire clubhouse on Friday evening, February 6. It is proposed to give a similar entertainment in each of the clubhouses in the Zone, providing there is sufficient interest. Among those who will take part in this exhibition will be several newcomers, who have not appeared at the clubhouses heretofore.

An all-Isthmian duckpin league was organized at a meeting held at Empire on January 25. H. E. King of Empire was selected president, and Frank Dougherty of Pedro Miguel, secretary and official scorer. It was decided to play one series of games at home and one series of games abroad, the schedule to begin on Saturday, February 7, when Culebra will play at Corozal, Cristobal at Gatun, and Empire at Pedro Miguel. Gold medals will be given, as follows: Six medals to members of winning team; six medals, one for high average on each team; one medal for highest average of the tournament; one medal for second high average of the tournament; one medal for third high average of the tournament; one medal for three high games rolled in one night, one medal for highest single game rolled in the tournament.

BALBOA.

Mr. Johnson is the leader in the local pool tournament, with Messrs. Ruck, Potter, and Gugendord, second, third, and fourth, respectively.

Motion pictures were held in the clubhouse on Tuesday evening, February 3. Piano music was furnished by Mr. C. C. Pearsall.

The new clubhouse safe arrived last week.

Request has been made for a pressing club, and it is likely that there will be one in the near future.

Word has been received that a collection of library books has been shipped from the United States.

PEDRO MIGUEL.

The Pedro Miguel clubhouse was formally opened on Tuesday evening, January 27, with an appropriate program. Over 400 people from Pedro Miguel and Paraiso, as well as from many other towns in the Zone, attended. The numbers, were, as follows: Invocation by the Rev. H. R. Carson; piano solo, "Rigoletto fantasia," by Miss Irene Kuhn; welcome to guests, by Mr. Frank Dougherty; soprano solo, "Smile of spring," by Miss Hazel Neff; greetings from neighbors, by Mr. H. O. Cole of the Corozal Y. M. C. A.; Mr. E. E. Lee of the Culebra Y. M. C. A.; Mr. T. L. Clear of the Empire Y. M. C. A.; violin solo, from "Mignon," by Miss Verna Page; address, by the Hon. H. A. Gudgey, Chief Justice of the Canal Zone Supreme Court; bass solo, "The bandolero," by Mr. Ernest Gamble; announcements, by Mr. C. B. Russell, secretary. Following the program, there was a reception in the social room on the first floor, during which light refreshments were served.

At the end of the month, 84 members had been secured; many more look forward to joining during the present month.

The bowling alley was opened Wednesday evening, with an "Open house." It is expected that the three pool tables and billiard table will soon be recovered and in readiness for the use of all those interested in either game.

The barber shop will soon be ready for business; it will be opened every other day during the week.

Pedro Miguel people enjoyed the first moving picture on Tuesday evening, over 200 were in attendance. The regular show this week will be on Friday evening, February 6.

Mr. Wm. Dubois of Culebra, the expert chess player, met a number of men for several games of simultaneous chess, on Saturday evening, January 31. All those interested in the game are requested to see Mr. Shropshire to arrange for the formation of a chess club.

The representatives of the Zone clubhouses were tendered a reception on the local alleys on Saturday evening, January 31. The scores made during the evening were, as follows:

Culebra.				
Case.....	83	104	105—292	
DeCorra.....	89	95	121—305—597	
Gatun.				
Claherty.....	96	94	94—284	
Dumville.....	103	102	86—291—575	
Pedro Miguel.				
Whiston.....	87	83	85—255	
Dougherty.....	95	80	105—280—535	
Empire.				
Gustavson.....	104	91	83—278	
Boesen.....	85	81	88—254—532	
Corozal.				
Parkis.....	79	101	85—265	
Smith.....	91	83	82—256—521	

The work of renumbering and recataloging the books will be completed within a few days and the library opened to the public. The privileges are granted to the members and their families, a deposit of \$1.50 being required for each card issued.

A sunset song service will be conducted each Sunday evening at 7.30 o'clock, beginning next Sunday, February 8. An invitation is extended to every one to attend.

CULEBRA.

High scores for the week in Baltimore duckpins are, as follows: Rudolph, 138; Schmeck, 138; DeCorra, 132; Case, 128, 142; Kronmiller, 126; Kiernan, 125; Chadbourne, 135.

On Thursday, January 29, Mr. H. H. Richardson of Jacksonville, Florida, exhibited pictures and gave a talk describing the South and Florida in particular.

On Sunday night, February 1, Mr. S. P. Verner of Cristobal exhibited slides of scenes in Central Africa, and described his experiences there some 15 years ago. A larger collection of pictures and a more extended lecture will be given in the near future.

A local duckpin tournament will start as soon as a sufficient number have signified their desire of entering same. All those who wish to enter are requested to sign the poster in the bowling alleys.

At the moving picture show on Saturday night, Miss Iza Lee Lindley sang several solos. Miss Curtis furnished piano music during the evening.

EMPIRE.

Three hundred attended the "Smoker" held on Wednesday evening, January 28, for the men of Empire. Mr. A. S. Zinn, who has been a member of the local association council since 1907, was the guest of the evening. The following program was carried out: Moving picture, "How Patty made good"; solo, by Mr. Case; juggling act, by Mr. Brennan; moving picture; tumbling act, by Mr. Brittin; piano solo, by Mr. Pearsall; contortion feats, by Mr. Kelly; remarks, by Mr. T. L. Clear, and Mr. Zinn; wrestling exhibition, by Messrs. Huber and Willoughby. Refreshments were served, and music was furnished by Gray's orchestra.

Mr. Smith, who represented the Empire association in the individual championship chess tournament of the Isthmus, defeating Mr. Logan of Gatun on Saturday, January 31, has won the tournament. He played eight games, winning six and one-half, and losing one and one-half.

The first game of the Isthmian duckpin league will be rolled on Saturday evening, February 7, on the Empire alleys, between the local team and Pedro Miguel.

GATUN.

Mr. H. H. Richardson of the Florida department of the Southern settlement and development organization gave an address on "The opportunities of the State of Florida." Colored slides were shown, illustrating the physical attractions of the State.

D. Roswell Homer played piano selections for the motion pictures on Thursday, January 29.

A 7-man handicap pool tournament is in progress. The present standing of the contestants is, as follows:

Name.	Handicap.	Won.	Lost.
Baxter.....	100	0	0
Karruish.....	100	2	0
Hamill.....	80	0	1
Texter.....	80	1	1
Ludlum.....	80	3	0
McCaith.....	75	0	2
Reiszner.....	75	0	2

The results of the January "Ragtime" duckpin tournament are:

Doubles—Holtz and Humphrey, 218; Hodges and Sherrard, 204; Davidson and Sherrard, 198.

Singles—Humphrey, 115; Hodges, 115, Claherty, 110. Gold and silver medals will be given as prizes.

The children who participated in the entertainment given before the motion picture show last week were:

Boys' drill, (American flag)—Ferdinand Buckholdt, Charles Walsh, Steve Westbrook, Harold Hansen, Fraley Weidner, Alpha Morgan, Robert Gough, George Carkeet.

Girls' drill, (Japanese parasol)—Barbara Gayer, Loretta Koley, Bonita Black, Lois DeForce, Marjorie Walsh, Mildred Morgan, Elizabeth Twitchell, Catherine

Parmeter, Kathrynne Mellon. Mrs. Witt played for the girls' drill, and Miss Winnie Mae Stevenson for the boys' drill.

The present rating of the boys' group athletic contest is, as follows:

Name.	Points	Name.	Points
Loulan, Francis.....	342	Cucuel, Alfred.....	271
Claherty, Charles.....	341	Twitchell, James.....	257
Griffith, Essex.....	327	Grant, Douglass.....	210
Christian, William.....	323	Stevenson, Branson.....	194
Hansen, Paul.....	312	Sisson, Franklin.....	158
Pentz, David.....	307	Viberg, Herman.....	153
Kuller, John.....	302	Carkeet, John.....	123
Neville, David.....	295	Witt, Morris.....	119

Interest in the gymnasium work has been increased by the adoption of piano music for the calisthenic drills. Mrs. Dow Walker has been engaged for the work.

The boys of the first aid class gave a practical demonstration of their class work recently, when a member of the association who sprained his ankle was attended to by some of the older boys.

Mr. Titus Stauffer, who has been employed at the Y. M. C. A. as office assistant, since June, 1913, tendered his resignation, effective February 1, 1914. As an appreciation of his services, the council and members of the association passed a set of resolutions in his favor. Mr. Harry A. Comley has been appointed to fill the vacancy.

Nine members of the clubhouse are taking piano and violin lessons under the supervision of the Y. M. C. A. Mrs. E. T. Gilbert, Mrs. Dow Walker, and Prof. Sello Bartocchini are the teachers. Students may start at any time. The charges are reasonable.

CRISTOBAL.

The Canal Zone high school basketball team defeated the Cristobal juniors on Saturday evening, January 31, in a close game, by the score of 10 to 9.

A 2-man handball team tournament, with eight teams entered, was started on Saturday afternoon, January 31. Hughes and Farrell won two out of three games from Nash and A. Fraser; scores, 15-21, 21-12, 21-11.

An aquatic meet will be held on February 23, celebrating Washington's Birthday. The first event will be at 2 o'clock sharp. Following is the program: Twenty-five-yard dash; fancy diving (12-foot board); 50-yard dash; 100-yard dash; one mile swim; obstacle swimming race, 25-yard back swim, relay race (20) yards, four men; 50-yard swim for boys (95 pounds and under, weigh in with swimming suit); tub race; under water swim for distance. Entries close on Tuesday, February 17, at 10 p. m. Entrance fee for each event is 50 cents; no entry blanks will be considered without entrance fee. Fancy diving contest, three optionals with one required dive, (front jack dive.) The meet is open for all gold employees and to members of the Army and Navy. Gold, silver, and bronze medals will be offered as prizes, gold medals to members of winning relay team. If four, or more, relay teams are entered, two prizes will be given.

The capacity of the social hall was tested at the debate on "Socialism" on Thursday, January 29. Messrs. Swanson and Morrison of Empire spoke in favor of socialism; Messrs. Verner and Wempe against.

A preliminary meeting to organize a checker club was held on Saturday night, January 31. Messrs. Rattner, Ermus, and Hodgson were appointed a committee to draft rules for the club.

The Cristobal team plays at Gatun in the first game of the all-Isthmian duckpin tournament on Saturday, February 7.

The single folks bowling tournament held on January 27, resulted, as follows:

W. F. Scheid and Miss G. Butler.....	504
Mr. Daniel Russell and Miss M. Stevens.....	499
Mr. D. Raymond and Miss Southerland.....	477
Mr. G. R. Farr and Miss C. Mathews.....	454
Mr. E. H. Nash and Miss Farrell.....	426
Mr. W. F. Robertson and Miss E. Mathews.....	419
Mr. Ernest Cotton and Miss Ida May Glawson.....	417
Mr. Joseph Gill and Miss Hollowell.....	413
Mr. Joseph Raymond and Miss Vail.....	376
Mr. F. A. Dickinson and Miss Vickery.....	373

OFFICIAL CIRCULARS.

Appointment of Superintendent of the Mechanical Division.

CULEBRA, C. Z., January 26, 1914.

CIRCULAR No. 523:

Mr. D. C. Nutting, Naval Constructor, U. S. Navy, is appointed superintendent of the Mechanical Division, effective this date.

GEO. W. GOETHALS,
Chairman and Chief Engineer.

Transportation of Labor Gangs.

CULEBRA, C. Z., January 30, 1914.

HEADS OF DEPARTMENTS AND DIVISIONS:

Frequent instances have been brought to the attention of this office in which passes covering the transportation of labor gangs from one point to another have been improperly filled out, resulting in the passes being taken up and the laborers compelled to pay full fare or get off the train. It is also noted that in a great many cases foremen in charge of labor gangs neither accompany the gangs when traveling, in accordance with circular letter from this office, dated January 18, 1908, nor make any effort to see that the gangs are given proper instructions with reference to the use of transportation.

While it may not always be convenient for the foreman in charge of a gang to accompany the gang when traveling, he must do so whenever possible, and at least see that the men are provided with proper transportation which should be handed to the collector as they get on the train. Please issue positive instructions to all foremen regarding this matter.

GEO. W. GOETHALS,
Chairman.

Prompt Handling of Equipment to be Retired.

CULEBRA, C. Z., February 2, 1914.

ALL ACCOUNTABLE OFFICERS:

Owing to the moving of the shops from Empire to Balboa, it is necessary that all equipment which needs to pass through shops for retirement be handled as soon as possible.

You are therefore instructed to submit survey papers on all equipment that is to be retired, so that same can be given attention at once.

GEO. W. GOETHALS,
Chairman.

Property Accountability at Balboa Store.

CULEBRA, C. Z., January 28, 1914.

ALL ACCOUNTABLE OFFICERS:

Effective February 1, 1914, Mr. Charles L. Parker will take over the property accountability at Balboa store, in place of Mr. X. D. Holt, who will cease to be an accountable officer of the Commission on final audit of his accounts.

GEO. W. GOETHALS,
Chairman and Chief Engineer.

Recovery of Scrap.

CULEBRA, C. Z., February 2, 1914.

All concerned.—The following instructions will govern in the recovery of scrap:

1. Inspections will be made under the direction of the Chief Quartermaster to see that all scrap is recovered around shops, power houses, engine houses, field repair shops, and localities where construction work is, or has been carried on.

2. The construction departments will be expected to make a thorough clean-up of all scrap during the present dry season. After the clean-up has been made, whenever practicable, Lidgeewood cars should be set out in localities where scrap is produced. Around small shops, and in places where only a small quantity of scrap is produced, dump buckets and skips will be used for collecting scrap. Supply of dump buckets and skips may be obtained from Mount Hope. When a sufficient quantity of skips and buckets has been accumulated to justify shipment, shipment should be made to Mount Hope Depot.

3. The construction and shop forces are primarily responsible for keeping premises clean and seeing that all scrap or usable material is picked up and turned over to the Quartermaster's Department.

4. The district quartermasters, storekeepers, and material foremen of the Quartermaster's Department will call the attention of responsible officials of the construction and shop forces to any scrap or material that is not being picked up or properly handled, and if no action is taken within a reasonable time they will report the matter to the Chief Quartermaster.

5. No tracks are to be taken up, leaving scrap in an isolated locality, where it will be expensive to recover. In loading scrap in the field, a reasonable amount of care should be taken, so as to save expense in unloading. For instance, rail and track fittings should not be loaded

together on the same car unless in cases where only one carload of material is picked up.

6. All serviceable material, so far as practicable, should be kept separate from scrap and turned into the nearest Quartermaster's storehouse.

7. In handling scrap around shops, care should be taken, as far as practicable, to keep brass, babbitt, and iron and steel borings and chips separate. By mixing babbitt with brass borings, the price of the borings is reduced at least one cent a pound. By mixing iron and steel chips with brass borings, the price of the borings is reduced two or three cents a pound. Cast iron scrap should be kept separate from other iron scrap and should be shipped to the storekeeper at Balboa for use in the foundry.

8. All electric light, telephone, and power lines should be taken down as soon as no longer required.

9. All brass and copper should be kept in a secure place to prevent theft or loss.

10. In cleaning up around work, care should be taken to see that copper wire and small pieces of brass and copper scrap are not picked up with dirt and thrown on the dump. The same remark applies to rope, hose, and scrap rubber.

11. Track gangs should pick up all scrap, such as tie plates, bolts, rail, etc., collect same at some central point, and make shipments to Mount Hope at least once a month, or oftener, if necessary. The track gangs on dumps should see that all scrap rail, car aprons, and scrap of all kinds, are picked up.

12. Scrap receptacles should be placed at all section houses on the main line of the Panama railroad and section gangs of this company should turn in all scrap recovered on, or in the immediate vicinity of, the right-of-way.

13. The powder foreman will see that all fuse used in excavation work is picked up.

14. The heads of the departments will see that their men are informed as to the value of scrap and that they understand the importance of taking care of it and keeping it picked up. The following is the value of the various classes of scrap:

Copper.....	pound..	10c to 15c.
Brass.....	pound..	10c to 12c.
Lead.....	pound..	5c.
Rope.....	pound..	2c.
Hose and rubber.....	pound..	2c.
Serviceable rail.....	ton..	\$20
Cast iron.....	ton..	\$12 to \$14
Steel and iron scrap.....	ton..	\$4 to \$10

15. In addition to scrap recovered, there is always a certain portion of serviceable material which finds its way into the scrap pile. By keeping the scrap cleaned up, this material will be recovered and put back in service while it is still in usable condition.

16. Scrap cable, scrap galvanized iron pipe, and scrap galvanized iron roofing have no scrap value, and no money should be spent in recovering this material.

GEO. W. GOETHALS,
Chairman.

Unserviceable Level Rods.

CULEBRA, C. Z., February 2, 1914.

ALL ACCOUNTABLE OFFICERS:

It is requested that all unserviceable level rods be turned over to the district quartermaster at Culebra as soon as possible, for use of the supervisor, Second Division. Survey papers should be submitted at the same time that level rods are shipped.

GEO. W. GOETHALS,
Chairman.

Shipments of Household Goods via Pacific Mail Steamship Company.

CULEBRA, C. Z., January 28, 1914.

HEADS OF DEPARTMENTS AND DIVISIONS:

The local agent of the Pacific Mail Steamship Company advises that his line will accept shipments of household goods and personal effects of persons in the employ of the Commission on the basis of a 25 per cent reduction from the regular tariff freight rate at \$10 a ton of 40 cubic feet, or 2,000 pounds, ship's option. By direction of the Chairman.

C. A. McILVAINE,
Chief Clerk.

Examination by Board of Local Inspectors.

BOARD OF LOCAL INSPECTORS.

ANCON, C. Z., January 29, 1914.

The Board of Local Inspectors will conduct examinations at the Administration building, Ancon, on Wednesday, February 11, 1914, beginning promptly at 2 p. m., for persons desiring the following classes of licenses: Pilots, masters, mates, marine engineers, chauffeurs, and navigators of motor boats. All applicants for licenses must procure from the Executive Office, Ancon, forms of application and information respecting the filling out of the same, not later than the day previous to the examination. In addition, all persons desiring chauffeurs' licenses must provide

themselves with automobiles with which to demonstrate their ability to properly operate the same.

NOTE.—The demonstration test for applicants for chauffeurs' licenses will be given on Tuesday, the day preceding the regular examination, at 2 p. m., at the Administration Building, Ancon; on Wednesday, the day of the regular examination, for out-of-town applicants, at 2 p. m., at the Administration Building, Ancon. No demonstration tests will be given at Cristobal, except by appointment.

HUGH RODMAN,
Chairman, Board of Local Inspectors.

Amendment to Circular No. 96-B.

CRISTOBAL, C. Z., February 2, 1914.

CIRCULAR No. 96-B:

Circular No. 96-B is hereby amended by omitting paragraph—

"Special rates will be made for room and meals for women employes for whom no quarters are provided at Ancon."

EUGENE T. WILSON,
Subsistence Officer.

Changes in Panama-Bas Obispo Shuttle Train Service.

PANAMA RAILROAD COMPANY,
OFFICE OF GENERAL SUPERINTENDENT,
COLON, R. P., January 28, 1914.

G. S. BULLETIN No. 43:

All concerned.—Effective 12.01 a. m., February 1, the following changes in passenger train schedule, time table No. 17, will be made:

Las Cascadas will be the north terminal station for trains Nos. 42, 43, 46, 47, 50, and 51, Bas Obispo-Panama shuttle service.

All other trains in this shuttle service will operate through to Bas Obispo station as at present.

F. MEARS,
General Superintendent.

McNeill, J. D.	Wilson, Mrs. F.

Movement of Vessels, Port of Balboa.

The following steamers arrived at, or departed from, the port of Balboa, during the week ending January 31, 1914:

Arrivals.—January 25, *Rupanco*, from intermediate ports; January 26, *Pachitea*, from Callao; January 27, *Colusa*, from San Francisco, Ecuador, from Guayaquil; January 28, *Limari*, from Valparaiso.

Departures.—January 26, Mexico, to Callao and south ports; January 27, *Manari*, to intermediate ports; January 31, *San José*, to Central America and south ports, *Rupanco*, to Guayaquil.

Lost.—On Wednesday, January 28, on the shuttle train between Panama and Bas Obispo, a Masonic button, square, and compass. Finder please leave at the Panama railroad ticket office, Panama.

Lost.—A bunch of keys and metal check No. 114844 either at Balboa terminals, or Gold Hill. Reward, if returned to O. Cook, engineer, Room 24 house No 159, Balboa.

MOVEMENT OF OCEAN VESSELS.

CANAL

RECORD

Volume VII.

ANCON, CANAL ZONE, WEDNESDAY, FEBRUARY 11, 1914.

No. 25.

The Canal Record

Published weekly under the authority and supervision of the Isthmian Canal Commission.

The Canal Record is published free of charge, one copy each, to all employees of the Commission and Panama Railroad Company whose names are on the gold roll. Extra copies and back numbers can be obtained from the news stands of the Panama Railroad Company for five cents each.

Address all Communications,
THE CANAL RECORD,
Ancon, Canal Zone,
Isthmus of Panama.

No communication either for publication or requesting information, will receive attention unless signed with the full name and address of the writer.

NOTES OF PROGRESS.

The New Organization.

The following general statement relative to the reorganization is issued for the information of employees, as these matters are of personal and direct interest to them:

The Panama Canal Act, and the Executive Orders outlining this organization and the permanent conditions of employment, have been published. The Panama Canal Act provides a certain maximum for wages. There is, therefore, no authority outside of Congress to pay wages in excess of that maximum. Some decreases in compensation will be necessary, while in other positions no changes will be made. A revised scale of wages has been made up, and in each case where a decrease has been necessary, the classes affected have been given the benefit of the 25 per cent allowed by law. In addition, provision has been made for leave with pay, free hospital treatment, railroad transportation privileges, quarters, etc.

The question of making a charge to cover rent for quarters, fuel, and light will be taken up at a later date, but it is not anticipated that any change will be made prior to April 1, 1915; and when one is made the terms will be reasonable.

Those employees who have earned free transportation under the old organization will be allowed same at any time in the future that their services are terminated.

There are to be no wholesale reductions in force on April 1. The work will go on as usual, the construction forces completing their tasks, and reductions of force only taking place as the work closes up. At the same time the forces necessary to operate the Canal will be selected, as far as possible, from the men on the Isthmus.

As will be noted from the Executive Order, a Department of Organization and Maintenance is provided. This will simply consolidate under one head all the present work designated for that department, and the work itself will go on, and will be worked down gradually to the permanent basis by dropping

out from time to time those whose services may no longer be needed, and retaining, so far as possible, the most efficient men.

The work consolidated under the Examiner of Accounts will be handled in the same general way, using present forces to carry on the work and pruning out the poorer material from time to time as conditions gradually settle down to the permanent basis.

The Supply Department will be simply a consolidation of the Quartermaster's Department and the Commissary-Subsistence Department.

The Health Department will replace the Department of Sanitation, and the Executive Secretary will, under my direction, take charge of the Department of Civil Administration, and the other duties named in the Executive Order.

It will thus be seen that the permanent organization will be a *development*, an adaptation of the present organization to permanent needs, by gradual changes as they are practicable and advisable.

Nearly all the changes made for some time past have been a preparation for the permanent organization, as, for instance, the consolidation of the dredging under one head, the consolidation of municipal engineering, timekeeping, files, etc. This development will continue until a permanent basis is reached.

There will be some delay in paying off accrued leave due on April 1. The office force will be heavily taxed to prepare new forms, new appointments to cover the new conditions of employment, etc., and it will probably take two or three months to calculate the accrued leave due the nearly four thousand gold employees, and to execute the necessary papers and vouchers to make the payments. It will not be practicable to start this work until about April 1, and it is expected to get out this special roll not later than July 1, but in the meantime, payments will be made to employees whose services may be terminated. Arrangements will be made also to allow employees who have had no leave for 10 months, or more, to take a leave of six weeks, or so, without pay, pending the time they will have earned a leave under the new organization. Such a leave without pay will not prejudice their leave rights in the new organization. In such cases, they will be paid their accrued leave before going away, if the leave is taken prior to the time the special roll is ready.

Other necessary rules and regulations will be published after my return to the Isthmus.

GEO. W. GOETHALS,

Chairman and Chief Engineer.

CULEBRA, C. Z., February 11, 1914.

Dredge "No. 84" Makes Record Change of Pumps.

The crew of the 20-inch pipeline dredge No. 84, working at Margarita Point, estab-

lished a new record for time in changing main pumps, by removing the old pump and installing a new pump in 21 hours. The work was begun at 6 p. m., on Saturday, January 24, the regular stopping time for the dredge, and the new pump was completely installed and ready for work at 3 p. m., on Sunday, January 25, no dredging time having been lost.

This is shorter, by three hours, than any previously recorded time.

Appointment of Colonel Goethals as First Governor of the Canal.

The nomination of Col. Geo. W. Goethals as first Governor of the Panama Canal, forwarded to the Senate by President Wilson on January 29, was confirmed by the Senate on February 4.

Foot and Wagon Bridge Across Chagres River.

The erection of bracket extensions on the east side of the piers of the Gamboa bridge of the Panama railroad, to support the proposed foot and wagon bridge for crossing the Chagres River, and one side of the track-span bridges of the transmission line, has been begun. Part of the material for the bridge proper has arrived on the Isthmus, and enough to allow the erection to begin is expected to arrive within this week. The bridge is to be 10 feet wide, and at about the elevation of the rails of the track, the tops of which are 91 feet above sealevel. The use of the old footbridge on the west, or lower, side of the structure has been destroyed by the rise of Gatun Lake, which has inundated the approaches, formerly on dry land.

Diablo Demolished.

All of the buildings at Diablo, except two owned by the Isthmian Canal Commission, and remodeled by employees at their expense, are being demolished and transferred to La Boca. They will be erected there and rented to silver employees. The families of white Americans formerly living at Diablo have been quartered in Corozal. Diablo originated as a camp for silver employees, the Commission buildings having been placed there in 1907 as bachelors' barracks. The houses were made into gold family quarters in 1909, and Diablo has since been a part of the Corozal district. The immediate reason for removing the houses is on account of the steamshovel excavation on the east side of the hill on which they were situated. The edge of the cut has broken back to the site of the house foundations.

Recurrence of Seismic Disturbances.

From 5.57 p. m., on Saturday, February 7, to 8 a. m., on Monday, February 9, ten distinct earthquake shocks were registered at the Ancon and Gatun seismograph stations. Only two of these shocks, however, were pronounced. The first was the severest and continued until

6.25 p. m. The record at Ancon showed a maximum amplitude of 57 millimeters (Magnification 10.) Measured by the Rossi-Forel scale, this shock was of Intensity II or III. The movement was felt by a number of persons in this section of the Isthmus. The second pronounced shock occurred at 12.08 a. m., on Sunday, February 8, the record showing an amplitude of 11 millimeters; it was classified as Intensity II. The other disturbances were slight, measuring about Intensity I. The instruments indicated that the epicenter, in all but two of the movements, was about 115 miles to the southwest of Ancon. Two slight shocks, one at 2.08 p. m., and the other at 2.33 p. m., on Sunday, February 8, indicated an epicenter 300 miles distant from Ancon, direction unknown. All but the two last mentioned of the recent disturbances apparently originated in the same locality, in or near Los Santos province, as those of October and November, 1913.

PERSONAL.

Col. Geo. W. Goethals will sail for New York on the United Fruit Company's steamship *Metapan*, on Thursday, February 12.

Lieut.-Col. Eugene T. Wilson will sail for the United States on Thursday, February 12, on special leave of absence of three weeks.

Obituary.

A cable message has been received announcing the death, on Saturday, February 7, of Dr. Jean Pierre Lacroisade, at his home at La Croisade, near Angoulême, Department of Charente, France. He was a surgeon in the service of the French canal companies from September 17, 1887, the date he first arrived on the Isthmus, until 1891, when he was promoted to the post of chief surgeon, a position he retained up to the transfer of the Canal property to the United States Government on May 4, 1904. He was offered and accepted a position as physician in the medical corps of the Canal Commission, entering its service on September 13, 1904. He was first connected with the Ancon Hospital staff, was later transferred to Santo Tomas Hospital in Panama, and subsequently became a physician in the health department, resigning on October 24, 1906, shortly after which he returned to France. He was 74 years of age, and is survived by his wife and five children, four sons, and one daughter. One of the sons, Mr. Elie Lacroisade, resides in Panama.

Clarence E. Whalen, a member of the Tenth Infantry, was struck and killed by a train at Las Cascadas on February 1. He was single, and had been on the Isthmus two and one-half months. He is survived by his mother, living at Chambersburg, Pa.

Charles C. Grover, formerly a private in the Tenth Infantry, U. S. A., stationed at Las Cascadas, died at Ancon Hospital on February 1. He was a native of the State of Maine, and had been on the Isthmus 18 months.

Meeting of Y. P. S. C. E. at Corozal Postponed.

The meeting for the purpose of organizing a Christian Endeavor society at Corozal, scheduled for last Sunday morning at the Y. M. C. A. clubhouse, was postponed to Sunday, February 15, at 11 o'clock.

The semiweekly informal dance of the Strangers Club will occur on February 19.

CHIRIQUI RAILROAD.

Government of Panama Contracts for Construction of 52-Mile Line.

The Secretary of Public Works of the Republic of Panama let a contract on February 4 to R. W. Hebard and Company, Inc., for the construction and equipment of a 3-foot gage steam railway in the province of Chiriqui. The road is to extend from Pedregal to David, thence to Boquete, and a branch line is to run from David to La Concepción. The total length of the road, including the 20-mile branch to La Concepción, is to be about 52 miles, extending from seaboard to a point about 4,000 feet above sealevel. The details of construction, as specified in the contract, are essentially those recommended by a committee, consisting of Capt. R. E. Wood, Capt. W. H. Rose, and Mr. A. S. Zinn, appointed by the Chairman and Chief Engineer, on request of President Porras, to consider the plans previously drawn up by the contractor.

factors for the present undertaking of the work.

The cost of the project is estimated at approximately \$1,600,000. The contract provides that the contractor is to be paid in bonds of the Government of Panama, and he will receive five per cent of the cost up to \$1,600,000, with a bonus of 50 per cent of all the saving on this estimate, and a penalty of paying 50 per cent of all cost above the estimate. The contractor is to advance the money for the work, submitting each month a report of expenses for the 30 days preceding; this amount, on approval, will be refunded to the contractor, in bonds, with the stipulated bonus of five per cent.

Analysis of Limestone Deposit.

An analysis has been made of a deposit of limestone occurring near mile post No. 24 on the Panama railroad main line, a little north of Radio Station, which shows it to contain a silicious residue of .70 per cent;

SECTION OF CHIRIQUI PROVINCE SHOWING PROPOSED LINE OF RAILROAD.

Construction work is to be begun within 60 days after date of contract, and completed by May 1, 1916. The maximum force to be employed is estimated at about 2,000 men. Efforts will be made to engage the services of European laborers relinquished by the Canal Commission as the Canal construction draws to a close, and the Government of Panama will attempt to colonize these men in the district through which the railway is to run. It is anticipated also, that a great part of the necessary equipment and material will be purchased from the retired and surplus supplies of the Isthmian Canal Commission, and the availability of this relatively cheap material at this time was one of the deciding

iron and alumina, .90 per cent; calcium carbonate, 97.03 per cent, and magnesium, 1.06 per cent. The large proportion of calcium carbonate has shown this deposit to be well suited for mixing with limeless soils. Arrangements will be made to use it in the preparation of the ground for the growing of citrus fruits on the Subsistence Department's farm near Frijoles.

Order of Isthmian Conductors.

The next regular meeting of the Order of Isthmian Conductors will be held in Ancon lodge hall on Sunday, February 15, at 9.30 a. m. **GEORGE B. ALLEN, Secretary.**

COROZAL, C. Z., February 9, 1914.

A letter addressed to Mr. Tobin, care of THE CANAL RECORD, may be procured on application of the addressee at the office of the Secretary, Ancon.

ZONE WOMEN AT WORLD'S FAIR

Women's Board of San Francisco Exposition Invites their Cooperation.

The Woman's Board of the Panama-Pacific International Exposition has extended an invitation to the American women in the Canal Zone to organize an auxiliary to the board, having the same status as county auxiliaries in the State of California. The invitation to such participation in the work and privileges of the woman's board is limited to the 58 counties of the State of California, and to the Canal Zone; the latter organization will be called the Panama auxiliary. The invitation was tendered by a representative of the woman's board, Mrs. S. M. B. Healey, who visited the Isthmus last week for that purpose.

The woman's board is an executive body formed for the purpose of furthering the preparatory work for the exposition. Its central office is in the Panama Building in San Francisco. For the purpose of securing the cooperation of women throughout the State, the board has formed auxiliaries in the counties, which, in turn, have their suborganizations and are a part of the working force in San Francisco. The county auxiliaries have an organization which calls for a chairman, subchairman, secretary, and treasurer. The names of the women chosen for chairman are forwarded to the central board, which ratifies the election; the chairman and her subchairman are members *ex officio* of the woman's board, with all its rights and privileges, except those of voting.

There will be no "Woman's building" at the Panama-Pacific exposition in the sense that the exhibits of women will be shown in such a building. The participation of women in the exposition administration is to be entirely upon the basis of equality and cooperation. The woman's board has undertaken to furnish, operate, and control the entertainment section of the California Host Building. The development of this responsibility is expected to attract the interest of the women of California. County auxiliaries will be asked, in turn, to act as hostesses in the reception and entertainment of the visitors, the date of such invitation being dependent upon the convenience of the board. The installation of day nurseries and playgrounds will be undertaken by the woman's board, and special work is the financing and furthering of plans for the protection of women and girls.

Another effort of the woman's board is the raising of a fund for the erection of a statue to "Motherhood." This monument, the model of which is being executed, will be a permanent bronze statue. It has been promised a place beneath the dome of the Fine Arts building, and, at the close of the exposition, will be presented to the city of San Francisco.

Membership in the Panama auxiliary costs \$2. The seal of the woman's board has been made into a membership badge, and is sold at \$1. This pin is not purchasable by any but certified members of the board, or one of its auxiliaries. The design, which is executed in colors with a groundwork of gold, shows a woman's figure standing between two parted gates. Within is revealed a ship in full sail, with the setting sun for a background, the whole typifying the opening of

the Panama Canal as a new avenue to the commerce of the world.

Moneys raised by the woman's board through contributions, auxiliary membership, and the sale of pins will be expended for office administration, for the furnishing and maintenance of the California building, and for participation in the general welfare work to be organized.

Members of auxiliaries will be entitled to the privileges of the rest and tea room in the California building. Membership tickets will be sent out shortly before the opening of the exposition. The central organization, which is composed of both men and women, consist of a limited number of stockholders who bear all the legal responsibilities.

Cristobal Woman's Club.

At the meeting of the Cristobal Woman's Club on Wednesday afternoon, February 4., Maj. Charles Gerhardt, Tenth Infantry, U. S. A., was the speaker in the place of Dr. Dexter as previously announced, the latter having been called away on official business. Major Gerhardt spoke on popular military education, giving an outline of the students' military camps, which were established last summer under the direction of regular officers of the United States Army at Monterey, California, and Gettysburg. The Cecelian trio of the Cristobal club sang three numbers. The members of the trio are Mrs. Williamson, Mrs. Diers, and Mrs. Mears; Mrs. Ulrich is the director and pianist. Book reviews will be the subject of the meeting on February 18.

New Woman's Club at Pedro Miguel.

A movement has been started to form a woman's club at Pedro Miguel, and a mass meeting will be held in the Commission clubhouse, for the purpose of considering the form that such an organization shall take, on Friday afternoon, February 20, at 2 o'clock. It is intended to invite experienced club women of the Canal Zone to assist in the forming of this organization, and women residing in Pedro Miguel and Paraiso are invited to attend the meeting.

The first woman's club at Pedro Miguel was organized on October 2, 1907. It continued activities, planning for and carrying out many community entertainments, especially Christmas celebrations, until 1912, when, owing to the changes in the villages and the removal of many of the members, it was disbanded. The club was federated in the Canal Zone Federation of Woman's Clubs, and, in connection with the Paraiso Woman's Club, entertained the federation at the January convention in 1911. The new club will have more scope for general activities than the original club had, and the cooperation of the clubhouse secretary, the privileges of the clubhouse, and the more permanent character of the village, provide a more encouraging outlook.

Bishop Knight's Visit Postponed.

The annual visit of the Rt. Rev. Albion W. Knight, D. D., bishop of the Episcopal church, which was to have taken place February 21 to March 1, has been postponed one week. Bishop Knight will arrive, according to cable advice, on Saturday, February 28. The dates of the local visitations will be announced in THE CANAL RECORD later.

The regular dance of the Cristobal Dancing Club will be held on Saturday evening, February 14, at the Commission clubhouse.

EXECUTIVE ORDER

To Establish a Permanent Organization for the Panama Canal.

By virtue of the authority vested in me, I hereby enact the following Order, creating a permanent organization for the Panama Canal under the Act of Congress "To provide for the opening, maintenance, protection, and operation of the Panama Canal, and the sanitation and government of the Canal Zone," approved August 24, 1912.

Section I.

The organization for the completion, maintenance, operation, government, and sanitation of the Panama Canal and its adjuncts, and the government of the Canal Zone, shall consist of the following departments, offices, and agencies, and such others as may be established by the Governor of the Panama Canal on the Isthmus or elsewhere with the approval of the President, all to be under the direction of the Governor, subject to the supervision of the Secretary of War.

DEPARTMENT OF OPERATION AND MAINTENANCE.

There shall be a Department of Operation and Maintenance under the immediate supervision and direction of the Governor of the Panama Canal. This department shall be charged with the construction of the Canal and with its operation and maintenance when completed, including all matters relating to traffic of the Canal and its adjuncts, and the operation and maintenance of beacons, lights, and lighthouses; the supervision of ports and waterways, including pilotage; the admeasuring and inspecting of vessels, including hulls and boilers; the operation and maintenance of the Panama railroad upon the Isthmus, including telephone and telegraph systems; the operation of locks, coaling plants, shops, dry docks, and wharves; office engineering, including meteorology and hydrography; the construction of buildings and sanitary and municipal engineering, including the construction and maintenance of drainage ditches, streets, roads, and bridges.

PURCHASING DEPARTMENT.

There shall be a Purchasing Department under the supervision and direction of the Governor. This department shall be charged with the purchase of all supplies, machinery, or necessary plant.

SUPPLY DEPARTMENT.

There shall be a Supply Department, under the supervision and direction of the Chief Quartermaster. This department shall store and distribute all material and supplies for use of the Panama Canal and of its employees; and for other departments of the Government on the Isthmus and their employees; and for vessels of the United States and for other vessels, when required. The Supply Department shall operate commissaries, hotels, and messes; shall be in charge of the maintenance of buildings, the assignment of quarters, and the care of grounds; shall recruit and distribute unskilled labor; and shall have charge of the necessary animal transportation.

ACCOUNTING DEPARTMENT.

There shall be an Accounting Department under the supervision and direction of the Auditor, with an assistant in the United States. The duties of the department shall include all general bookkeeping, auditing, and accounting, both for money and property, costkeeping, the examination of pay rolls and vouchers, the inspection of time books and of

money and property accounts, the preparation of statistical data, and the administrative examination of such accounts as are required to be submitted to the United States Treasury Department; and the collection, custody, and disbursement of funds for the Panama Canal and the Canal Zone. These same duties shall be performed for the Panama Railroad Company on the Isthmus when not inconsistent with the charter and by-laws of that company. The department shall be charged with the handling of claims for compensation on account of personal injuries and of claims for damages to vessels. Within the limits fixed by law, the duties and financial responsibilities of the officers and employees charged with the receipt, custody, disbursement, auditing, and accounting for funds and property shall be prescribed in regulations issued by the Governor, with the approval of the President. The Auditor shall maintain such a system of bookkeeping as will enable him to furnish at any time full, complete, and correct information in regard to the status of appropriations made by Congress, the status of all other funds, and the amounts of net profits on all operations, which are to be covered into the Treasury as required by the Panama Canal Act.

HEALTH DEPARTMENT.

There shall be a Health Department under the supervision and direction of the Chief Health Officer. This department shall be charged with all matters relating to maritime sanitation and quarantine in ports and waters of the Canal Zone, and in the harbors of the cities of Panama and Colon; and with land sanitation in the Canal Zone, and sanitary matters in said cities in conformity with the Canal Treaty between the United States and the Republic of Panama and existing agreements between the two Governments thereunder; and all matters relating to hospitals and charities.

EXECUTIVE SECRETARY.

There shall be an Executive Secretary, who, under the direction of the Governor of the Panama Canal, shall be charged with the supervision of all matters relating to the keeping of time of employees; to post-offices, customs, taxes, and excises, excepting the collection thereof; police and prisons; fire protection; land office; schools, clubs, and law library; the custody of files and records; and the administration of estates of deceased and insane employees. He shall, in person, or through one of his assistants, perform the duties of a Shipping Commissioner. He shall conduct all correspondence and communications between the authorities of the Canal Zone and the Government of the Republic of Panama, and such other correspondence as may be given him in charge by the Governor. He shall have charge of the seal of the Government of the Canal Zone, and shall attest such acts of the Government as are required by law to be performed and done under the seal.

The duties herein prescribed for the foregoing departments, offices, and agencies will be assigned to divisions or bureaus thereunder by the Governor of the Panama Canal, as the necessities therefor arise. Each of the foregoing departments shall discharge such further duties as may be assigned to it from time to time by the Governor; and the Governor, with the approval of the President,

may transfer from time to time specific duties from one department to another.

Section II.

The organization provided for in Section 1 shall be, in general, in accordance with the outline chart accompanying the memorandum of January 27, 1914, entitled "Memorandum to accompany Executive Order of January 27, 1914, providing for a permanent organization for the Panama Canal," and officers from certain departments shall be detailed in accordance with that memorandum.

Section III.

This Order shall take effect from and after the first day of April, 1914, from which date the Isthmian Canal Commission, together with the present organization for the Panama Canal and the Canal Zone, shall cease to exist, in accordance with the terms of the above-mentioned Act of Congress.

WOODROW WILSON.

THE WHITE HOUSE,
January 27, 1914.

[No. 1885.]

Memorandum to accompany Executive Order of January 27, 1914, providing for a permanent organization for the Panama Canal.

In construing and carrying out the foregoing Order, I direct that it be done with the following considerations in view:

I have deemed it advisable for reasons of efficiency, economy, and good administration to have all the activities connected with the Panama Canal under the supervision of one Cabinet officer.

The troops which will be stationed on the Canal Zone for the protection of the Panama Canal are under the Secretary of War; the Panama Canal Act provides that in time of war an officer of the Army shall, upon the order of the President, have exclusive authority over the operation of the Panama Canal and the Government of the Canal Zone; the construction of the Canal has been successfully carried on under the supervision of the Secretary of War; the logical conclusion is, therefore, that the supervision of the operations of the Panama Canal under the permanent organization should be under the Secretary of War.

It is directed that officers shall be detailed for certain duties from the several departments, as follows:

As Engineer of Maintenance, an officer of the Corps of Engineers, U. S. Army, who shall act as Governor in the absence or disability of the Governor of the Panama Canal.

As Superintendent of Transportation, an officer of the U. S. Navy.

As Electrical Engineer, an officer of the Corps of Engineers, U. S. Army.

As Captains of the Terminal Ports, officers of the U. S. Navy.

As Superintendent of Shops and Dry Docks, a naval constructor, U. S. Navy.

As Chief Health Officer, an officer of the Medical Corps, U. S. Army.

As Superintendent of Hospitals, an officer of the Medical Corps, U. S. Army.

As Chief Officer of the Quarantine Division, an officer of the U. S. Bureau of the Public Health.

As Chief Quartermaster, an officer of the Quartermaster Corps, U. S. Army.

The organization is to be in general accordance with the chart accompanying this memorandum, except that all of the various

divisions and subdivisions need not be established until, in the opinion of the Governor, it is desirable to do so, the organization being expanded gradually as the necessities of the work require.

WOODROW WILSON.

THE WHITE HOUSE,
January 27, 1914.

The Executive Order defining "Conditions of employment for the permanent force of the Panama Canal," published in full in THE CANAL RECORD of February 4, was signed by the President on February 2, 1914.

EXECUTIVE ORDER

To Prevent Fire Hunting at Night, and Hunting by Means of a Spring or Trap, and to Repeal the Executive Order of September 8, 1909.

By virtue of the authority vested in me, I hereby establish the following Order for the Canal Zone.

Section 1. Every person who shall hunt at night, between the hours of sunset and sunrise, with the aid or use of a lantern, torch, bonfire, or other artificial light, or who shall hunt by the use of a gun or other firearm intended to be discharged by an animal or bird, by means of a spring or trap, or other similar mechanical device, shall be guilty of a misdemeanor.

The penalties imposed by this Order shall be in addition to the punishments authorized by the law against carrying arms without a permit.

Section 2. The Executive Order of September 8, 1909, amending Section 454 of the Penal Code of the Canal Zone, is hereby repealed.

Section 3. This Order shall take effect thirty days from and after its publication in THE CANAL RECORD.

WOODROW WILSON.

THE WHITE HOUSE,
January 27, 1914.

[No. 1884.]

Sunday Trips of Sightseeing Barge Through Gatun Lake.

The Panama railroad sightseeing barge was placed in service on Sunday, February 8, when two trips were made through Gatun Lake. On the morning trip from Gamboa to Gatun, about 100 passengers were carried, and on the afternoon trip from Gatun to Gamboa, about 50. The tug *Porto Bello* towed the barge in the morning from the end of a hawser; in the afternoon, the tug *Reliance* performed this duty with the barge lashed alongside. The second trip occupied about two hours and 20 minutes. There will be two trips of the barge through the lake on Sunday, February 15, one leaving Gamboa at 8.40 a. m., and the second, leaving Gatun at 2 p. m. Fare \$1.50, U. S. currency, one way.

John Burke Suspended.

John Burke, manager of the Panama railroad commissaries, was suspended from office on Monday, February 9, and has been given until April 1 to show that certain checks deposited to his credit were come by honestly.

Civil Service Examinations.

Applications for the examinations mentioned in THE CANAL RECORD of February 4 will not be received after February 14.

ISTHMIAN CIVIL SERVICE BOARD.

CULEBRA, C. Z., February 9, 1914.

CUSTOMS ON BAGGAGE.

Bulletin of Treasury Department on Declarations for Entry into the United States.

The following bulletin, issued by the Secretary of the Treasury, with respect to the entry of baggage through the customhouses of the United States, is published for the information and guidance of all concerned:

Paragraph 642, appearing in the free list of the present tariff Act, reads, as follows:

642. Wearing apparel, articles of personal adornment, toilet articles, and similar personal effects of persons arriving in the United States; but this exemption shall include only such articles as were actually owned by them and in their possession abroad at the time of or prior to their departure from a foreign country, and as are necessary and appropriate for the wear and use of such persons and are intended for such wear and use, and shall not be held to apply to merchandise or articles intended for other persons or for sale; provided, that in case of residents of the United States returning from abroad all wearing apparel, personal, and household effects taken by them out of the United States to foreign countries shall be admitted free of duty, without regard to their value, upon their identity being established under appropriate rules and regulations to be prescribed by the Secretary of the Treasury; provided further, that up to but not exceeding \$100 in value of articles acquired abroad by such residents of the United States for personal or household use or as souvenirs or curios, but not bought on commission, or intended for sale, shall be admitted free of duty.

BAGGAGE DECLARATIONS.

The law requires that every person entering the United States shall make a declaration and entry of personal baggage. The senior member of a family present as a passenger may, however, declare for the entire family.

A failure to declare articles acquired abroad and brought in as baggage renders the articles subject to forfeiture and the passengers liable to criminal prosecution. (Sections 2802 and 3082, R. S.)

Returning residents of the United States should use the form of declaration printed in black; nonresidents should use the form printed in red.

The exact number of pieces of baggage accompanying a passenger must be stated in the declaration, including trunks, valises, boxes, hand bags, and packages or bundles of every kind. Forms of baggage declarations will be furnished passengers by the steamship officers. The declaration should be prepared and signed at least one day before the expected arrival of the vessel. Declarations spoiled in preparation should not be destroyed, but should be turned over to the purser, who will furnish a new blank.

When the declaration has been prepared and signed, the coupon at the bottom of the form must be detached and retained by the passenger and the declaration delivered to the ship's officer designated to receive the same. After all the baggage and effects of the passenger have been landed, the coupon which has been retained must be presented at the inspector's desk, and an inspector will then be detailed to examine the baggage.

Passengers must acknowledge in person, on the pier, their signatures to the declarations.

RETURNING RESIDENTS OF THE UNITED STATES.

Returning residents of the United States must declare all articles acquired abroad, in their baggage or on their persons, whether by purchase, by gift, or otherwise, and whether dutiable or free of duty. Exemption, however, will be allowed by customs officers of articles aggregating not over \$100 in value, if suitable for personal or household use, or as souvenirs or curios, and whether intended for the personal use of the passengers or as gifts

or presents to others, provided the articles are not bought on commission for another person nor intended for sale. Articles so exempt from duty must, nevertheless, be declared.

Articles belonging to one passenger cannot be included in the exemption of another.

Use does not exempt from duty wearing apparel or other articles obtained abroad. Such articles which have been used abroad may, however, be specifically noted on the declaration and due allowance will be made by the appraising officers for depreciation through wear and use, and duties charged upon the articles at their value in their condition as imported.

Passengers must not deduct the \$100 exemption in making out their declarations. Such deductions will be made by customs officers on the pier.

All wearing apparel, personal, and household effects taken out of the United States by residents shall be admitted free of duty without regard to their value, upon their identity being established. If remodeled, repaired, or improved abroad the cost of such remodeling, repairing, or improvement must be declared, and receipted bills for such alterations should be presented. The cost of such repairs is subject to duty, but may be included by customs officers within the \$100 exemption. If the cost or value of the repairs be not declared, the articles will be subject to duty upon their entire value.

Citizens of the United States, or persons who have at any time resided in this country, shall be deemed to be residents of the United States, unless they shall have abandoned their residence in this country and acquired an actual, *bona fide* residence in a foreign country. Such citizens or former residents who declare as nonresidents must present satisfactory evidence to the customs officers upon the pier that they have given up their residence in the United States and have become *bona fide* residents of a foreign country.

The residence of a wife follows that of the husband, and the residence of a minor child follows that of its parents.

The examination of baggage will be facilitated and difficulties avoided if receipted bills for foreign purchases be presented, and if all articles acquired abroad be packed separately in one or more trunks.

NONRESIDENTS OF THE UNITED STATES.

Nonresidents of the United States must declare all articles in their baggage, or on their persons, which do not constitute wearing apparel, articles of personal adornment, toilet articles, or similar personal effects, whether intended for their personal use or for others. They must also declare all articles of wearing apparel, jewelry, and other articles of personal adornment, toilet articles, and similar effects, when not owned by them or when intended for other persons, or for sale.

HOUSEHOLD EFFECTS.

Household effects, such as furniture, table linen, bed linen, tableware, etc., imported as baggage, must be declared. If shown to the satisfaction of the customs officers to have been actually owned and used abroad by the passenger not less than one year, and not intended for any other person, nor for sale, such effects will be admitted free of duty. If not so owned and used abroad, duties must be paid thereon, unless included in the \$100 exemption allowed returning residents.

CIGARS AND CIGARETTES.

Each passenger over 18 years of age may bring in free of duty 50 cigars or 300 cigarettes, or smoking tobacco not exceeding three pounds, if for the *bona fide* use of such passenger. These articles must be declared, but will be passed free by customs officers in addition to the \$100 exemption.

CONTESTED VALUATION.

Passengers dissatisfied with values placed upon dutiable articles by the customs officers on the pier may demand a reexamination. Application therefor should be made to the officers in charge immediately. If, for any reason, this course is impracticable, the package containing the articles should be left in customs custody and application for reappraisal made to the collector of customs in writing within 10 days after the original appraisement. No request for reappraisal can be entertained after the articles have been removed from customs custody.

Examination of any baggage may be postponed if the passenger requests the officer taking his declaration to have the baggage sent to the appraiser's stores.

Currency or certified checks only can be accepted in payment of duties, but upon request baggage will be retained on the pier for 24 hours to enable the owner to secure currency or certified checks.

The offering of gratuities or bribes to customs officers is a violation of law. Customs officers who accept gratuities or bribes will be dismissed from the service, and all parties concerned are liable to criminal prosecution.

Discourtesy or incivility on the part of customs officers should be reported to the collector at the customhouse, to the deputy collector or deputy surveyor at the pier, or to the Secretary of the Treasury. Passengers should not, however, deem customs officers discourteous merely because such officers examine baggage thoroughly or appraise articles at a value different from that stated in the passenger's declaration.

BAGGAGE FOR TRANSPORTATION IN BOND.

Baggage containing dutiable articles may be forwarded in bond to any other port of entry upon good reason therefor being shown.

Passengers desiring to have such baggage forwarded in bond should so indicate on their declarations, and also make a request therefor upon the inspector at the time he is assigned to the examination of their baggage. Similar action should be taken when it is desired to have baggage forwarded to another country in transit through the United States.

SEALSKIN GARMENTS.

An Act of Congress of 1897, as amended in 1912, expressly forbids the importation into the United States of garments made in whole or in part of the skins of seals taken in the waters of the Pacific Ocean. Unless the owner is able to establish to the satisfaction of the collector that the garments are not prohibited by said Act, they cannot be admitted.

AIGRETTES AND OTHER PLUMAGE.

Paragraph 347 of the present tariff Act contains the following provision:

The importation of aigrettes, egret plumes, or so-called osprey plumes, and the feathers, quills, heads, wings, tails, skins, or parts of skins, of wild birds, either raw or manufactured, and not for scientific or educational purposes, is hereby prohibited; but this provision shall not apply to feathers or plumes of ostriches, or to the feathers or plumes of domestic fowls of any kind.

Any of the above described prohibited

A force of between 150 and 200 men will be engaged on the work, which is estimated to cost about \$16,000. Among the principal items of the work will be 737 cubic yards of excavation, the spoil to be used in a fill for widening the street in front of the building; 982 cubic yards of borrowed fill to supplement this; the laying of 606 lineal feet of curbs and gutters and 669 square yards of pavement; and the building of steps, terraces, and retaining walls, involving the placing of 28 cubic yards of plain and 142 cubic yards of reinforced concrete.

*As per notice published in *The Canal Record* of January 21, 1914, I. C. C. labor trains ceased operating north of Empire after January 26.

INSECT TRAP.

Local Invention Designed Chiefly to Catch Mosquitoes by Means of Human Scent.

Mr. Charles H. Bath, division inspector in the Department of Sanitation, has been granted a patent (No 1,082,489) on an improved insect trap, the principal object of which is to provide a device to entrap mosquitoes by means of human scent, without subjecting the occupants of a room to attack. The

THE PARTS ASSEMBLED.

idea of furnishing this form of a lure is based on the now generally recognized belief that human scent will attract mosquitoes. The trap is designed to be applied over the inside of

MAIN HOUSING, OR CAGE.

an opening in the wall, or window, of a room, preferably near the ceiling on account of the stronger scent, so that the mosquitoes at-

OUTER INLET STRUCTURE, WHICH IS FASTENED OVER INSIDE OF OPENING IN SCREEN OF VENTILATOR, DOOR, OR WINDOW.

tempting to enter will be caught. The entrance to the trap is eight by 23 inches, and the insects will enter it in preference to seeking a more difficult place. The trap

may also be placed over the outside of the opening, and in this manner the insects already in a room seeking an outlet may be trapped. When the device is placed on refuse boxes, or over pits, where fly larvæ are hatched, the light at the outside will serve for the necessary attraction. Quarts of flies have been caught in this manner on the Isthmus. For catching moths and the like, artificial light, placed in a suitable position, will suffice to attract. The invention is so constructed that it can be readily taken apart for cleaning and disinfection, as well as for removing the accumulation of insects. A description of it more in detail, follows:

Its construction involves a main housing or cage, comprising a rectangular frame (10) to which is secured the wire structure or caging (11). The sides of this

INTERMEDIATE INLET STRUCTURE THAT FITS INTO MAIN CAGE.

structure are formed of one piece of wire screen or gauze (12), while the ends (13 and 14) are pieces of wire screen or gauze secured to the side frame (12) by receiving through its meshes the strands (S), which are

An intermediate inlet structure, shown in Figure 4, comprises conical end walls (17 and 18) connected at their bases by side bars (19 and 20), with a wire screen or gauze (21) secured to the edges of the conical end walls and to the side bars (19 and 20). Along the apex of the screen the sections are cut out to leave inlet passageways (22) to the interior of the cage (12). This intermediate structure is adapted to fit into the cage structure as indicated in Figures 1 and 5, the side strips (15) of the cage structure extending slightly beyond the side walls of the frame (10) to form abutment for the side bars (19 and 20) of the intermediate structure.

An outer inlet structure, shown in Figure 3, comprises a rectangular frame (23) from the end walls of which (24) the conical pieces (25) extend. Wire screen or gauze is secured to the edges of these pieces, with the gauze along the apex cut away to leave the passageways (27). When the parts are to be assembled, the intermediate structure is fitted into the main structure, and the frame (23) of the outer structure is applied to the frame (10) of the main structure, and held to such frame by means of hooks (h) or pins (p). The assembled structure may be placed in any position, so that the insects will find entrance into the outer inlet structure; they will pass along the conical walls and then through the passageways (27) of this structure. From here the insects will pass into the intermediate inlet frame, and out of the passageways (22) thereof, and into the main structure or cage (14). The operation of the conical frame is well understood by mosquito experts; insects readily enter at the bases and leave through the apex passageways, but refuse to enter the frames at the apex. The insects eventually land in the main cage, and may be readily removed after the intermediate and outer inlet structures have been lifted out.

The traps should be cleaned at least once a month. The cage may be removed easily by unfastening the hooks (h). In order that the inlet or outlet through the wall opening may be closed to insects upon removal of the cage, suitable means are provided for closing such openings. The end blocks (25) on frame (23) have the grooves (29) in which the ends of a bar (30) may slide to open or close the passageways (27) at the apex of the conical screen member. To manipulate this bar, a wire or rod (31) may be extended therefrom, so that the block can be readily shifted to close the passageways before the cage is removed, and to reopen them when the cage is applied. To better prevent escape

THE TRAP IN PLACE OVER AN OPENING IN SCREENING OF A VENTILATOR, DOOR, OR WINDOW.

then twisted together. The inner edges of the side and end parts are held against the frame (10) by side and end strips (15 and 16 respectively).

of insects after once having entered the intermediate structure, or the cage, the screen sections (32 and 33) are relatively offset; that is, the sections (33) of the

Intermediate structure are in line with the passageways (27) of the inner structure. Also, to prevent return of insects at the ends of these structures, screen sections (34 and 35) are left to extend a distance inwardly from the conical end blocks.

A number of experiments have been conducted by the inventor with traps of the above design. A series of tests conducted at the former laborers' barracks at Miraflores in 1911, covering a period of 71 days, with 44 traps set in eleven barracks, and with the average of $14\frac{1}{2}$ traps in use per day, showed an estimated daily catch per trap of 96 *anopheles*, or a total of 1,392 per day. The total estimated number caught during the entire period of 71 days was 98,832. One of the traps that had not been cleaned out for several days contained a thick layer of mosquitoes, flies, moths, and other insects. The dead *anopheles* in this trap amounted to several thousand. In an average of six traps daily for 60 days over 37,000 *anopheles* were caught and counted. The largest catch on record in one night, in one of these traps, was 1,018 *anopheles*.

Admissions to Colon Hospital.

The primary object of Colon Hospital as at present organized is to treat emergency cases, but this rule has been waived to admit Panamanians when necessary. It is not possible with the present equipment of the hospital to handle all classes of maternity cases among residents of the city, but even in such cases, where life is endangered, aid will not be refused. It is thought that in nearly all instances the sick of Colon can be cared for without difficulty at Santo Tomas Hospital, but in every case where immediate treatment is necessary, it will be given. The superintendent of the hospital, the district physician, and the alcalde have been informed that charity cases may be transferred to Santo Tomas Hospital in the hospital car without charge, and the attendants have been instructed to receive these patients, and to look after them until they reach Panama.

Hotel Aspinwall, Taboga.

Families of employes are entitled to the employes' rate of \$2.25 per day, per person, at the Hotel Aspinwall, Taboga.

Launch tickets to Taboga are on sale at all I. C. C. hotels and the Hotel Washington.

Transfer Charge for Employes' Baggage.

A transfer charge will be made hereafter for employes' baggage from the line railroad stations to the Panama railroad docks at Cristobal and Colon, as well as for the handling of baggage of employes returning to the Isthmus. These charges will be in accordance with the current rates for handling baggage, placed in effect when the railroad company took the baggage business out of private hands, namely, 15 cents for a grip, 25 cents for a trunk weighing 150 pounds, or under, and 40 cents for one weighing over 150 pounds. A few years ago a charge was made for handling employes' baggage, along the lines now adopted, but the arrangement was subsequently annulled, and since then the railroad company has handled this class of baggage free. No change will be made in the present method of transferring baggage to pier No. 11, with the exception that the station agents have been instructed to use the current transfer baggage checks, now in their possession, for all baggage checked to Panama railroad steamers in the same way

as they have been doing for outside lines. The four new baggage wagons, ordered for the service some time ago, have arrived and are in use, two at each terminal.

Postal Savings Bank Transactions.

Following is a statement of the postal savings bank transactions at Canal Zone post-offices for the month of January, 1914:

OFFICE.	Amount issued.	Amount paid.

Crematory Installation Completed.

The smokestack at the new crematory at Ancon was raised on Saturday, January 31, which completed the installation of the plant; the first operation took place on Thursday, February 5. The building housing the apparatus is situated in the Ancon cemetery grounds, and is of a temporary character, it being planned to move the crematory to a different location, and house the apparatus in a permanent structure as soon as the work of exhuming and burning the unclaimed bodies in the graveyard is finished. This work is preparatory to vacating the plot for burial purposes, as it will become a part of the new Balboa townsite.

Notices have been sent out to relatives or friends, where obtainable, of persons buried in the cemetery announcing that 90 days' time would be given to effect a removal of the bodies. Several exhumations have already been made since the issuance of the notice. There were 4,945 burials in this cemetery from May 9, 1905, the date of the first interment, to February 1, 1914. By far the greater number of interments are of colored persons, the section allotted to the whites occupying but a small proportion of the whole plot. In one part of the section for the whites are the graves of the soldiers, sailors, and others transferred from the Flamenco Island cemetery in August, 1911, a list of which was published in THE CANAL RECORD of August 30, 1911. What is left of these interments will probably be burned, and the ashes, together with the monuments that mark some of these graves, provided no other disposition is made, will be taken to a new cemetery plot to be laid out at Corozal, or some other point on the Pacific side.

A description of the cemetery apparatus, which consists of two retorts with accessories, manufactured by the Jarvis Engineering Company of Boston, was published in THE CANAL RECORD of July 30, 1913. The building is divided into three rooms, the first and largest for the furnaces, the second for the air blower, oil pump, electric motor, etc., and the third for use as a store room.

California crude oil will be used as fuel, for the first time, it is stated, in a crematory of this design. The California product was tried at a 2-retort crematory installed at Omaha, Neb., but failed to give successful results, owing to its density. Some slight modifications have been made in the burners at the Ancon cemetery plant, which, it is expected, will overcome the difficulty met with at Omaha. The apparatus was installed under the direction of Mr. A. E. Barnes, sent down by the Jarvis Engineering Company for the purpose. He will also superintend its future operation.

Present Work of Steamshovels.

Nineteen steamshovels were excavating in the construction of the Canal and its accessory works on February 2, as follows:

Three 95-ton shovels were excavating from the top of slides on the east bank of Culebra Cut, north of Gold Hill.

Four 95-ton shovels were removing hard rock from the Sosa Hill quarry, for armoring the Naos Island breakwater.

Two 95-ton Bucyrus shovels and one Model 91 Marion shovel were excavating the site of the proposed dry docks and coal station adjoining, at Balboa.

One 70-ton shovel was borrowing clay fill from the east side of the hill on which all that remains of the village of El Diablo is situated, and at the same time preparing the permanent right-of-way of the Panama railroad, running to Balboa.

One 70-ton shovel was borrowing spoil from the west side of Cocoli Hill, for completing the connection between Miraflores west dam and Miraflores Locks, and completing the west backfill of the locks, especially at the northwest wing wall.

Two 70-ton shovels were deepening and widening the discharge channel of Miraflores Spillway.

One 70-ton shovel was working near the old sand track junction, south of Miraflores Locks, excavating the dike separating the Canal and the channel of the Rio Grande, below the point at which the Cardenas River flows into the Rio Grande.

One 70-ton shovel was borrowing spoil from hills west of Gatun Dam for backfill around the hydroelectric station, on the east side of the discharge channel of Gatun Spillway, and for raising and widening the Gatun-Mindi levee.

Two 95-ton shovels were engaged at Porto Bello, quarrying hard rock for armoring the lee side of the Toro Point breakwater.

One 70-ton shovel was working in a borrow pit of the Panama railroad at Mount Hope, providing material for the railway to the proposed coaling plant at the north end of Mindi Island, and for fills in the extension of Colon.

Ancon Crusher.

Following is a statement of rock crushed at Ancon quarry during the week ending February 7:

DATE.	Hours worked.	Cubic yards.

February 3	8.20	2,135
February 4	8.00	2,233
February 5	8.30	2,214
February 6	8.15	2,270
February 7	7.05	2,334
Total	17 20	13 271

OFFICIAL CIRCULARS.

Provisions of the Income Tax Law.

CULEBRA, C. Z., February 9, 1914.

CIRCULAR No. 526:

1. *Normal income tax on income exceeding \$3,000 or \$4,000*—The income tax law, Section 2 of the Act of October 3, 1913, requires every citizen of the United States, whether residing at home or abroad, thus including those residing on the Isthmus of Panama, to pay a normal income tax of one per centum per annum upon the entire net income of such citizen in excess of \$3,000, in case of a single person, or \$4,000, in case of a married man or woman with a wife or husband living with him or her. For the taxable period ending December 31, 1913, viz., March 1 to December 31, 1913, the tax will be assessed upon the net income exceeding \$2,500 in the first case and \$3,333.33 in the second case.

2. *Net income defined*—The law provides that:

"The net income of a taxable person shall include gains, profits, and income derived from salaries, wages, or compensation for personal service of whatever kind and in whatever form paid, or from professions, vocations, businesses, trade, commerce, or sales, or deals in property, whether real or personal, growing out of the ownership, or use of, or interest in, real or personal property; also, from interest, rent, dividends, securities, or the transaction of any lawful business carried on for gain or profit, or gains or profits and income derived from any source whatever, including the income from, but not the value of property acquired by gift, bequest, devise, or descent; provided, that the proceeds of life insurance policies paid upon the death of the person insured, or payments made by or credited to the insured, on life insurance, endowment, or annuity contracts, upon the return thereof to the insured at the maturity of the term mentioned in the contract, or upon surrender of contract, shall not be included as income."

3. *Withholding agents*—All persons, firms, agents, employers, etc.,

"including all officers and employees of the United States having the control, receipt, custody, disposal, or payment of interest, rent, salaries, wages, premiums, annuities, compensation, remuneration, emoluments, or other fixed or determinable annual gains, profits, and income of another person exceeding \$3,000 for any taxable year, other than dividends on capital stock or from the net earnings of corporations and joint stock companies or associations, subject to like tax, who are required to make and render a return in behalf of another,"

are required to deduct and withhold a sum sufficient to pay the normal tax, and to pay the same to the proper officer of the United States, and they are made personally liable for such tax.

4. *Deductions at the source for 1913 limited*—No deductions from the source were required until November 1, 1913, and no deduction is to be made for the months of November and December, 1913, unless the total income from March 1 to December 31, 1913, paid to any person by the withholding agent after October 31, 1913, exceeds \$3,000. If the income for the taxable part of the year 1913 paid by any one employer or other withholding agent after October 31, 1913, exceeds \$3,000, the tax is to be collected on the entire amount paid unless the exemption of \$2,500, or \$3,333.33, as the case may be, is claimed by filing not less than 30 days prior to March 1, 1914, "With the person who is required to withhold and pay the tax for him, a signed notice in writing claiming the benefit of such exemption." If this notice is given no tax is to be withheld upon the amount of the exemption. The form of the notice required to be given is contained in Section 8.

5. *Deductions on Panama Canal pay rolls*—Beginning when the amount of salary due any officer or employee of the Isthmian Canal Commission for the calendar year 1914 equals \$3,000, there will be deducted, upon the pay rolls of the Commission, the normal income tax of one per cent on the total salary for the calendar year unless there is filed with the Examiner of Accounts of the Isthmian Canal Commission, prior to the 25th day of the month in which the salary reaches the amount of \$3,000, the notice in the form contained in Section 8. If the notice is given to the Examiner of Accounts as above provided, deduction will be made only on the excess of the exemption of \$3,000, or \$4,000, as the case may be. If the notice is not filed 30 days or more prior to March 1, 1915, the deduction will be made upon the total salary if it exceeds \$3,000, and a refund of the amount will not be made unless authorized by law, and then only in conformity with the regulations prescribed by the Secretary of the Treasury.

6. *One exemption allowed*—No person and no man and wife is entitled to more than one exemption.

7. *Deduction from pay of U. S. Army and Navy officers*—The income tax will be deducted from the salaries of officers of the United States Army and Navy detailed for duty with the Panama Canal, and from the salaries of all other Government employees whose compensation is paid in part only by the Panama Canal, beginning when the total amount of salary due for the

calendar year 1914 and payable by the Canal equals \$3,000. The deduction will then be one per cent of the total salary for the calendar year actually payable from Panama Canal funds unless the notice contained in Section 8, claiming exemption, is filed with the Examiner of Accounts at the time and in the manner provided in Section 5. If this notice is given any balance of the exemption claimed in excess of the regular Army or Navy pay will be applied against the salary paid by the Panama Canal. Each Army and Navy officer whose salary as such officer exceeds \$3,000 should file with the Army or Navy paymaster paying his account a notice on the form provided in Section 8, prior to the month in which his total salary for the calendar year paid by such Army or Navy paymaster amounts to that sum, and in any case not less than 30 days prior to March 1.

8. *Notice to withholding agents*—Any person subject to the normal tax of one per cent, the amount of which is withheld or is to be withheld at the source, wishing to avail himself or herself of the exemption of the \$3,000, or \$4,000, as the case may be, must file with the withholding agent not later than 30 days prior to the date on which the return on his income is due; that is, 30 days prior to March 1 of each year, a notice in the following form which has been adapted for use of officers and employees of the Panama Canal:

FORM FOR CLAIMING EXEMPTION FROM THE SOURCE, AS PROVIDED IN PARAGRAPH C, SECTION 2, OF THE FEDERAL INCOME TAX LAW OF OCTOBER 3, 1913.

To Examiner of Accounts,
Isthmian Canal Commission,
Empire, Canal Zone.

I hereby serve you with notice that I am single—married and living with my wife—husband (strike out so as to show status correctly), and now claim the benefit of the exemption of \$....., as allowed in Paragraphs C and D of Section 2 of the Federal income tax law of October 3, 1913 (my total exemption under said paragraphs being \$.....)

Signed:

Address:

Street and number,

Date: 191.... City and State,

As stated in preceding sections this same notice must be given before the total salary due for the calendar year equals the amount of \$3,000, otherwise a deduction on the total salary will be made.

9. *Deductions to be made in computing net income*—The following is included although its provision cannot now be availed of in connection with the returns of income for the calendar year 1913:

"Any person subject to the normal income tax of one per cent, a part of whose income is withheld, or is to be withheld at the source, who may wish to avail himself of the deductions authorized, may file either with the collector of internal revenue for the district in which return is made for him, or with the withholding agent, not later than 30 days prior to March 1, a return and notice in substantially the following form:

United States Internal Revenue.

RETURN MAKING APPLICATION FOR DEDUCTIONS, AS PROVIDED BY PARAGRAPHS B AND E, SECTION 2 OF THE FEDERAL INCOME TAX LAW OF OCTOBER 3, 1913:

To

I hereby solemnly declare that the following is a true and correct return of my gains, profits, and income from all sources from March 1 to December 31, for the year 1913, and a true and correct return of deductions asked for under Paragraph B of Section 2 of the Act of October 3, 1913, and I hereby claim deductions as shown below.

Amount of gains, profits, interest, rents, royalties, profits from copartnerships, and income from all sources whatsoever \$.....

Deductions.

1. The amount of necessary expenses actually paid in carrying on business, except business expenses of partnerships, and not including personal, living, or family expenses \$.....
2. All interest paid within the year on personal indebtedness of taxpayer \$.....
3. All National, State, county, school, and municipal taxes paid within the year (not including those assessed against local benefits) \$.....
4. Losses actually sustained during the year incurred in trade, or arising from fires, storms, or shipwreck, and not compensated for by insurance, or otherwise \$.....
5. Debts due, which have been actually ascertained to be worthless and charged off within the year \$.....
6. Amount representing a reasonable allowance for the exhaustion, wear, and tear of property arising out of its use or employment in the business, not to exceed in the case of mines five per cent of the gross value of the output for the year for which the computation is

made, but not including the expense of restoring property or making good the exhaustion thereof, for which an allowance is or has been made \$.....

7. The amount received as dividends upon the stock, or from the net earnings of any corporation, joint stock company, association, or insurance company which is taxable upon its net income \$.....
8. The amount of income, the tax upon which has been paid or withheld for payment at the source of income \$.....

Total deductions \$.....

(Signed)

(Address)

Date: 191....

NOTE—Money or other things of value, disposed of by gift, donation, or endowment, shall not be deducted or be made a basis for a deduction from the income of persons or corporations in their tax returns under the income tax law.

The Federal income tax law exempts from taxation interest upon the obligations of the United States or its possessions, or upon the obligations of a State or any political subdivision thereof; also, the compensation of the present President of the United States during the term of office for which he has been elected, and of the Judges of the Supreme and inferior courts of the United States, now in office, and the compensation of all officers and employees of a State or any political subdivision thereof paid by the State or any political subdivision thereof, except when such compensation is paid by the United States Government.

10. *Deductions allowable for 1913*—For the tax period from March 1, 1913 to December 31, 1913, the deductions allowed, as provided in Section 9, shall be five-sixths of the deductions allowable for a calendar year.

11. *Returns*—On or before March 1, 1914, and the first day of March in each year thereafter, a true and accurate return, under oath or affirmation, must be made by each person of lawful age, except as hereinafter stated, having a net income of \$3,000, or over, for the taxable year, to the collector of internal revenue for the district in which such person resides, or has his principal place of business, or in the case of a person residing in a foreign country, in the place where his principal business is carried on within the United States. Such return in the form prescribed must set forth specifically the gross amount of income from all separate sources, and from the total thereof, deducting the aggregate items or expenses and allowances authorized.

Guardians, trustees, executors, administrators, agents, receivers, and conservators, and all persons, corporations and associations acting in any fiduciary capacity, must make and render a return of the net income of the person for whom they act subject to the tax coming into their custody and control or management, except that a return made by one of two or more joint guardians, trustees, executors, administrators, agents, receivers, and conservators, or other persons acting in a fiduciary capacity, filed in the district where such person resides, or in the district where the will or other instrument under which he acts is recorded, under the regulations prescribed by the Secretary of the Treasury, is constituted a sufficient compliance with the requirements.

12. *Persons physically unable to make returns*—If a person subject to said tax part of which income is withheld, or is to be withheld, is a minor or insane person, or is absent from the United States, or unable to make the application or return, because of serious illness, the application or return may be made by the withholding agent, who shall make the following oath under the penalties of this Act:

I hereby swear (or affirm) that I have sufficient knowledge of the affairs and property of (naming person and address for whom acting) to enable me to make a full and complete return for (naming person), and that the return of income and application for deductions made by me are true and accurate.

(Signed)

(Address)

(Street and number)

(City and State)

Date: 191....

Signed and sworn to before: 191....

13. *Returns from the Isthmus*—No collector of internal revenue has been designated to receive the returns due March 1, 1914 from those on the Isthmus of Panama who are required to make such returns. Forms for making the returns may be obtained by employees of the Isthmian Canal Commission and the Panama Railroad Company upon application to the Examiner of Accounts of the Isthmian Canal Commission. Returns should be made in the following manner: Residents of the Canal Zone who have bona fide residence in the United States should forward their returns to the

collector of internal revenue for their respective districts, or to the collector of internal revenue of the district where they have their principal place of business. Residents of the Canal Zone who have no bona fide residence in the United States, or no place of business, may make their returns direct to the Commissioner of Internal Revenue at Washington, or to the collector of the district in which they last resided before coming to the Isthmus.

14. *Penalties*—Subsection (F) of Section 2 provides *inter alia*, as follows:

"Any person or any officer of any corporation required by law to make, render, sign, or verify any return, who makes any false or fraudulent return or statement with intent to defeat or evade the assessment required to be made shall be guilty of a misdemeanor and shall be fined not exceeding \$2,000, or be imprisoned not exceeding one year, or both, in the discretion of the court, with the costs of prosecution."

15. *Assessment and payment of tax*—The law requires the Commissioner of Internal Revenue to notify all persons of the amount to which they are respectively liable, on or before the first day of June of each successive year, and requires that the assessment shall be paid on or before the 30th day of June. If possible, arrangements will be made, so that payments may be made to a collector for the Panama Canal, who will make a remittance for all amounts collected to a collector of internal revenue, or to the depository designated by the Commissioner of Internal Revenue.

GEO. W. GOETHALS,
Chairman and Chief Engineer.

Car Demurrage System.

CULEBRA, C. Z., February 6, 1914.

CIRCULAR No. 525:

A car demurrage system is to be established between the several departments and divisions of the Isthmian Canal Commission and the Panama railroad, effective about March 1, 1914, and, as a preliminary means of establishing the proper car records and of educating those concerned in the preparation and use of the various blank forms, the following reports will, effective at once, be submitted by responsible officers:

1. Form A. I. 87-Revised—Daily report of cars.

This report will be submitted daily by all agents and yardmasters, both I. C. C. and P. R. R. It will be prepared to show all cars on hand at the respective station or yard, together with full information called for by printed headings or instructions. In all cases where cars are consigned "Care of Quartermaster," under the heading "Remarks," last column, note the name of the person responsible for unloading the car.

The agent or yardmaster preparing and submitting this report will secure from the quartermaster of his district the names of the persons responsible for unloading all cars consigned in care of the district quartermaster. The quartermaster's or storekeeper's decision in this matter will be final.

This report is to be made up and closed by 11 a. m., each day, a carbon copy being retained for the office file. The original shall be mailed to the trainmaster, Colon, if sent by railroad mail, or trainmaster, Cristobal, if sent by Canal Zone mail, on first train after 11 a. m.

2. Form A. I. 828—Yardmasters' weekly report of cars on hand.

This report shall be submitted by all agents and yardmasters, both I. C. C. and P. R. R. at 4 p. m., each Saturday. It shall be addressed to trainmaster, Colon, if sent by railroad mail, or trainmaster, Cristobal, if sent by Canal Zone mail. This report will show the information called for by printed headings, and under the column "Remarks" will designate the office or person responsible for unloading the cars.

3. Form A. I. 827—Transfer list.

This report is to be made out and forwarded to trainmaster by railroad mail, as addressed on the back. It needs no envelope. This form has been prepared on stiff paper to facilitate writing car numbers, or when checking a short train, and is intended for use by I. C. C. and P. R. R. crews to keep track of cars moved over the road without billing. As an example: An I. C. C. engine moves two steel flat cars, loaded with dredge pipe, from Miraflores to Paraiso. The conductor enters these two cars on form and hands it to any P. R. R. agent, or block office, he passes while making the transfer. This gives the trainmaster's office, Colon, a record of the cars.

Under heading "Origin," show at what point cars are picked up. Under heading "Destination," show where cars are set out. Other information should be shown as called for by headings. The card should be signed.

It is not intended that this form should be used for movement of steel dump cars, or Lidgerwood side flats.

A supply of the necessary blank forms is available in Colon, and the trainmaster has been instructed to see that a suitable initial supply is furnished all offices upon application. Any additional number required should be requisitioned from the Depot Quartermaster, Mount Hope.

All district quartermasters will cooperate with sta-

tion agents and yardmasters, and render any assistance necessary to secure full information for preparation of these reports. They will arrange to check up at least once daily with the agent or yardmaster in their particular territory, and take account of the cars for which they are responsible.

GEO. W. GOETHALS,
Chairman, Isthmian Canal Commission.
President, Panama Railroad Company.

Observance of Washington's Birthday.

CULEBRA, C. Z., February 6, 1914.

CIRCULAR No. 524:

As Washington's Birthday falls on Sunday, February 22, 1914, the following day, Monday, February 23, 1914, will be observed as a holiday in the Canal Zone, and as far as practicable all public business will be suspended on that day.

GEO. W. GOETHALS,
Chairman.

Operation of Handcars and Velocipedes on Panama Railroad Main Line Tracks.

CULEBRA, C. Z., February 5, 1914.

HEADS OF DEPARTMENTS AND DIVISIONS:

The general superintendent of the Panama railroad states that the number of hand cars and 1-man and 2-man velocipedes that are in use by employees of the Commission on the main tracks and yard tracks of the Panama railroad is increasing, and that same interfere with the switching, and delay track work. It is desired that hand cars and velocipedes assigned to this service be limited to the actual necessities of the department or division using same, and heads of departments and divisions are requested to see that all hand cars and railway velocipedes not assigned to some particular gang are turned over to the nearest storekeeper of the Quartermaster's Department.

The general superintendent of the Panama railroad also reports that Commission hand cars are frequently equipped with seats so that white foremen can sit down at the front part of the car. This practice is dangerous, and it is requested that instructions be issued to all concerned to discontinue same.

GEO. W. GOETHALS,
Chairman and Chief Engineer.

Termination of Service Papers.

CULEBRA, C. Z., February 9, 1914.

CIRCULAR No. 309-D:

Whenever possible, this office should receive termination of service papers at least five days prior to the date the employee's service is terminated.

GEO. W. GOETHALS,
Chairman.

Examination of Applicants for Position as Pilot.

ANCON, C. Z., February 6, 1914.

Applicants for license as pilot on the Panama Canal may be examined at any time during office hours as to their qualifications for such position. Arrangements should, however, be made in advance, either by letter or by telephone, with Captain Hugh Rodman, U. S. N., Administration Building, Ancon, C. Z.

HUGH RODMAN,
Chairman, Board of Local Inspectors.

Change in Sailing Date of the "Advance."

PANAMA RAILROAD COMPANY,
OFFICE OF GENERAL SUPERINTENDENT,
COLON, R. P., February 9, 1914.

CIRCULAR No. 360:

All concerned—The steamship *Advance* will sail from pier No. 11, Cristobal, at 3 p. m., on Monday, February 16, instead of Tuesday, February 17, as scheduled.

F. MEARS,
General Superintendent.

Handling Mail Matter on Panama Railroad Baggage Cars.

PANAMA RAILROAD COMPANY,
OFFICE OF GENERAL SUPERINTENDENT,
COLON, R. P., February 10, 1914.

CIRCULAR No. 361:

All concerned—It has been brought to my attention that certain mail matter is being delivered this company for handling in baggage cars as company business, which is not only against the rules of this company, but in direct violation of the postal laws.

The postal authorities have called attention to the matter and a continued effort to violate such laws will, no doubt, meet with serious results, as it will be necessary for us to turn such matter over to the postal authorities.

All employees of this company have been instructed not to receive any other than company mail in official envelopes, and such mail or packages, plainly marked to indicate that they contain documents covering

through cargo, such as accountable receipts and bills of lading, etc.

F. MEARS,
General Superintendent.

Change of Position of Manual Block Office at Gamboa.

PANAMA RAILROAD COMPANY,
OFFICE OF GENERAL SUPERINTENDENT,
COLON, R. P., February 9, 1914.

G. S. BULLETIN No. 46:

All concerned—The manual block office at Gamboa cabin will be moved to the south end of the present platform on Thursday, February 12, work beginning at 7 a. m. The manual block signal will be disconnected and out of service for probably two days, and during this time, all trains will be governed by red and yellow flags.

F. MEARS,
General Superintendent.

Board to Inspect Surplus Furniture.

WAR DEPARTMENT,
WASHINGTON, January 23, 1914.

Special Orders }
No. 19 }

(Extract)

* * * * *
17. A board of officers to consist of Brig. Gen. Carroll A. Devol, Quartermaster Corps; Capt. Pegram Whitworth, Tenth Infantry; and Capt. Robert E. Wood, cavalry; is appointed to meet in the Canal Zone at the call of the senior member of the board for the purpose of ascertaining and report upon the amount of surplus furniture in the possession of the Isthmian Canal Commission, the condition of the furniture, and as to whether or not it is suitable for equipping officers' quarters and messes in the Canal Zone, with a view of fixing a fair value at which the furniture may be taken over for the use of the Army.

Such journeys as may be required of the members of the board are necessary for the military service. (2118948 A. G. O.)

By order of the Secretary of War.

LEONARD WOOD,
Major General, Chief of Staff.

Official:
GEO. ANDREWS,
The Adjutant General.

COMMISSION CLUBHOUSES.

Activities of the Young Men's Christian Association

GENERAL.

"The prisoner of Zenda" in motion pictures, with James K. Hackett in the leading role, is being shown at the clubhouses during the present week. Owing to the late arrival of the boat it was impossible to print the schedule for these reels in THE CANAL RECORD for this week, but they will be bulletined by the secretaries in each clubhouse well in advance.

The moving picture schedule for the week February 16 to 21 is, as follows: Monday, Gatun; Tuesday, Cristobal and Balboa; Wednesday, Corozal; Thursday, Culebra; Friday, Empire; Saturday, Pedro Miguel.

Word has been received that "Walter Eccles and the Four College Girls" will sail from the United States on March 9, for a tour among the local clubhouses.

The final standing in the all-Isthmian individual chess championship is, as follows:

	Won.	Lost.
Mr. H. A. A. Smith.....	6 1/2	1 1/2
Mr. C. R. Logan.....	5	3
Wm. DuBois.....	2 1/2	5 1/2

F. W. Fields.....	2	6

COROZAL.

The high scores for bowling in duckpins for the past week are, as follows: Davis, 100, 104, 101; Beall, 105; Hutchings, 102; Sims, 101; Owens, 103, 112; Taylor, 100.

The elimination handicap pool tournament was started Monday evening, with 24 entries.

PEDRO MIGUEL.

The membership of Pedro Miguel clubhouse is rapidly increasing, and is now 110.

The exhibit of water color paintings of the Canal and Panama, made by Mr. E. J. Reid, was largely attended on Tuesday afternoon and evening. Many interesting subjects were exhibited, such as Canal construction work, and the native life and scenes in Panama.

The boys' gymnasium classes have been started, and will be held twice a week from now on. One day each week is reserved for bowling.

Classes in Spanish will be started as soon as enough people manifest an interest in this study to warrant the engagement of an instructor.

The barber shop was opened on Tuesday, February 10. The shop will be open Tuesdays, Thursdays, and Saturdays of each week, day and evening.

Thirty-five people attended the first Sunday evening song service on February 8. All those interested in this informal gathering are invited to attend.

A Sunday school was organized by the people of Pedro Miguel on Sunday morning, February 8. The officers elected were, as follows: Secretary-treasurer, Miss Green; librarian, Miss Jordan; pianist, Miss Hockenberry; superintendent, Mr. Russell. A number of the older people present volunteered to teach classes. The Sunday school will meet every Sunday morning at the Y. M. C. A., at 9.30 o'clock. It will be entirely undenominational and will be affiliated with the Isthmian Sunday School Association. It is desired to have the convention, scheduled for April, held at Pedro Miguel.

The pool and billiard tables have been recovered, and are now in good condition. The pool rooms are attracting a number to the building.

Gymnasium classes for the men will be started soon. The work will consist of calisthenic exercises, light and heavy apparatus work, and recreational games. All members of the clubhouse are welcome to join these classes without extra charge.

CULEBRA.

High scores in Baltimore duckpins for the past week are, as follows: Ferguson, 135; Chadbourn, 135; Case, 154, 146; Friddle, 139.

High scores in regular duckpins were, as follows: Palmer, 102, 101; Case, 112, 103; Barnes, 109.

The all-star Isthmian vaudeville company will give an entertainment on Friday night, February 13. Admission will be, as follows: Members, free; adult nonmembers, 50 cents; children, 25 cents.

A special moving picture exhibition will be given on Monday night, February 16, consisting of the feature reel in four parts, entitled "The prisoner of Zenda," and other films.

EMPIRE.

The first appearance of the all-Isthmian vaudeville company was at Empire on Friday, February 6, when 350 people were present. The program was, as follows: Music by Gray's orchestra; fancy dancing, by Mr. Britton; Barbadian sketch, by Messrs. Burmeister and Morrison; "ragtime" melodies, by Messrs. Schaeffer and MacMahon; Stedval, by Messrs. Emery, Schubert, and Pearsall; expert juggling, by Mr. Brennan; moving picture reel; burlesque wrestling, by Messrs. Huber and Hughes; bass solos, by Mr. Case.

The first game in the duckpin league was bowled

between Pedro Miguel and Empire on Thursday, February 5, on the Empire alley. Empire won two out of three games, Pedro Miguel winning its game on the roll off, as the game ended in a tie. Scores: Empire..... 451..... 432..... 517
Pedro Miguel..... 415..... 432..... 464

GATUN.

A number of people have already taken advantage of the offer of the Y. M. C. A. to teach swimming lessons. Application should be made of the physical director.

Mr. F. H. Wang, who has been employed as office assistant at the clubhouse for the past three years, has tendered his resignation, effective February 9. Mr. Wang goes to Pedro Miguel, where he becomes postmaster.

Forty new books have arrived from the United States.

A group picture of the basketball team was taken on Saturday, February 7, and will be on sale at the clubhouse at 50 cents each.

Gatun's representative in the interassociation chess tournament was Chester R. Logan. By defeating DuBois of Culebra on Saturday evening, February 7, with a score of 2 to 0, Logan gave Gatun second place for the tournament. Logan's games were, as follows:

Fields, Corozal.....	0	Logan.....	2
DuBois, Cristobal.....	1 1/2	Logan.....	1 1/2
Smith, Empire.....	1 1/2	Logan.....	1 1/2
DuBois, Culebra.....	0	Logan.....	2

The opening game of the Isthmian duckpin tournament was played at Gatun on Saturday evening, February 7, when Gatun won all three games. The score follows:

Gatun.	Cristobal.
Dumville..... 100 83 86	Pinney..... 82..... 86
Furlong..... 83 92 104	Farr..... 86 86.....
Delaney..... 87 91 99	Scheid..... 94 90 80
Conley..... 79.....	Collins..... 88 83 95
Claherty..... 108 94 94	Smith..... 88 95 101
Davidson..... 96 90	Barte..... 91 88
457 456 473	438 445 450

The Gatun team has elected Mr. B. B. Dumville the captain for the season.

The Gatun juniors won the basketball game played with the Canal Zone high school on Saturday evening, February 7. Gatun's line-up was: Richardson, Thompson, Godwin, Claybourn, Thompson. The high school's team was composed of Loulan, E. Frasier, A. Frasier, Udry, and Cook. The score was 16 to 6. Physical Director Kjellander acted as referee.

The following men have joined the glee club, which meets once a week for practice: Coleman, Gilbert, Gerchow, Fonner, Thompson, Duesy, Arthur, Evans, Edwards, Klingner, Stauffer, Walker, Richardson, Dumville, Laughlin, Smawley, Delamater, Hindle, Dewey. Mrs. Dow Walker acts as accompanist.

H. H. Hodges won the prize in tenpins given for the month of January. Michael Conley won first prize in duckpins.

CRISTOBAL.

Schradley and J. Raymond won two out of three games in the handball tournament, playing against Barcroft and W. Fraser. Scores, 19-21, 21-19, 21-20.

German baseball has been introduced in the boys' and young men's gymnasium classes.

On Saturday morning, February 14, a boys' team athletic contest will be held. Twenty-four boys will take part, divided into three teams. The captains are Anderson, Billet, and Cotton. The events are, as follows: Standing broad jump, running high jump, 50-yard dash, throwing medicine ball for distance, and team relay race.

By rolling 123 at duckpins, Mrs. Charles Cotton broke all records for women on the Cristobal alleys, Friday afternoon, February 6.

Mr. A. H. Pinney was elected captain of the team to represent Cristobal in the all-Isthmian duckpin league. Messrs. Barte, Farr, Pinney, Smith, Scheid, Collins, and Russell comprise the team.

The high duckpin scores of the local alleys for the past week were, as follows: Farr, 127; Pinney, 117; Weaver, 116.

Mr. William Jennings Price, American minister to Panama, will deliver an address on Sunday afternoon, February 15, in the social hall of the clubhouse; subject, "This one thing." Mrs. L. P. Williamson will sing, and Mrs. McCloud will give a violin solo. The general public is invited.

The all-Isthmian vaudeville troupe will give an entertainment at Cristobal, on Wednesday night, February 18. The prices will be those charged at the regular United States entertainments.

By an unanimous rising vote, the discussion club requested Capt. John C. McArthur to appear again before the club and continue his address on "The standing Army."

PORTO BELLO.

A pool tournament is in progress, with the following entries: Thompson, Baker, Bradberry, Ransbotom, Colberg, Woolworth, Chase, Cummings, King, and Doyle. King is in the lead, having won five games and

lost only one. Baker is a close second, with four games to his credit and one lost.

Washington's Birthday will be observed in Porto Bello with the following program:

Morning—Tug-of-war, bachelors versus married men; sailing race, one mile; canoe paddling, one-half mile; cayuco race, two persons, one-half mile.

Afternoon—Swimming race from the float to the shore, for men; swimming race from the float to the shore, for ladies; swimming race from the float to the shore, for boys; swimming race from the float to the shore, on the back, for men; fancy diving; relay race, four men to a team; swim under water for distance; one mile swim, for men; tub race; swimming nearest to a pole blindfolded, for ladies and children.

In the evening an entertainment will be held in the clubhouse, consisting of local talent.

Canal Supplies.

The following steamers with supplies for the Isthmian Canal Commission and Panama Railroad Company arrived at the ports of Colon, Balboa, and Cristobal during the week ending January 31:

Panama, January 25, from New York, with 170 crates roofing tile, 55 cases woodwork, 73 cases window glass, 23 cases elevator parts, for Administration Building; Balboa; 54 packages pump parts, for Division of Municipal Engineering; 145 bundles reinforcing bars, for permanent quarters, Balboa; 28 cases electrical machinery, 267 bundles structural steel, for First Division; 82 cases plumbing material, four boxes electrical supplies, 50 bundles conduit, for Mechanical Division; 207 bundles pipe, for Panama Railroad Company; 14 crates mop handles, 469 pieces pipe, 16 cases lubricating oil, 417 bundles steel bars, 150 coils rope, 194 plates, steel, 10 coils rope, 125 cases lanterns, 200 bundles pipe; and a miscellaneous cargo, the whole consisting of 2,923 packages, weighing 345 tons.

Tagus, January 26, from New York, with 250 pieces steel ties, for Panama Railroad Company; 400 pieces steel plates, for stock.

Prins Joachim, January 26, from New York, with eight reels wire, one case electrical material, for Mechanical Division; 36 drums unslacked lime, nine bundles steel bars, for stock.

Heredia, January 26, from New Orleans, with 750 kegs white lead, 23 barrels rosin, 692 bales hay, 25 crates plumbing supplies, two barrels grease, for stock.

Cristobal, January 27, from New York, with 124 cases electrical machinery, 27 reels cable, 32 cases electrical machinery, one electric towing locomotive, 1,206 packages structural steel, 109 packages structural steel, for First Division; two reels cable, 12 bundles copper wire, eight crates plumbing furnaces, for Mechanical Division; 58 packages structural steel, for Panama Railroad Company; 47,998 bags cement, 46,000 pounds coke, 10 cases asbestos covering, 1,000 pieces pipe, 136 drums chloride of calcium, for stock; and a miscellaneous cargo, the whole consisting of 50,750 pieces, weighing 2,858 tons.

The Canal Record

Published weekly under the authority and supervision of the Isthmian Canal Commission.

The Canal Record is published free of charge, one copy each, to all employees of the Commission and Panama Railroad Company whose names are on the gold roll. Extra copies and back numbers can be obtained from the news stands of the Panama Railroad Company for five cents each.

Address all Communications,
THE CANAL RECORD,
Ancon, Canal Zone,
Isthmus of Panama.

No communication either for publication or requesting information, will receive attention unless signed with the full name and address of the writer.

NOTES OF PROGRESS.

Status of Work on Permanent Administration Building.

The erection of the structural steel in the framework and roof trusses of the permanent administration building, overlooking the new townsite of Balboa, has been entirely completed, and the sawdust concrete base for the roof is completed over the north half of the building. Two portable mixers, of $\frac{1}{2}$ and $\frac{3}{4}$ -cubic yards capacity, are supplying material, by means of two elevators operated by donkey engines, for finishing the roof base over the south half of the building, and this is now practically completed with the exception of the overhang. The laying of the dark red vitreous roof tiles, of Spanish style, began on February 10, on the north wing.

The walls of the building, made of hollow concrete block manufactured at Corozal, are up to the full height of the three stories at the north wing, and up to the level of the second floor around most of the rest of the building. The square piers to form a colonnade along the front and the outer sides of the two end wings, have been completed to full height at the north wing and front, and to about the level of the second floor along the south wing. None of the cement stucco for finishing the exterior has been applied.

Within, the base slabs of reinforced concrete for the floors have been completed. These slabs are to be covered with redwood, then with a cushion of cinder concrete, and finished with long leaf yellow pine flooring, but this part is being deferred until other interior work is further advanced. Some of the interior woodwork, namely, for the window frames and sashes of the basement and first and second stories, has arrived from the manufacturers in the United States. All of the piping for the vacuum cleaning system has been installed. The conduits for the electric wiring, including the telephone service, is nearly all in place. The plumbing is about 40 per cent completed. The installation of an electric elevator, capable of handling 2,600

pounds safely and designed for a maximum of 15 passengers, is in progress and will be completed in a few weeks. Plastering the walls of the rooms on the first story of the north wing began on February 1.

It is estimated by the forces in charge of the building that it will be ready for occupancy in June of this year, if desired, though not all of the finishing work will have been done by that time. The rotunda in the central wing of the building will probably be the last part of the building completed, as it will be finished in marble, of which none has arrived on the Isthmus.

Sample Steamshovel at Brooklyn Navy Yard.

A 95-ton steamshovel is to be dismantled and shipped to the Brooklyn Navy Yard, where it will be reerected and advertised for sale in the United States.

Almost all the smaller steamshovels retired from the Canal work have already been disposed of by the Commission on the Isthmus, but it is anticipated that the larger size shovels can be sold to better advantage in the United States.

Corozal Cemetery.

A plot of ground, containing about two acres, has been set aside at Corozal for use as a permanent cemetery at the Pacific end of the Canal, and, effective February 5, its administration and care was assigned to the superintendent of Ancon Hospital. The cemetery is included within the limits of Corozal farm, and is situated on rising ground, a short distance back of the Commission hotel, and a little south of the farm buildings on the Herrera place. This site has been used for the burial of natives, and others, residing in the vicinity of Corozal, for the past five or six years, and during that time upward of 40 interments have been made there. The plot is surrounded by a barb wire fence, and is large enough for about 1,800 graves; it can be increased in size, when desired. The first burial of an American there since the closing of the Ancon cemetery was on Friday, February 13. The superintendent of Corozal farm will have direct charge of the burying ground, and the services of the farm inmates will be utilized in its maintenance.

Extension of Underground Duct Line in Colon.

As part of the plan of placing telegraph and telephone cables, as well as those to be used under low tension for the distribution of electricity for light and power, in underground duct lines, the Panama Railroad Company will begin work within a month on the construction of a 6-way duct line from a point near the Colon freight station to a point near Tower A interlocking cabin, Cristobal. Between the freight station and the passenger station, the line will be made 8-way, the two additional ways being for the cable of the Central and South American Cable Company.

A 6-way line has been laid already from a point near the entrance to Colon Hospital to the freight station, but the part leading the rest of the way to Cristobal has been held in abeyance, pending decision on features of the transisthmian duct line.

Progress on Pontoon Barge for Crossing the Canal.

All the decking of the pontoon barge for the permanent crossing of the Canal at Paraiso, under construction on the north side of the approach to the Mount Hope dry dock, has been laid and about 65 per cent of the sheathing on bottom and sides, to form the hull, is in place. Caulking the deck is 90 per cent completed, and that of the hull about 30 per cent. Seventeen shipwrights and 16 caulkers were brought from shipyards on the north Atlantic coast of the United States especially for this job, and the only white men connected with the work who have been regular employees of the Canal Commission are the foreman in charge and the operator of the locomotive crane assigned to the handling of the heavy timbers. The negro helpers, 87 in number, were recruited from the regular forces of the Commission.

This barge is the largest vessel ever built on the Isthmus. It will contain approximately 575,000 feet, board measure, of yellow pine timber, and the seams to be caulked will have an aggregate length of about nine miles. The length of the barge, 378 feet, exceeds that of the steamship *Colon* of the Panama Railroad Steamship Line by 18 feet.

Panama railroad floating piledriver No. 1 is engaged in preparing along the water side of the barge the piles to support the shipways down which the vessel will be slid into the French canal. The ways will have an incline of about five per cent, and the vessel will slide into the water sideways. It is expected that the launching will take place within a month.

Changes at Corozal Farm.

A board, consisting of Lieut.-Col. Chas. F. Mason, Mr. H. A. A. Smith, and Mr. C. A. McIlvaine, appointed to consider matters in relation to the Corozal farm, has recommended a number of changes in the regulations governing it, which have been approved.

The regulations formerly provided for a working day of 10 hours. In view of the fact that the disabled laborers employed on the farm, many of whom have lost at least one limb, are not able to work 10 hours, it has been decided to make the working day eight hours.

Men having families dependent upon them and living with them at the farm will, hereafter, be allowed commutation for subsistence at the rate of 27 cents a day for colored, and 40 cents a day for white inmates, for each day they are on duty, or sick with a physician's certificate covering, and shall be allowed the same commutation for Sundays and holidays

provided they have been working the day preceding and the day following such Sundays and holidays, or provided their absence on these days was due to illness. This change has been made to place the married men on the same footing as the bachelor inmates, as formerly no allowance was made married men for rations on Sundays and holidays, or when sick.

A shed, situated near the farm kitchen, has been set aside for the exclusive use of the disabled colored inmates in the serving of food. Previously, it was the custom to serve them along with the well laborers, but this plan did not work out satisfactorily. It has been decided also not to quarter any outside laborers in buildings assigned to the farm laborers.

The stockade, formerly used by the Quartermaster's Department as a shelter for its employees, will be turned over to the farm to house the insane patients assigned to work about the place. The services of these men are much needed at the present time, in order to clear up the pasture lands before the rainy season sets in.

The number of disabled and indigent inmates at the farm is gradually increasing, and was 48 on February 14.

Steamshovel Operations In Culebra Cut During January.

During the month of January, the total amount of material excavated by the Fourth Division in Culebra Cut was 178,600 cubic yards. All of this amount was primary excavation for the Canal; 81,628 cubic yards were classified as earth excavation, and 96,972 cubic yards as rock excavation.

All the yardage handled by this division was excavated by steamshovels.

Canal Excavation in January.

The grand total of Canal excavation to February 1, 1914, was 216,966,610 cubic yards, leaving 15,386,390 cubic yards remaining to be excavated under the revised estimate of July 1, 1913.

The total excavation for the month of January was 1,514,972 cubic yards, as compared with 1,581,726 cubic yards for December. The wet excavation amounted to 1,118,464 cubic yards, and the dry excavation to 396,508 cubic yards.

In the Atlantic section, the total excavation for January was 160,417 cubic yards. Of this amount, all but 4,626 cubic yards was wet excavation, consisting of 102,057 cubic yards dredged from the Atlantic entrance by the suction dredge *Culebra*, and 53,734 cubic yards, removed from the permanent coaling basin.

The total excavation in the territory of the old Central Division aggregated 849,032 cubic yards. Of this amount, 178,600 cubic yards were removed by Fourth Division steamshovels to relieve the pressure on the banks of Culebra Cut in the zone of slides; 445,222 cubic yards were excavated from the base of Cucaracha and other slides in the Culebra Cut section; 153,500 cubic yards were sluiced from the rear of Gold Hill, and from Cucaracha slide, by monitors, while 77,710 cubic yards were taken out by dredges operating in the lake channel north of the former site of Gamboa dike.

In the territory of the old Pacific Division operations by the Dredging Division resulted in the removal of 86,585 cubic yards from the Pacific entrance, and 205,656 cubic yards from the terminal basin. The material from

the basin was dug by pipeline suction dredge and discharged into the tidal flat between Panama and Corozal. The dry excavation at the Pacific end consisted of 30,700 cubic yards removed by steamshovel at Miraflores Spillway, 161,818 cubic yards taken out at the terminal site, 14,130 cubic yards removed in work at the Rio Grande Diversion, and 6,634 yards dug in and around the terminal site, and charged to "Plant."

A detailed statement of excavation, and a summary of the work on the locks and dams, follow:

Mean rainfall along Canal (nine stations), 0.87 inches.

By "Work" excavation is meant excavation actually made for one of the constituent parts of the Canal, such as prism, diversions, or locks, etc.; that is, it represents material taken from the area to be occupied by the Canal and constitutes excavation useful for the completed Canal.

By "Plant" excavation is meant excavation outside any of the constituent parts of the Canal, such as prism, diversions, or locks, etc. It includes material necessary to be excavated for construction purposes only, and is chargeable against the particular plant item for which it is performed, such as prism, diversions, locks, etc.

ATLANTIC BREAKWATERS.

Heavy Rock on Toro Point Project now Altogether Placed by Derrick Barges—East Breakwater.

In the construction of the Toro Point, or west breakwater, the armoring along the ocean side is complete, the center fill nearly so, and the armoring of the harbor side finished for a distance of about 4,700 feet.

The work is being completed at the rate of about 100 feet per day. All of the trestle, excepting the piles, is removed ahead of the finished fill as it advances, in order that a smooth, compact breakwater may be obtained.

Rock for future repairs to the breakwater probably will be unloaded by derrick barges from the harbor side of the fill.

The bottom is firm, and only slight settlement has occurred.

The heavy rock used for armor is placed by three derrick barges, and is supplied from the Porto Bello quarry, by means of a fleet, consisting of one tug, the *Mariner*, and eight barges. The steamshovels regularly at work at Porto Bello are three Model 91 Marions, and the force engaged in quarrying and loading the rock consists of 48 gold and 300 silver men. The output of large rock from the quarry reached its maximum in October, 1913, when about 26,000 cubic yards were unloaded. Hereafter, about 18,000 cubic yards per month will be unloaded; the decreased amount is due to the fact that the trestle can no longer be used and the finishing of the slopes requires considerable care with a consequent decrease in the amount unloaded per day. Rocks weighing from 500 pounds to 25 tons are used.

The force engaged on the west breakwater proper includes 30 gold and 200 silver employees.

At Coco Solo Point, a track has been built connecting the Mount Hope—Margarita Point line with the root of the east breakwater. The Point is about four miles, by rail, from the Panama railroad at Mount Hope. Excavation of a small harbor at Coco Solo Point, involving the removal of 45,000 cubic yards, has been partially completed. A timber wharf, 98 feet long by 16 feet wide, and with its floor six feet above sealevel, has been constructed at Coco Solo harbor.

Piles for the trestle, which will be built out from Coco Solo Point for the construction of the breakwater, have been ordered from the United States. A first shipment was lost at sea in November, but another consignment is expected in February. The trestle will extend northwesterly a distance of 4,125 feet in single track, to the point at which the filling for the breakwater will begin, and will extend beyond in double form for a distance of 7,200 feet, the length of the breakwater.

Rock for the east breakwater will be obtained from Sosa Hill, the intention being to haul ten trains a day, beginning June 1.

Concrete in the Locks and Auxiliary Works.

The following is a statement of the concrete laid in the Canal locks and auxiliary works up to February 1, 1914:

	Cu. Yds.

SOCIAL LIFE OF THE ZONE.

Ancon Study Club.

At the meeting of the Ancon Study Club on Thursday afternoon, February 11, Mrs. Maxon read a paper on native woods showing an exhibit of specimens of the different woods. An informal discussion of the subject followed the reading. The next meeting will be devoted to the study of English history and literature, with Mrs. Luce as leader. The subject of the meeting on February 26 is "Popular astronomy." Mrs. Woson will read the paper.

Panama Auxiliary to be Organized March 12.

The regular meeting of the Ancon Study Club on March 12, will be suspended, and the members will be hostesses at a mass meeting held in the clubrooms, house No. 31, Tivoli district, for the purpose of organizing the Panama auxiliary of the Woman's Board of the Panama-Pacific International Exposition. Women who expect to attend the exposition, and are interested in the movement, are cordially invited to attend this meeting; those who cannot attend may signify their intention of becoming members of the auxiliary by notifying the secretary of the Ancon Study Club, Mrs. E. Luce.

Lenten Services.

The Woman's Altar Guild of St. Luke's Hospital Chapel will hold weekly meetings during Lent, which begins on Wednesday, February 25, on Tuesday mornings at the Hotel Tivoli, at 9.30 o'clock. The guild will sew for a church orphanage in South Carolina. The schedule of these meetings is, as follows: March 3, 10, 17, 24, 31, and April 7. At St. Luke's Hospital chapel, there will be services on Ash Wednesday at 10 a. m., and evening prayer on Wednesday afternoons through Lent, at 5 o'clock.

Lenten services in Christ Church, Colon Beach, have been arranged, as follows: On Ash Wednesday, February 25, there will be a celebration of the Holy Communion at 7.30 a. m.; penitential office and litany, at 9.30 a. m.; meditation, at 4.30 p. m.; and evensong, with an address, at 7.30 p. m. There will be daily services through Lent at 7.30 a. m., and 4.30 p. m. On Wednesday evenings, at 7.30, there will be choral evensong with Lenten address.

Foreign Missionary Meeting.

At the meeting of the Woman's Foreign Missionary Society of the Methodist Episcopal Church, held at the residence of Mrs. Taylor, Ancon, the discussion was largely devoted to the philanthropic work of the society in Panama. A donation of clothing and food and other necessities for a destitute family in Panama was received. The lesson for the day, on "The Light of the World," was suspended owing to a press of matters concerning the philanthropic work.

Ladies' Auxiliary, U. S. W. V.

At the meeting of the ladies' auxiliary of the United Spanish War Veterans, held in Empire lodge hall on January 21, the following officers were installed for the ensuing year, by Past President Ruth A. Purdew: President, Beulah A. Young; senior vice-president, Effie E. Frink; junior vice-president, Emma von Münchow; chaplain, Joanna Tuley; secretary, Mary J. Mantooth; treasurer, Maude Archart; historian, Nettie M. Jernegan; patriotic instructor, Annie Conley;

conductor, Harriet M. Rice. A Lincoln and Washington birthday program was the feature of the meeting of the auxiliary, held in the Empire lodge hall on Wednesday afternoon, February 11, when nearly every one present read or said something relating to the lives of the two presidents.

Knights of Pythias.

A roll call meeting of Paradise Lodge, No. 6, Knights of Pythias, Paraiso, was held on Tuesday evening, February 17, in celebration of the fiftieth anniversary of the order. On the program for addresses were Messrs. A. M. Warner and W. S. Lawrence of Culebra; F. G. Swanson of Empire, William J. Vickery of Cristobal, and Emil J. Rall of Ancon. The visitors were met by brakes at Paraiso station, and those coming from the north of the line were entertained over night. The invitation extended included members in good standing from all parts of the Canal Zone.

Balboa Lodge, No. 4, Knights of Pythias, formerly of Las Cascadas, was consolidated with Ancon lodge, No. 8, at Ancon, effective February 1. All correspondence should be addressed to S. C. Russell, Ancon.

Tennis Tournament.

Following are the results of the tennis tournament, in doubles, held at Empire on February 8:

Preliminaries—Gatun (Wells and Rose) defeated Camp Otis (Swartz and Stewart) 7-5, 6-0. Culebra (Goethals and Fleischman) defeated Ancon Hospital (Runyan and Earhart) 5-7, 6-1, 7-5. Empire (Smith and Potter) defeated Cristobal (Poole and Hart) 6-2, 6-4. Gatun defeated Tivoli (Russell and Kalar), 0-6, 8-6, 6-0. Corozal (Neely and Sawyer) defeated Culebra, 6-3, 6-1. Pacific (Fechtig and Ohlson) defeated Pedro Miguel (Bartholomew and Shropshire) 6-4, 6-4.

Semifinals—Empire defeated Gatun, 6-2, 6-4. Corozal defeated Pacific, 6-3, 6-1.

Finals—Corozal defeated Empire, 6-8, 6-3, 6-3.

The next association tournament, "All comers singles," will be held at Ancon on February 22-23. Any member of a club affiliated with the association may enter on the payment of an entrance fee of \$1 to the secretary, Mr. E. F. Ohlson, Ancon C. Z. Entries will be closed February 20, and drawing made.

Delta Kappa Epsilon Fraternity.

All members of Delta Kappa Epsilon fraternity on the Isthmus who are interested in a reunion are requested to communicate with Mr. D. T. Edwards, Ancon.

Sending Convalescents to Taboga Island.

Employees of the Canal Commission and the Panama railroad who are convalescent from illness may be sent to Hotel Aspinwall, Taboga, under sick leave from Ancon and Colon Hospitals. The number of days spent at the hotel by each employe under such leave is not to exceed the number prescribed by the physician, and will be certified by the steward in charge to the hospital sending the patient. The hotel charge for such convalescents will be the regular employes' rate of \$2.25 per day for bed and board.

The steam launch *Louise* leaves the dredge landing at Balboa for Taboga at 9 o'clock

in the morning on Tuesdays, Thursdays, and Saturdays; returning the same day, it leaves Taboga at 2 p. m. The postal address of the Commission hotel on Taboga Island is Hotel Aspinwall, Taboga, Balboa, Canal Zone.

PERSONAL.

Assistant Civil Engineer C. A. Bostrom, U. S. N., arrived on the *Ancon* on February 15, and will spend about two weeks on the Isthmus in study of special features of the Canal work.

Mr. John K. Baxter, formerly consul at St. Pierre, a French island possession off the coast of the Dominion of Canada, arrived on the Isthmus on the *Ancon*, on Sunday, February 15, on his way to Maracaibo, Venezuela, to which point he has been transferred.

Order of Railroad Telegraphers.

Panama Railroad Division, No. 158, Order of Railroad Telegraphers, will hold its next meeting in the Ancon hotel building, on Saturday, February 21, at 8 p. m. Business of importance is to be transacted.

JOHN F. STAHL, *Secretary-Treasurer*.
CRISTOBAL, C. Z., February 16, 1914.

Christian Endeavor Society at Corozal.

At a meeting at Corozal, on Sunday, February 15, held by those interested in the organization of a Christian Endeavor society, a constitution was adopted, and a nominating committee appointed, which was directed to report at a business meeting of the society to be held on February 26. It was decided to hold the first regular meeting on Sunday evening, March 1. The constitution provides that the name of the organization shall be the Christian Endeavor Society of Corozal; that there shall be two classes of members, active and associate; that the officers shall consist of a president, secretary, treasurer, and pianist, elected for a term of three months, and that the standing committees shall consist of lookout, prayer meeting, and music, social, and such other committees, as may be decided on from time to time. Regular prayer meetings will be held weekly, and a roll call, or "Consecration" meeting once each month; regular business meetings will be held monthly, and if thought desirable, in connection with a monthly "Social."

New Dipper Dredge on its Way.

The first of the new dipper dredges for use on the Panama Canal, was scheduled to leave Port Richmond, Staten Island, N. Y., for the Isthmus, on Tuesday, February 17. The boom for this dredge, weighing about 60 tons, and two of its dippers, weighing about 25 tons each, arrived on the *Ancon*, which docked at Cristobal on Sunday, February 15.

The Panama railroad sightseeing barge will make two trips through Gatun Lake on Sunday, February 22, leaving Gamboa at 8.40 a. m., and returning, leave Gatun at 2 p. m. Fare \$1.50, U. S. currency, one way.

The post-office at Monte Lirio was discontinued at the close of business on Saturday, January 31. All ordinary mail matter addressed to that point will, from and after that date, be delivered at the Gatun post-office.

A total of 24,000 cubic yards of Punta Chame sand was unloaded at Balboa during the month of January. This amount represented 47½ barge loads.

RECORD OF CANAL WORK SINCE AMERICAN OCCUPATION.

TOTALS BY CUBIC YARDS OF EXCAVATION AND LOCK AND DAM CONSTRUCTION.

[All figures are of work useful for the completed Canal.]

SALE OF OLD CANAL BUILDING.

Former Headquarters of French and American Canal Forces Passes to Panama.

Cable advice has been received that President Wilson has signed the deed conveying the old administration building in Panama to the Panama Government, and that the amount involved in the transaction, \$80,000, has been paid into the Treasury of the United States. Authority for this sale was granted by Congress in the Sundry Civil Act, approved August 24, 1912.

The building was erected in the years 1874-75, by George Loew, a Frenchman, who, prior to this time operated a hotel in the bishop's residence on the Plaza de la Independencia, which at that time extended out to the present limits of the plaza. It was designed for a hotel, and was used for that purpose, under the name of the Grand, until its sale to the Universal Inter-oceanic Canal Company of Panama in 1881. The structure occupies the whole of a small block; it fronts on the Plaza de la Independencia, parallels Fifth street on the south, and Sixth street on the north, with its rear on Avenue A. The site originally consisted of three parcels of ground, one purchased by Loew from Messrs. N. Brandon and Son on October 8, 1873, the second, purchased from Juana Arosemena de Alvarado on February 28, 1874, and the third, acquired from Manuel José Hurtado on March 3, 1874. The building is approximately 75 by 166 feet in plan, surrounds a small patio, and contains three main and two mezzanine floors. The walls are built of rubble masonry, and are very thick; the roof is of tile. At the time it was erected, Panama had no system of waterworks, and in view of this fact, the owner dug a cistern, which was kept filled during the rainy season, and installed a 3-horsepower vertical steam engine, together with a hydraulic pump, which lifted the water into tanks located on the various floors. These tanks were six in number, with a capacity of from four to 40 tons. On the lower floor there was formerly a good-sized bathroom, equipped with shower baths. When the building was taken over by the United States, American employees at that time forced to live in Panama on account of lack of accommodations elsewhere, found these baths very convenient; the toilet facilities, however, were in a deplorable condition, and remained so until the installation of modern fixtures some time later. The original owner installed a gaslight plant to furnish the interior illumination, but this was out of service in 1904.

George Loew died in Paris about the year 1879, leaving as heirs, George Auguste Loew, in his own name, and as guardian and curator of his brother Henry, a minor; and Marie Georgette de Blanchet. These heirs, on October 19, 1881, conveyed the property to Louis Verbrugge, representing the first French canal company, for the sum of \$206,521.73. The property was encumbered by a mortgage of \$109,800, which was taken up at the time of the transfer. The canal company altered the interior of the building to some extent to conform to its requirements, and used it as headquarters up to the time of its transfer to the United States on May 4, 1904.

The early American officials established headquarters in the building, and it was continued in use until the engineering departments of the Isthmian Canal Commission

under former Chief Engineer Stevens, were moved to Culebra in 1906. The first offices to be opened in it, were those of Maj. Gen. George W. Davis, managing representative, and Paymaster E. C. Tobey, U. S. N., followed a few weeks after by former Chief Engineer John F. Wallace, who occupied a suite on the second floor in the northeast corner of the building. During the years 1904-1906, the building was completely occupied; it housed the offices of the chief engineer, Canal Zone Government, executive secretary, communications, chief sanitary officer, auditor, disbursing officer, department of building construction, division of material and supplies, maps, printing and lithography, personnel and quarters, machinery, meteorology and river hydraulics, water commissioner (afterward superintendent of public works), instrument repair shop, and various smaller offices. The exodus began in 1906, with the removal of the engineering offices to Culebra, the disbursing and accounts offices to Empire, and the greater part of the offices belonging to the division of material and supplies to Cristobal. The erection of the present administration building in Ancon, in 1907, furnished room for most of the other offices, although the old building continued to be occupied up to 1909, when it was vacated by all but the Panama health office, and the superintendent of public works. These latter offices were moved to a new location near the Panama railroad freight station last month.

During the yellow fever outbreak in 1905, the building became a source of infection, and two heads of office, Mr. M. O. Johnson, supervising architect, and Mr. R. R. West, auditor, were attacked and succumbed.

Since 1910, it has been the policy to permit the Panama Government the use of the vacant rooms in the building for certain of its offices, rent free, with the stipulation, however, that it should pay its own electric light, water, and repair bills. Under this arrangement, the national printing office was first moved into the building, and later, various other offices, until at the time of the recent transfer, a large part of the vacant space was thus occupied. The Panama Government proposes to make a number of important changes in the interior arrangements, and about \$30,000 will be spent for this purpose.

Extension of Insured and C. O. D. Services to Incoming Canal Zone Mail Matter.

The Chairman has authorized the extension to the Canal Zone of the insured and C. O. D. features of the United States postal service, in so far as it affects incoming mail matter. Section 62 of the parcels post regulations, which covers the insurance provision, reads, as follows:

"All mailable parcels on which the postage is fully prepaid may be insured against loss for an amount equivalent to its actual value, but not to exceed \$25 on payment of a fee of five cents, and in an amount equivalent to its actual value in excess of \$25, and not to exceed \$50, on payment of a fee of 10 cents in stamps, such stamps to be affixed. The amount of the insurance fee shall be placed on the receipt given to the sender, and on the coupon receipt at the mailing office."

Insured parcels are not listed or billed from one post-office to another in the United States, but are treated in every way as ordinary mail matter; the only feature distinguishing them from ordinary parcels is the insurance tag, which is attached by means of a string. This tag is in three pieces, two of which are detached at the mailing office, one as a receipt to the sender of the parcel, and the other as

the mailing office record. When the parcel reaches its destination, and is delivered to the addressee, the last piece of the tag is detached, signed by the addressee, and filed in the post-office as the delivery record.

In the dispatch of insured parcels to the Canal Zone, it has been decided to vary from the above arrangement to the extent that when parcels are sent out from New York, they will, as an additional precaution, be listed and witnessed by two bonded officials of the post-office, and on delivery at destination, they will be rechecked and witnessed by two other bonded post-office officials. Delivery under the above system is absolutely guaranteed, or the value of the parcel made good. Where parcels listed check short, or are rifled in the mails, and it is not possible to place the responsibility, the payment of indemnity will be shared jointly by the two postal services.

The C. O. D. provision is simple and fairly easy to handle. It permits a manufacturer, or dealer, in the United States to make a shipment of goods, within the parcels post regulations, to a resident of the Canal Zone. On arrival, the consignee is given the privilege of inspecting his purchase, and if found to be as ordered, he pays the bill, and also the fee covering the cost of transmitting the money to the seller, the money order fees in these cases accruing to the revenues of the Canal Zone postal service. If a parcel remains unclaimed for more than 30 days, the shipper is notified and requested to forward the equivalent of the postage for its return to him. In case no reply is received within reasonable time, the parcel is sent to the Dead Letter Office at Washington, where the shipper is again notified, and if still no reply is received, the contents of the parcel are later disposed of at public sale.

The above services apply only on mail matter sent from the United States to the Canal Zone, the existing regulations regarding the dispatch of mail matter from here being unchanged.

Missing Men.

Any one having knowledge of the present whereabouts of Herman Francis Newell, and Norman Newell, supposed to have been on the Isthmus at one time, is requested to communicate with the Office of the Chairman, Culebra.

Any one having information regarding the whereabouts of Mr. Edwin F. McCarthey, who is believed to be on the Isthmus, is requested to communicate with Mr. Frank B. Williams, 2 Isabella St., Worcester, Mass.

Ancon Crusher.

Following is a statement of rock crushed at Ancon quarry during the week ending February 14:

DATE.	Hours worked.	Cubic yards.
February 9	8.45	2,250
February 10	6.30	2,443
February 11	7.50	2,167
February 12	7.55	2,174
February 13	7.45	2,556
February 14	8.05	2,202
Total	46.50	13,792

The finances of the dinner held by the First Division employees at the Hotel Tivoli, under date of October 22, 1913, were closed out during the past week, when \$31.64, the balance of subscriptions after all expenditures had been met, was turned over to the Red Cross Society.

OFFICIAL CIRCULARS.

Acting Chairman and Chief Engineer.

CULEBRA, C. Z., February 11, 1914.

CIRCULAR No. 527:

Effective February 12, 1914, Col. H. F. Hodges will be in charge of the work as Acting Chairman and Chief Engineer during my absence from the Isthmus.

GEO. W. GOETHALS,
Chairman and Chief Engineer.

Changes in Wage Scale.

CULEBRA, C. Z., February 11, 1914.

All concerned—The following changes in the wage scale as provided in Circular 299 are made effective April 1, to comply with the requirements of the Panama Canal Act of August 24, 1912, and as provided for in the Executive Order of February 2, 1914:

In the preparation of the wage scale herein provided, the average salaries for similar classes of employment in the Government service in continental United States were taken as a basis, to which has been added 25 per cent, the maximum limit provided by the law. If at any time prior or subsequent to April 1 it is shown that the average wage in such service is higher than that which has been taken as a basis, proper correction will be made.

In the case of locomotive engineers and conductors, those who are now qualified will continue to hold this grade under the reorganization schedule unless reduced for cause.

Scale of Salaries for Clerical Positions.

The entrance salary for clerks in the permanent organization will be \$100 per month for general clerks, and \$125 per month for stenographers or clerks to fill positions where special training or knowledge is required. The scale of salaries for clerical work will be \$1,200, \$1,350, \$1,500, \$1,650, \$1,800, \$1,950, and \$2,100 per annum. More than \$2,100 per annum will not be paid, except for clerks having charge of all or a section of an office, and the amount to be paid will depend upon the duties and responsibilities of the position.

Transfer of Mechanical Division Shops.

CULEBRA, C. Z., January 2, 1914.

CIRCULAR No. 349-F:

The heads of departments and divisions will anticipate, so far as practicable, their requirements for repair and manufacturing work heretofore done in the Empire shops, and will immediately place orders for all such work, as the transfer from the Empire to the Balboa shops will commence on March 2, 1914, and, during the period of transfer it will be impracticable for the Mechanical Division to perform as much work as usual.

The transfer of the headquarters of the Mechanical Division, and of the work now being done in the Empire shops, in the car and paint shops in Cristobal, in the car shop at Balboa, and of the engine houses of the Panama Railroad Company at Cristobal and Balboa, will be made, as follows:

1. The office of the superintendent of the Mechanical Division, the clerical, drafting room, and planning department forces, will be transferred from Empire to the Balboa shops on February 25, 1914. Until the shop office, building No. 28, shall have been completed, the office of the superintendent of the Mechanical Division will be installed in the temporary office building constructed for the superintendent of the Balboa terminals.

2. On and after February 24, 1914, all mail for the Mechanical Division will be addressed to the superintendent of the Mechanical Division, Balboa, Canal Zone.

3. On and after March 1, 1914, all classes of Panama railroad passenger and freight cars that require shop repairs will be sent to the Balboa shops. Such of the gold and silver employees, tools, and equipment, now in the car and paint shops at Cristobal, as may be required, will be transferred to the Balboa shops as rapidly after March 2, 1914, as the work on hand in the Cristobal shops on that date is completed. Upon the completion of all work in the Cristobal car and paint shops, the buildings will be used for the storing under cover, inspecting, cleaning, and field repairing of passenger equipment at the Cristobal terminal.

4. All classes of cars belonging to the Commission that require heavy repairs on and after March 15, 1914, will be sent to the Balboa shops. Such of the gold and silver employees, tools, and equipment in the Empire car shops, as may be required, will be transferred to the Balboa shops as rapidly as the work on hand in that shop on March 16 is completed. Upon the completion of all work in the Empire car shop, the building will be turned over to the Chief Quartermaster. No cars will be sent to the field car repair shop at Balboa after March 29; all cars at the south end of the Canal requiring minor repairs after April 1, will be sent to the Balboa shops. Upon the completion of work in the above-mentioned car shops, they will be turned over to the Quartermaster's Department.

5. All work heretofore performed in the Empire shops, that is covered by shop work orders issued on and after March 2, 1914, except repairs to cars, instruments, and locks, will be performed in the Balboa shops. As the work in progress in the Empire shops on March 2 permits, such of the gold and silver employees, machines, tools, and other equipment, selected for transfer to the Balboa shops, will be transferred from the Empire to the Balboa shops.

6. On and after April 1, 1914, all instruments, locks, etc., requiring repairs will be sent to the superintendent of the Mechanical Division at the Balboa shops.

7. Upon the completion of the work described in

Paragraphs 5 and 6, the machines, tools, and other equipment not required in the Balboa shops will be surveyed and turned over to the Quartermaster's Department in accordance with existing rules. After the removal of all machines, tools, shafting, pulleys, hangers, and other equipment, the buildings will be turned over to the Chief Quartermaster.

8. The electric and air compressor plants at Empire will continue in operation until further orders.

9. The roundhouse at Cristobal, and engine house at Panama, will be transferred on April 1, 1914, from the Panama Railroad Company to the Mechanical Division. After April 1, 1914, light running repairs only will be made to locomotives in the Cristobal roundhouse.

10. The inspector of shops is charged with the execution of the details of this order, and will designate the dates on which the machines, tools, equipment, and employees will be transferred.

11. Circulars Nos. 343, 343-B, 343-C, 349-A, 349-B, and 349-C are hereby modified to direct that the work covered by them will be performed at the Balboa shops, instead of at the Empire and Cristobal shops, after the dates of transfer specified above.

GEO. W. GOETHALS,
Chairman and Chief Engineer, Isthmian
Canal Commission.
President, Panama Railroad Company.

Acting Subistence Officer.

CULEBRA, C. Z., February 11, 1914.

CIRCULAR No. 528:

During the absence from the Isthmus of Lieut.-Col. E. T. Wilson, Subistence Officer, all his duties in connection with the Subistence Department of the Isthmian Canal Commission and the commissary department of the Panama railroad will be performed by Capt. F. O. Whitlock, assistant subistence officer.

GEO. W. GOETHALS,
Chairman, Isthmian Canal Commission,
President, Panama Railroad Company.

Transfer of Accounting Division, Commissary Department, to Examiner of Accounts.

CULEBRA, C. Z., February 10, 1914.

CIRCULAR No. 183-z-7:

Effective February 11, 1914, the accounting division of the commissary department, Panama Railroad Company, will be placed in charge of the Examiner of Accounts, Isthmian Canal Commission.

GEO. W. GOETHALS,
Chairman.

Stock Material Surcharge.

CULEBRA, C. Z., February 11, 1914.

CIRCULAR No. 169-R:

Effective February 16, 1914, the surcharge on stock material to nonemployees, or to employees when it is to be used for other than personal use, and on which duty is payable to the Republic of Panama, will be increased from 20 per cent to 30 per cent.

GEO. W. GOETHALS,
Chairman and Chief Engineer.

Applications for Position of Pilot on the Panama Canal.

ANCON, C. Z., February 12, 1914.

No applications will be considered for the position of pilot on the Panama Canal unless the applicant shall have an unlimited license for vessels of unlimited tonnage, seagoing. It will be needless for candidates to ask an exception to this rule.

HUGH ROOMAN,
Chairman, Board of Local Inspectors.

Train Schedule on February 23.

PANAMA RAILROAD COMPANY,
OFFICE OF GENERAL SUPERINTENDENT,
COLON, R. P., February 16, 1914.

CIRCULAR No. 369:

All concerned—The train schedule of Monday, the 23d, (Holiday, account of Washington's Birthday falling on Sunday), will be the same as on Sunday; that is, trains Nos. 52 and 53, scheduled to run Sunday only, will be operated on Monday, February 23.

F. MEARS,
General Superintendent.

Cows For Sale.

ANCON HOSPITAL,
ANCON, C. Z., February 10, 1914.

For sale at the Ancon Hospital dairy, four cows suitable for butchering. May be seen at the dairy any afternoon from 3 to 5 o'clock, and can be sold at private sale.

CHAS. F. MASON,
Superintendent.

LOST—In Mount Hope cemetery, Sunday, February 15, 7-jewel Elgin watch, ladies' size, 20-year case, made by J. Boss and Company. A liberal reward is offered if returned to P. O. Box 299, Cristobal, C. Z.

COMMISSION CLUBHOUSES.

Activities of the Young Men's Christian Association.

GENERAL.

The moving picture schedule for the week February 23 to 28 is, as follows: Monday, Pedro Miguel; Tuesday, Gatun and Balboa; Wednesday, Cristobal; Thursday, Empire; Friday, Culebra; Saturday, Corozal.

The standing in the all-Isthmian duckpin tournament is, as follows:

Team.	Won.	Lost.	P.C.
Gatun.....	4	2	667
Empire.....	4	2	667
Pedro Miguel.....	3	3	500
Cristobal.....	3	3	500
Culebra.....	2	4	333
Corozal.....	2	4	333

COROZAL.

The elimination pool tournament was started on Monday night, February 9, with 24 entries.

The elimination duckpin tournament is still in progress.

The following are some of the high scores in duckpins made during the past week: King, 101; Davis, 104, 106; Regan, 112, 101; Parkis, 118; McNeill, 105; Sims, 106; Steel, 100; Ragan, 106.

The Isthmian duckpin tournament games played on Monday, February 9 resulted, as follows:

Culebra.			Corozal.		
Chadbourne	93	85	Davis	115	97
Kiernan	81	85	Sims	83	84
Barnes	83	102	Owens	78	84
R. Koperski	84	81	Seebt	79	84
Case	85	88	Edwards	82	84
Kienmiller	93	85	Steele	98	86
			Parkis	103	80
				477	426
				452	

Ancon defeated the local basketball team in a closely contested game.

PEDRO MIGUEL.

The Pedro Miguel bowling team took two of the three games rolled on the home alleys with Gatun, Saturday evening. The scores are, as follows:

Gatun.			Pedro Miguel.		
Dumville	114	83	Orr	69	98
Delaney	99	82	Whiston	82	94
Furlong	79	82	Vandeburgh	96	84
Walsh	119	79	Bartholomew	84	91
Claherty	86	87	Dougherty	97	108
Davidson	87	86			
Richardson	87	87			

Totals... 497 413 427 428 475 452

The score of 119 made by Walsh of Gatun team is the highest individual score made so far in the present league.

The clubhouse membership is steadily increasing, the total being 126, consisting of 114 men and 12 boys.

The Spanish class was begun on Thursday evening, February 19 under Mr. Renald of Corozal. The first lesson was free to give the people an idea of the method used. The De Tornos method will be used in the various classes that may be formed. The price of the lessons per month is \$2. These lessons are opened to all members and to any of the ladies who may wish to take them.

The library books have been catalogued, and are now ready for distribution. The privileges of the library are open to members and their families, a deposit of \$1.50 being required for each card issued. There are 680 books in the general fiction library, and about 400 in the reference library; these will be placed in the reading room on the second floor.

The Sunday school service on February 15 was attended by 41 children and adults.

The men interested in gymnastic work are invited to join the gymnasium class held twice a week, from 8 to 9 o'clock evenings.

The All-Isthmian vaudeville performance will be held at the local clubhouse on Tuesday evening, February 24. The prices of admission are 50 cents for nonmembers and 25 cents for children. Members are admitted free.

CULEBRA.

The all-Isthmian vaudeville company presented its program to a good-sized audience on Friday night, February 13.

On Saturday night, February 14, a chess "Fest" was held, with representatives present from Empire and Cristobal.

On Thursday night, February 12, the Empire team bowled the locals in the all-Isthmian duckpin tournament, the former winning two out of three:

Empire.			Culebra.		
Barrett	83	95	Chadbourne	95	86
King	88	87	Kiernan	97	86
Sims	112	99	Barnes	85	84
Potter	83	84	Kronmiller	94	102
Gustavson	93	100	Case	82	102

Totals... 459 465 451 453 460 455

A handicap billiard tournament will be started, pro-

vided there are enough men interested. A preliminary tournament will be arranged for the placing of handicaps. Those desiring to enter are requested to see Mr. Cook.

On Sunday night, February 15, fifty-nine slides, colored and sepia, showing the island of Sicily with its celebrated historical churches, cities, and ruins, were exhibited to a good-sized audience. A lecture was read describing the scenes.

EMPIRE.

The medals won in the all-Isthmian tenpin tournament, held at Empire on November 25, have arrived. As some of the men who won medals have moved since then, it is desired that each one of these entitled to a medal, write the secretary where to send it.

The three high men in the "Ragtime" duckpin bowling tournament are, as follows: Sims, 30 games, 93.18 average; Barrett, 42 games, 92.33 average; Gustavson, 53 games, 92.17 average.

A new lot of bowling and tennis shoes have arrived and are on sale.

Providing there are five persons for a beginners' class in Spanish, one will be started the first of March. Leave names at the desk.

GATUN.

Arenilla, the Mexican magician, appears at the clubhouse on Thursday evening, February 19. The program will be in four parts—magic, flying rings, spiritualism, and contortion. Admission, 25 cents.

Ten sets of duckpins and twelve duckpin balls have been ordered from the United States.

The Isthmian vaudeville company will appear at Gatun on Thursday evening, February 26.

Nine members of the Gatun association are now studying the violin and piano under the supervision of the association. A few more pupils can be taken on. See the secretary for particulars.

Mrs. Walker played piano selections at the "Prisoner of Zenda" motion pictures on Thursday evening, February 12.

A large supply of rubber-soled shoes and supporters has been received from the United States, and are now sale.

The American Institute of Electrical Engineers will hold a meeting at the Gatun clubhouse on March 3.

The Gatun Y. M. C. A. will celebrate its fourth anniversary by a series of four entertainments. On Wednesday, March 4, a "Smoker" will be held for men only; on March 5, formal exercises will be held, with a reception following; on Friday, March 6, motion pictures with special music, and on Saturday, March 7, there will be an exhibition of gymnasium work, folk dancing, boys' activities, and a basketball game.

The present standing of the boys' athletic contest is, as follows:

Juniors.			Points.		
Hanson, Paul	642				
Griffith, Essex	639				
Sisson, Franklin	494				
Midgels.					
Loulan, Francis	683	Stevenson, Branson	505		
Clarify, Charles	602	Viberg, Herman	501		
Christian, William	586	Twitcheil, James	499		
Kuller, John	554	Cinwel, Alfred	465		
Pentz, David	549	Witt, Morris	391		
Neville, David	549	Carkeet, John	382		

CRISTOBAL.

The discussion club was addressed on Thursday night, February 12, by Mr. P. P. Scott of Florida, who spoke on the present and future of Florida, illustrating his remarks with stereoscopic views. The meeting for February 19 will be addressed by Mr. Edward Schildhauer, electrical and mechanical engineer. Mr. Schildhauer will tell of some of the electrical problems that had to be solved in constructing the Panama Canal. The meeting for February 26 will be addressed by E. M. Keyser in charge of the seismograph instruments at Ancon. Mr. Keyser's subject will be "Earthquakes and volcanoes."

Cristobal won all three games from Corozal in the all-Isthmian duckpin tournament on Saturday evening, February 14. The score follows:

Cristobal.			Corozal.		
Pinney	92	86	Davis	90	77
Schicd	75	100	Steele	86	96
Barte	116	92	Sims	83	73
Collins	87	70	Regan	76	
Smith	101	90	Edwards	89	79
			Parkis	98	97

Totals... 471 438 481 446 422 425

Entries are in order for the single folks' bowling tournament, on Monday evening, February 23 (Washington's Birthday.)

The first of a series of monthly Sunday afternoon meetings was held on Sunday, February 15, at 3 o'clock. The ladies' quartet, consisting of Mrs. Mears, Mrs. Wilford, Mrs. Williamson, and Mrs. Diers, gave two vocal numbers, with Mrs. Ulrich at the piano. Mrs. McCloud gave two violin selections, accompanied by Mrs.

Brittin. Mr. Price will address the meeting on Sunday, March 8.

Messrs. Weimeir and Hagan defeated Messrs. Schradley and J. Raymond two straight games, in the handball tournament, by the scores of 21-19, 21-20. Schradley and J. Raymond defeated Jimenez and D. Raymond in three games; scores, 21-17, 21-16, 21-14.

Team number three, captained by R. Billet, won the Cristobal boys' triangular athletic meet on Saturday morning, February 14. The meet was composed of five events, and the winning team was not known until the last event, the team relay race, was run. Score: Team No. 3, captain, R. Billet, Buser, Waid, C. Weaver, Grow, Mendes, Bradford, 41.086 points; team No. 1, captain, M. Cotton, R. Appleton, Harrison, M. Weaver, Simonson, Hollowell, F. Raymond, 37.547 points; team No. 2, captain, J. Anderson, J. Raymond, Foley, Wardlaw, Otey, Allen, O. Rowe, 37.211 points. Minot Cotton won the all-round junior athletic championship with 45.40 points.

PORTO BELLO.

The standing in the pool tournament to date is, as follows:

Name.	Won.	Lost.	P. C.
Baker	7	1	875
King	7	2	777
Colberg	7	2	777
Thompson	4	3	571
Ransbottom	4	4	500
Bradberry	3	4	428
Woolworth	3	6	333
Doyle	2	5	285
Chase	0	6
Cummings	0	4

Supplies for the Canal.

The following steamers with supplies for the Isthmian Canal Commission and Panama Railroad Company arrived at the ports of Colon, and Cristobal during the week ending February 7:

Parismina, February 2, from New Orleans, with 136 barrels paving brick, for Panama railroad; 950,000 pounds pig iron, for Mechanical Division; 15,000 (board feet) yellow pine lumber, 120 bags feed, 73 rolls cotton duck, for stock.

Metapan, February 4, from New York, with 30 packages chain fender material, 135 barrels oil, four boxes electrical machinery, 35 cases electrical machinery, for First Division; 28 packages structural material, for fortifications; 18 crates galvanized stovepipe, 39 reels wire rope, 60 boxes window glass, 300 cases turpentine, for stock.

Colon, February 5, from New York, with 17 reels copper wire, 285 bundles pipe, 89 boxes lamps, 18 pieces castings, for Mechanical Division; 186 pieces structural material for Panama railroad; 28 packages machinery, for Sixth Division; 28 cases electrical machinery, for First Division; 37 cases woodwork, for Administration Building, Balboa; 18 packages structural material, 27 packages armament material, for fortifications; four crates plumbing material, for permanent buildings; 110 pieces pipe and fittings, for Division of Municipal Engineering; 62 packages signal material, one launch, for Panama railroad; 146 kegs nails, 200 drums calcium carbide, 94 pieces sewer pipe, 24 barrels compound, 47 bales excelsior, 240 coils rope, 50 crates galvanized pails, 137 cases paint, for stock; and a miscellaneous cargo, the whole consisting of 2,459 packages, weighing 192 tons.

Turrialba, February 5, from New Orleans, with 2,708 (board feet) oak lumber, for Mechanical Division; 949 pieces cast iron pipe, 80,870 (board feet) yellow pine lumber, 6,987 (board feet) oak lumber, for stock.

Tenadores, February 5, from New York, with 24 reels wire rope, for Mechanical Division; 277 bundles enameled brick, 40 packages electrical machinery, 159 packages structural material, 309 packages structural material, for First Division; 158 crates asbestos roofing, for fortifications; 250 kegs nails, 300 kegs paint, 429 pieces pipe, for stock.

Sixola, February 6, from Boston, with two crates grindstones, one box screws, for stock.

Tide Table.

The following table shows the time of high and low tides at Panama for the week ending February 28, 1914:

DATE.	High	Low	High	Low
	A.M.	A.M.	P.M.	P.M.
February 22	1.47	8.02	2.30	8.34
February 23	2.46	8.56	3.17	9.24
February 24	3.34	9.40	3.57	10.05
February 25	4.14	10.21	4.33	10.43
February 26	4.49	10.58	5.05	11.18
February 27	5.22	11.32	5.35	11.51
		P.M.		
February 28	5.53	12.05	6.05

75th meridian time.

COMMISSARY DEPARTMENT.

The commissary stores are open during the following hours:

Cristobal, 8 a. m. to 12.30 p. m., and 2 to 7 p. m.
Balboa, 8 a. m. to 12.30 p. m., and 2.30 to 7 p. m.
Ancon, 8 a. m. to 1 p. m., and 3 to 6 p. m.
All others, 8 a. m. to 1 p. m., and 3 to 7 p. m.

Commissary Cold Storage.

No changes are reported in the list of cold storage supplies sold at the commissaries published in THE CANAL RECORD of February 11.

Family Quarters.

Applications for married quarters on file on January 31, were, as follows:

DISTRICT.	List No. 1.	List No. 2.
Balboa.....	8 (6)	67 (18)
Ancon.....	31 (24)	130 (51)

WEATHER CONDITIONS. CANAL ZONE. JANUARY, 1914.

Typical dry season weather prevailed on the Isthmus during the month of January. The rainfall was below the station averages at all stations except Pedro Miguel and Juan Miao. The average rainfall in the Canal Zone amounted to approximately 40 per cent of the January normal. The monthly totals ranged from 0.09 inch at Alhajuela to 2.38 inches at Porto Bello. The maximum precipitation recorded in one day was 1.08 inches at Pedro Miguel on the 29th.

Average air temperatures and atmospheric pressure were generally above normal. Approximately average conditions of relative humidity prevailed, while the cloudiness and wind movement were generally slightly deficient.

There was a marked decrease in night and early morning foginess with the return of dry season weather conditions. Of the fogs observed, 44 per cent were dissipated by 6.30 a. m., 72 per cent by 7.30 a. m., and 100 per cent by 8 a. m.

The following table summarizes the weather conditions for the month:

STATIONS.	Pressre (reduced to mean of 24 hours).	Temperature.						Mean relative humidity.	Precipitation.			Wind.

Board of Local Inspectors.

ANCON, C. Z., February 15, 1914.

The Board of Local Inspectors will conduct examinations at the Administration Building, Ancon, on Wednesday, February 25, 1914, beginning promptly at 2 p. m., for persons desiring the following classes of licenses: Pilots, masters, mates, marine engineers, chauffeurs, and navigators of motor boats. All applicants for licenses must procure from the Executive Office, Ancon, forms of application and information respecting the filling out of same, not later than the day previous to the examination. In addition, all persons desiring chauffeurs' licenses must provide themselves with automobiles with which to demonstrate their ability to properly operate the same.

NOTE—The demonstration test for applicants for chauffeurs' licenses will be given on Tuesday, the day preceding the regular examination, at 2 p. m., at the Administration Building, Ancon; on Wednesday, the day of the regular examination, for out-of-town applicants, at 2 p. m., at the Administration Building, Ancon. No demonstration tests will be given at Cristobal, except by appointment.

HUGH RODMAN, Chairman,
Board of Local Inspectors.

The Canal Record

Published weekly under the authority and supervision of the Isthmian Canal Commission.

The Canal Record is published free of charge, one copy each, to all employees of the Commission and Panama Railroad Company whose names are on the gold roll. Extra copies and back numbers can be obtained from the news stands of the Panama Railroad Company for five cents each.

Address all Communications,

THE CANAL RECORD.

Ancon, Canal Zone,

Isthmus of Panama.

No communication either for publication or requesting information, will receive attention unless signed with the full name and address of the writer.

NOTES OF PROGRESS.

Raising Surface of Miraflores Lake.

The culvert in the east side wall of Pedro Miguel Lock was opened at 2 p. m., on Saturday, February 21, for the purpose of passing water from the Gatun Lake level in Culebra Cut to Miraflores Lake, and raising the surface of the latter. The culvert, which is 18 feet in diameter, was left wide open for 40 minutes, and during this time about 17,000,000 cubic feet of water were passed through it. The surface of Miraflores Lake was raised from 51.91 to 52.36 feet above sealevel, a total of .45 inches.

During this run, the velocity of current caused by the outflow from Culebra Cut was measured. At Paraiso, near the south end, and at Gamboa, at the north end, the maximum velocity was about .4 mile per hour; through the restricted channel at Cucaracha slide, it was approximately four miles per hour.

Paraiso Springs Water Service Discontinued.

Effective February 20, the hauling of water in demijohns from Paraiso springs to residents of Corozal was discontinued, and the train formerly engaged in this service annulled. Under recent conditions, the service had required holding an additional engine in use at a cost of \$44 per day. In case the operation of a distilling plant at Corozal shall appear in the future to be desirable, on account of the discontinuance of the Paraiso springs service, the matter will be acted upon jointly by the Sanitary Department, the Quartermaster's Department, and the Division of Municipal Engineering.

The regular water supply of Corozal, previously used at the I. C. C. hotel in the village, the bachelors' quarters, and a number of family quarters, is furnished from the Rio Grande reservoir and Miraflores Lake, in connection with the system for supplying the south end of the Canal. At Corozal, it is not filtered, but the watershed of both reservoirs is guarded vigilantly and the water from

Miraflores Lake is treated with a solution of hyperchloride which is fatal to all bacilli in the water.

Wood Found 59 Feet Below Sealevel.

In the work of sinking the caissons to support the new wharves and pier at Balboa, pieces of wood in good state of preservation are frequently recovered from strata 50 feet or more below the present surface of the ground. A caisson recently sunk for Pier No. 1 struck a log at 59 feet below sealevel, or 67 feet below the surface, which was so large that it was necessary to cut it to pieces with axes in order to let the shoe of the caisson pass on to bed rock. A section of the log, six inches long and 20 inches in diameter, with the bark on, was washed and packed, and has been shipped to Mr. Henry Pittier of the Bureau of Plant Industry, in the Department of Agriculture, with the request that he identify it if possible and make a report on it. Mr. Pittier has made extensive studies of the woods of the Isthmus, as well as of other parts of Central America. The log was found in black alluvial deposit, directly above a stratum of gravel, several feet in thickness, which separates the alluvium from the bed rock to which the caissons are sunk.

Removal of Gatun Seismograph Station.

The seismograph station, which has been maintained by the Canal Commission on Guarapo Island in Gatun Lake, near the dam, will be abandoned, and the two 25-kg. instruments installed there, both of the Bosch-Omori type, will be transferred to their old location at Ancon, on March 1. The station on Guarapo Island was opened in the early part of 1911, for the purpose of obtaining a check on any seismic disturbances that might be registered at the Ancon station; for arriving at a more correct determination of their probable foci, and the effects, if any, on the tilting of the adjacent ground due to filling of Gatun Lake. As the two stations are but 40 miles apart, and as the records are nearly identical, it has been decided to effect a saving by combining again all the instruments at Ancon.

Repairs to Dredging Equipment.

The seagoing suction dredge *Culebra* was passed through Gatun Locks from the lake to the Atlantic entrance on Sunday, February 22, and has been set at work on a shoal west of the channel, near Mile 2. Later on the dredge will be placed in the Mount Hope dry dock for a complete overhauling. During the six years of its operation at the Pacific end, it has been given only emergency repairs to hull, as the facilities for overhauling the vessel there were incomplete, the method adopted being to beach it on one of the islands in the Bay of Panama for such repairs as were necessary.

In addition to the *Culebra*, the tug *Chame*, two empty coal lighters, and a mud scow, were

locked down on Sunday. The *Chame* has been placed in dry dock, where it will receive a general overhauling; its rudder will be replaced by one of larger size, and the vessel will be equipped with a towing machine. On leaving dry dock, it will be returned again to the Punta Chame sand service. The mud scow will undergo some necessary repairs also.

The tug *Miraflores*, which was at Mount Hope dry dock for about three weeks, was returned to the Culebra Cut dredging service on Sunday, February 22. In addition to receiving a thorough overhauling, the vessel was equipped with a new boiler, and its old rudder was exchanged for one of larger size. These improvements, it is expected, will increase the working efficiency of the tug fully 35 per cent. On the up trip, the *Miraflores* had a mud scow in tow.

Erection of Permanent Family Quarters at Balboa.

The construction of 20 concrete 4-family quarters, known as Type B, was begun about January 5. Five of these buildings are situated on the main street, known as Balboa Prado, in the permanent town of Balboa, and 15 are on the east slope of Sosa Hill, extending from a point opposite the present commissary store, over the toe of the hill, to the rear of the present power plant.

These buildings are designed for the housing of 80 families of the gold employees. The excavation for the building foundations has been completed, and the work on the various buildings is now in all stages of advancement, between the pouring of concrete foundations and the erection of walls and floor arches as high as the second story. The work is being pushed to completion as rapidly as the materials can be obtained from the United States.

The buildings will be provided with an open basement, extending the full length and width of the building, 90 feet by 35 feet 10 inches. The clear head room in the basement will be about six feet six inches, and the clear head room in the apartments will be 10 feet. The walls of the basement are of reinforced concrete. The remainder of the walls, including the interior partitions, are of hollow concrete blocks, to be finished with stucco on the exterior, and cement plaster on the interior. The floor arches are of reinforced concrete, upon which will be laid redwood floor sleepers, with a filling of cinder concrete between same; the floor of the apartments will be of comb-grained yellow pine nailed to the sleepers. The roof framing will be of yellow pine, covered with roofing felt, and a top surface of red vitrified Spanish tile.

Each apartment consists of five rooms and bath, with an 8-foot 2-inch veranda the entire width of the apartment on the front, and an 11 by 12-foot veranda on the rear, called the "Kitchen veranda." The apartment includes a living room, 14 by 14 feet 10 inches, a dining room, 12 by 14 feet, two bedrooms, each 11 by 12 feet, a bathroom 11 by seven feet.

with a small hall to provide communication between the bedrooms, bathroom, and the living room; and a kitchen 11 by 11 feet; also, a dry room approximately four by 11 feet, with a small closet in each bedroom. The bathroom is equipped with shower and tub, and the entire apartment is piped for hot and cold water. The floors on the verandas will be cement finished. The roof of the building has a pitch of six inches to the foot, and covers the verandas, projecting four feet two inches beyond same. The doors and windows will be of cypress, and the hardware of brass, sand finished. The force now employed on this construction includes 40 gold and 600 silver employees.

Operations at Cucaracha Slide.

The dipper dredges *Cardenas*, *Chagres*, and *Mindi* are excavating on the north side of the base of Cucaracha slide, close to Gold Hill, in practically the same positions they have occupied for the past month. On the south side of the slide, the pipeline suction dredges *No. 4* and *No. 86* are handling lighter material to the relay station on the west 95-foot berm, whence it is passed to the Rio Grande valley, with the rock being dumped behind a retaining dike considerably below the level of the watercourse. The second monitor installed on the slide, to be supplied with water pumped up by pipeline suction dredge *No. 82*, has begun operations, resulting in increased output by the two dredges which are carrying the spoil away. The daily excavation of all the dredges at the slide now approximates 20,000 cubic yards. New material comes into the channel about as fast as the excavation advances, but the bank is being continually lowered and the situation is regarded as satisfactory. Part of the spoil loosened by the monitors is washed through a flume into a dump barge moored at the base of the slide, and towed away in the same manner as spoil from the ladder or dipper dredges.

Progress on Permanent French Canal Bridge.

A piledriver is driving a trestle from the east side of the French canal, about 25 feet north of the present track crossing the Canal between Mount Hope and Mindi Island, in preparation for the construction of the east abutment pier of the permanent swing bridge for rail communication with the coaling plant at the north end of the island. Upon the completion of this approach trestle, the piledriver will place four rows, of eight each, of creosoted piles to support the concrete cap which will form the portion of the abutment above the water level. The base rock at this place slopes sharply, and at the point selected for the abutment is 61 feet below sealevel.

After the abutment has been completed, connection between it and the railway will be effected by means of an 80-foot plate girder which has been removed from the north end of the Gamboa bridge crossing the Chagres River. In its former use, this girder spanned a section of firm earth slightly below the level of Gatun Lake. A pile trestle has been constructed in its place, connecting with the adjacent pier of the bridge, and the girder taken out. It was the original plan to use at the French canal crossing one of the girders recovered from the old Barbacoas bridge, supporting it at the center by an additional pier, but the heavier Gamboa bridge girder will be used instead, as being

more in keeping with the heavy construction of the rest of the bridge.

Locating New Pier at Cristobal.

For the erection of the recently authorized additional pier at Cristobal, the site investigated was one with its inner side 300 feet west of the outer side of pier No. 8, to provide between these two piers a slip of the same width as that between pier No. 8 and dock No. 9, both of which are now nearly completed. Borings over this area, approximately 1,050 feet long by 219 feet wide, have showed that hard rock lies there about 50 per cent lower than beneath pier No. 8. The average depth below pier No. 8 is about 65 feet, and at the site investigated it is about 110 feet, with a maximum of 120.4 feet. Borings were made in longitudinal rows, spaced about 150 feet apart, on 100-foot centers. As the foundation cost of the new pier will be about 60 per cent of the total, several designs are being prepared with a view of keeping this cost as low as possible.

Island of Juan Mina Assigned to Meteorological Section.

The site of the former village of Juan Mina on the south bank of the Chagres River, a few miles above Cruces, is now an island, which, in its elevated portions, will be about 10 feet out of water, when Gatun Lake is at the 87-foot level. The locality has never been flooded by the rises in the river, and produces an abundance of native fruits, especially oranges, which are said to be about the sweetest found in this part of the Isthmus. The island has recently been placed under the control of the meteorological section of the Second Division, on account of the fact that the house and repair station of the lineman in charge of the telephone line to the upper river gaging stations of Alhajuela and El Vigia are located at this point.

To Abandon Miraflores Passenger Station.

It has been proposed that Miraflores station be abandoned as a regular stop for passenger trains of the Panama railroad, and a committee consisting of representatives of the Assistant Chief Engineer, the General Superintendent of the railroad, the resident engineer of the Division of Municipal Engineering, and Mr. W. L. Phillips, landscape architect, will meet at Miraflores station at 2 p. m., February 25, to select the most suitable point for the erection of an alighting platform at which trains may be stopped on signal to allow construction employees engaged in the vicinity to get on or off.

The village of Miraflores has entirely lost its identity, the only buildings remaining being several laborers' barracks situated on knolls above the level of Miraflores Lake. The site of most of the former town, including all its public buildings, is now under water.

Enlisted men on the submarine flotilla stationed at Cristobal, and those in the camps of the Coast Artillery Corps on the Canal Zone, will be allowed personal transportation on the Panama railroad at half-rate charges, as provided for enlisted men of the Tenth Infantry.

The Panama railroad sightseeing barge will make two trips on Sunday, March 1; in the forenoon, leaving Gamboa for Gatun, at 8.40; and in the afternoon, leaving Gatun at 2 o'clock. Fare, \$1.50, U. S. currency, each way.

PLAN OF BALBOA TERMINALS.

Layout of Permanent Plant at Balboa for Marine and Railway Maintenance and Manufacturing Work.

The layout for the Pacific terminals at Balboa, including the dry docks, shop facilities, wharves, and the one new commercial pier authorized at present, is indicated by the accompanying sketch. The site, beginning with the sea end, extends about one mile in a southwest to northeast direction. It is bounded on the west and north by the approach channels from the Canal, on the south by Sosa Hills, and on the east by the yards of the Panama railroad. Its normal width is about 900 feet, and it will have an area of approximately 103 acres.

The site was originally a flat on the northwest side of Sosa Hills, with a general elevation of only a few feet above sealevel. Solid rock under the site dips at a steep inclination from the hills. The area occupied by the shops proper has been raised to a general elevation of about 17.5 feet above sealevel by means of dry spoil; the area east of the shops proper was raised to a general elevation of about 16 feet by material pumped into it by pipeline suction dredges, working in the inner harbor. At the same time, the site was widened by excavation along the north face of Sosa Hills.

The foundations for the buildings on this site with the exception of a few carried to solid rock, rest on clusters of timber piles, about 10 piles to the cluster, driven to a depth of about 35 feet and splaying over a circular area about 30 feet in diameter. The heavier superstructures for the wharf facilities and the coal plant will rest on caissons, driven to rock at a general level of about 50 feet below sealevel. Most of the caissons will be of 6-foot diameter reinforced concrete shells, filled with reinforced concrete, and the others will be 4 to 6-foot diameter steel shells, similarly filled. A total of about 1,100 caissons will be used for the structures. The dry docks will rest on bed rock.

The area devoted to the terminals was formerly occupied by a part native, part American, village, known as La Boca, as well as by the shipways, wharves, and shops of the Pacific dredging department, the Quartermaster's storeroom, and the storage yard for supplying materials to that department. After the issuance of the order by the Secretary of War changing the name of the Pacific entrance and vicinity to Balboa, the settlement was mostly referred to as Old Balboa. All the former buildings have been removed in the progress of the terminal construction, except the Quartermaster's storeroom and part of the timber wharf devoted to the sand service, and to making light repairs to vessels; these will be demolished when new facilities are provided to care for their work.

The layout was designed to place the metal and woodworking shops, storeroom, and other facilities most needed in connection with repairs to vessels, close to the dry docks and the repair wharf, at the sea end of the site; and the foundry, lumber, and equipment shed and car shop nearer the land end, with the locomotive roundhouse at the extreme inland end of the site, adjoining the terminal yards of the Panama railroad. The office building is situated near the center of the plant.

BUILDINGS.

Following is a summary of the plan di-

such general construction work as will be carried on along the Canal; to make repairs to the gates, dams, and operating machinery of locks, spillways, etc., of the Canal; to maintain the dredging equipment in permanent service on the Canal, and to provide for all repair needs of vessels of the United States Navy, and those engaged in commercial service. The comprehensive mission of the plant may be summarized as attending to all the manufacturing and repairs required in the maintenance and operation of the Canal, though it is the present intention to maintain the shops and dry dock at Mount Hope as an auxiliary plant, for vessels and equipment at the Atlantic end.

The foundry and planing mill were occupied in August, 1913, and the pattern storage building in November, 1913. The transfer of work to the remaining buildings will begin on March 2, 1914, as provided for in circular No. 349-F.

ACCOMMODATIONS FOR SHIPPING.

The accommodations for shipping at the terminals include a reinforced concrete pier, 1,000 feet long by 300 feet wide for handling cargo, the inner corner of which is shown in the accompanying plan; a repair wharf, having an aggregate length of 2,960 feet, with average width of 50 feet; two dry docks, the larger 1,000 feet long, 110 feet wide, and with a depth of 35 feet over the keel blocks at mean tide, the smaller 350 feet long, 71 feet wide, and with a depth of 13½ feet over the keel blocks at mean tide; and a coaling plant with facilities for handling and storing 210,000 tons of coal. Descriptions of these features have been published in previous issues of THE CANAL RECORD.

Reclaiming Swamp East of Camp Bied.

An area between Camp Bied, at the north limit of Cristobal, and the French canal, is being reclaimed from its former swampy condition for an extension of the site suitable for buildings, including the new Cristobal sub-station. A timber dike has been built along the north side of this area, adjoining the lagoon used as a marine graveyard for several abandoned French dredges, and the material for making the fill is supplied by pipeline suction dredge No. 83, excavating diagonally across the French canal from this area in preparing the approach to the coaling plant. The dredge discharges ordinarily on the other side of Mindi Island from the French canal, but at night, from 6 p. m. to 6 a. m., the French canal to the south of the dredge is closed to traffic, and the discharge is made through an auxiliary line, crossing the canal to the bank adjoining the swamp. A total of about 12,000 cubic yards of spoil will be required.

Sand Service Discontinued Temporarily.

In order to advance the completion of the repair wharf which is to be part of the permanent terminals at Balboa, it has become necessary to remove the timber wharf for unloading sand, which now occupies a part of the site of the repair wharf. The sand service from Punta Chamé was, therefore, discontinued on February 7, to be resumed within three or four months, when new facilities for unloading the barges shall have been provided. About 75,000 cubic yards of sand have been stored in the stock pile along the east side of Miraflores Locks to cover the requirements within that period. The total consumption on

the Isthmus is now about 500 cubic yards per day.

The French ladder dredge *Gopher*, which has been reclaiming sand from Chamé, has been brought to the Pacific entrance channel, to work, for the present, near station No. 2115, opposite the north end of Corozal. The drill boat *Teredo* and the rock breaker *Vulcan* have been breaking rock in the channel at this point, and the *Gopher* will proceed with the excavation of the loosened material.

The tug *Chamé* and three dump barges, formerly in the sand service, were passed through Miraflores and Pedro Miguel Locks on February 8, to take part in the dredging operations in Culebra Cut, and on the same day clapets No. 6 and No. 7 were passed down to the Pacific entrance, to serve the *Gopher*.

Aquatic Meet at Cristobal.

About 1,500 people attended the aquatic meet, held on Washington's Birthday under the auspices of the Cristobal Y. M. C. A., at Pier 9. Bingaman won the 25-yard, 50-yard, and 100-yard swims, Fraser finished second in the 25 yard dash, won the obstacle swimming race, finished second in the tub race, won third place in the under water swim, and swam on the winning relay team. One of the best events of the afternoon was the race between Bingaman and Green in the mile swim. Green took the lead at the start, but at the half-mile turn both were even. On the last lap, Green slowly forged to the front and was never headed. Green swam the mile in 30 minutes, 38 4-5 seconds. Following are the results:

25-yard dash.—First, Bingaman, Gatun; second, W Fraser, Cristobal; third, Gordon, Cristobal. Time, 15 1-5 seconds.

50-yard dash, boys, 95 pounds and under.—First, Wardlaw; second, Kerr; third, McKeown, all of Cristobal. Time, 38 1-5 seconds.

25-yard back swim.—First, J. Mitchell, Gatun; second, A. Marcus, Camp Harrison; third, Dustheimer, Gatun. Time, 20 2-5 seconds.

Fancy diving.—First, Dustheimer, Gatun, 91 points; second, Jimenez, Cristobal, 87 points; third, Hanson, Corozal, 85 points.

50-yard dash.—First, Bingaman, Gatun; second, Dustheimer, Gatun; third, N. Giavelli, Empire. Time, 31 2-5 seconds.

Obstacle swimming race.—First, W. Fraser, Cristobal; second, A. Fraser; third, Hanson, Corozal. Time, nine minutes.

100-yard swim.—First, Bingaman, Gatun; second, Gordon, Cristobal; third, Kyes, Gatun. Time one minute 13 seconds.

Tub race.—First, N. Giavelli, Empire; second, W. Fraser, Cristobal; third, A. Fraser, Cristobal. Time, 33 seconds.

Under water swim for distance.—First, Nash, Cristobal, 132 feet; second, Hanson, Corozal, 130 feet; third, W. Fraser, 121 feet.

One mile swim.—First, Green, Cristobal; second, Bingaman, Gatun; third, Marcus, Camp Harrison. Time, 30 minutes, 38 4-5 seconds.

Relay Race between Gatun and Cristobal.—Won by Cristobal. Team composed of W. Fraser, P. Simons, Green, and Gordon. Gatun team—Clayton, Dustheimer, Mitchell, and Bingaman. Time, 2 minutes, 21 seconds.

Winner of meet.—First, Cristobal, 47 points; second, Gatun, 36 points; third, Empire, six points; fourth, Corozal, five points; fifth, Camp Harrison, four points.

DRY DOCKING SUBMARINES.

Repairs to be Made to Them in One of the Gatun Lock Chambers.

The submarines C-1, C-2, C-3, C-4, and C-5, which have been stationed at the Atlantic entrance to the Canal since December 12, 1913, when they arrived from Guantanamo, Cuba, require to go into dry dock for general overhauling, and as the dock at Mount Hope can not be spared for so long from its services to the dredging equipment, it has been decided to dock the submarines in the upper level of the east flight of Gatun Locks. They will be docked probably about March 2, and it is estimated that about three weeks will be required for their overhauling. The chamber selected can be spared with the least interference with the work of the First Division in installing machinery and testing valves. The tender *Severn*, on which the crews of the submarines mess and sleep, will be berthed alongside the upper approach wall of the locks.

The Mechanical Division will perform the overhauling and is now preparing ladders, blocks, battens, cradles, etc., in the chamber, for the work. It will erect and remove the stages; take off and replace the manhole plates on the ballast and fuel tanks; test the hull, fuel tanks, and ballast tanks to air pressures of 10, 15, and 50 pounds, respectively, renewing rivets if necessary and making the plates airtight to the respective pressures; clean the ballast tanks and paint them with two coats of anticorrosive paint; provide a water pump or other device capable of giving a water pressure of 3,000 pounds to the square inch, for testing the high pressure air service; and, on submarine C-4 only, line up the diving rudder bearings and, by swinging the diving rudder in a lathe, line up its journals.

The crews of the submarines will overhaul machinery and valves, and clean and paint the hulls of the boats.

Shipments of Household Goods to San Francisco.

The Luckenbach Steamship Company, Incorporated, through its Isthmian manager, Mr. R. E. Wheelan, announces that it will accept shipments of household goods and personal effects of Canal Commission employees to San Francisco at 25 per cent reduction from the regular tariff of \$10 per ton, weight or measurement, ship's option.

Reducing Level of Gatun Lake.

One gate of the Gatun spillway was opened at 7 a. m., Saturday, February 21, for the purpose of lowering the surface of Gatun Lake, then 84.96 feet above sealevel, to elevation 84.8 feet. Two gates were left open between 7 a. m. and 5 p. m., on the following day. Elevation 84.76 was attained at 5 p. m., February 23. It is desired to keep the surface, for the present, between elevations 84.8 and 85.

Ancon Crusher.

Following is a statement of rock crushed at Ancon quarry during the week ending February 21:

DATE.	Hours worked.	Cubic yards.
February 16	8.30	2,307
February 17	6.55	1,694
February 18	7.15	2,179
February 19	8.30	2,431
February 20	8.05	2,846
February 21	8.10	1,990
Total	47.25	13,447

CANAL WORK IN JANUARY.

Report of the Acting Chairman and Chief Engineer to the Secretary of War.

CULEBRA, C. Z., February 17, 1914.

The Honorable the Secretary of War,
Washington, D. C.

SIR: I have the honor to submit the following report of operations on the Isthmus for the month of January, 1914:

ITEM.	Unit.	Atlantic.	2d. Div.	4th Div.	5th Div.	Dredging	Municipal Eng'n'g	Total.
Work excavation, dry.....	Cubic yds.	4,626	161,818	178,600	44,830			389,874
Work excavation, wet.....	Cubic yds.				153,500	964,964		1,118,464
Total work excavation.....	Cubic yds.	4,626	161,818	178,600	198,330	964,964		1,508,338
Plant excavation, dry.....	Cubic yds.		6,634					6,634
Plant excavation, wet.....	Cubic yds.							
Total.....	Cubic yds.		6,634					6,634
Total Canal excavation.....	Cubic yds.	4,626	168,452	178,600	198,330	964,964		1,514,972
Concrete placed in locks, dams, and spillways.....	Cubic yds.	811			7,372			8,183
Fill placed in dams.....	Cubic yds.	544			13,164			13,708
Explosives used.....	Tons (Gr.)	9.32	31.53	13.17	15.10	33.00		162.12
Rock drilled.....	Feet	9,439	59,989	27,440	18,961	20,595		136,424
Tracks removed.....	Miles	7.52	3.10	5.05				10.67
New tracks laid.....	Miles	1.44	5.29	2.69	0.90			10.32
Rock crushed.....	Cubic yds.				43,160			43,160
Cement used.....	Barrels	294	10,641			4,499		15,434
New roads built.....	Miles					.88		.88
Water mains laid.....	Feet	1,669				23,183		24,843
Sewers laid.....	Feet					6,861		6,861
Open drains and ditches dug.....	Feet		2,160			6,504		8,664
Average daily force.....		1,114	2,851	1,226	995	2,450	2,351	10,987
Average rainfall.....	Inches	2.98	.30	.38	1.27	.87	1.63	.87

Department of Construction and Engineering.

The following table summarizes the principal items of work accomplished by the construction divisions during the month:

First Division—Office of the Chief Engineer.

LOCK GATES AND PROTECTIVE DEVICES.

The contractor finished work on the lock gates at Pedro Miguel on January 8; at Miraflores, January 19, and at Gatun, January 26. Some painting and the application of bitumastic enamel comprise the only remaining work.

Manufacture of the fender chains at Boston Navy Yard advances, one open link and one stud link section, each 55 feet long, having been completed on January 20. An order was placed for six additional chains. The contractor has shipped two operating valves and 12 resistance valves. Three complete chain fender machines, and various parts, have been delivered.

Approximately half of the structural steel required for the lock entrance cassion has been shipped to the contractor's plant, and over 96 per cent of all the structural steel and rivet material has been passed for shipment to the contractor at San Francisco.

OPERATING MACHINERY AND ELECTRICAL EQUIPMENT.

At the hydroelectric station at Gatun, the installation of machinery and equipment has been begun.

Installation of transformer room equipment at all the locks is about 87 per cent completed.

Control houses at all the locks are practically completed. Practically all control apparatus for lock and spillway machines is on the Isthmus, except part of the interlocking system and indicators for the main control

boards. Erection of the main control board at Gatun is about 75 per cent complete; at Pedro Miguel, 40 per cent.

Erection of steel at Gatun substation has been begun; Miraflores substation is ready for steel erection; at Cristobal, borings are being made for the foundations.

Track-span bridges have been erected along approximately 28 miles of the transisthmian transmission line; 714 foundations for towers

LOCK OPERATIONS.

Nine lockages were made at Gatun, four at Pedro Miguel, and eight at Miraflores.

EMERGENCY DAMS.

The subdivision of emergency dams was discontinued on January 31, its work having been practically completed.

AIDS TO NAVIGATION.

The construction of range towers, installation of permanent lighting apparatus, construction of electric pole line along Culebra Cut, locating buoy sites, and other work in connection with aids to navigation were continued.

Second Division—Office of the Chief Engineer.

BALBOA TERMINALS.

Dry docks—Design work for dry dock No. 1 included a tunnel under the floor to carry electric conduits, air pipes, etc.; a sidewall capable of withstanding hydrostatic pressure, and valve operating machinery. For dry dock No. 2, a general plan was completed, embodying the latest features of the dock and surrounding wharf structures. This study includes a method of filling by means of six 24-inch electrically operated valves in the side walls.

Excavation in the dry docks, entrance basin, and coal pocket amounted to 83,204 cubic yards.

Permanent shops—The removal of the blacksmith, boilermaker and shipfitter, carpenter, and pipefitter machines and tools from the old shipways was completed on January 2, and the shipways and its buildings were demolished. Sufficient machines and forces were put into service in the forge, boiler and shipfitter's shops, for performing the work formerly done at the shipways. Fifty-four machines, out of a total of 178, have been installed in the machine shop; 13, out of a total of 35, in the forge shop; 14, out of a total of 37, in the boiler and shipfitter's shop, and 55, out of a total of 57, in the planing mill.

Excavation for shop foundations amounted to 971 cubic yards; for tunnel, 45; for machine footings, floors, and turntable, 695 cubic yards. Fill amounted to 1,614 cubic yards of spoil, and 1,806 cubic yards of rock, screenings, and cinders. Concrete placed amounted to 918 cubic yards in foundation piers, and 613 in machine footings.

Coaling plant—A detail drawing of the berm crane and conveyor car supports, Stations 5 to 8, was practically completed; studies are under way for continuation of this part of the plant across the subaqueous storage basin. Excavation for the coal pocket was nearly completed, the total for the month being 24,244 cubic yards.

Pier and quay walls—Excavation amounted to 3,345 cubic yards; fill, 11,073 yards; concrete in substructure of pier, 4,534 cubic yards; quay walls, 58 yards; piling driven, 1,035 linear feet.

In sinking the remaining piers for the substructure of pier No. 1, rock has been encountered at a higher elevation than formerly, and of the 400 feet penetration made for the month, 100 feet were through rock. Thirty-five caissons were sunk into rock to their final elevation during the month, making 165 caissons on pier No. 1 to date. Seventy-eight were filled with concrete and reinforced with rail during the period, using the elevator towers to distribute the concrete. Four thousand five hundred and thirty-four cubic

have been placed, out of a total of 804; 6,266 cubic yards of concrete have been placed. Stringing of wire was begun during the month, and four miles of ground wire and three and one-half miles of power wire were strung.

About 99 per cent of the total of 2,507,190 feet of cable on order for the power distribution at the locks, the Gatun duct line, hydroelectric station and spillway, and the Pedro Miguel-Miraflores duct line, has been delivered, and 1,519,633 linear feet have been pulled into the ducts.

Reflectors for exterior and interior illumination are 86 per cent completed. Out of a total of 206 lamp posts at Gatun, 204 have been completed; at Pedro Miguel, out of a total of 130, seventy-two have been completed; and at Miraflores, out of a total of 168, ninety-three have been completed.

Ninety-nine per cent of the towing track has been completed at Gatun and Pedro Miguel, and 96 per cent at Miraflores.

All valve machines are installed, and installation of the electrical apparatus is 95 per cent completed.

The miter gate moving machines are installed, and the electrical work is 76 per cent completed. Mechanical erection of miter gate forcing machines is 95 per cent completed, and electrical installation, 68 per cent.

Spillway gate machines are completely installed at Gatun, and at Miraflores only 20 per cent of the electrical installation remains.

On miter gate sump pumps, mechanical erection is 100 per cent complete, electrical, 77 per cent; chain fender sump pumps, mechanical, 31 per cent, electrical, started; drainage sump pumps, mechanical, 100, electrical, 76 per cent; culvert pumps, mechanical, 100 per cent, electrical, 20 per cent.

yards of concrete were placed in this way inside the caissons.

The driving of steel cylinders was begun on quay wall e-l. The rock at this section is below -60, and several layers of sea deposit of varying hardness cover the rock. A total penetration of 157 linear feet was made in the month, 111 feet of which were classified as in rock. Ten caissons were started, and 605 linear feet of 6-foot steel caissons were placed in position.

The paving of the floor of quay wall g-h-i was completed, and the floor cleaned of all refuse. This quay is completed, with the exception of placing a few more anchors and driving the fender piles.

The construction of the superstructure of quay wall i-j-m-n was begun during the month. Due to lack of reinforcing rods, no work could be done before this date. No concrete was poured. The piers, which, heretofore, were under the construction tracks leading to pier No. 1 were excavated for and 1,097 linear feet of penetration were made. There are yet two caissons to be started. Forty-six caissons were filled with concrete to date.

Atlantic terminals—A profile of the borings taken along the east and west sides of the 700-foot extension was completed. A design for the support of the stocking and reclaiming bridges was decided upon. The design and drawings for the dock structure were being prepared throughout the month. Sketches of the limits of the coral fill were also prepared.

Transportation section—Equipment in service included 174 Lidgerwood flat cars, 414 steel dumps; 78 American locomotives. 13 French locomotives. Cars handled amounted to 26,551 Lidgerwood cars, 2,323 of crushed rock, 1,302 of sand, 202 of screenings.

Landscape architect—Plans made included location of residence for the Governor, revised sanitary sewer layout, location of public buildings. Surveys and construction were continued. Excavation amounted to 12,496 cubic yards; backfill, 2,090 cubic yards; townsite fill, 16,548 cubic yards; sewer pipe laid 3,854 linear feet; water pipe laid, 5,170 linear feet.

Meteorology and hydrography—Typical dry season weather prevailed on the Isthmus throughout the month of January. The rainfall was below the station averages at all stations, except Pedro Miguel and Juan Mina. The average rainfall in the Canal Zone amounted to approximately 40 per cent of the January normal. The monthly totals ranged from 0.09 inch at Alhajuela to 2.38 inches at Porto Bello. Slight seismic tremors were recorded at Ancon and Gatun on the 17th and 29th. These shocks were of insufficient intensity to be felt locally, and no damage resulted from them. The total yield for Gatun Lake watershed was 48 per cent below the 6-year normal for January, while that at Alhajuela was 40 per cent below the 25-year normal. For the 25-year period, Gatun was 57 per cent below normal. The flow of all streams continued to diminish throughout the month. The discharge at Alhajuela dropped from 1,710 second-feet on the 1st to 830 second-feet on the 31st. The maximum discharge for the month was 2,255 second-feet, on the 13th. During the month, Gatun Lake rose from 84.48 on the 1st to 84.90 on the 31st, or a storage increase of 1.91 billion cubic feet. Spillway gates

were operated on the 2d, 3d, 5th, and 6th, discharging a total of 2.54 billion cubic feet.

Fourth Division—Office of the Chief Engineer.

Dry excavation, Culebra Cut—Excavation in Culebra Cut from slides, and from high levels as preventive work against slides, amounted to 178,660 cubic yards, of which 96,972 cubic yards were rock. The daily average of steamshovels was four, and the total of shovel days was 103.

Fifth Division—Office of the Chief Engineer.

Pedro Miguel and Miraflores—Grading and filling at Pedro Miguel Lock, except in the areas occupied by materials and shops, was completed. The backfill was increased by 760 cubic yards; total, 1,039,383 cubic yards. At Miraflores, general cleaning up, grading, and backfill were continued. Two steamshovels worked south of the spillway dam, and one in Cocoli borrow pit. Dry filling in the west dam was increased by 13,164 cubic yards, making the total 1,748,223 cubic yards of dry fill, and 661,048 of hydraulic fill. Backfill at the locks was increased by 41,114 cubic yards; total, 2,046,522 cubic yards.

Ancon quarry and crusher—Excavation in the quarry at Ancon Hill amounted to 44,725 cubic yards. The crusher plant crushed 43,160 cubic yards.

Gold Hill hydraulic excavation—The excavation by hydraulic method from the back of Gold Hill amounted to 153,430 cubic yards, of which 72,000 were classed as earth.

Sixth Division—Office of the Chief Engineer.

The total excavation by dredges was 1,133,804 cubic yards. The material remaining to be excavated by dredging is, as follows:

LOCATION.	Earth, Cu. yds.	Rock, Cu. yds.	Total, Cu. yds.
Ocean to Gatun Locks.....	460,769	1,204	461,973
Cristobal coaling station.....	39,356	841,353	880,709
Culebra Cut.....	624,002	2,862,204	3,486,206
Miraflores Lake.....	328,872	328,872
Miraflores Locks to the sea.....	1,540,759	549,629	2,090,388
Inner harbor, Balboa.....	5,760,782	372,062	6,132,844
Total.....	8,754,540	4,626,452	13,380,992

In the Atlantic entrance, 102,057 cubic yards were removed from the Canal prism, and at the end of the month 35 feet of water could be carried to Gatun Locks. At Cristobal coaling station, 53,734 cubic yards of coral were removed. Dredges working in Gatun Lake near Gamboa removed 71,710 cubic yards of earth.

Excavation from Culebra Cut was, as follows:

LOCATION.	Earth	Rock	Total
Empire slide.....	2,177	33,093	35,270
Hagan's slide.....	754	9,067	9,821
Culebra slide (east).....	506	53,772	54,278
Culebra slide (west).....	506	53,773	54,279
Cucaracha.....	115,513	176,061	291,574
Total.....	119,456	325,766	445,222

At the Pacific entrance, 86,469 cubic yards of earth were removed from the Canal prism, and 205,656 cubic yards of earth from the inner harbor.

Division of Municipal Engineering.

General finishing up work was done on the new filtration plant and pump station for the Colon-Cristobal water system.

Work was continued at the townsites of Balboa, La Boca, and Pedro Miguel. The work at Pedro Miguel is about 51 per cent com-

pleted; at Balboa, about 40 per cent; at La Boca, 90 per cent.

The main walls of Ancon high service reservoir were completed. Work on the filtration plant at Miraflores, Ancon pump station, and the pipe lines for the new Panama water system was carried forward.

Atlantic Division.

At Gatun Locks, the dismantling of the last cableway was begun on January 26, and the routine work was carried on.

Two steamshovels excavated 17,714 cubic yards of earth and rock, 13,260 of which were used as backfill over the penstocks of the hydroelectric plant, 3,910 as embankment on the Gatun-Mindi levee, and 544 yards on the dam. The duct line construction was advanced by the laying of 357 feet of 20-inch duct, and 61 feet of 16-inch duct.

The contractor's work at Caño saddle dam was carried on under the eye of an inspector from the Atlantic Division.

The fill at the west breakwater was increased by 17,888 yards of rock from Porto Bello. The total fill is now 3,126,165 cubic yards, of which 669,254 cubic yards are within the breakwater section proper.

Preliminary work in connection with the east breakwater was continued.

Quartermaster's Department.

There was a slight increase in the working force, the total at work at the close of the month being 27,768 Canal and 5,502 Panama railroad employees. The Canal force at the close of December was 26,953. Gold employees numbered 3,944 on the Canal force, and 752 on the railroad.

Work on the buildings at La Boca was continued, and 100 additional apartments were authorized. Work has been begun on the 4-family quarters at Balboa.

Subsistence Department.

Subsistence operations were conducted with a net profit of \$2,565.66, of which \$2,034.68 was profit on the Hotel Tivoli. The total number of meals served was 423,283, of which 174,408 were served at line hotels, 237,426 at laborers' messes, 11,180 at Hotel Tivoli, and 269 at Hotel Aspinwall.

Department of Civil Administration.

POSTS, CUSTOMS, AND REVENUES.

Postal receipts amounted to \$7,608.83; money orders, \$306,062.15; savings deposits, \$138,996, withdrawals \$125,116. At the port of Ancon, 24 vessels entered and 20 cleared; at Cristobal, 26 entered and 23 cleared.

POLICE AND PRISONS.

Arrests numbered 422, of whom 28 were women. Nine persons were committed to the penitentiary and 12 were discharged, leaving 91 in confinement. The cost of guarding and subsisting the prisoners was \$2,135.79, and their work on the Gamboa-Empire road was valued at \$1,572.60.

FIRE PROTECTION.

Twenty-one fires occurred, causing \$11,998.56 damage to Commission property, and \$135 to private property.

SCHOOLS.

The net enrollment in the white schools was 1,194; average daily attendance, 961.6. In the colored schools, the net enrollment was 1,300; average daily attendance, 748.8.

Department of Sanitation.

The total number of deaths from all causes among employes was 33, divided, as follows: Disease, 20; violence, 13, giving the annual

average per thousand of 4.87 and 3.16, respectively. Among employes for the month, the annual average death rate per thousand was 8.03. The annual average death rate per thousand in the cities of Panama and Colon, and the Canal Zone, including both employes and civil population, for the month, was 25.94. Deaths from the principal diseases among employes were, as follows; Dysentery, unclassified, one; lobar pneumonia, four; malaria fever, estivoautumnal, one; tuberculosis, seven, leaving seven deaths from all other diseases, and 13 deaths from external violence. No case of yellow fever, smallpox, or plague originated on, or was brought to the Isthmus, during the month.

Respectfully,

H. F. HODGES,

Acting Chairman and Chief Engineer.

Emigration and Immigration in January.

According to the figures of the quarantine service, there was a falling off in the emigration from the Isthmus during January, the excess of departures over arrivals totaling 1,382, as compared with an excess of departures amounting to 1,970 in December, and 2,037 in November. The net emigration for the six months period ending January 31, 1914, was 12,148, the greater part of which consisted of Canal employes.

The total number of steamship passengers embarking from the ports of Colon and Cristobal for foreign ports during January was 4,193, consisting of 1,800 cabin, and 2,393 steerage passengers. The number of persons landing from foreign ports was 2,835, consisting of 1,572 cabin, and 1,263 steerage passengers. The number of persons who embarked over those who landed at these ports was 1,358. There was a slight increase in the immigration of steerage passengers from West Indian ports, but all other countries contributing to this class, showed a decrease. Costa Rica furnished only 83, Colombia, 91, while a new low record in recent years in the immigration of deck passengers from Europe was established, namely 52. The number of persons arriving "In transit" during the month of January, nearly all tourists, was 2,392, as compared with 1,618 for the months of November and December, respectively.

The number of persons arriving at the ports of Ancon and Panama from foreign ports during the month was 492, consisting of 367 cabin, and 125 steerage passengers. The number of persons embarking for foreign ports was 516, consisting of 319 cabin, and 197 steerage passengers. The number of those who embarked over those who landed was 24.

The total number of vessels arriving at Colon during January was 98, of which one was a United States naval vessel. The number of vessels arriving at the port of Ancon was 24.

A tennis court will be laid out at Pedro Miguel on a piece of level ground, east of the Panama railroad and in the rear of house No. 132. The work will be performed by the Canal Commission, and will be paid for by the local tennis club, which now numbers about 12 members.

Mr. José M. Misteli has been appointed consul at Panama for the Swiss Confederation.

The hull of the old drill boat *Terrier*, which sank in the French canal, near dock No. 11,

on December 27, 1913, and was subsequently raised, will be towed to the west breakwater and used for the temporary location of a mess house for the crews of the derrick barges em-

ployed in placing the rock in armoring the breakwater. The mess house was formerly on Toro Point, at some distance from the men's work.

LABOR FORCE AND QUARTERS IN JANUARY.

The force report for January 28, shows the actual working force of the Canal Commission on that date to have been 27,768; of the Panama railroad, 5,502, and of the contractors, 349, a total effective working force of 33,619, an increase of 1,056, as compared with the statement for December. The gold force on the Canal work, composed almost exclusively of white Americans, was 3,944, an increase of 200, as compared with the previous month. A statement of the Canal force, by divisions, follows:

DEPARTMENT OR DIVISION.	SILVER EMPLOYEES*											Total silver.	Total gold.	Grand total.

Gold force of contractors (included above), seven families, 108 bachelors.

MIRAFLORES SPILLWAY FLOW.

To Be Regulated By a Settling Basin in Place of Baffle Piers.

In preparation of a discharge channel for the spillway of Miraflores Lake, two steam-shovels are engaged in the excavation of a settling basin below the ogee of the spillway dam, to take the place of baffle piers, as used in Gatun Spillway, and a third shovel, No. 110, is engaged about 1,100 feet south of Miraflores Locks in cutting away a 1,000-foot section of the embankment by which the waters of the Rio Grande were diverted from the adjoining section of the Canal during the progress of its excavation. The north end of this section is at about the site of the former sand track junction, and the embankment which is being removed formerly supported the sand track.

The Rio Grande diversion, which debouches into the Canal about 7,000 feet south of the sand track junction, and has carried the waters of the Rio Grande and its tributaries, is expected to carry the normal flow over the spillway; the excavation of the embankment, which is being carried to an elevation of about two feet above normal high tide level, will provide a place for overflow when the discharge from the spillway exceeds the capacity of the diversion channel.

In connection with this work, the embankment at the north end of the present trestle across the diversion, affording track connection between the east side of Miraflores Locks and the Panama railroad at Corozal Junction, will be cut away. This requires the building of a new and longer trestle at about the same place, and preparations for the work are now in progress. Spoil from the excavation of the diversion embankment, and from the settling basin directly below the spillway, is being used as fill for a raised track to the north end of the proposed trestle, and the work of driving piles for the trestle bents is expected to begin within a few days. The new trestle will be 600 feet long, and its track will be about six feet higher than that on the present trestle. From a point close to precise bench mark No. 42, it will cross the diversion channel at right angles, terminating at a knoll on the east side.

Progress at Miraflores Purification Plant.

Since the completion of steamshovel excavation at the site of the filtration plant overlooking Miraflores Spillway, in the early part of January, and of supplementary task excavation shortly afterward, the reinforced concrete floor and sides of the clear water basin, which will be directly under the filter building, have been completed to the level of the floor on which the filters will be installed.

Similar construction for the bottom and sides of the sedimentation basin, directly to the north, is in progress. The supporting wooden piles have been driven over most of the area, reinforcing steel is in place for about one-third of the basin, and the laying of concrete has begun.

The 300,000-gallon wash water tank, situated on the crest of the hill to the southwest of Miraflores tunnel, to supply water by gravity to Pedro Miguel and Paraiso, and to wash the filters, is completed. It has been built of reinforced concrete throughout. Its plan section is a regular 12-sided polygon, 70 feet between opposite sides, and it is twelve and one-half feet deep.

Construction of the auxiliary pumping station, designated as No. 2, for pumping clear water to the wash water tank, is to begin shortly. Work has been begun on Ancon pump station; and at the principal pumping station, No. 1, on the edge of Miraflores Lake, east of Miraflores passenger station, for lifting water to the filtration plant, the building has been completed to the top of the walls, but operations have been suspended, pending the arrival of steel framing for the roof. The intake house, 100 feet out in the lake, has been completed, and all of the control valves to be installed in it are in place.

Organization for Train Operation, P. R. R.

The operation of trains on the Panama railroad will hereafter be under the direct management of the master of transportation, to whom will report the following: The chief dispatcher, controlling the dispatchers, operators, and station agents; the general yardmasters at Colon and Cristobal, and Panama and Balboa, with supervision over all crews; the general foremen of engine houses, having supervision over the local foremen of engine houses and their employees, and of locomotive men while at the terminals; all conductors, collectors, engineers, baggage masters, flagmen, brakemen, line switch tenders, and levermen at interlocking plants. The traveling engineer will act in an advisory capacity to the master of transportation and to the general foremen, and will have supervision of engine men while on the road. In order better to engage in this plan, the traveling engineer will shortly move his residence to Ancon from Empire, and his office from Empire to Balboa, or Panama.

Manufacture of Hollow Concrete Blocks.

The plant at Corozal for the manufacture of hollow concrete blocks, for use in the walls of buildings in the same manner as hollow terra cotta tile, is turning out about 2,300

finished blocks in every shift of eight hours. Three gold and 60 silver men are employed on the day shift, and two gold and 52 silver men on the night shift. The blocks are being shipped to Balboa for the permanent administration building and permanent quarters, and to Gatun for the construction of the new transformer substation. In an average day's run of eight hours, the plant consumes about 270 bags of cement, 15 cubic yards of sand, and 20 cubic yards of screenings, the three components being mixed in the proportions, 3:1½:6. The labor cost in the manufacture, under the present system, is less than the cost of materials; the total unit cost, including all the various items of administrative expense, labor, material, and plant arbitrary, averages about \$.068 per block. Up to the morning of February 22 approximately 295,365 blocks had been made.

Red Cross Finances.

The financial statement of the Canal Zone Chapter, American National Red Cross, for the month of January, 1914, follows:

RECEIPTS.	
January 1 On hand.....	\$3,791.29
23 Received account of Red Cross ball.....	2.00
31 Received during month account of sale of Christmas seals.....	522.11
31 Refund by commissary for unused ribbon.....	53.36
31 Interest credited at bank.....	18.18
31 Membership dues.....	8.00
	\$4,394.94
DISBURSEMENTS.	
January 2 Relief of aged destitute American, Colon Hospital.....	\$5.00
8 Relief of family of employee who died at Ancon Hospital.....	20.00
10 Deportation of Spaniard and family.....	33.90
21 Relief of family of employee who died in Ancon Hospital.....	15.00
21 Relief of employee ill at Ancon Hospital.....	3.00
21 Relief of destitute American family, Gatun.....	8.80
28 Expenses in connection with deportation of family of employee (above).....	20.00
30 Deportation of family from Chiriqui.....	40.00
30 Postage used by secretary in connection with Christmas seals and ballots.....	20.00
	165.70
January 31 Balance on hand.....	\$4,229.24

SOCIAL LIFE OF THE ZONE.

Formation of Woman's Club at Pedro Miguel.

The woman's meeting for the discussion of the formation of a club, which was held in the clubhouse at Pedro Miguel on Friday afternoon, February 20, brought together a number of Pedro Miguel women who were interested in the promotion of club life in the community. There were present a delegation from the Cristobal Woman's Club, including its president, Mrs. Thomas E. Brown, Jr., and a delegation from the Ancon Study Club. The meeting was opened with informal discussion as to the advisability of forming a club at once, or waiting until the permanent residents were settled in the village. The women decided unanimously in favor of the former, and Mrs. L. P. Evans was made provisional chairman. Informal discussion as to the meetings, programs, and other essential matters resulted in the appointment of a committee of four, delegated to draw up by-laws and present a tentative program to cover the ensuing three months period. The women will meet again on Friday afternoon, February 27, when the organization will be perfected. Refreshments were served by a committee of women volunteering for the purpose, and the session ended with a social hour.

Cristobal Woman's Club.

Book reviews formed the topic of the program at the meeting of the Cristobal Woman's Club on Wednesday afternoon, February 18, when the following recent works of fiction were discussed: "Laddie," by Gene Stratton Porter, reviewer, Mrs. Bradney; "Camp Fire Girls," a juvenile work, reviewer, Mrs. Waid; "T. Tembarom," Mrs. Frances Hodgson Burnett, reviewer, Mrs. Verner. Next month's program will deal with the political life of the United States. Judge Thomas E. Brown, Jr., will deliver an address at the meeting on March 4, on the Government of the United States; on March 18, the club will discuss political parties.

Federation for Christian Work.

Plans for the first convention of the Panama Federation of Societies of Women for Christian work, to be held at Empire on Friday afternoon, March 4, are about completed. The program will consist of two addresses, several musical numbers, short reports reviewing the work of each society, and a short business meeting. The Empire auxiliary will serve lunch on the arrival of the noon train, which will bring the delegates and representatives from Cristobal and Panama and intermediate points. There are nearly 200 women holding membership in the five societies federated, and it is expected that the attendance will be a representative one. Letters of congratulation have been received on the formation of the Federation. It is said to be the second federation of such societies to be organized, the first being in Providence, Rhode Island.

Empire and Ancon High Schools Consolidated.

Owing to the reduction in the enrollment of pupils in the Empire branch of the Canal Zone high school, the branch was transferred to Ancon at the beginning of the second semester, which was on Monday, February 23. The completion of some of the year's work and the beginning of new studies make the change desirable at this time. The pupils

will have more advantages at Ancon, the school being larger, better equipped and organized, special teachers for the different subjects making more effective work possible.

The Ancon high school hours are from 8.30 to 11.30 a. m., and from 1 to 2.30 p. m. The pupils will leave Las Cascadas at 7.16 a. m., Empire at 7.22, and Culebra at 7.28. They will be met at the station in Panama by the school brake and conveyed to the school. They will be chaperoned on the train and in the brake by Miss Hine, one of the high school faculty. They will have a luncheon period of one hour and a half, which time will be spent in the schoolhouse under the supervision of a teacher. The afternoon session will be dismissed at 2.30 o'clock, and the pupils will leave the Panama railroad station at 2.45, arriving at Culebra at 3.22, at Empire at 3.28, and at Las Cascadas at 3.34.

Notable Collection of Specimens.

As a result of the interest of Canal employees in the different species of animal life of the Isthmus of Panama, various collections of native animals, birds, fish, and butterflies have been made. One of the largest and most systematically arranged of these collections has been made by Mr. L. Becksted of Cristobal. The collection contains more than 1,500 species, mounted and arranged for exhibition. Among the specimens are the following: Large man eating shark captured off Colon, boa constrictor, armadillo, wild hog, porcupine fish, whip fish, flying fish, land and sea turtles, tarantulas, black panther, tapir, various specimens of monkeys, pelicans, ox-billed turtle, sloths, toucan bird, giant lizards, iguana, giant grasshoppers, some measuring 12 inches across the wings, and a large variety of moths, butterflies, and insects. The collection was exhibited at Watertown, N. Y., in the summer of 1913.

Kappa Sigma Fraternity.

All members of Kappa Sigma fraternity on the Isthmus are requested to communicate with E. G. Porter, Paraiso.

I. B. of S. S. and D. M.

A regular meeting of Local No. 19, International Brotherhood of Steamshovel and Dredge Men, will be held at Ancon Lodge hall on Sunday, March 1, at 1.30 p. m. All members are urgently requested to attend.

J. I. MAJOR,
Secretary-Treasurer.

ANCON, C. Z., February 18, 1914.

University of Illinois.

It is desired that all persons who have ever enrolled in the University of Illinois, whether recipients of degrees or not, communicate their names and addresses to the undersigned. If the names of others are known, they may be inserted on the same card.

JAMES ZETEK.

ANCON, C. Z., February 14, 1914.

Order of Isthmian Conductors.

A regular meeting of the Order of Isthmian Conductors will be held at Ancon lodge hall on Sunday, March 1, at 9.30 a. m.

GEORGE B. ALLEN, Secretary.

COROZAL, C. Z., February 24, 1914.

The National Surety Company, of New York, has withdrawn its agent from the Canal Zone and discontinued local business; and

of the officials formerly bonded by it, none remains in the Canal service at present. Authority has, accordingly, been given the Canal Zone Government to return to the company the \$10,000 security which it had deposited with the Government at the time it began business on the Canal Zone.

PERSONAL.

Mr. Edgar S. Garrison, district judge at Empire, resigned, effective Friday, February 20, and on Tuesday, February 24, he sailed on the Royal Mail Steam Packet Company's steamship *Trent* for Trinidad, where he goes to investigate some cocoa plantations. He was appointed a clerk in the Canal service on the Isthmus on August 8, 1905, and was assigned to the Department of Construction and Engineering. On February 1, 1906, he was transferred to the office of the prosecuting attorney in the old department of Government and Sanitation, and, effective December 1, 1907, he was appointed district judge at Empire.

Accidental Deaths.

Ernest M. Nessler, an American employed in the First Division, with residence at Pedro Miguel, was found dead in the transformer room at Pedro Miguel Lock on Thursday morning, February 19. He was last seen alive at about 4.30 p. m., on the previous day, when he went into the transformer room, telling a helper he would soon be back. The coroner's verdict was that he came to his death unavoidably, by means of an electric shock. He was 24 years of age, unmarried, and had been on the Isthmus five months. His father, Luis Nessler, resides at No. 1034 Tacoma avenue, Indianapolis, Ind.

Willard Deemer, the 15-year old son of Mr. and Mrs. J. A. Deemer, living at Gatun, was drowned at about 2.25 p. m., on Friday, February 20, while bathing in Gatun Lake at a point about 200 feet south of the concrete dock, and 40 feet out from the Panama railroad embankment. His body lodged on the bottom, but was recovered by a diving crew at 10 a. m., on the following day.

Obituary.

Mrs. Emma Hall, wife of Mr. Peter A. Hall, living at Empire, died on Sunday, February 22. She was born at Sheboygan, Wisconsin, 44 years ago, and had been on the Isthmus five years. Her husband and two daughters, one 12, and the other seven years of age, survive her. Her mother, a brother, and a sister, reside in Milwaukee. The funeral was held Tuesday forenoon, February 24, at Ancon.

Marvin, the 4-year old son of Mr. and Mrs. Marvin L. French, living at Ancon, died at Ancon Hospital on Thursday, February 12.

Metal Joints for Discharge Pipes of Dredges.

The trial of six ball and socket, flexible steel couplings, as a substitute for the rubber sleeves used for connections between lengths of discharge pipe from pipeline suction dredges, referred to in THE CANAL RECORD of October 29, 1913, has shown them so satisfactory that a requisition for 50 more of the couplings has been made. These couplings are used on the parts of the discharge pipe which are supported on pontoons, and subjected to considerable flexure; on land, the joints are made beneath steel bands and drawn tightly together with twisted wire, or by means of small wooden wedges.

COMMISSION CLUBHOUSES.

Activities of the Young Men's Christian Association.

GENERAL.

The schedule for moving pictures for the week March 2 to 7 is, as follows: Monday, Corozal; Tuesday, Pedro Miguel and Balboa; Wednesday, Empire; Thursday, Cristobal; Friday, Gatun; Saturday, Culebra.

BALBOA.

The all-Isthmian vaudeville company gave an entertainment in the hall on Friday evening, February 20. The attendance was the largest since the Balboa clubhouse was opened.

Twenty men have entered in the pool tournament that has just been started.

New material for the pool tables has arrived. All the tables will be put in good condition during the next few weeks.

COROZAL.

The following scores of 100, and over, were recorded in bowling for the week ending February 21: Davis, 107, 102, 111; Parkis, 107; King, 100, 109; Steele, 100, 105; McDonald, 104; Beall, 103; Seebt, 100; Sommer, 100.

Special moving pictures will be shown on Thursday evening, February 26, consisting of Ivanhoe in three reels and Tigris in four reels. The regular pictures are scheduled for Saturday, the 28th.

PEDRO MIGUEL.

The membership is steadily increasing, the number now reaching 133, thirteen of this number are boy members.

There are nearly 700 books in the general fiction library, and many more will soon be ordered from the United States. Members are asked to assist by suggesting the names of good books. Leave the title and author's name at the desk, so that it will be in the new order.

Fourteen people attended the first lesson in the Spanish class on Thursday evening, February 19. It was taught by Mr. Fred Renaud of Corozal. The next lesson will be on Thursday evening of the present week, and all desiring to learn Spanish are invited to join the class. The dues for the lessons are \$2 per month, payable in advance.

A class in first aid to the injured will be started about the first of the coming month, if enough members manifest an interest in the subject to make the class a success. The class will be under the leadership of Dr. Gibson and will be held once a week, from 7 to 8 p. m. Persons interested are requested to hand their names in at the desk and try to interest some one else to join also. This class will be free to all members.

Some interest has been manifested in the formation of a choral club. Those interested in singing are requested to let the secretary know of it, as a meeting will be held in the near future to organize such a club. This club will be for the men and ladies of Pedro Miguel and Paraiso, and will be under the direction of Mr. Frank Gill of Paraiso. All interested, are invited to join.

Any one interested in Sunday school work can help by volunteering to teach a class of boys or girls. About 50 children have already enrolled.

Several writing tables have been arranged in the reading room on the second floor for the use of the members of the clubhouse. Writing material can always be found on these tables.

The barber can be found in the barber shop on Tuesdays, Thursdays, and Saturdays. Prices are the same as at the other clubhouses.

The Culebra chess club played the Pedro Miguel club on Friday evening, February 20. Scores were, as follows:

Culebra.	W. L.	Pedro Miguel.	W. L.
Dubois, Wm.	1 .. 1	Shropshire, J. B.	1 .. 1
McClure, A. E.	1 .. 1	Wilson, L. D.	1 .. 1
Warner, J. F.	2 .. 0	Capwell, J. S.	0 .. 2
Totals.....	4 .. 2		2 .. 4

CULEBRA.

High scores in duckpins for the week are, as follows: Perkins, 111, 103; Case, 109, 108, 102, 100; Koperski, R., 103, 100; Start, 100, 106; Chadbourne, 115, 100, 100, 107, 108; Koperski, 106; Brown, 105, 108; Seeley, 101.

On Sunday evening, the life and character of Washington was discussed by Messrs. Warner, Higgins, and Weaver.

A handicap billiard tournament is being arranged. All interested are requested to hand their names to Mr. Cook, as the tournament will start in a few days.

GATUN.

A program has been arranged for the celebration of the fourth anniversary of the Gatun Y. M. C. A. On Wednesday evening, March 4, a "Smoker" will be held for men only, when a program of vaudeville numbers will be given. On Thursday evening, March 5, the formal exercises will be held, with Lieutenant-Colonel

Sibert presiding. There will be several musical numbers, and an address by a prominent speaker. A reception will follow, with refreshments, music, games, and a photographic exhibition. On Friday evening, March 6, there will be an evening of music and motion pictures. On Saturday night, March 7, there will be a gymnastic exhibition, followed by a basketball game, Empire versus Gatun. These entertainments are open, not only to the members of the association, but all of the people of Gatun and former residents, as well.

The glee club will meet on Friday evening, February 27.

Two hundred and twenty-five people attended the performance of magic and contortion given by Arenilla, the Mexican boy, on Thursday, February 19.

The all Isthmian vaudeville company appeared at the clubhouse on Thursday evening, February 26.

CRISTOBAL.

Sixteen entries have been received in the handball tournament in the young men's class. Following are the results of games played during the week of February 16: Wehmeier and Hagan won two games out of three from Kaunitz and Wechsler; scores, 21-17, 21-13, 10-21. Barcroft and W. Fraser won two games out of three from Kaunitz; scores, 21-15, 18-21, 21-20. Hughes and Farrell won two straight games from Winters and Cousineau; scores, 21-18, 21-20. Wehmeier and Hagan won two games out of three from A. Fraser and Nash; scores, 21-15, 21-8, 10-21.

The "Secret seven" defeated "House 83" in an indoor baseball game on Monday evening, February 16, by the score of 21 to 18.

A handball tournament in the boys' gymnasium class will be started on Saturday, February 28.

The men's gymnasium class, which was started a few weeks ago, is meeting with success. About 18 men are now enrolled. This class is intended for men of mature years who do not care for the more strenuous calisthenic exercises.

Mr. Edward Schildhauer gave an address before the discussion club on Thursday night, February 19. He explained the manner of operating the gates, the emergency dam, the towing locomotives, the chain fenders, the various valves etc. Judge Frank Feuille will speak before the discussion club, on Thursday, March 5 on "Some differences between American and Spanish jurisprudence."

Three hundred and twenty attended the all-Isthmian vaudeville entertainment on Wednesday, February 18. This is the largest attendance this season at any entertainment, at the local clubhouse, at similar prices.

Mr. William J. Price, American Minister to Panama, will address the monthly Sunday afternoon meeting, on March 8. Subject, "This one thing." Mr. Max Thompson, manager of the Hotel Washington will sing. Other musical numbers will be provided.

Married.

BARTLETT-WHISTON—At St. Luke's Episcopal Church, Ancon, on February 14, Miss Minnie Bailey Whiston of Philadelphia, Pa., to Emir C. Bartlett of

St. Louis, Mo., the Rev. Mr. Carson officiating. Canal Zone residence, Pedro Miguel.

FEY-TRAUTMAN—On Monday afternoon, February 16, at Gulfport, Miss., Miss Anna Dora Trautman of Long Beach, Miss., to Mr. William L. Fey of Savannah, Ga. Canal Zone residence, Pedro Miguel.

CLARDY-HENKEN—In Ancon chapel, February 21, 1914, Miss Alice Henken of Mobile, Ala., to Mr. Albert Basil Clardy of Anniston, Ala., the Rev. Harry Compton officiating. Canal Zone residence, Empire.

Misdirected Letters.

DISTRIBUTION OF RAINFALL, CANAL ZONE, CALENDAR YEAR 1913.

OFFICIAL CIRCULARS.

Accounting for Material and Supplies.

CIRCULAR No. 54, REVISED:

In order to carry out the provisions of Chairman's Circular No. 520, the following details of procedure, to govern the accounting for the material and supplies, are given for the information of all concerned:

1. Material ordered by a division on regular requisitions and not on foremen's orders will be invoiced by the storekeeper. One copy of each invoice will be sent to the Examiner of Accounts as issued and a sufficient number sent to the division for its record and accomplishment. The division receiving the material will accomplish the original of each invoice, note on one copy the proper costkeeping account number, and forward both the original and copy to the Examiner of Accounts.

2. Material ordered on foreman's order, which for any reason cannot be charged to the department or division from that foreman's order, will be invoiced. This applies to any case where the order can be filled immediately in part only and the order is not retained until complete delivery is made, or where material is ordered which must be delivered in nonexpendable containers, etc.

3. The Examiner of Accounts will transmit priced and totaled copies of foremen's orders, shipment tickets, inspection calls, and invoices, accompanied by adding machine lists, to division costkeeping accountants, or to the costkeeping accountant of the Chairman's office, as desired.

4. The accomplishment of invoices covering transfers of stock between storehouses will not be necessary, but any exceptions as to quantity, weight, or unit price must be reported to the invoicing store and adjusted, and any changes reported to the Examiner of Accounts. Storekeepers will be charged with the value of material as invoiced unless exceptions are taken and reported to the Examiner of Accounts within five days from date of invoice.

5. When serviceable material is returned to stores, invoice showing the costkeeping account number will be prepared to cover, one copy being sent immediately to the Examiner of Accounts. The storekeeper will insert the prices and class numbers on the original and one copy of the invoice, and forward same to the Examiner of Accounts, who, after making extensions, will forward the copy to the proper costkeeping accountant. (See Paragraph 8 for nonexpendable property).

6. Second-hand material, tools, and equipment returned to stock for repair and reissue will be invoiced without charge by the division returning same. The cost of repairs will be charged against the division returning the material, etc., if it can be located. If the division cannot be located, the charge for repairs will be made against the Chairman's office and prorated to divisions. The division making the repairs will invoice the material, etc., without prices, to the receiving store as soon as the repairs are completed and articles delivered, sending one copy of the invoice immediately to the Examiner of Accounts. The storekeeper will insert prices and class numbers and send the original and one copy to the Examiner of Accounts, who will send the copy to the proper costkeeping accountant for credit to division accounts. This is not intended to cover cases where articles are turned in on survey requests.

7. For use in ordering nonexpendable property only, a revised form of foreman's order (Form X-234) is being printed and will be placed in stock at Mount Hope depot. Divisions and departments should secure a supply of these forms as soon as possible. The quadruplicate copy of the foreman's order will be sent by the issuing storekeeper direct to the official for whose account the property is drawn, to be used as a debit voucher to his property return. Deliveries on this form will not be covered by invoice, but storekeepers will invoice all nonexpendable property issued on regular requisitions.

8. When nonexpendable property is returned to stores it shall be invoiced, one copy of the invoice being sent immediately to the Examiner of Accounts. The storekeeper will insert prices and class numbers, and send the original and one copy to the Examiner of Accounts, one accomplished copy being returned to the division to support the invoicing official's property return. The Examiner of Accounts will make extensions and send one copy to the proper costkeeping accountant for credit to division accounts.

9. When nonexpendable property is transferred from one division to another, the procedure at present in force will be followed, and copies of accomplished invoices will be attached to all returns until otherwise provided.

10. Issuing storekeepers shall make financial and physical charge for oil drums, cement sacks, and other containers at a price which will be determined by the Chief Quartermaster. The division returning such con-

tainers or cement sacks to stores will invoice them in the manner provided for other property which is returned to stores. Divisions will take up on invoices all containers and cement sacks on hand January 1, 1914, and send original and one copy of invoice to the Examiner of Accounts. Charges have been made against divisions for all containers delivered during January. Divisions must send to the Examiner of Accounts two copies of invoices covering containers returned to stores and invoices for January for physical accounting only.

11. All scrap material and equipment will be taken up by the store at a price to be fixed by the Chief Quartermaster, and the original and one copy of invoice forwarded to the Examiner of Accounts. When material is sold, credit will be given storehouse and proper adjustment made. Scrap transferred from one division, or from one storehouse to another, will be invoiced at a price to be fixed by the Chief Quartermaster and invoices disposed of as provided for other material.

12. All foremen's orders or other receipts for stock material and supplies issued to contractors, other departments of the United States Government, or to other individuals and companies, against whom bills for such material and supplies are to be rendered, will be forwarded in duplicate, immediately upon issue, to the Examiner of Accounts, who will prepare the bills.

13. Material transferred between departments, or from one division of the Department of Construction and Engineering to another, shall be invoiced, one copy of the invoice being sent immediately to the Examiner of Accounts. The invoicing official will insert prices, costkeeping account number if credit is to be given to cost accounts, forward to the receiving official, who will accomplish, indicating the costkeeping account numbers to be charged, and forward the original and two copies to the Examiner of Accounts. One copy will be forwarded by the Examiner of Accounts to the costkeeping accountant of the invoicing division for credit, and one copy to the costkeeping accountant of the receiving division for debit.

14. Material covered by inspection call will not be invoiced. One copy for each inspection call will be sent to the Examiner of Accounts as issued, and a sufficient number to the receiving store or division for record and accomplishment. The official receiving the material will accomplish the original and one copy (the division will note on the copy the proper costkeeping account number; the store will note the class number) and return both to the Chief Quartermaster for transmittal to the Depot Quartermaster for certification of the dealer's bill. The copy of the inspection call, when received by the Examiner of Accounts with the certified bill, will be detached and transmitted to the proper costkeeping accountant for charge. Nonexpendable property covered by inspection call will be invoiced by the Depot Quartermaster for physical accountability only.

15. The rendition of bills for repair work performed by the Mechanical Division for outside parties must be expedited. To accomplish this, the following procedure will govern the issue of material on foremen's orders for outside work, effective February 16, 1914. The Mechanical Division will stamp, or, until rubber stamp is received, write clearly on each copy of foremen's orders or material for job orders for outside parties: "Special—work for I. and C." The issuing store will handle "Special" by pricing and extending both originals and duplicates and returning duplicates direct to the Mechanical Division not later than the day following the issue, sending originals, with adding machine tape, to the Examiner of Accounts, who will charge the Mechanical Division.

16. Include in one invoice material of one class only, unless impracticable in any case.

H. A. A. SMITH,
Examiner of Accounts.

Cows for Sale.

ANCON HOSPITAL,
ANCON, C. Z., February 10, 1913.

For sale at the Ancon Hospital dairy, four cows suitable for butchering. May be seen at the dairy any afternoon from 3 to 5 o'clock, and can be sold at private sale.

CHAS. F. MASON,
Superintendent.

Reduced Rates to Employees on United Fruit Company's Steamships to New Orleans and New York.

UNITED FRUIT COMPANY,
COLON R. P., February 11, 1914.

Effective at once, arrangements have been made to honor Isthmian Canal Commission and Panama Railroad Company reduced rate requests at rate of \$40 from Colon to New Orleans, and \$56.25 from Colon to New York.

Employees holding such requests will be assigned to minimum priced rooms, and in the event that same are not available, they will be assigned to berths in higher

priced rooms without additional charge. This, of course, does not apply to rooms with private baths, or suites, for which the usual additional charge will be made.

H. R. WILFORD,
General Agent.

Hotel Aspinwall, Taboga.

DEPARTMENT OF SANITATION,
OFFICE OF CHIEF SANITARY OFFICER,
ANCON, C. Z., February 6, 1914.

*Indicates reduction from last list.

**Indicates five cents allowed for return of bottle.

†Indicates advance on last list.

††Fowls weigh each, about, as follows: 3, 3½, 4, 4½, and 5 pounds. Prices are based accordingly; when size ordered is not in stock, next lightest weight is supplied and refund note sent for difference.

‡Sold only from commissaries, no orders taken for delivery.

\$Not less than half of a fresh ham or shoulder will be sold.

Supplies for the Canal.

The following steamers, with supplies for the Isthmian Canal Commission and Panama Railroad Company, arrived at the ports of Colon, Balboa, and Cristobal during the week ending February 14:

Caroline, February 7, from Seattle, with 550 pieces untreated Douglas fir piling, for Atlantic Division; 133,223 board feet, yellow pine lumber, for stock.

Cartago, February 9, from New Orleans, with 1,102 bales timothy hay, 3,000 kegs white lead, 40 boxes varnish, 167 bales cotton waste, 1,298 pieces cast iron water pipe, 19,135 board feet, yellow pine flooring, for stock.

Prinz August Wilhelm, February 9, from New York, with 44 cases water coolers, for stock.

Pleides, February 9, from San Francisco, with 15 bales rubber dredging sleeves, for Dredging Division; 64 bales rubber hose, for stock.

Zacapa, February 11, from New York, with 663 pieces structural steel, six cases electrical material, for Mechanical Division; 42 boxes number plates, 885 pieces structural steel, for First Division; 118 kegs nuts, bolts, and washers, 23 cases files, 1,576 pieces steel bars and beams, for stock.

Californian, February 12, from Liverpool, with 10 dredge buckets, for Dredging Division; 155 barrels crude carbolic acid, 20 pieces dipper teeth, for stock.

Carrillo, February 13, from Boston, with two cases sheaves and chains, for Mechanical Division; one box diving dress, for Dredging Division.

Advance, February 13, from New York, with 111 rolls mesh reinforcement, 31 cases woodwork, 137 bundles reinforcing steel, for permanent buildings; 28 cases battery renewals, two reels insulated cable, 146 pieces structural steel, for Panama Railroad Company; 159 bundles reinforcing steel, nine cases electrical machinery, for First Division; 32 cases steel doors, eight crates varnish, for Mechanical Division; 124 packages castings and brass goods, 90 crates roofing tile, for Division of Municipal Engineering; 97 pieces pipe and fittings, 25 packages pipe and fittings, 82 cases plumbing material, 70 cases varnish, 19 bales belting, 19 bundles picks, 60 cases toilet paper, 12 boxes copper tacks, 14 crates paint, 881 sacks oats, for stock; and a miscellaneous cargo, the whole consisting of 2,372 pieces, weighing 120 tons.

MOVEMENT OF OCEAN VESSELS.

The following is a list of sailings and scheduled arrivals of the Panama Railroad Steamship Line; of the Royal Mail Steam Packet Company; of the Hamburg-American Line, and of the United Fruit Company's Line:

*Will carry mail from the United States.
†Will carry mail to the United States.

†Will carry mail for Alabama, Arkansas, Louisiana, Mississippi, and Texas.

Panama Railroad Company's steamers sail from Pier 11, Cristobal, at 3 p. m.

Royal Mail steamers leave for New York on alternate Tuesdays at 2 p. m.; for Southampton, on alternate Tuesdays at 10 a. m.

United Fruit Company's ships for New Orleans direct, leave on Thursdays and Saturdays at 3 p. m.; ships for New York, via Kingston, on Thursdays at 2 p. m.; for New York, via Limon and Havana, on Sundays at 5 p. m.; for Limon and Bocas del Toro, on Tuesdays at 3 p. m.; for Bocas del Toro direct, on Mondays at 5 p. m.; and for Boston, on Sundays at 3 p. m.

Hamburg-American steamers sail for New York, via Kingston, Santiago de Cuba, and Fortune Island, on Tuesdays; the *Prinz August Wilhelm* and *Prinz Joachim* at 10 a. m.; the *Prinz Sigismund* and *Prinz Eitel Friedrich*, at 2 p. m.

Losr—Small, round class pin, on February 18, either in Panama, Ancon Hospital, or on Panama railroad train. The pin had initials "W. J. S. N., 1905" on one side, and "E" on the other. A reward is offered for its return to Mrs. Edith B. Kirkpatrick, Pedro Miguel.

The Canal Record

Published weekly under the authority and supervision of the Isthmian Canal Commission.

The Canal Record is published free of charge, one copy each to all employes of the Commission and Panama Railroad Company whose names are on the gold roll. Extra copies and back numbers can be obtained from the news stands of the Panama Railroad Company for five cents each.

Address all Communications,
THE CANAL RECORD,
Ancon, Canal Zone,
Isthmus of Panama.

No communication either for publication or requesting information, will receive attention unless signed with the full name and address of the writer.

NOTES OF PROGRESS.

The Situation at Cucaracha Slide.

Approximately one million cubic yards of material have been dredged from the base of Cucaracha slide since the dredges began operations there, on October 26, 1913. The channel past it has now a minimum width of about 190 feet, with minimum draft of 20 feet, at the present level of Gatun Lake, but the removal of large quantities of spoil has resulted in a marked lowering of the masses of material beyond and above, which have heretofore kept thrusting rock and earth forward almost as rapidly as material in the channel was taken out.

A summary of excavation by the dredges at the slide, by months, follows: October (five days), 3,805 cubic yards; November, 68,979 cubic yards; December, 321,193 cubic yards; January, 291,574 cubic yards; February, 287,223 cubic yards; March (one day), 10,150 cubic yards; total, 982,924 cubic yards.

Pipeline suction dredges No. 4 and No. 82, the former excavating earth, and the latter pumping water for the monitors which have been sluicing material down from the south side, have been withdrawn temporarily for repairs at Paraiso. Pipeline suction dredge No. 86 is excavating near the south side of the slide and the dipper dredges Chagres, Cardenas, and Mindi are working near the north side and center, advancing toward the south.

Purchase of Asphalt Mixing Plant.

Award has been made to the Pittsburgh Amiesite Company of Pittsburgh, Pa., for an asphalt mixing plant for use in street work at the new Balboa townsite, and in the other permanent towns of the Canal Zone. The plant is similar to the one in use by the State of Pennsylvania, is to cost, complete, about \$4,650, and consists principally of a drum or furnace for heating 2-inch crusher run stone to between 275 and 375 degrees, Fahrenheit, and a mixer for mixing the stone with from

five to eight per cent of melted asphalt, the asphalt being heated in a separate receptacle. Roadmaking by the asphaltic concrete method is accomplished by first placing a 4 or 5-inch layer of No. 1 large broken stone, and after rolling, to spread on it a 2-inch layer of hot mixture, composed of asphalt, sand, and broken stone, prepared in the manner above referred to. Prompt shipment of the equipment has been requested, as it is desired to get this work well under way before the advent of the rainy season. Two hundred tons of asphalt were shipped to the Isthmus from San Francisco on the steamer *Luckenbach*, on February 14.

Payment of Accrued Leave.

The President has authorized payment of accrued leave at the rate of 3½ days for monthly, and 2½ days for hourly men, in the case of those employes who on March 31 shall have served less than six months for which no leave has been granted, where such employes are transferred to the new organization and accept employment therein, subject to such rules and regulations as the Chairman may prescribe.

Dredge "Corozal" to be Dry Docked.

The ladder dredge *Corozal*, which has been at work in Culebra Cut excavating in slides on the east and west banks at Culebra village, was locked down at Gatun on Tuesday forenoon, March 3, and will be dry docked at the Cristobal marine shops for repairs. Chief among these are the repairing of the bottom tumbler on the ladder; renewal of the 4-inch armor plate of the bottom hopper, which has been in service for one year and six months, and is badly worn, due to the handling of heavy rock; renewal of the wooden guards, which have become badly splintered; removal of the doors to the hopper, which will be left off on account of the spilling of material from the chute into the storage compartment, necessitating frequent stoppages to empty; installation of new gears and clutches in various parts of the machinery, and such other work, including cleaning and repainting of the hull, as may be necessary at this time. On account of the draft of the dredge, the dry dock will be taxed to about its capacity to accommodate the vessel. In order to have the repairs to the dredge completed as early as possible, the work will be carried forward day and night.

Colon Water Works.

The new water purification plant and electric pump station constructed at Mount Hope was placed in service on February 24, and is now furnishing filtered water to all points north.

Work on this plant was begun in the latter part of October, 1912, and was practically completed on the first of January, 1914. Owing to the delay in the receipt of certain electrical equipment it was not possible to

put the plant in service until the above date.

The raw water is delivered by gravity from Brazos Brook reservoir to the aeration chamber, through two 24-inch mains. During the dry season months, the Brazos Brook watershed furnishes only a small portion of the total amount of water required, and this shortage is made up out of the water from Gatun Lake, which flows under automatic control into the Brazos Brook reservoir through a 20-inch main laid in a tunnel driven through the ridge separating Gatun Lake from the reservoir.

Installation of Towing Locomotives.

No. 641, the first towing locomotive of the 40 on order, which arrived on the Isthmus on January 27, has been installed on the west side of the center wall at Gatun Locks, and, beginning with Monday, February 16, tests of the machine have been conducted each week day, consisting principally of operating it back and forth along the rack rail, including the inclines. A second machine, No. 643, has been received, and was unloaded at Gatun Locks last week. Under the schedule of deliveries, one locomotive was to have been received from the factory on January 15, and four are to be delivered on or about the 15th of each month thereafter until all deliveries have been effected. A schedule has been prepared by the First Division for the installation of the locomotives, as follows:

No. of Shipment.	Date.	Destination.	Locomotive Nos.
1.....	1-15-14	Gatun.....	641
2.....	2-15-14	Gatun.....	642 to 644
	2-15-14	Miraflores....	681
3.....	3-15-14	Pedro Miguel	666 to 669
4.....	4-15-14	Miraflores....	682 to 685
5.....	5-15-14	Gatun.....	645 to 648
6.....	6-15-14	Pedro Miguel	670 to 673
7.....	7-15-14	Miraflores....	686 to 689
8.....	8-15-14	Gatun.....	649 to 652
9.....	9-15-14	Miraflores....	690 to 693
10.....	10-15-14	Gatun.....	653 to 656
11.....	11-15-14	Miraflores....	694 to 696

The numbers were chosen in the 600 series in the general numbering system of all machines, float wells, transformer rooms, and other equipment.

New Gasoline Launches In Service.

The third of the three new motor launches for inspection service in the Dredging Division arrived from the United States on February 18. It was launched overboard from the vessel on which it was shipped, and raised to Gatun Lake on February 22. This launch has been named the *Pioneer*. It, and the *Patrol*, which is used by the superintendent of dredging at the Atlantic entrance, are 40 feet in length; the *Search*, used in Culebra Cut, is 45 feet long. All three are equipped with 6-cylinder motors, capable of developing from 45 to 65 horsepower, according to the speed at which they are driven. The *Search* and *Patrol* ordinarily attain a maximum speed

of 14 miles an hour; the *Pioneer* makes about 15 miles per hour.

The gasoline tug, or dock tender, for which award was made to Welin Marine Equipment Company, builder of the three inspection launches, last October, arrived at Colon on February 7, was transferred to Balboa on a flat car, and was launched on February 23. This vessel is 40 feet long, 10 feet wide, and has a draft of three feet. It is equipped with a 4-cylinder heavy duty motor, developing between 45 and 50 horsepower, and will be used for light towing service in Balboa harbor.

Installation of Chain Fender Machines.

The installation of the chain fender machines at the locks of the Canal has been delayed by the nonarrival of the material from the contractor. Complete delivery of the first group of four machines was due on September 5, 1913. The first shipment arrived September 28; complete delivery was not effected until December 17, for the machines of this group at Gatun Locks, and January 7, 1914, for those to be installed at Pedro Miguel. Delivery of all material for the 24 machines is now about 20 per cent complete.

Machines No. 814 and 815, for the fender chain to guard the west upper approach at Gatun, and Nos. 820, 821, 822, and 823, for the two chains of the upper approaches at Pedro Miguel, are almost completely installed. The girders and struts, eye-bars and yokes, the main upper and lower cylinders, with caps, the upper and lower sheaves, the hawse pipe sheaves, bearings, intermediate upper and lower cylinders, with caps, the plungers, crossheads, glands, and liners for these machines are in place, but the piping for machines Nos. 820 and 823 only has arrived. The plungers for all the machines at Gatun, the plunger bases for all at Gatun and Pedro Miguel, and for one pair at Miraflores Locks, have arrived. Various small parts for the machines at Miraflores are at hand.

A part of the chains for the fenders are being manufactured at the Boston Navy Yard. They are made from 3-inch diameter iron; the links are 17 inches long by 10½ inches wide. Twenty-four chains are required of an average length of 427 feet, weighing 85 pounds to the foot. The first chain is practically completed, and shipment is expected at an early date.

A description of the chain fender operating devices was published in THE CANAL RECORD of October 4, 1911.

Charge for Boats Using Gatun Dock.

Effective Sunday, March 1, all small vessels, except those of the United States Government and the Panama railroad, mooring at the boat landing at Gatun, will be required to obtain a permit from the station agent, for which a charge will be made of 50 cents, U. S. currency, per day, or fraction thereof.

Warning Against Eating Native Oysters.

It has been determined that the origin of several cases of typhoid fever, now under treatment at Ancon Hospital, and in Panama, is directly traceable to the native oysters sold in the city of Panama. Examination of these oysters at the Ancon Hospital laboratory has shown them to be badly contaminated with sewage matter, the shells as well as the meat. A notice has been issued by the Health Officer of Panama warning all persons from partaking

of these oysters, as they are dangerous to the public health.

The captain of the port of Panama, Mr. Carlos de Diego, on February 27, issued instructions prohibiting the placing of oysters in that part of the bay of Panama lying between Punta Paitilla and the island group to the west, called Las Tres Hermanas.

Progress on Empire-Gamboa Highway.

About 31 per cent of the new Empire-Gamboa road has been completed, under the direction of the Division of Municipal Engineering, or as far south as Obispo Junction. Municipal prisoners are now at work subgrading west of the Panama railroad, from the valley of the Sardinilla River to the intersection of the highway with the Las Cascadas plantation road, leaving a gap of about 1,500 feet between the two points, where no work has been done. It was only recently that a decision was arrived at in regard to the crossing of the Panama railroad main line, which is included in the gap above referred to. The original plan provided for a grade crossing, but in June of last year, it was decided to install a concrete-lined tunnel beneath the track, thereby eliminating all danger from train accidents. In view of the extra cost this tunnel would entail, and the fact that the Panama railroad has agreed to establish and maintain suitable automatic protective devices to safeguard traffic over the crossing, it has been decided to revert to the original plan and make it at grade. The new road when completed, will furnish connection, via the suspension bridge, with Empire and other towns on the west bank of the Canal, and with Panama by way of the Canal Zone highway through Pedro Miguel and Corozal.

Panama Railroad Watchman Service.

The watchman service of the Panama railroad was reorganized, effective March 1, according to the following general provisions: The position of chief inspector was abolished, and the watchmen were placed under the immediate orders of the company's representatives at the various points. Those at the Panama freight station and in the Panama yard are in charge of the local agent at Panama. The watchmen at the company's piers in Colon have been placed under the receiving and forwarding agent for that port; the guarding of the docks in Cristobal is in charge of the Division of Police and Prisons. This division also took over the patrol of the wharves at Balboa and, as it did several months ago while in temporary charge, assigned to this work nine colored policemen. This provided continuously a gate-man and a patrolman on the steel pier and annex, and a patrolman on the new concrete wharf.

Extension of E Street, Panama.

An extension of West E street, lying in the Santa Ana district of the city of Panama, has recently been authorized and will be begun shortly by forces of the Division of Municipal Engineering. This involves building a macadam street, with the necessary curb and gutters, 16 feet wide, a distance of 324 feet, connecting Sixteenth and Seventeenth streets. A 4-inch water line and a 6-inch sewer pipe will be laid, and the total cost of the work is estimated at approximately \$2,300.

ORDINANCE.

[Amending Section 8 of Ordinance No. 24, "Providing for the Licensing of Chauffeurs for Automobiles."]

Be it enacted by the Isthmian Canal Commission, that Section 8 of the ordinance adopted by the Isthmian Canal Commission at its 160th meeting held on April 15, 1911, and approved by the Secretary of War on April 26, 1911, providing for the licensing of chauffeurs for automobiles, be, and the same hereby is, amended to read, as follows:

"The Head of the Department of Civil Administration is authorized to revoke for cause any license issued under the authority of this ordinance."

Enacted by the Isthmian Canal Commission, February 3, 1914.

Approved by the Secretary of War, February 14, 1914.

Procedure in Case of Fire.

In order that residents of the Canal Zone may acquaint themselves with the location of the fire alarm box closest to their residence, or to their place of employment, so that no time will be lost in submitting an alarm of fire, the following information is published:

If no alarm box is convenient, the nearest telephone should be used to notify the fire station. The location of fire alarm boxes may be learned from the notices posted in each town. If this source of information is not available, an inquiry of the district fire station will elicit all necessary information as to the location of fire boxes.

Fire alarm boxes are installed at Balboa, Ancon, Corozal, Culebra, Empire, Gatun, and Cristobal in the Canal Zone, and near property of the United States in the cities of Panama and Colon.

No alarm boxes are installed at Pedro Miguel, Paraiso, Las Cascadas, and the smaller settlements in the Zone. Alarms from these places should be sent in by telephone.

To send in an alarm from a *street fire alarm box*, break the small glass in the front of the box in order to secure the key; turn the key to the *right* and open the door; then grasp the small hook near the center of the box, pull it down *once*, and release it. By listening intently at the box, one can hear the alarm sounding.

To send in an alarm from one of the *small auxiliary fire alarm boxes* installed in the Tivoli Hotel, in the commissary at Cristobal, on the docks at Colon, and in several other buildings, break the glass, pull the small hook down, and *hold it down about five seconds*.

After sending in an alarm, remain at the fire box and inform the firemen of the location of the fire.

Appointment of Notary at Corozal.

Upon the suggestion of the surveying officer that Corozal should be provided with some one authorized to perform the functions of a notary, Mr. Geo. E. LeMire, the postmaster there, has been appointed a notary public in and for the First Judicial Circuit of the Canal Zone for the term of three years from February 11, 1914.

On account of the desire of an increasing number of persons to visit the site of operations at Caño saddle, at which the rim of Gatun Lake is being raised by means of an embankment of borrowed spoil, it has been decided that in the future the launch *Balboa*, plying between Gatun and the saddle, with supplies for the work, will carry no passengers except those whose duties require them to be carried.

SOCIAL LIFE OF THE ZONE.

Woman's Work.

Two coming events of interest to American women in Panama and the Canal Zone are the first convention of the Panama federation of societies of women for Christian work, which is to be held in Empire on Friday afternoon, March 6; and the forming of the Panama auxiliary to the woman's board of the Panama-Pacific International Exposition, as outlined in THE CANAL RECORD of February 11. These two events are expected to call forth a large attendance of the women interested in public work and the forward movements of the day.

A program of interest has been prepared for the federation convention. Societies are requested to send as many of their members as possible.

Church Notes.

The newly completed Roman Catholic church building in Corozal was opened on Sunday morning, February 22. The hour for mass has been fixed at 8 a. m., in order to allow church members in the neighboring villages, where there are no churches, time to attend. Masses are said in the church of St. Mary, Star of the Sea, at Balboa, on Sundays at 9 a. m., at Corozal at 8 a. m., at St. Rita's, Gatun, at 8 a. m.; at New Gatun at 10 a. m., and at Cristobal at 7 and 9.30 a. m.

Salvation Army Notes.

Colonel Rothwell, the chief officer of the Salvation Army in the West Indies and Panama, will be a visitor to the Isthmus this month. In connection with his visit, arrangements have been made for him to deliver two lectures on the life and works of the late General Booth, founder and commanding officer of the Salvation Army. The first lecture will be held in the Wesleyan church, in Panama city, on Monday evening, March 9, at 8 o'clock. Seats will be reserved for visitors for this occasion and the public is invited to attend. Judge H. A. Gudger will preside. The second lecture will be delivered at the Commission clubhouse, in Cristobal, on Wednesday evening, March 11.

During the present month, the members of the Salvation Army on the Isthmus are making their annual self-denial collections. Moneys raised by freewill offerings are devoted to the army's missionary and social work.

Visit of Bishop Knight Postponed.

The visit of Bishop Knight of the Episcopal church, who was expected to arrive on the Isthmus in February, has been postponed until July of this year. Bishop Knight will probably be accompanied by the Rt. Rev. Arthur S. Lloyd, D. D., president of the board of missions of the Episcopal church.

Installation of Officers by Rebekahs.

At the meeting of the Isthmian Canal Rebekah Lodge, Empire, No. 1, I. O. O. F., held in the lodge hall at Empire on Saturday evening, February 24, the following officers were installed: Noble grand, Ida Johnson; vice-grand, Grace Jarvis; recording secretary, Annie Calvit; financial secretary, Jeanette Martin; treasurer, Marie Vickery; chaplain, Marion Beetham, right supporter of the noble grand, Mary McCann; left supporter of the noble grand, Henry Lotz; right supporter of the vice-grand, Molly Perry; left

supporter of the vice-grand, J. W. Jarvis; conductor, Luna King; warden, Charles Hopkins; inside guardian, Louis Perry; outside guardian, Richard Stoddard; past noble grand Clara Rhodes. The installing officer was Deputy Grand Sire B. F. Sisson of Gatun.

Library for St. Luke's Hospital Chapel.

The Sunday school of St. Luke's Hospital chapel has received a collection of books from the traveling library of the Isthmian Sunday School Association for the use of its scholars. The books have been placed in the choir room of the chapel, and will be distributed to those entitled to the use of the library, on Wednesday afternoons, at 4.30 o'clock. The chaplain of St. Luke's church will be in charge of this extension work, with Mrs. Edward L. Luce assisting. Books will be available to members of the Sunday school only, as the supply is limited.

Seventh Day Adventists.

The Seventh Day Adventist Conference for Panama and the Canal Zone is building a small church for the accommodation of its congregation in New Gatun. The structure is a frame building capable of seating about 50 persons. The Seventh Day Adventists have churches in Panama, Empire, New Gatun, Mount Hope, and at Cristobal, the headquarters of the organization. The building now occupied by the superintendent of the Conference was erected to take the place of the one destroyed by fire on March 23, 1911. The building contains apartments for the superintendent and his family, and the secretary of the conference, on the second floor, and the church and offices on the ground floor. Supplies are furnished at the office prepared in conformity with the tenets of the church. These include the sale of canned goods put up at the sanitarium operated by the Seventh Day Adventists in Tennessee. Books and periodicals of the conference are sold at headquarters. The printing plant, which was formerly located in the building in Colon, has been removed to Jamaica. The Conference church has been established in Panama and the Canal Zone since 1907. There are about 250 adherents.

PERSONAL.

Brigadier-General C. A. Devol, former Chief Quartermaster of the Isthmian Canal Commission, arrived on the Isthmus on March 1, accompanied by Mrs. Devol. His visit is in conformance with Special Orders No. 19 of the Chief of Staff, directing General Devol, Capt. Pegram Whitworth of the Tenth Infantry, and Capt. R. E. Wood, present Chief Quartermaster, to constitute a board to report on the surplus furniture in possession of the Canal Commission.

Representative J. Henry Goeke of the Fourth Congressional District, Wapakoneta, Ohio, a member of the House Committee on Interstate and Foreign Commerce, accompanied by his family, arrived on the *Cristobal*, which docked on Sunday, March 1.

Dr. W. E. Deeks, chief of medical clinic at Ancon Hospital, has resigned, effective at the close of business on February 28. He was appointed to the position on August 17, 1906, and arrived on the Isthmus on August 24. He was born at Morrisburg, province of Ontario, Dominion of Canada, about 48 years ago, and obtained his earlier education at the

Morrisburg schools, and the Kingston Collegiate Institute. He then entered McGill University at Montreal, and after receiving the degree of B. A. in 1889, he took up the study of medicine in that institution, was graduated with the degree of M. D. C. M., in 1893, and won the master's degree in 1896. On leaving McGill University, he studied for a time in Europe, and later became an instructor in anatomy and lecturer in zoology in McGill University. Later, he went to New York City, where he was lecturer in electrotherapeutics, X-ray work, and internal medicine at the New York Post Graduate Medical School. Besides his work as chief of medical clinic at Ancon Hospital, he has written several articles on various medical conditions on the Isthmus, among them being publications on pneumonia, gastric ulcer, pellagra, infant feeding, the carbohydrate diathesis, 6-day fever, malaria, amebic dysentery, and, with Dr. W. M. James, a monograph on hemoglobinuric fever. He sailed on March 1 for a short visit to Costa Rica, after which he expects to spend some time in travel and research work.

Knights of Columbus.

Permission has been granted by the Supreme Master of the Fourth Degree, of the Knights of Columbus, Mr. John H. Reddin, to exemplify the fourth degree in Cristobal, on March 29. A degree team from New Orleans will officiate. On the same date, the honors of the third degree will be given to a large class. As soon as arrangements have been completed the entire membership will be notified through council secretaries.

Results in Tennis Tournament.

Following are the results of the all comers' singles tournament in tennis, held at Ancon on February 22-23:

Preliminaries—Bartholomew defeated Stewart, 4-6; 6-4; 6-4. Earhart defeated Crenshaw, 7-5; 6-4. Wells defeated Pearman, 3-6; 6-3; 6-4. Runyan defeated Shropshire, 6-2; 6-0. Ohlson defeated Poltrino, 6-3; 6-3. Weckler defeated Cross, 6-4; 6-3.

Second round—Nevius defeated Kalar, 6-0; 6-0. Poole defeated Swartz, 8-6; 6-4. Fechtig defeated Bartholomew, 5-3; 6-2. Wells defeated Earhart, 6-3; 4-6; 6-4. Runyan defeated Ohlson, 6-1; 6-4. Weckler defeated Edwards, 6-0; 6-4. Drennan defeated Fessler, 6-2; 5-7; 6-4. Neely defeated Erbe, 6-1; 6-0.

Third round—Nevius defeated Poole, 6-3; 6-3. Fechtig defeated Wells, 3-6; 6-2; 6-1. Runyan defeated Weckler, 6-2; 2-6; 6-1. Neely defeated Drennan, 6-4; 6-3.

Semifinals—Nevius defeated Fechtig, 2-6; 7-5; 6-4. Neely defeated Runyan, 6-2; 10-8.

Finals—Nevius defeated Neely, 8-6; 6-2.

The Commission photographer has prepared and mailed to the New York State Education Department 12 negatives for lantern slides, showing recent conditions on the Canal, principally at Gold Hill and Cucaracha slide, Pedro Miguel Lock, and Gatun Dam. These are to supplement a collection of about 80 slides of Isthmian views which the department has been circulating for exhibition at various schools.

TRANSMISSION LINE WORK.

Foundations for Track-Span Bridges Installed Between Mount Hope and Diablo.

Foundations for the track-span bridges of the high tension transmission line have been installed between Mount Hope and Diablo, and their installation is now advancing south of Diablo, along the right-of-way of what will be made the permanent main line of the Panama railroad, running into Balboa. About 20 foundations are yet to be placed. At Corozal, their placing required the moving of two crossovers, the shifting of the spur leading to the commissary building, and throwing the temporary track south of Corozal, known as the sand line, to the west, placing it on a center of 19 feet six inches from the southbound main of the Panama railroad. At Gamboa bridge, across the Chagres River, the placing of foundations is delayed by the work of erecting brackets, which are also to support the highway and foot bridge being erected by the Panama railroad on the east side of the bridge. Two foundations, caught in small local slides near Radio Station, are being reset.

The erection of the track-span bridges is following closely the completion of foundations. The bridges are in place between Mindi and Pedro Miguel, with the exception of seven at Gamboa bridge, five at Frijoles, and two or three others which cannot be erected at present on account of some local interference.

The one ground-wire and three power wires which are suspended on each side of the track, have been strung between Radio Station and Pedro Miguel, with the exception of the gap at the Chagres River. The insulators are placed at about the same time the bridges are erected.

The steel work for the transformer substation at Gatun has been completed and erection of the walls of hollow concrete block has begun. The steel work at the Miraflores substation is practically completed. Filling for the site of the substation at Cristobal, east of Camp Bierd and opposite the proposed Atlantic entrance coaling plant, is in progress, and the Panama railroad is making preparations for driving the piles to support the building. Bed rock beneath this area lies from 35 to 45 feet below sealevel, and the station will be supported on about 600 timber piles. Part of the foundation steel has been delivered at the site, in readiness for the beginning of building operations.

Oiling of Streets and Roads.

The oiling of streets and roads in the Canal Zone, and in Panama, has been considerably extended in scope during the present dry season. The efforts in this direction during the past two seasons have been, in a measure, experimental; the results were such as to encourage the continuance of the practice and to enlarge the field. The coating of oil applied during the dry season is worn off to some extent by the heavy rains of the wet period, but it has been demonstrated that a fresh coat can be applied at less expense than the first one.

All of the macadamized streets in Panama are being oiled for the first time by forces of the southern district of the Division of Municipal Engineering, thus doing away with the necessity for street sprinkling. It is estimated that the cost of sprinkling the macadamized streets in Panama is about one and one-half cents a

square yard a week, while the cost of applying the coat of oil is estimated at about two cents a square yard. The effect of the water sprinkled on the streets is lost within two or three hours after the sprinkler has passed, while one coat of oil will, it is believed, suffice to prevent most of the dust until the advent of the rainy season, in addition to providing a foundation for next year's treatment. About half a gallon of crude oil is used to the square yard of street surface. The method followed is to make, first, necessary surface repairs to the macadam and roll thoroughly, then to sweep the street free of loose dirt, next to apply the coat of oil, and lastly, to spread over the oiled surface a light coat of sand. Two wagons are employed by the Division of Municipal Engineering in this work, each carrying two 50-gallon tanks, pipe-connected. On Friday, February 27, over 11,000 linear feet of street and road surface were oiled during the working day of nine hours.

Oiling already accomplished in the southern district comprises the new wagon road to Corozal, the boundary road between Ancon post-office and the old Balboa road; the driveways in Ancon; the macadamized streets in the districts of Guachapali and Maraion in Panama city, Avenue B, some of the side streets east of Central avenue, and the streets in the vicinity of Santo Tomas Hospital, and in the Chorrillo district. The Calidonia and Las Sabanas roads will be treated also, the latter probably as far as the Canal Zone police station.

Passenger Station for New Town of Balboa.

The Quartermaster's Department has begun the preparation of plans for a new passenger station of the Panama railroad, to be erected in the permanent residential and administrative town of Balboa. The construction of the building will be performed by the subdivision of building construction of the Quartermaster's Department. The station will be situated on the west side of the town, near and south of the toe of Ancon Hill on which the permanent administration building has been erected.

Drowning of a Policeman.

First-class Policeman Erno Story of the Canal Zone Police Department was drowned while swimming in Miraflores Lake, at the south end of Pedro Miguel Lock, Tuesday forenoon, March 2. His plight was first noticed by a negro employe, who called the attention of George H. Schutt, an American electrician employed at the lock, to it. Both went to Story's assistance, and after diving three times, Schutt found the body in an upright position with the feet resting on the bottom. It was taken to Pedro Miguel dispensary, and although there were some signs of life at first, all efforts at resuscitation proved unavailing. It is estimated that he was under water from six to eight minutes. Story was appointed to the police service on October 5, 1912. He was born at Little Cypress, Ky., was about 25 years of age, and

unmarried. His father, John A. Story, lives at Calvert City, Ky., and a cousin, Mrs. Dennis F. Reeder, resides at Ancon.

Red Cross Finances.

The financial statement of the Canal Zone Chapter, American National Red Cross, for the month of February, follows:

RECEIPTS.

February 1 On hand.....	\$4,229.24
17 Collection by Disbursing Officer account of Red Cross ball	2.00
17 From sale of Christmas seals.....	29.82
17 Donation by employees of First Division.....	31.64
18 Collections by Panama railroad account of Red Cross ball.....	174.00
18 Refund of money advanced employe.....	2.00
18 Interest for October	4.80
27 Membership dues.....	37.65
28 Interest, January	7.17
28 Refund, account of error.....	3.00
	\$4,521.32

DISBURSEMENTS.

February 2 Deportation of American woman.....	\$85.00
16 Disbursing Officer, printing	3.03

February 28 Balance on hand..... \$4,395.29

JOHN L. PHILLIPS,
Treasurer.

Approved:
EDW. SCHILDHAUER,
Chairman.

Change in New Orleans Steamship Connections.

Beginning with the sailing on March 4, vessels of the United Fruit Company sailing from New Orleans on Wednesdays will call at Havana on the way to Colon. Instead of arriving on Monday, as heretofore, they will arrive on Wednesday. They will sail on the day after, Thursday, via Port Limon and Bocas del Toro, for New Orleans, arriving in that port on the following Thursday. They will not regularly carry mail between the United States and the Canal Zone, either way, and the \$40 rate allowed to employees of the Isthmian Canal Commission and Panama railroad from New Orleans will not apply to this trip; it will remain valid on the sailings from New Orleans, for Colon direct, on Saturdays.

The schedule of vessels sailing from New Orleans on Saturdays will not be changed; they will arrive at Colon on the following Thursday, make a side trip to Bocas del Toro and back, and sail for New Orleans direct on Thursday, a week after their arrival at Colon from New Orleans. These vessels will continue to carry United States mail on both outward and homeward voyages.

Trips of the "Louise" to Taboga Island.

The steam launch *Louise* leaves the landing at Balboa for Taboga Island at 9.50 a. m., on Tuesdays, Thursdays, and Saturdays, and returns from there as soon as possible after the unloading and delivering of supplies.

CULVERT OVER CURUNDU.

**Reinforced Concrete Structure for 18 Tracks.—
Will Have Tidal Gates.**

The diversion of the main line tracks of the Panama railroad to serve the new town of Balboa, and the construction of a number of yard tracks in connection with the new pier, have made necessary a suitable crossing over the Curundú River at the point indicated in the attached sketch (A). The Curundú is a small stream that drains the meadows lying east of the present Panama railroad main line, a section of the district of San Miguel in the city of Panama, and the greater part of the swampy area between Ancon and Diablo Hills. Its discharge, except after heavy rains, is in-

cut off at the bottom. The wall between the openings will be two feet thick, the outside walls one and one-half feet thick, while the floor and roof will be two feet thick. On each side there will be an apron nine feet wide between wing walls. The entire structure will be of concrete, heavily reinforced, and founded on about 600 piles penetrating to rock. The piles have been driven, and about 100 feet of culvert have already been finished. The floor of the bridge will be at elevation plus three feet above mean sealevel, and not much work is required in excavating the pit for it. The ground at this point is very soft, and to prevent caving in during construction and underwashing of the finished structure, the

SKETCH A—SHOWING CULVERT OVER CURUNDU RIVER, AND RAILROAD TRACK LAYOUT IN RELATION TO NEW BALBOA PIER.

significant; at the present time it amounts to almost nothing; but it is subject to a tidal flow along its entire winding course through the swamp, and as far back as the railroad crossing above referred to. A part of the swamp has been filled with material pumped by suction dredge in excavating the inner harbor at Balboa, and to avoid blocking the

pit (with a width of 25 feet) is entirely enclosed in sheet piling. The culvert is designed to support a wagon road of standard width, two tracks of the Panama railroad main line, and 16 yard tracks. The tracks and road will cross the culvert at right angles, as shown in Sketch A, and will be placed on a 2½-foot fill of earth to be made over the roof of the

SKETCH B—SHOWING ENDS OF OPENINGS IN DOUBLE BOX CULVERT WITH ONE OF THE WING WALL SECTIONS.

Curundú, while the work was in progress, its channel was deepened, and the earth taken therefrom was used to form levees on each bank.

The adopted plan for the new crossing of this stream provides for a box culvert, with two openings, which, on account of the numerous tracks to be laid over it, will have a length of 307½ feet, between portals. Each opening will be 10 feet wide, and seven feet high, square at the top, but with the corners

structure. This will be the fourth culvert constructed over the Curundú River; one now spans it on the old Corozal wagon road, one on the new Corozal road, and another for the present railroad crossing.

In order to prevent the tidal flow from ascending the river east of the new culvert, automatic tidal gates will be installed at the west end of the bridge, one to cover each opening. These gates will be constructed of 4-inch timber, heavily bolted and braced, to be

hinged to the upper edge of the opening. Their operation will be entirely controlled by the tidal rise and fall. When the tide rises above the water level in the swamps, the beginning flow will serve to close the gates against the culvert openings, and when it falls below that level, the accumulation of the natural flow of the stream on the other side of the gates will push them open, allowing the water to escape. This device will prevent the inundation of the low parts of the swamp twice every 24 hours, as now, and will prevent also wearing of the bed of the Curundú by rapid currents caused by the tidal flow.

Postage Due Stamps.

In accordance with the "Taft Agreement," the Canal Zone Government purchases all of its stamps for use on mail matter originating in the Canal Zone, from the Panama Government, at 40 per cent of their face value. Heretofore, it has been the practice to use these stamps on letters arriving from abroad on which the full amount of postage has not been paid. During the last fiscal year, it is estimated that this class of postage amounted to about \$4,000 in value. Most of the mail matter from the United States comes fully prepaid, but in the case of mail from the West Indies, and to some extent from Europe, the postage is only partly paid, or in some cases not paid at all, as under the Rome Convention, letters for points abroad may be accepted at the home post-offices without prepayment of postage. In view of the fact that this class of postage does not come under the Treaty with Panama, a supply of stamps for this purpose has been ordered from the United States Government, which will be furnished at the cost of the printing. They will be surcharged "Canal Zone" in the same manner as the Panamanian stamps, and, on receipt, will be used on all letters received at Canal Zone post-offices on which postage may be due.

Sailing Vessels from Ecuador.

As a result of representations from the quarantine service, the captain of the port of Panama, will, in future, as a precaution against the introduction of plague, compel masters of sailing vessels from Ecuadorian ports to submit to medical inspection before permitting his passengers and crews to land. Also, vessels must anchor well out from shore. Heretofore, in view of the time consumed by sailing vessels in making the trip to Panama from Ecuadorian ports, the above precaution has not been regarded as necessary, but as recent reports show that the plague is gradually creeping up the coast of Ecuador, and is now prevalent in towns much nearer Panama, it has been decided to apply the regulations to all vessels.

Sailing vessels arriving from Ecuadorian and Colombian ports will be remanded to the quarantine station for inspection and such treatment as may be required.

Fire Protection Changes at Cristobal.

Recent changes for increased fire protection in the Cristobal-Colon district include the installation of a 2-way standpipe near the main office on Dock 13, connected with the 6-inch main recently laid for the purpose of filling barges with water, to be hauled to Toro Point; improving the road between the north entrance to Mount Hope storehouse and dry dock shops; filling the space between

the railroad tracks along the south approach to the Mount Hope dry dock and the carpenter shop to the level of the track, to allow the automobile fire engine to be driven to the water's edge in case its use should be required for fire fighting or for pumping out vessels; the placing of sufficient standpipes and 600 feet of fire hose at a central location at Coco Solo Point in connection with which a flat car, equipped with skids so as to be ready for hauling the automobile fire engine to the point, will be spotted on the siding south of the Cristobal corral; a new cement culvert and fill in place of a condemned wooden bridge across the drainage ditch back of the nurses' quarters, Colon Hospital, in the road leading to the wireless and quarantine stations; and the repair of roads and crossings generally; and the repair of small hose houses at Mount Hope.

The water pressure in case of fire has been greatly improved by the two 300-horsepower, electrically driven fire pumps in the new Mount Hope pumping station.

American Institute of Electrical Engineers.

The next regular meeting of the Panama section of the American Institute of Electrical Engineers, will be held in the Commission clubhouse in Gatun on Tuesday evening, March 10, at 7.15 p. m.

Papers will be presented on the subject of "Lock illumination of the Panama Canal," and the tests thereof. A demonstration of typical lighting will be given at the locks. It is planned to illuminate the entire upper lock, as well as a typical stretch of operating tunnel and machinery rooms.

Return train to Panama, connecting with the Bas Obispo shuttle train, will leave Gatun at 9.45 p. m.

Obituary.

Mrs. M. A. Sherman died at the home of her daughter, Mrs. G. A. Howard, in Cristobal, on Wednesday, February 25, aged 70 years. She was a widow, was born in Eastport, Maine, and had been on the Isthmus one year and six months. Four children, Mrs. W. H. Knowles of Buckeye, Texas, Mrs. G. A. Howard of Cristobal, Mr. C. E. Sherman of Quincy, Mass., and Mr. W. C. Sherman of Lawrence, Mass., survive her. The interment will be at Eastport.

COMMISSION CLUBHOUSES.

Activities of the Young Men's Christian Association.

GENERAL.

The schedule for moving pictures for the week March 9 to 14 is, as follows: Monday, Pedro Miguel; Tuesday, Cristobal and Balboa; Wednesday, Culebra; Thursday, Gatun; Friday, Corozal and Porto Bello; Saturday, Empire.

Films to be shown at the clubhouses March 2 to 7 are, as follows: "Amateur lion tamer;" "Still voice;" in two reels; "Stolen melody;" "Bunny's birthday surprise;" "Perilous ride;" "Cupid through keyhole." Films to be shown at the clubhouses March 9 to 14 are, as follows: "Leopard tamer;" "Tattle battle;" "His father's deputy;" "Just gold;" "Right-of-way;" "High-brow love;" "Trimmer trimmed;" "Widow of Nevada;" "Counsellor Bobby."

The standing in the all-Isthmian duckpin bowling tournament is, as follows:

Team.	Won.	Lost.	P. C.
Empire	7	2	.778
Culebra	7	5	.583
Cristobal	3	3	.500
Pedro Miguel	4	5	.450
Gatun	4	8	.333
Corozal	3	6	.333

BALBOA.

The pool tournament will close on Saturday night, March 14. The standing of the men so far is, as follows: First, S. T. Smith; second, W. Skinner; third, H. Ashton.

A pressing club will be started for the benefit of the members on Monday, March 2, with the following rates: Two suits (inside of 30 days), \$1; four suits (inside of 30 days), \$1.50; single suits, nonclub rates, \$1.

On Friday night, March 6, special moving pictures will be shown at the local clubhouse consisting of the feature films "Ivanhoe" in three reels, and "Tigris" in four reels. Special music will be furnished by Mr. G. A. Howard of Balboa.

COROZAL.

High scores in bowling for the week ending Saturday, February 28 were, as follows: Owens, 100, 100; Simms, 108, 103; Seebt, 100, 101; Regan, 100; Davis, 103; Steele, 100; Parkis, 101.

The first Pedro Miguel-Corozal Isthmian bowling tournament games resulted in the following scores on Wednesday, February 25:

Pedro Miguel	429	477	459
Corozal	441	452	454

The results of the "Ragtime" finals were, as follows: Two high games, Davis and Simms, 428; second two high games, Parkis and Taylor, 424; high average, Parkis, 94 for 54 games; high score, Parkis, 120.

PEDRO MIGUEL.

A number of people have already joined the Spanish classes, which are instructed by Mr. Fred Renaud of Corozal. The classes have been arranged, as follows: Beginner's class from 7.30 to 8.30 p. m.; advanced class from 8.30 to 9.30 p. m.

The total membership reported for the month of February is 136.

The attendance at Sunday school for the first Sunday in March was 46, the largest since its organization.

Several of the people of Pedro Miguel have expressed a desire to learn to swim, and as opportunity allows, lessons will be given at the regular swimming place at the lower end of the Lock. Those wishing to learn to swim can arrange with the secretary for free lessons.

Two large doors are being constructed to complete the background for the handball court in the gymnasium. As soon as these are ready, all that care to play handball are invited to come out in the evenings, or afternoons. If sufficient interest is aroused in the game, a handball league will be started.

CULEBRA.

High scores in duckpins for the week are, as follows: Cornthwaite, 101; Fitzpatrick, 105; Perkins, 103, 101; Brown, 100; Barnes, 115, 103; Case, 117.

The Culebra chess team played the Empire team on Friday, February 27, winning four games and losing two games.

On Saturday evening, March 7, the Empire basketball team will play an exhibition game with the Gatun team at Gatun.

On Saturday night, February 28, the local team won two out of three games in the all-Isthmian tournament from the Pedro Miguel team. Scores:

Pedro Miguel.	Culebra.

Totals.... 447 477 484 429 391 463

The next tournament game will be played at Corozal on Saturday, March 7.

GATUN.

The boys' group athletic contest, which was started on January 19, ended on February 25. The boys whose names appear first and second in each group receive gold and silver medals, respectively.

Juniors.

Griffith, Essex	920
Hansen, Paul	888
Sisson, Franklin	709

Midgets.

Loulan, Francis	980
Christian, Wm.	851
Claberty, Chas.	831
Pentz, David	757
Neville, David	720
Kuller, John	709
Twitcheil, James	658
Stevenson, Branson	652
Cucuel, Alfred	618
Carkeet, John	557
Witt, Morris	556

Culebra won three straight games from Gatun on the latter's alleys. On Wednesday evening, February 25, Gatun's totals were 420, 453, 438. Culebra's totals were 485, 482, 455.

Mr. B. B. Dumville and Mr. J. T. Smith have been appointed members of the executive council of the Gatun association.

Motion pictures of the gymnasium activities of the clubhouse were taken on February 28.

The last four nights of this week will be devoted to the celebration of the fourth anniversary of the Gatun Y. M. C. A.

CRISTOBAL.

The single folks bowling tournament held on Monday, February 23, resulted in the following scores:

G. R. Farr and Miss C. Mathews	496
W. Russell and Miss M. Stevens	481
W. Scheid and Miss B. Larcom	466
D. Raymond and Miss E. Mathews	448
E. H. Nash and Miss R. Farrell	432
J. Gill and Miss L. Cotton	431
Ernest Cotton and Miss Ida May Glawson	429
A. Gibson and Miss A. Larson	412
N. Drew and Miss E. Bevington	398

About 40 men attended the discussion club meeting on Thursday night, February 26, to hear Mr. E. M. Keyser talk on volcanoes and earthquakes. Mr. Keyser had prepared charts to illustrate his address. He mentioned particularly the San Francisco, Messina, and local earthquakes. He also explained the manner of recording earth tremors by the seismograph instruments at Ancon. Owing to the moving pictures on Thursday night, Judge Feuille addressed the discussion club on Tuesday, March 3.

Colonel Rothwell of the Salvation Army will deliver a lecture on General Booth, on Wednesday, March 11. No admission will be charged. The general public is invited to attend.

A "Father and son" supper will be given to members of the boys' department, and all other boys of Cristobal and Colon Beach who attend, on Friday night, March 13. No boy can attend without his father; no father can attend without his son. After the fathers and sons have been given an opportunity to entertain, Mr. Richard L. Metcalfe, Head of the Department of Civil Administration, will give a talk to the boys.

The members of the boys' and girls' gymnasium classes, about 70 in all, gave an exhibition in marches, races, folk dances, etc., to permit of a motion picture being taken, on Saturday afternoon, February 28.

PORTO BELLO.

The final standing in the pool tournament is, as follows:

Name.	Won.	Lost.	P. C.
Baker	8	1	.888
Colberg	7	2	.777
King	7	2	.777
Thompson	5	3	.744
Ransbottom	5	4	.555
Doyle	4	5	.444
Bradberry	4	5	.444
Woolworth	3	6	.333
Chase	1	8	.111
Cummings	0	9	.000

Baker won the gold medal, while Colberg and King tied for second place. On the playoff, King defeated Colberg and won the silver medal.

Married.

DECORA-LAMBERT—On Sunday, February 15, 1914, at Hot Springs, Ark., Miss Estelle Gaines Lambert of Hot Springs, Ark., to Mr. J. Guy DeCora of Plattsburg, N. Y. Canal Zone residence, Culebra.

OFFICIAL CIRCULARS.

Conduct and Efficiency Ratings.

CULEBRA, C. Z., February 25, 1914.

CIRCULAR No. 309-S:

In order that the service record of an employe may show a conduct and efficiency rating for each position he has occupied, or each class of work performed, it is directed that "General conduct" and "General workmanship" be shown on each transfer slip (C. E. 277-1) and each application for increase of pay or change of rating (C. E. 160-1) issued henceforth.

On the "Transfer slip" (form C. E. 277-1), it should be shown under the caption "Remarks."

On "Application for increase of pay" (form C. E. 160-1), it should be shown in the blank space immediately under the name of the employe in those cases where the rating or designation of the employe is to be changed, or his pay increased.

H. F. HODGES,
Acting Chairman.

Chief Clerk, Commissary-Subsistence Department.

CRISTOBAL, C. Z., March 1, 1914.

CIRCULAR No. 501:

To chief stewards, commissary storekeepers, and office employes—Effective March 1, 1914, Mr. C. M. Bullard is appointed chief clerk of the Commissary-Subsistence Department, vice Mr. W. F. Shipley, resigned.

F. O. WHITLOCK,
Acting Subsistence Officer.

Assistant Chief Clerk, Commissary-Subsistence Department.

CRISTOBAL, C. Z., March 2, 1914.

CIRCULAR No. 502:

To chief stewards, commissary storekeepers, and office employes—Effective March 1, 1914, Mr. Homer W. McCally is appointed assistant chief clerk of the Commissary-Subsistence Department.

F. O. WHITLOCK,
Acting Subsistence Officer.

Board of Local Inspectors.

ANCON, C. Z., March 3, 1914.

The Board of Local Inspectors will conduct examinations at the Administration Building, Ancon, on Wednesday, March 11, 1914, beginning promptly at 2 p. m., for persons desiring to secure the following classes of licenses: Pilots, masters, mates, marine engineers, chauffeurs, and navigators of motor boats. All applicants for license must procure from the Executive Office, Ancon, forms of application and information respecting the filling out of same, not later than the day previous to the examination. In addition, all persons desiring chauffeurs' licenses must provide themselves with automobiles with which to demonstrate their ability to properly operate the same.

NOTE—The demonstration test for applicants for chauffeurs' licenses will be given on Tuesday, the day preceding the regular examination, at 2 p. m., at the Administration Building, Ancon; on Wednesday, the day of the regular examination, for out-of-town applicants, at 2 p. m., at the Administration Building, Ancon. No demonstration tests will be given at Cristobal, except by appointment.

HUGH RODMAN,
Chairman, Board of Local Inspectors.

Interlocking Plant at Summit Out of Service.

PANAMA RAILROAD COMPANY,
COLON, R. P., February 27, 1914.

G. S. BULLETIN No. 49:

All concerned—The interlocking plant at Summit will be placed out of service at 8 a. m., on Monday, March 2, 1914, and the south end of double track moved 90 feet farther north and controlled by a main line switch until such time as the interlocking is rebuilt and put in service.

F. MEARS,
General Superintendent.

Signal Change at Paraiso Cabin.

PANAMA RAILROAD COMPANY,
OFFICE OF GENERAL SUPERINTENDENT,
COLON, R. P., March 3, 1914.

G. S. BULLETIN No. 52:

All concerned—The manual block signals at Paraiso cabin will be placed out of service at 6.30 a. m., Wednesday, March 4, 1914, and changed to upper quadrant. During the time changes are being made, the operator will display red and yellow flags in lieu of the usual signal aspects.

F. MEARS,
General Superintendent.

Signal Changes at Bridge 57½, P. R. R.

PANAMA RAILROAD COMPANY,
OFFICE OF GENERAL SUPERINTENDENT,
COLON, R. P., March 3, 1914.

G. S. BULLETIN No. 51:

All concerned—Beginning at 6.30 a. m., Thursday,

March 5, 1914, the home and manual block signals at Bridge 57½ will be changed to upper quadrant.

During the time changes are being made, the operator will display red and yellow flags in lieu of usual manual block signal aspects, and all trains entering the interlocked limits will be governed by proceed hand signals, while fixed signals are inoperative; these to be given with a yellow flag in accordance with rule No. 330.

F. MEARS,
General Superintendent.

Interlocking Plant, West Leg, Balboa Wye.

PANAMA RAILROAD COMPANY,
OFFICE OF GENERAL SUPERINTENDENT,
COLON, R. P., March 3, 1914.

G. S. BULLETIN No. 50:

All concerned—The interlocking plant at west leg, Balboa wye will be placed in service at 10 a. m., Sunday, March 8, 1914.

All routes will be controlled by home and dwarf signals and all conflicting points protected by derails.

F. MEARS,
General Superintendent.

Balboa-Frijoles Labor Train.

BALBOA, C. Z., February 25, 1914.

TRANSPORTATION BULLETIN No. 62:

Effective Friday, February 27, 1914, the schedule of the Balboa-Gamboa labor train, Nos. 102 and 123, will be extended to Frijoles, No. 102 arriving at Frijoles at 6.50 a. m., and No. 123 leaving there at 4.30 p. m., making the necessary stops between Frijoles and Gamboa cabin to accommodate the transmission line employes.

W. J. HOLMES,
Superintendent of Transportation.

Sale of Launch Hull.

OFFICE OF CHIEF QUARTERMASTER.

CULEBRA, C. Z., March 2, 1914.

Sealed proposals will be received at this office until 3 p. m., Tuesday, March 17, and then opened, for the purchase of the hull of the launch *La Zona*. Full information relative to size and condition can be secured upon application to the storekeeper at Balboa, at which point the launch is open for inspection. Proposals must be accompanied by certified check, postal money order, or cash for five per cent of the amount bid. Proposals should be marked "Proposals for purchase of launch hull", and addressed to Capt. R. E. Wood, Chief Quartermaster. Culebra, C. Z.

Ancon, Canal Zone,

Isthmus of Panama.

No communication either for publication or requesting information, will receive attention unless signed with the full name and address of the writer.

NOTES OF PROGRESS.

"Miraflores Locks" Flag Station.

The committee of representatives of the Panama railroad, the Division of Municipal Engineering, the First Division, and the landscape architect, which met at Miraflores passenger station on February 25 to consider the location of an alighting platform and the abandonment of the present station, has recommended that an alighting platform for both north and southbound trains be constructed at a point about 1,000 feet south of Miraflores tunnel, or approximately 1,800 feet from the present station. This point is opposite the Miraflores power plant, and affords the readiest access of passengers to the power plant, Miraflores Locks and spillway, and the new purification plant on the hill overlooking the spillway. The pumping station on the edge of Miraflores Lake, just east of the present station, can be reached by a walk of from 10 to 15 minutes.

The recommendations of the committee have been approved, and the construction of alighting platforms on both sides of the double track, each six feet wide by 300 feet long, has been begun by forces of the Panama railroad. This point will be a regular stop for labor trains, and a flag stop for all passenger trains. A signboard, reading "Miraflores Locks," is to be erected alongside. The alighting platform will be made a stop, and the Miraflores passenger station abandoned, when the new platforms are ready.

Moving into Balboa Shops.

The office and drafting forces of the Mechanical Division completed their moving from Empire to Balboa shops on February 24 and 25; the moving of the shops proper, and of employes and machines, has been a gradual consolidation since the abandonment of Gorgona shops, and is still under way. At the time of the reoccupation of Empire shops, beginning in August, 1913, two steam hammers, a flue rattler, and certain milling machines planers, air brake equipment, and locomotive

cranes were transferred there from Gorgona shops; the rest of the Gorgona equipment was transferred direct to Balboa shops, or placed in storage. Most of the machinery now at Balboa shops was so handled, or is new; relatively little of that recently in use at Empire shops has yet been moved. The car and locomotive shops and the instrument repair shop are still at Empire.

On January 31, there were 277 gold employes of the Mechanical Division at Empire shops, and 274 at Balboa; on March 9, there were 350 gold employes at Balboa shops, and 205 at Empire. Practically all of the force from the Cristobal car and paint shops has been transferred recently to Balboa, about 35 gold employes having moved to date. The roundhouse and engine shops at Cristobal are yet in operation for the benefit of locomotives of the Panama railroad, to handle hostling and minor repairs.

Collier "Cecil" Overdue.

The collier *Cecil*, sailing under the Norwegian flag, and chartered by the Earn Line, which sailed from Norfolk, or Newport News, Va., on February 23, at 3 p. m., with 5,400 tons of coal consigned to the Panama Railroad Company, had not been heard from up to Wednesday afternoon, March 11, at which time the vessel was considerably overdue. It has been making trips to the Isthmus for some time past, and its run usually takes from eight and one-half to nine days.

Word from the "Gamboa."

Word has been received that the tug, with the new dipper dredge *Gamboa* in tow, left Guantanamo, Cuba, where it had put in to coal, on Sunday, March 8. Providing the vessels encounter fair sailing weather, they should arrive at Cristobal about March 14, or 15. So far as known, Charleston, S. C. was the only other stop made, besides Guantanamo.

Must Purchase Their Own Tools.

A ruling was placed in effect on February 1, requiring all linemen and wiremen in the Mechanical Division employed at a rating of 44 cents an hour, or greater, to purchase their own tools on and after that date. It was made optional with them either to purchase the Canal Commission tools then in their possession, or to obtain them elsewhere. The ruling applies to tools of the two employments, as follows:

Wiremen—One tool bag; one set wood bits; one ratchet brace; one 2-pound soldering copper; one claw hammer; one pair pliers, gas; two pairs pliers, S. C., 6 and 8-inch; one 6-inch rule; three screwdrivers, 3, 6, and 10-inch; one blow torch; one 8-inch monkey wrench; and one 14-inch pipe wrench.

Linemen—One tool bag; one belt; one ratchet brace; one 2-inch wood chisel, firmer socket; one splicing clamp; one Haven's clamp; one pair climbers; one hacksaw frame; one ball

pein hammer; one claw hammer; one pair pliers, S. C., 8-inch; one 6-inch rule; one hand saw, crosscut; two screwdrivers, 6 and 10-inch; one carpenter's square; one safety strap; one Howe's tool, or jack strap; one lag screw wrench; and one monkey wrench.

Site for Station at Paraiso Selected.

Anticipating the use of the pontoon barge, now under construction, in place of bridge No. 57½ as the means of crossing the Canal at Paraiso, a committee selected on March 5 a site for a station for the village of Paraiso. Access to the east abutment of the pontoon crossing is through a cut, and it was decided that the most desirable situation was the level ground at the south end of this cut. This is approximately opposite the Paraiso machine shop. The committee consisted of the heads of the Panama railroad, the Dredging Division, the Quartermaster's Department, and the Division of Posts, Customs, and Revenues.

Camp Bied Swamp Reclamation Completed.

The reclamation of the swamp east of Camp Bied, on the north limit of Cristobal, was finished on March 10, and pipeline suction dredge No. 83 is now discharging all its spoil in the fill for the Atlantic entrance coaling plant. The driving of piles to support the foundation of the Cristobal transformer substation, to be situated on the Camp Bied fill, has begun, and materials are at hand for the advancement of the work of construction. It is anticipated that more fill will be pumped into the area after the substation erection is under way.

Submarines in Dry Dock in Gatun Locks.

The submarines C-1, C-2, C-3, C-4, and C-5, comprising the First Division of the submarine flotilla of the United States Navy, which has been stationed at Cristobal since December 12, 1913, were placed in dry dock in the east chamber of the upper level of Gatun Locks on Monday, March 9.

The five vessels, each 105 feet long by 16 feet in maximum beam, were lashed together in one rank, side by side, and handled in a group. The movements of the group were controlled by means of four towing lines, two attached forward and two aft, each line being handled by from 10 to 12 seamen of the division, walking on the lock walls.

The draft of the vessels in salt water is 14 feet. The floor of the intermediate level of Gatun Locks is 13½ feet below sealevel, and the chambers may be filled to that depth with sea water. In order to avoid unnecessary operations of gates and valves, the lower gate of the middle level was thrown open directly after the operating gate at the lower end of the lower level was closed, making one chamber, 2,000 feet long; this was filled a few feet and the vessels were towed into the intermediate level. The lower gate of this chamber was

then closed, and the chamber was filled to a level sufficient to float the vessels into the upper level and in place over the cradles which had been prepared on the floor. The lower gate of the upper level was then closed and the water was let out slowly through the culverts under the floor, allowing the vessels to settle into place in their respective cradles. In the upper east chamber, the shorter, or 400-foot section, was used.

The tender *Severn*, on which the crews of the submarines mess and sleep, was lifted to Gatun Lake and moored along the east side of the upper approach wall of the locks on Sunday, March 8. Being without motive power, it was handled by the tug *Porto Bello*, which towed dredge No. 4 on the return trip through the locks. The dredge was placed in the Cristobal dry dock on Wednesday, March 11.

Pleasure Trips on Gatun Lake.

A daily sightseeing and pleasure trip is made by the motor boat *Louise* from Gamboa to Gatun in the forenoon, and from Gatun to Gamboa in the afternoon, every day except Sundays.

The boat leaves Gamboa station at 8.40 a. m., arriving at Gatun in three hours. On the return trip, it leaves Gatun station at 2 p. m., arriving at Gamboa, three hours later.

For the morning trip take the 7.30 a. m. trains, either from Colon or Panama, to Gamboa.

For the afternoon trip take the 11 a. m. trains, either from Colon or Panama, to Gatun, get lunch at Gatun, and take the boat at 2 p. m., arriving at Gamboa in time to connect with the afternoon trains north and south.

The trip covers one of the most picturesque parts of the Canal, and this part of the waterway has been spoken of as the "Hudson of the tropics."

The *Louise* carries 25 passengers with comfort, and the number of tickets is accordingly limited to that number for each trip.

The cabin and after deck are shaded and cool; ice water is provided, comfortable wicker and folding chairs, and a toilet; this boat is Government licensed, and inspected, and carries the safeguards required by law.

Tickets should be procured in advance at the Panama railroad stations at Panama or Colon, or may be obtained at Gamboa or Gatun station, if trip is not sold out. Tickets, \$1.50, U. S. currency, each.

Lock Illumination.

Nearly 100 people were in attendance at the meeting of the Panama Section of the American Institute of Electrical Engineers, held at the Commission club in Gatun, on Tuesday evening, March 10. An interesting paper was read by Mr. F. C. Clark, assistant superintendent of erection, on the subject of the lock illumination of the Panama Canal. He was followed by Mr. S. H. Grauten, testing engineer at Gatun Locks, who, with the aid of a series of diagrams, explained recent tests made to determine illuminative values of the lamps on Gatun Locks. At the conclusion of the meeting, at 8.30, the audience under the guidance of the chairman of the section, Mr. Edward Schildhauer, was taken to the locks, where the control house was visited, and a practical demonstration made of the operating of the lighting system from the lighting control board, which is situated in the same room with the control board for

operating the locks. The visitors were next conducted through a section of the operating tunnel and some of the machinery rooms in the west wall. The control house, central and west lock walls, a typical stretch of the operating tunnel, and the west emergency dam, were all especially illuminated for the occasion. The members and visitors from the line left for home on a special train at 9.45 p. m.

Civil Service Examinations.

Examinations for the following-named positions are scheduled to be held, probably on April 19: Agricultural inspector, Philippine Service; aid, Lighthouse Service; assistant observer, Weather Bureau; cadet engineer, cadet officer, Lighthouse Service; civil engineer and draftsman; copyist ship draftsman, ship draftsman; Navy Department; mechanical draftsman, topographic draftsman, Isthmian Canal Service; engineer, Indian Service (steam engineering, heating, etc.); junior engineer (mining), Bureau of Mines; junior engineer (civil), junior engineer (mechanical or electrical), Engineer Department at Large; scientific assistant, Department of Agriculture; teacher, Indian Service; trained nurse, all services; wireman, nonapportioned Departmental Service.

Applications for the abovenamed examinations will not be received in this office after March 25; this date may be changed if necessary. Applications should be secured from and filed with this office. In requesting information, the kind of examination desired should be specifically mentioned.

Women will be admitted to examinations for scientific assistant, teacher, and trained nurse.

The examinations will be held, probably at Empire, in the Commission clubhouse, but the place of examination, and also the date, should be omitted in application forms.

A card of admission will be sent to those found eligible to be admitted, just before the examination.

In answer to questions as to residence, applicants must show residence in a State or Territory of the United States, and county thereof, up to the time of filing application.

ISTHMIAN CIVIL SERVICE BOARD.

CULEBRA, C. Z., March 7, 1914.

Civil Service Examinations.

In a letter dated February 25, the Civil Service Commission has advised this office that, owing to the lack of funds for printing, it has been unable to prepare papers for the spring examinations. The examinations announced to be held next Sunday, March 15, will, therefore, not be held. As soon as the papers for those examinations are received in this office, cards of admission will be sent to those found eligible to be admitted.

ISTHMIAN CIVIL SERVICE BOARD.

CULEBRA, C. Z., March 9, 1914.

Society of the Chagres.

On account of the resignation from the Isthmian Canal Commission service of Mr. W. F. Shipley, secretary-treasurer of the Society of the Chagres, Mr. Homer W. McCalley, whose address is Subsistence Department, Cristobal, is hereby temporarily

appointed acting secretary-treasurer of the Society of the Chagres, and as such all mail should be addressed, it being understood in this connection that in case Mr. Shipley remains on the Isthmus, he will retain his position of secretary-treasurer of the society; but to facilitate business until arrangements are made, Mr. McCalley will act as temporary secretary-treasurer.

R. E. WOOD, President.

CULEBRA, C. Z., March 7, 1914.

Dedication of Baptist Church.

On Sunday and Monday, March 15 and 16, the newly completed Baptist church building in Guachapali will be dedicated, and a series of services held, at which there will be special speakers. The speaker on Sunday afternoon, March 15, will be Chief Justice Gudge; the meeting will be at 3 o'clock. In the evening, at 7.15, the Rev. Mr. Hardwick, superintendent of the Wesleyan Methodist missions in the Canal Zone and Panama, will preach.

Steamshovel Operations by the Fourth Division in February.

During the month of February, the total amount of material excavated by the Fourth Division in Culebra Cut, and in the Miraflores spillway, was 152,695 cubic yards. All of this amount was primary excavation for the Canal; 60,478 cubic yards were classified as earth excavation, and 92,217 cubic yards as rock excavation. In addition thereto, the Fourth Division excavated at Cocoli Hill 20,570 cubic yards for backfilling at Miraflores Locks.

All the yardage handled by this division was excavated by steamshovels.

Postal Savings Bank Transactions.

A statement of postal savings transactions at Canal Zone post-offices for the month of February, follows:

Total.....	38.45	12,533

The regular dance of the Cristobal Dancing Club will be held on Saturday, March 14, at the Commission clubhouse.

CONVENTION OF WOMEN.

Meeting of Federation of Societies for Christian Work in the Canal Zone.

About 50 women attended the first convention of the Panama federation of societies of women for Christian work, which was held in the Commission chapel at Empire, on Friday afternoon, March 6, the ladies' auxiliary to the Empire Christian League acting as the hostess organization. Five societies were represented, as follows: The Women's Foreign Missionary Society of the Methodist Episcopal Church at Panama, the Fidelity Bible Class of Empire, the ladies' aid of the Union Church, Cristobal, the ladies' auxiliary to the Empire Christian League, and the altar guilds of Christ Church, Colon, and St. Luke's Hospital chapel, Ancon.

On the arrival of the train, at 1.03 p. m., the visitors were served with a luncheon in the chapel, and at 1.45, the meeting was called to order by the president of the federation, Mrs. J. H. Stokoe. An address of welcome was delivered by the chairman, in which she outlined the purpose of the meeting, and asked the earnest attention of those present to the papers to follow.

An interesting feature of the program was the part devoted to the reports of the five federated societies, a brief summary of which is given herewith.

The Cristobal Ladies' Aid, represented by Mrs. Butters, was organized in 1909, and has been active in connection with the work of the Union Church since that time. Its object is to aid in the work of the Cristobal Union Church, to unite the women of Cristobal and Colon for Christian work, to further the spirit among the women of the church by meetings, and to keep in touch with the missionary and social work that is being carried on in the Christian churches throughout the world. The meetings for the year have been devoted to the study of missionary work in Japan, China, Mexico, Hawaii, and the Philippines. During the meeting at which China was the subject, the society was addressed by two young Chinese merchants of the city of Colon. The society has forwarded two boxes to Miss Annie Coope, the American missionary to the San Blas Indians.

Mrs. Kelley read the report of the ladies' auxiliary to the Empire Christian League. The general outline of the work of this society shows it to be an active factor in the lives of the members, and in the life of the community. The auxiliary was organized in January, 1911, with 12 charter members. Meetings were held until 1913 on the first and third Tuesdays in each month; the first meeting in the month was devoted to the study of missions, with lessons from a text book, and the second meeting to some special branch mission work, with Bible study and devotional exercises. Speakers from outside were present at some of the meetings, among them being Miss Blackmore, an independent missionary, who has been stationed in Nicaragua for many years; Miss Elise Keyser, deaconess in the Lutheran Church; the Rev. Harry Compton, pastor of the Methodist Episcopal Church at Panama; and Mrs. Stephen Witt of Gatun, at one time missionary in Costa Rica. The society holds a thankoffering meeting in November each year, and special programs are given at that time. It is also a practice of the organization to hold public meetings once or twice each year. Since 1913, the

auxiliary has held only one meeting monthly, owing to the fact that several of the members are also enrolled in the adult Bible class, which holds one meeting monthly. On October 25, 1912, a missionary convention was held in Empire at the call of the ladies' auxiliary, this being the first convention of women engaged in church work to be held in the Canal Zone.

The adult Bible class, organized under the title of Fidelity Bible Class, has been in existence since September 13, 1913. The class was organized on that date at the home of Mrs. Homer Smith, with 20 charter members. Officers are elected semiannually. The class conducts its studies at the regular sessions of the Union Sunday school, and holds a social meeting on the second Tuesday in each month. At these meetings, there is a program, followed by a social session, and occasionally, light refreshments. Besides the regular officers, president, vice-president, secretary, and treasurer, there is a teacher, or leader, in the work of the class and three committees, visiting, social and lookout. The class instituted a cradle roll for the Sunday school, and carried on the work for one year, when it was turned over to the management of the Sunday school. Flowers and messages are sent to the sick in their homes and in Ancon hospital by the visiting committee. A sum of money has been donated for missionary work, a gramophone has been presented to the patients in the Palo Seco leper colony, and the receipts of a Christmas sale held in the Commission clubhouse in December, 1913, were devoted to the relief of several destitute families which the lookout committee discovered in Empire. The subject of study is the women of the Bible. Mrs. Homer Smith is the leader.

Mrs. Compton, president of the Woman's Foreign Missionary Society of the Methodist Episcopal church at Panama, told of the work of that organization. The Panama society is an auxiliary to the Baltimore branch of the Woman's Foreign Missionary Society of the Methodist Episcopal Church, with which all similar societies in South America are connected. Regular meetings of the local society are held monthly at the homes of members. During the past year, the attendance at these meetings has averaged about eight. It was at the initiative of this society that the Panama federation of church societies was formed. A special effort for the year was the furnishing of playground equipment for the pupils of the mission school in the seawall church, Panama. The society expended \$60 for this purpose, and also supports a scholarship in the school. The women assisted in the work of the evangelist, Mr. Taylor, who visited the Isthmus recently. In October, a lecture was given by Bishop Stuntz in the seawall church under the auspices of the society. At the meeting on October 4, Mrs. Stuntz spoke on the work of the Woman's Foreign Missionary Society in South America.

The report of St. Luke's Altar Guild, Ancon Hospital chapel, was given by Mrs. Trask. This guild was organized on December 2, 1907, by the Ven. Archdeacon Henry B. Bryan, then chaplain of Ancon Hospital and rector of St. Luke's chapel, with 15 charter members. The special work of the guild is caring for the altar and the church, and through its efforts, St. Luke's chapel, which was opened in 1908, is thoroughly furnished and equipped for the proper conduct of the services of the church. Special gifts at Christmas to Ancon

Hospital, work for various charitable institutions as recommended by the chaplain, or the members, and local philanthropic work, have been some of the guild's efforts. The membership is 26. There are three charter members remaining in the organization.

Mrs. Mears, representing the altar guild of Christ Church, Colon Beach, drew attention to its unique character; it is a society of American and English women, which operates in a church, the congregation of which is composed almost exclusively of West Indians, the exception being a few English and American worshippers. The guild cares for the altar and chancel, and the vestments, as its natural function, and acts as an auxiliary to the parish priest. The corporate communion is held once a month, and following this, a business meeting is held in the vestry room of the church. The tangible results of this guild are seen in the permanent cement altar, which was consecrated by Bishop Knight at his last visitation in 1913, a credence table, and the renovation of the church interior, prior to January 1, 1913. The guild is also assisting the congregation to discharge the debt on the organ that was installed last year.

After the conclusion of the reports, Mrs. Thomas Edwin Brown, Jr., delivered the first address of the afternoon. Her subject was social service in its relation to Christian effort. Mrs. Brown quoted largely from the specific efforts along the line of hygiene and sanitation, and told of work that is being done toward relieving the crowded quarters of the poor in many of the cities.

Mrs. H. A. A. Smith, in speaking on the federation, outlined briefly the nature of the organization and expressed the hope that meetings similar to that in which the women were engaged would be held from time to time for the purpose of bringing the women together in the unity of Christian spirit.

The following is the program in full:

Welcome to visitors.....Mrs. Stokoe, chairman of the federation.
Hymn.....The congregation
Devotional exercises.....Mrs. Stephen Witt
Solo....."Nearer my God to Thee," Mrs. E. M. Keyser
Business—
Report of the secretary.
Announcements.
Reports of societies—
Cristobal ladies' aid.....Mrs. Butters
Empire auxiliary.....Mrs. Kelley
Empire Fidelity Bible Class.....Mrs. Ash
Panama W. F. M. S.....Mrs. Compton
Ancon St. Luke's Altar Guild.....Mrs. Trask
Colon Christ Church Altar Guild.....Mrs. Mears
Solo.....Mrs. W. J. Keenan
Character recitation, "A Chinese mother-in-law".....Mrs. Goolsby
Address, "Social service".....Mrs. Thomas E. Brown, Jr.
Solo, "Perfect day".....Mrs. Frank Roberts
Address—"The federation".....Mrs. H. A. A. Smith
Report of the resolutions committee.....
Hymn.....The congregation
Benediction.....Mrs. E. H. Sobey

A resolution was adopted extending thanks to the Empire auxiliary, and the Fidelity Bible Class, for their entertainment; to the singers and speakers who assisted in the program, and to the Panama Railroad Company for granting transportation to the societies for the convention.

The building formerly used as a garage for the motor car assigned to the Atlantic Division has been turned over to the Mechanical Division for use as an electrical repair shop. This building is situated on the east backfill of Gatun Locks, near the station of the Panama railroad, and is to be removed in June, or July, in the progress of the landscape work for beautifying the vicinity of the locks.

BALBOA PUBLIC BUILDINGS.

Sites for Most of Them have been Selected and are now Available.

The committee, consisting of Civil Engineer H. H. Rousseau, chairman; Capt. R. E. Wood, Lieut. Frederick Mears, and Mr. W. L. Phillips, appointed to consider sites for the proposed permanent public buildings at the new town of Balboa, has submitted its report and recommendations. As a basis, the committee took the layout of the streets and roads that has received general approval, with the main axis of the town passing through the center of the administration building site on the north, and the location tentatively recommended for the new clubhouse on the old Balboa road, on the south. The following

(g) Passengers arriving and departing from the railroad station at the foot of the administration building.

(h) Silver employees, living at La Boca, to be served by the commissary and post-office.

Clubhouse Plaza was considered the central point most convenient to serve the foregoing, and the adoption of a central axis along Balboa Prado was recommended. The grouping of the public or semipublic buildings along this axis will, it was believed, result in economy of operation by reducing foot and team travel to a minimum.

Certain locations are not available as building sites at the present time. In general, these are in the area filled in hydraulically, the material in which has not yet hardened sufficient-

The recommended site for the Balboa railroad station is at the foot of Administration Hill, situated so that the passenger platform will not be on the curve. The main line tracks with reference to the roundhouse and the roundhouse tracks are fixed, so that work on this building can be started at any time.

The site for the permanent fire station is in Block A. This brings it near the quarters on Ancon Hill, which will consist largely of frame buildings reerected from along the line. Work on the new station may be begun at any time.

The site of the courthouse for the combined use of the magistrate's court and police station is in Block D, and erection of the building can be proceeded with.

The schoolhouse for children of gold em-

PLAN OF BALBOA TOWNSITE, SHOWING LOCATION OF PUBLIC AND SEMIPUBLIC BUILDINGS.

groups, or classes of groups, will be served by the buildings considered by the committee:

(a) Employees quartered on Ancon Hill in the rear of the administration building.

(b) Employees in the administration building.

(c) Employees in the present Commission settlement, east of Balboa.

(d) Employees to be quartered on the slopes of Ancon Hill.

(e) Employees connected with Balboa shops and piers.

(f) Employees that may be quartered on the flat between Ancon and Sosa Hills.

ly, and certain areas at present occupied by yard or construction tracks, which cannot be moved for several months to come. Blocks B, H, and I fall under this head, and for the above reason, these blocks were tentatively recommended by the committee for assignment as general athletic and recreation grounds, as it was considered that this was the best use that could be made of them.

The following building sites were considered by the committee, all of them being free of tracks, with the exception of the site for the proposed schoolhouse in Block E:

ployes is to be situated in Block E. If desired, ground may be had in the rear of the schoolhouse for recreation purposes. Work on this building cannot be started until the yard and construction tracks at present on the site are removed, which will be, probably, within a few weeks.

The Sanitary Department recommended that the building for use of the sanitary inspector be located in Block I, adjoining Clubhouse Plaza, and that the building to be used as a dispensary and as an office for the district physician be located in Block K, also adjoin-

ing Clubhouse Plaza. The committee endorsed this recommendation, and both sites are immediately available.

The site recommended for a permanent post-office building adjoins Clubhouse Plaza, in Block K. The site is ready, but it is intended to use the present post-office at Balboa as long as possible.

The proposed site for the clubhouse adjoins Clubhouse Plaza, on the south side of the Balboa road; it is ready for building on at any time.

Two locations were considered for the hotel and the commissary, which, it was recognized, should be in fairly close proximity, and should be served by a track in the rear. The site suggested by the Subsistence Department is on the old La Boca road, adjoining Clubhouse Plaza, and is available at once. It is in the vicinity of the post-office and clubhouse, and about equally distant from the new shops, railroad station, and administration building; in case quarters are built along Balboa Prado, the site will be especially convenient to them. The sole objection to this location is the fact that the track serving the buildings must cross the old La Boca road and Street B. Upon the completion of quarry operations at Sosa Hill, however, the road may be cut back considerably to enable the direction of Street B, or the old La Boca road, or both, to be so shifted as to have them intersect in one railroad crossing, which will reduce the objection one-half. The alternative location considered is in the vicinity of the railroad station, i. e., in Block A, or between Block A and the railroad station, but the first-mentioned site was regarded by the committee as the most advantageous.

Blocks F, G, J, and C are considered to be especially adapted to any additional bachelor quarters that may be required.

The location of the buildings as recommended by the committee, makes it desirable, in its opinion, that Ancon road, Street K, and Street A, as being main lines of traffic, should be of the same width as the old La Boca road, namely 24 feet. The recommendations of the committee, in general, have been approved by the Chairman and Chief Engineer.

Order of Isthmian Conductors.

The next regular meeting of the Order of Isthmian Conductors will be held in Ancon lodge hall on Sunday, March 15, at 9.30 a. m. All members are requested to be present as matters of importance will be brought up for final disposition.

PERSONAL.

Lieut.-Col. Tracy C. Dickson, Ordnance Department, U. S. Army, has resigned from the position of inspector of shops, effective March 6, 1914, to enable him to comply with orders from the War Department detaching him from duty with the Isthmian Canal Commission, and assigning him to the command of the Sandy Hook Proving Ground at Sandy Hook, N. J. He sailed for the United States on the United Fruit Company's steamer *Cartago* on Saturday, March 7.

He entered the Military Academy in June, 1888, from what is at present the Twelfth Congressional District of the State of Texas, and was graduated in 1892. Upon graduation, he was assigned to the Second Regiment of Artillery, and, in 1894, won an appointment in the Ordnance Department as a result of a

competitive examination. He served at the Springfield Armory, Springfield, Mass., at the Rock Island Arsenal, Rock Island, Ill., as assistant to the Chief of Ordnance in his office in Washington, D. C., at the Sandy Hook Proving Ground, and as a member of the Ordnance Board.

When he assumed the duties of inspector of shops, the Pacific Division was operating its own shops at Balboa and Cocoli; the Central Division was operating the Empire shops and making field repairs to steam-shovels; the Atlantic Division was operating the dry dock and shops at Mount Hope, and the repair shop at Gatun; the Quartermaster's Department was operating the planing mill at Lirio, and the Panama Railroad Company was operating the railroad shops and roundhouse in Cristobal, and the engine house in the railroad yard at Panama. In pursuance of the policy of concentration for economic reasons adopted in 1908 by Colonel Goethals, Chairman and Chief Engineer, some of the shops operated by the various departments and divisions were closed, and the remaining shops were transferred to the Mechanical Division, which has since operated all shops and maintained in operating condition all mechanical equipment, with the exception of the Panama railroad roundhouse at Cristobal and the engine house at Panama, which are also to be transferred to the Mechanical Division on April 1. He consolidated all mechanical work in connection with the construction of the Canal, under the Mechanical Division, with the exception of the small shops at Toro Point and Porto Bello.

In addition to his jurisdiction over all shops and mechanical equipment, Lieut.-Col. Dickson, under the direction of Mr. H. H. Rousseau, Assistant to the Chief Engineer, laid out the Balboa shops, and was charged with the designing work connected therewith. The foundry, planing mill, carpenter shop, and pattern shop were transferred last August from Gorgona to Balboa shops, and the construction of the buildings and installation of the machines, power systems, etc., had reached a stage of completion that permitted the transfer of work from the Empire shops, and from the car shops at Cristobal, to the Balboa shops to be begun on March 2.

Fourth Degree, Knights of Columbus.

The fourth degree of the Knights of Columbus will be exemplified in Cristobal, on Saturday, March 28. Brothers who have not already signified their intention of taking this degree must communicate at once with the undersigned. All notices and instructions in connection with this degree will be mailed direct to applicants. J. L. KERR,

Temporary Master, Fourth Degree.

CRISTOBAL, C. Z., March 9, 1914.

Record of Recent Seismic Disturbances.

Slight seismic disturbances were recorded on the Ancon seismographs on February 24. The first lasted from 1.07 to 1.11 p. m.; the distance was indeterminate, the amplitude recorded, .2 millimeter. A second lasted from 4.34:10 to 4.52 p. m.; the epicenter was at a distance of 565 miles, in an indeterminate direction from the instrument, and the amplitude of the record was three millimeters on the north-south, and two millimeters on the east-west component.

In all, there were recorded at Ancon during February, 22 distinct seismic disturbances.

All except two of these shocks were of slight intensity. Movements recorded on the 7th and 10th were of sufficient intensity to be generally felt over the Isthmus. (Intensity 11 or 111, Rossi-Forel scale). Fourteen of the 22 shocks recorded during the month seemed to originate approximately 115 miles southwest of Ancon, in the vicinity of the province of Los Santos.

Knights of Columbus.

A first and second degree is announced by Panama Council for Sunday, March 22, at 9.30 a. m., in the Ancon lodge hall. Candidates from Cristobal Council may take the degrees by arranging with the financial secretary, Mr. J. V. Delgado, not later than Saturday, March 21. The third degree will be exemplified in Cristobal on March 29. A banquet in honor of the visiting degree team will be given by Knights and their ladies on Sunday, March 29. A special return train will be provided for members coming from line points.

Bachelor Quarters in Tivoli Annex.

Two of the four annex buildings of the Hotel Tivoli have been turned over to the Quartermaster's Department, effective March 1, for 90 days, for use in quartering bachelors transferred from Empire, in connection with the transfer of force and equipment from Empire shops to Balboa shops, now in progress.

Consistory Masons.

Cable advice just received from Gus D. Levy, Grand Master of the Kadosh, Grand Consistory of Louisiana, states that a reunion of Ancient and Accepted Rite Masons will be held on the Isthmus, beginning March 26, 1914, and that Grand Commander Richardson of the Supreme Council, Southern Jurisdiction of the United States at Washington, D. C., will accompany the party to the Isthmus. It is contemplated that the degrees from the fourth to the thirty-second will be conferred on upward of 100 candidates. The exact date of holding the reunion will be communicated by the general committee.

Sand Shipments.

The Punta Chamé sand service was discontinued on February 11. From the second to the 11th of the month, inclusive, 14 barge loads, containing 7,450 cubic yards of sand, were received at the Balboa wharf. The loading of cars in the sand service at Balboa was discontinued on February 13, and from the first of the month up to the latter date, 113 cars, containing 2,089 cubic yards of sand, were shipped. Sand is now obtained from the stock pile at the south end of Miraflores Locks.

Church Notes.

The ladies' auxiliary to the Empire Christian League will hold a public meeting in the chapel on Sunday morning, March 15. The subject for this meeting is "The new America," as outlined in a missionary study text book. There will be special music, and an exercise by the children of the Sunday school. The offering taken will be for special missionary work in the Canal Zone.

The weekly service on Wednesdays at 5 p. m., at St. Luke's Hospital chapel, will continue throughout Lent. The services of the church on Sundays are, as follows: On the first and third Sundays in the month, divine service, with celebration of the Holy Communion, at

10 a. m.; on the second and fourth Sundays, celebration of the Holy Communion at seven a. m., and morning prayer, with litany and sermon, at 10 a. m. Since the establishment of the church on January 3, 1908, the doors have always been open, and those desiring to spend time in private devotions are welcome to enter at any hour in the day or evening. Library hours are Wednesday afternoons from 4.30 to 5 o'clock.

Shrine Ceremonial.

Jerusalem Temple, A. A. O. N. M. S. of New Orleans, La., has been granted a dispensation to hold a ceremonial on the Isthmus, by the imperial potentate, Noble William W. Irwin, who visited the Isthmus with Osman Temple on last Labor Day, when a shrine ceremonial was conducted in Miraflores Locks. Jerusalem Temple will hold its ceremonial soon after the closing of the consistory reunion, and full details of the ceremonial will be furnished by the general committee, which is expected to arrive on the Isthmus, March 19.

The steam launch *Louise* leaves the landing at Balboa for Taboga Island at 9.50 a. m., on Tuesdays, Thursdays, and Saturdays, and returns from there as soon as possible after the unloading and delivering of supplies.

OFFICIAL CIRCULARS.

Charge for Wrecking Crane at Dry Dock Shops.

CULEBRA, C. Z., March 7, 1914.

CIRCULAR No. 169-S:

The following rates will be charged for the service of the wrecking crane operated by the dry dock shops at Cristobal:

Per hour.

For departments and divisions of the Commission and the Panama Railroad Company..... \$3.00
For individuals and companies..... 4.50

The above rates to cover operation of crane and salaries of engineer and fireman. If other labor is required, it should be charged for additionally, with the following surcharges:

Departments and divisions of the Commission and the Panama Railroad—Gold labor, 25 per cent; silver labor, 10 per cent.

Individuals and companies—Gold labor, 40 per cent; silver labor 15 per cent.

H. F. HOOGES,

Acting Chairman and Chief Engineer.

Accountable Officer for Mechanical Division.

CULEBRA, C. Z., February 28, 1914.

CIRCULAR No. 529:

Mr. D. C. Nutting, superintendent of the Mechanical Division, is hereby designated an accountable officer of the Isthmian Canal Commission, effective March 1, 1914, and as such will make return for all property of the Mechanical Division for the period ending June 30, 1914.

H. F. HOOGES,

Acting Chairman and Chief Engineer.

Repairs Affecting Telephone and Signals Department, P. R. R.

PANAMA RAILROAD COMPANY,
OFFICE OF GENERAL SUPERINTENDENT,
COLON, R. P., March 4, 1914.

G. S. BULLETIN No. 53:

All concerned—When it becomes necessary to make any changes in track, or alignment of track, within the limits of any interlocking plants, the telephone and signals department must be notified, in order that it may take care of its apparatus.

Should it be necessary to do any emergency work in any territory protected by a signal of any type, the signal must be allowed to assume its stop aspect, and must not be tied to its proceed position under any circumstances.

In the event emergency work must be done, immediate steps should be taken to notify the telephone and signals department, in order that repairs may be made at once, or the signal covered by bulletin and placed out of service temporarily.

F. MEARS,

General Superintendent.

Change in Labor Train Schedule.

BALBOA, C. Z., February 26, 1914.

TRANSPORTATION BULLETIN No. 63:

Effective Monday, March 2, 1914, labor trains Nos. 136 and 137, I. C. C. timetable No. 1, will be annulled, and effective this date until further notice, labor trains No. 135 and 142 will run through to Empire on the following schedule, entering and leaving the Panama railroad main tracks at Corozal station, on account of moving Empire shops to Balboa:

Southbound.		Northbound.	
135	Station.	142	
Leave		Arrive	
A. M.		P. M.	
5.55	Empire	5.57	
6.00	Culebra	5.52	
6.05	Rio Grande	5.47	
6.18	Paraiso Junction	5.37	
6.20	Pedro Miguel	5.34	
6.29	Corozal	5.25	
6.40	Yard office	5.15	
6.42	Building 28	5.13	
6.45	Building 2	5.10	

These trains will not stop at Diablo and Miraflores. Schedule of train No. 128 will be set back five minutes, leaving East Balboa at 5.20 p. m., and arriving at Empire at 6.05 p. m.

W. J. HOLMES,

Superintendent of Transportation.

Labor Train out of Corozal.

BALBOA, C. Z. March 3, 1914.

All Concerned—I have arranged to restore labor train, leaving Corozal at 6.10 a. m., and arriving at Balboa terminals at 6.20 a. m., effective, March 4, 1914.

W. J. HOLMES,

Superintendent of Transportation.

LOST—Membership pin, American Society of Mechanical Engineers, presumably on February 27, either in administration building, Culebra, on train between

Panama and Culebra, or between Tivoli Hotel and Panama railroad station, Panama. Finder please return to F. C. Nichols, Hotel Tivoli, Ancon, C. Z.

Supplies for the Canal.

The following steamers, with supplies for the Isthmian Canal Commission and Panama railroad, arrived at the ports of Colon and Cristobal during the week ending March 7:

Cristobal, March 1, from New York, with 10 steel couplers, for Dredging Division; 120 cases electrical machinery, one electric towing locomotive, for First Division; six cases electrical machinery, for Mechanical Division; 50 bars steel for Quartermaster's Department; 70 rolls fence wire, for permanent buildings; 60,020 bags cement, 88,800 pounds coke, 220,500 pounds coke, 10 rolls copper wire, 12 barrels tar, 22 packages plumbing fittings, for stock; and a miscellaneous cargo, the whole consisting of 60,374 packages, weighing approximately 3,197 tons.

Prinz Eitel Friedrich, March 2, from New York, with one case electrical material, one case hardware, for stock.

Colon, March 3, from New York, with 98 crates roofing tile, for Division of Municipal Engineering; 75 barrels plaster, 755 bags sawdust, for permanent buildings; eight cases electrical machinery, for Mechanical Division; 525 bundles roofing paper, 110 barrels pitch, for Second Division; 46 bundles steel bars, 13 barrels electrical fixtures, for fortifications; 20 bundles galvanized wire, for Sanitary Department; 360 crates roofing tile, for First Division; 12 boxes stove polish, 34 boxes graphite, 20 boxes candles, 19 crates lead pipe, 10 bales rubber hose, 80 range boilers, 408 coils rope, 1,097 bales hay, 23 packages miscellaneous material, five crates lead pipe, 22 coils lead pipe, for stock; and a miscellaneous cargo, the whole consisting of 4,267 packages, weighing 305 tons.

Metapan, March 4, from New York, with 12 crates asbestos roofing, for fortifications; 186 rolls wire reinforcement, for permanent buildings; 429 pieces bridge iron, for Division of Municipal Engineering; four manganese steel bucket lips, for Dredging Division; two reels wire rope, 14 cases magnesia boiler lagging, 100 boxes concentrated lye, for stock.

Laila, March 4, from Philadelphia, with 2,491 cases explosives, for stock.

Abangarez, March 5, from New Orleans, with 668 pieces cast iron water pipe, for Department of Municipal Engineering; two boxes electrical material, 247 pieces yellow pine car lumber, for Mechanical Division; 13 packages armament material, for fortifications; 120 bags daily feed, four pieces ash lumber, for stock.

Stages of the Chagres River, Gatun Lake, and Miraflores Lake.

75th meridian time.

LOST—By Lady Gorell, about February 23, at Colon between the Hotel Washington and the Royal Mail pier, a red leather wallet containing valuables. Any one returning same, with contents intact, to the British Consul, Colon, will be suitably rewarded.

COMMISSION CLUBHOUSES.

Activities of the Young Men's Christian Association.

GENERAL.

Moving picture dates for the week March 16 to 21 are, as follows: Monday, Cristobal; Tuesday, Gatun and Balboa; Wednesday, Corozal; Thursday, Culebra; Friday, Empire; Saturday, Pedro Miguel.

Walter Eccles and the Four College Girls are due to arrive on the steamship *Panama* on March 15. The following is a schedule of their concerts at the various clubhouses: Monday, March 16, Corozal; Tuesday, Culebra; Wednesday, Empire; Thursday, Pedro Miguel; Friday, Cristobal; Saturday, Gatun; Monday, March 23, Balboa; Tuesday, Corozal; Wednesday, Empire; Thursday, Pedro Miguel; Friday, Culebra; Saturday, Porto Bello; Monday, March 30, Cristobal; Tuesday, Gatun.

The total membership of the clubhouses on February 28 was 1,785, which is the largest since October 31, 1913, when the total reached 1,794.

Special moving picture reels showing scenes enacted during the recent visit of the Shriners are expected shortly, and will be exhibited in the clubhouses.

The standing of the bowling teams, March 7, was, as follows:

	Won	Lost	P. C.
Empire.....	8	4	.667
Culebra.....	7	5	.583
Cristobal.....	5	4	.556
Pedro Miguel.....	6	6	.500
Corozal.....	5	7	.417
Gatun.....	4	8	.333

BALBOA.

About 100 people attended the moving picture show at the clubhouse last Friday night, which consisted of "Ivanhoe" a 3-reel feature film, and "Tigris" a 4-reel feature. Schaeffer and McMahon of Corozal furnished special music during the evening. This is the largest attendance, so far, at a moving picture show at the Balboa clubhouse.

W. Skinner is leading in the pool tournament which closes next Saturday night, having won six games and lost none. S. T. Smith, who was second, having won six games and lost one, is in the hospital.

Mr. Dewey of Gatun, the expert pool player, will play an exhibition game with two of the best Balboa players on Friday night, March 13, at 8 p. m. All the men of Balboa are invited.

There will be a checker tournament on Friday, March 13. Mr. Barte of Cristobal will undertake to play six players of Balboa at one time.

New records have been received for the phonograph. A new oil stove have been received. Coffee and sandwiches will be served every day after 2 p. m.

COROZAL.

High scores in duckpins for the past week were, as follows: Davis, 110, 111; Parkis, 102; King, 119, 101, 119, 105; Sims, 109, 112; Reagan, 110; Ruggles, 108, 101; Webb, 114.

Corozal won two of the three games rolled with the Empire team on Thursday, March 5. The results were, as follows:

Empire.	Corozal.
Barrett..... 101 89 108	Davis..... 90 91 84
King..... 89 96 88	Steel..... 85 120 95
C. Sims..... 95 90 97	A. Sims..... 79 83 88
Poter..... 91 101 108	Lowanda..... 105 97 83
Gustaveson..... 82 104 110	Parkis..... 100 107 94
458 480 511	459 498 446

CULEBRA.

The following high scores were bowled during the week: Seeley, 115, 100, 105; Barnes, 100; Kiernan, 108; Ferguson, 100, 104; Schmeck, 100, 100; Case, 111, 101.

An extra moving picture show, with "Keystone" and "Bunny" films, was held on Wednesday, March 4.

PEDRO MIGUEL.

An order for new books has just been sent to the United States. Eighteen persons have joined the library to date.

The total membership is now 142. Sixteen of these are members of the boys' department. Of this total, only 30 are residents of Paraiso. It is expected that when the brake service is instituted many more of the Paraiso residents will join the clubhouse.

The pressing club will soon be in operation, when members may have their pressing done at the rate of \$1 for two suits, or \$1.50 for four suits, each month. Suits will be called for and delivered by the attendant. The rates for nonmembers is \$1 a suit.

The first session of the class in first aid to the injured will be held under the leadership of Doctor Gibson, the district physician, on Friday evening, March 13. The course is free to all members, and consists of lectures on anatomy, physiology, hygiene, bandaging, and elementary first aid.

Fifteen representatives from the various towns on the Isthmus met at the local clubhouse on Sunday

afternoon, March 8, to discuss the work of perfecting the organization of the Union Church of the Canal Zone. Residents of Pedro Miguel desiring to know more about this organization may obtain information from the Y. M. C. A. secretary. For those residing in Paraiso, information can be obtained from Mr. I. W. Pickett. It is desired to secure enough support to the movement to warrant the employment of one or more pastors for the Zone.

A meeting will be held on Thursday evening, March 11, for men and women interested in the organization of a study club. The outline for the course of study will be drawn up at that time. The study will be along the line of evolution, and will bring in various branches of biology and nature study, later taking up the evolution of religion. All those interested are invited to join the club.

The gymnasium classes are popular with the boys and girls. Classes for men will be started as soon as sufficient interest is manifested in the work.

The local duckpin bowling team lost two out of three games on Saturday evening, to the Cristobal team.

EMPIRE.

The local duckpin bowling tournament, which has been in progress for the last month and a half, was closed on February 27. Twenty-seven men took part in the tournament, which resulted, as follows: High doubles, Gustaveson and Sims, 611; single high score, C. A. Sims, 133; high average, C. A. Sims, 94.5.

The chess match between the Empire and Culebra teams, played on February 27, took place at Empire, the Empire team winning four games, and the Culebra team two.

Reserved seats for the Walter Eccles and the Four College Girls' entertainment on March 18, will be on sale on Monday, March 16.

GATUN.

The fourth anniversary celebration of the Gatun Y. M. C. A. was celebrated by a series of four entertainments, as follows: Wednesday, March 4, "Smoker"; Thursday, March 5, formal exercises; Friday, March 6, motion pictures; Saturday, March 7, gymnasium exhibition.

The program at the "Smoker" was, as follows:

Part I.

1. Opening selection.....Gray's Orchestra
2. Black face sketch....."Honey Boy" Evans
3. Irish comedy.....Richard Roberts
4. Piano solo.....C. C. Pearsall
5. Soprano songs.....Mrs. J. L. Caldwell
6. Bass solo.....Louis Cantor
7. Violin solo.....Signor Silla Bartocini
8. Selection.....Y. M. C. A. Glee Club

INTERMISSION.

(Refreshments and cigars)

Part II.

1. Pittsburgh Music.....Roland Thompson
2. Trapeze and contortion acts.....Arenilla
3. "Organ" selections.....Prof. Kanalonowski
4. "Stunts," wise and otherwise.....Brittin and Cantor
5. "High class" music (?) etc., Gerchow, Wright, Conkerton, Thompson.
6. Juggling.....T. L. Brennan
7. Closing selection.....Gray's Orchestra

The program at the formal exercises and reception, was, as follows, Lieut.-Col. Wm. L. Sibert, chairman of the executive council, presiding:

1. Opening selection.....Gray's Orchestra
2. "The Winter song".....Y. M. C. A. Glee Club
3. Violoncello solo.....Signor Graniello
4. "Four years".....Secretary F. G. Smith
5. Soprano solo.....Mrs. A. C. Arthur
6. "Greetings".....From old time friends
7. Address "Brotherhood".....Mr. Chas. M. Branson
8. Trio—cello, violin and piano.....Signor Graniello, Bartocini, and Mr. Pearsall.
9. Closing selection.....Gray's Orchestra

An informal reception was held at about 9.45 p. m.,

during which there were refreshments, music, games, and a photographic exhibition.

The program at the music and motion picture entertainment on March 6, was, as follows:

1. Pictures.....First reel
2. Songs.....Roland Thompson
3. Pictures.....Second reel
4. Piano solo.....Mrs. E. S. Randolph
5. Pictures.....Third reel
6. Comedy.....Thompson and Gerchow
7. Pictures.....Fourth reel
8. Piano solo.....Mrs. E. S. Randolph
9. Slides and pictures.....Fifth reel

The program at the gymnasium exhibition and games on March 7, under the direction of Mr. Arvid N. Kjellander, physical director, were, as follows:

1. Bar bell drill.....Junior gymnasium class
2. Folk dancing—"Clap dance".....Girl's gymnasium class
3. Dumb bell drill.....Senior gymnasium class
4. Folk dancing—"Vasuvien".....Girls' gymnasium class
5. "Pyramids".....Men and boys
6. Row dance.....High school girls
7. Fencing exhibition.....Mr. Russell and Lieut. Wilbur.
8. Basketball game.....Empire vs. Gatun.

The executive council of the association consists of the following: Lieut.-Col. Wm. L. Sibert, chairman, Dr. A. G. Farmer, J. T. Smith, W. C. Gayer, and B. B. Dumville. Frank Gardner Smith is secretary, and Arvid N. Kjellander, physical director, of the Gatun association.

CRISTOBAL.

Judge Frank Feuille gave comparisons between Spanish and American law before the discussion club on Tuesday night, March 5, stating that the fundamental difference is, that Spanish law is based on authority from the Crown, while American law is based on the common law of England and other additions as the American people in their experience have found necessary. This results in the Spanish-speaking people taking their laws literally, while the American people look to the spirit of the law.

Twenty-eight boys enjoyed the trip to Caño saddle on Saturday, March 7. Wrestling was the principal diversion en route, with a swim in Gatun Lake on reaching destination.

A large audience greeted Mr. W. J. Price at the second monthly Sunday afternoon meeting on March 8. Mr. Price emphasized the necessity of sympathy, application, and earnestness in the formation of character. Mr. Max Thompson, manager of the Hotel Washington, sang two numbers.

Lieutenant Edwards, in command of the submarine flotilla, will address the discussion club on Thursday, March 19.

The Culebra volleyball team plays at Cristobal on Saturday, March 21.

Mr. C. M. Bullard has resigned charge of the bowling alleys after continuous service since December 1, 1909. Messrs. W. Russell and G. R. Farr are now in charge of the alleys on alternate nights.

House 83 defeated House 84 in an indoor baseball game, by a score of 15 to 11, on Monday night, March 2.

Movement of Vessels, Port of Balboa.

The following ships arrived at, or departed from, the port of Balboa during the week ending March 7:

Arrivals—March 1, *Santa Rita*, from Port Harford, Cal.; March 2, *Ucayali*, from Callao, Peru, from Callao; March 4, *Quilo*, from intermediate ports; March 6, *Chile*, from Guayaquil; March 7, *City of Para*, from San Francisco.

Departures—March 2, *Puchitea*, to Callao, Aysen, to Valparaiso; March 3, *Santa Rita*, to Port Harford; March 6, *Ecuador*, to Guayaquil.

WEATHER CONDITIONS, CANAL ZONE, FEBRUARY, 1914.

Dry season weather continued throughout the month. The rainfall in the Canal Zone and vicinity was everywhere below normal. Monthly totals at the regular stations ranged from 0 at Balboa and Miraflores to 2.20 at Porto Bello. The maximum precipitation recorded in one day was .85 inch at Monte Lirio on the 1st.

The air temperature and wind movement were above the February averages at all stations, while the relative humidity, cloudiness, and atmospheric pressure were generally deficient. No fogs were observed at either coast station, and few at the interior stations. All fogs lifted, or were dissipated, by 6.30 a. m.

The following table summarizes the weather conditions for the month:

STATIONS.	Press're (reduc'd to mean of 24 hours).	Temperature.						Mean relative humidity.	Precipitation.			Wind.				
		Mean.	Maximum.	Date.	Minimum.	Date.	Total inches.		Station average.	Days of .01 inch or more.	Total movement (miles).	Prevailing direction.	Max. velocity (in miles).	Direction.	Date.

CANAL

RECORD

Volume VII.

ANCON, CANAL ZONE, WEDNESDAY, MARCH 18, 1914.

No. 30.

The Canal Record

Published weekly under the authority and supervision of the Isthmian Canal Commission.

The Canal Record is published free of charge, one copy each to all employees of the Commission and Panama Railroad Company whose names are on the gold roll. Extra copies and back numbers can be obtained from the news stands of the Panama Railroad Company for five cents each.

Address all Communications,

THE CANAL RECORD.

Ancon, Canal Zone,
Isthmus of Panama.

No communication either for publication or requesting information, will receive attention unless signed with the full name and address of the writer.

NOTES OF PROGRESS.

The Panama Canal Organization.

The following assignments to duty and appointments in the permanent organization of The Panama Canal have been announced, effective April 1:

WAR DEPARTMENT.

Col. Harry F. Hodges, Corps of Engineers, U. S. A., at present member of the Isthmian Canal Commission and Assistant Chief Engineer, to remain to complete the work upon which he is now engaged.

Lieut.-Col. Charles F. Mason, Medical Corps, U. S. A., at present Superintendent of Ancon Hospital, to be Chief Health Officer.

Lieut.-Col. George D. Deshon, Medical Corps, U. S. A., to be Superintendent of Ancon Hospital.

Capt. Daniel W. Harmon, Medical Corps, U. S. A., and First Lieut. Henry P. Carter, Medical Corps, U. S. A., to be health officers at Colon and Panama.

NAVY DEPARTMENT.

Civil Engineer Harry H. Rousseau, U. S. N., at present member of the Isthmian Canal Commission and Assistant to the Chief Engineer, to remain to complete the work upon which he is now engaged.

Capt. Hugh Rodman, U. S. N., at present Chairman of the Board of Local Inspectors, to be Superintendent of Transportation.

Naval Constructor Daniel C. Nutting, Jr., U. S. N., at present Superintendent of the Mechanical Division, to be Superintendent of Shops and Dry Docks.

Commander Douglas E. Dismukes, U. S. N., and Lieut. Commander H. V. Butler, U. S. N., to be captains at the terminal ports at Ancon and Cristobal.

CIVIL APPOINTMENTS.

The following appointments have been made by Col. Geo. W. Goethals, Chairman and Chief Engineer of the Isthmian Canal Commission:

Auditor—H. A. A. Smith, at present Examiner of Accounts.

Paymaster—J. H. McLean, at present Disbursing Officer.

Collector—T. L. Clear, at present Assistant Examiner of Accounts.

Executive Secretary—C. A. McIlvaine, at present Chief Clerk to the Chairman and Chief Engineer.

Attorney for the Government in land claims, and to codify laws—Frank Feuille, at present Counsel and Chief Attorney.

RELIEVED FROM DUTY WITH THE CANAL COMMISSION.

Col. John L. Phillips, Medical Corps, U. S. A., Assistant Chief Sanitary Officer (now Acting Chief Sanitary Officer), is relieved from duty with the Isthmian Canal Commission, and has been directed to proceed to the United States, and report to the Adjutant General of the Army.

Excavation for Miraflores Spillway Discharge Channel Completed.

Excavation of the settling basin below the ogee of Miraflores Spillway dam was completed on Thursday, March 12, and surveys are being made by the hydrographic division of the completed discharge channel to determine its theoretical capacity and the liability of flooding the Miraflores power station if all the eight gates of the spillway were opened at one time.

The new pile trestle for railway communication across the channel is advancing from the east side. As the trestle will cross the site of the present trestle, which is six feet lower, it is planned to minimize interference with traffic by building the new trestle from both sides toward the center and completing the connection over the present trestle by the use of two piledrivers in rush work on some Sunday or holiday.

One of the two steamshovels formerly engaged in the settling basin excavation has been transferred to the east side of Pedro Miguel Lock, where it is to be engaged about 10 days in reducing elevations adjacent to the backfill. The spoil in being used for raising part of the backfill, near the lower end of the lock chamber, to even grade.

Abandonment of Silver Quarters, West Side of the Canal.

Placards will be printed and posted shortly, notifying silver employees that the labor train service on the west side of the Canal may be discontinued about July 1. In anticipation of this event, all silver employees residing at Las Cascadas, Empire, and Culebra, will be called upon to make other arrangements for quarters. Early notice is given, in order that the employees may have plenty of time in which to make their preparations, for while it is thought there will be about 400 apartments available for the silver force at La Boca by the end of May, these will be insufficient to take care of all of the silver men that will be employed in the Balboa shops and at nearby points at that time, and some of them will have to find quarters temporarily at least, in Panama.

It will probably be about July 1 before the

last of the gold shop employees now occupying quarters at Empire can be given assignments at Ancon, Balboa, or Corozal. The moving of the general office force at Culebra, and of the employees in the offices of the Examiner of Accounts and Disbursing Officer at Empire, will probably take place some time in June, or July, but it may be necessary to operate a labor train for the gold employees from Culebra to Balboa for a while after that date, because of the lack of sufficient gold quarters in the three American settlements near the Pacific terminus.

Arrival of Dredge "Gamboa".

The new 15-cubic yard dipper dredge *Gamboa*, the first of two identical vessels for which contract was awarded in January, 1913, to the Bucyrus Company, arrived in Colon harbor in the forenoon of Sunday, March 15. It had sailed, in tow of the tug *M. E. Luckenbach* from Port Richmond, New York, on February 17. The trip consumed 26 days, and owing to the rough weather experienced during the entire passage, the tug had to proceed at greatly reduced speed, at times only enough to maintain seaway.

For safety in handling at sea, the heavier parts of the machinery were shipped knocked-down, and the boom and two dippers had been forwarded on a vessel of the Panama Railroad Steamship Line. A construction supervisor in the employ of the contractor arrived on the Isthmus on March 9, on the steamship *Advance*, to supervise the reerection of the machinery. The second dredge, the *Paraiso*, has not left the yards of the contractor. A description of these dredges was published in THE CANAL RECORD of February 5, 1913.

The dredge was given inspection on its arrival; on Tuesday evening, March 17, it was locked up to the Gatun Lake level, and on Wednesday forenoon, it was taken through the lake in tow of a tug. The tug *M. E. Luckenbach* sailed from Colon for the United States on Tuesday, March 17.

Dredge "Corozal" Dry Docked at Gatun Locks.

The dredge *Corozal* was taken to Gatun Locks on Tuesday, March 17, and docked in the upper lock of the east chamber, where the submarines are now dry docked. Bilge blocks were placed on the floor of the chamber, and the hull of the vessel rests on these. This step was made necessary by damage caused by an explosion of the vessel's oil tank about 9 p. m., on Wednesday evening, March 11. The oil was nearly all drained from the tank at the time, in the work of lightening the vessel, and the accident is thought to have been due to an explosion of gas in the tank, although the latter is provided with a vent pipe.

Mr. C. W. Fisher, superintendent of erection in the Mechanical Division, has made an investigation as regards the repairs necessary.

The docking of the vessel has shown that the extent of the damage is considerably greater than was at first supposed, and that it will be necessary to remove the hopper doors from the fuel tank and completely rebuild the tank, as well as portions of the vessel immediately adjacent to it.

The *Corozal* had too great a draft to permit it to be dry docked at Cristobal, so the plan of docking it in Gatun Locks was decided on. The work of making the necessary repairs will be continued day and night until completed, and the men from the dry dock shops employed on it are working in two shifts of 12 hours each. The repairs for which the vessel was originally brought to the dry dock had been about completed at the time of the accident. Advantage will be taken of its present position to clean and repaint the hull.

Reduction in Number of Locomotive Engineers.

Effective at the close of business on March 18, the force of locomotive engineers in the Transportation Department (Second Division) of the Isthmian Canal Commission is to be reduced by 10. This follows on a reduction of steamshovel operations on the east and west sides of Miraflores Locks, and at Sosa quarry, in connection with which the work of 13 crews has been terminated. These reductions are made from the foot of the seniority list; in addition, several engineers, most of whom are well up on the list and some of whom have been in service since 1906, have signified their intention of resigning before April 1. On the morning of March 18, the number of locomotive engineers in the Second Division was 87.

Corresponding reductions in the conductors have not been made yet, on account of a shortage, due to sickness and the absence of men on vacation.

Canal Excavation in February.

The grand total of Canal excavation to March 1, 1914, was 218,392,464 cubic yards, leaving 13,960,536 cubic yards remaining to be excavated under the revised estimate of July 1, 1913.

The total excavation for the month of February was 1,430,050 cubic yards, as compared with 1,514,972 cubic yards for January. The wet excavation amounted to 1,168,671 cubic yards, and the dry excavation to 261,379 cubic yards.

In the Atlantic section, the total excavation for February was 345,123 cubic yards, all by dredges. Of this amount, 289,396 cubic yards were removed from the Atlantic entrance by the suction dredges *Caribbean* and *Culebra*, and 55,727 cubic yards were taken out at the coaling basin. The *Culebra*, formerly in the dredging service at the Pacific end, was locked through at Gatun on February 22, and set at work excavating a shoal near Mile 2 in the Atlantic channel.

Of the 795,017 cubic yards excavated in the Central section, comprising *Culebra Cut* and the Chagres territory, all but 115,894 cubic yards consisted of material removed by the dredges or hydraulic monitors. The dry excavation consisted of material taken out by Fourth Division steamshovels on the east bank of *Culebra Cut*, opposite *Culebra* village, in relieving the pressure as a preventive against slides. Of the wet excavation, 421,136 cubic yards were removed by dredges from *Culebra Cut*, including *Cucaracha* slide, 113,437 cubic yards were taken out of

the Chagres River section, and 144,550 cubic yards were sluiced from the rear of Gold Hill, and at *Cucaracha* slide.

In the territory of the old Pacific Division, operations by dredges resulted in the removal of 135,150 cubic yards from the inner harbor, and 9,275 cubic yards from the Pacific entrance. Dry excavation in this section consisted of 30,668 cubic yards removed at Miraflores spillway, 104,488 cubic yards at the terminal site, 6,133 cubic yards from the Rio Grande diversion, and 4,196 cubic yards, charged to "Plant" excavation, taken out in and around the terminal site.

A detailed statement of excavation, and a summary of the work on the locks and dams, follow:

By "Work" excavation is meant excavation actually made for one of the constituent parts of the Canal, such as prism, diversions, locks, etc.; that is, it represents material taken from the area to be occupied by the Canal and constitutes excavation useful for the completed Canal.

By "Plant" excavation is meant excavation outside

any of the constituent parts of the Canal, such as prism, diversions, locks, etc. It includes material necessary to be excavated for construction purposes only, and is chargeable against the particular plant item for which it is performed, such as prism, diversions, locks, etc.

PERSONAL.

Mr. W. W. Warwick, Mr. J. L. Baitz, and Mr. H. A. Harding, constituting the Treasury Committee on Panama Canal Accounting, sailed for the Isthmus from New York on March 13, on the steamship *Ancon*. The members of the committee are accompanied by their wives, and by a son of Mr. Warwick, and a daughter of Mr. Harding.

Dr. Roland C. Connor, formerly district physician at Cristobal, has been appointed chief of medical clinic at Ancon Hospital, effective March 1.

Wreck of the "Cecil."

Information has been received that the collier *Cecil*, reported as overdue in THE CANAL RECORD of March 11, was wrecked on Mariguana Island, one of the Bahama group, situated near the Crooked Island Passage, not far from Watling's Island. The vessel had a cargo of 5,400 tons of coal consigned to the Panama Railroad Company, and it has been reported that probably the greater part of it may be saved. The ship, according to report, will probably be a total loss. It had a gross tonnage of 3,685, and a net tonnage of 2,257. Its length was 335 feet; beam, 48 feet, and it was built at Newcastle-upon-Tyne, England, in 1901, by the Tyne Shipbuilding Company, Limited. The ship is owned by J. Christensen, registered in Bergen, Norway, and was under charter to the Earn Line.

Last Foundation for Balboa Terminal Buildings Completed.

The last pier of the foundation for the proposed office building of the Balboa terminals was completed at 4.30 p. m., Thursday, March 5. The framework of all the 27 other buildings has been completed, and the roofing is in place on all but No. 9, the galvanizing plant, and No. 14, the boiler house, where work has been deferred pending the installation of equipment. The laying of the roof on No. 14 was begun on March 12. The completion of the side walls and rolling steel doors of various shop buildings is in progress.

Five hundred and twenty-nine timber piles have been used to support the foundation of the office building. The walls of the foundation are six feet thick at the base, and stepped-in to a width of two feet at top. The superstructure will be of reinforced concrete, with walls of hollow concrete blocks, and will be three stories in height. It will be erected by the building division of the Quartermaster's Department.

For the present, the offices of the Mechanical Division, in charge of the operation of Balboa shops, are in the 2-story frame structure, formerly occupied by the superintendent of the terminal construction, the latter having vacated this building and moved his offices into the old building which formerly housed the offices of the Pacific dredging forces.

It has been directed that hereafter all official stationery and stock forms printed at the Canal Commission printing plant at Mount Hope bear the imprint, "The Panama Canal, Canal Zone." All stock that may be on hand after April 1 is to be utilized to the best advantage.

SOCIAL LIFE OF THE ZONE.

Meetings of Ancon Study Club.

The headquarters of the Ancon Study Club have been removed from House 31, Ancon, to the quarters occupied by Mrs. Edward L. Luce, House 261, Ancon, near the schoolhouse. Meetings of the club have been suspended since March 12, owing to the death of Mr. Marquis White, the husband of one of the club members; they will be resumed at the new rooms on Thursday afternoon, March 26. The program will consist of papers on the social problem. The mass meeting, which was to have been held at Mrs. White's house on March 12, for the purpose of forming the Panama auxiliary to the Women's Board of the Panama-Pacific International Exposition, will be arranged for at this meeting of the study club, and notice of the date will be announced later.

Immigration Discussed by Ladies of the Empire Christian League.

The ladies' auxiliary to the Empire Christian League held its regular monthly meeting in the chapel, at 11 a. m., on Sunday, March 15. The topic discussed was immigration, or "The new America." The devotional exercises were conducted by Mrs. H. A. A. Smith, and in response to the roll call, the members read selections or references bearing on the topic. In an address of welcome, the president expressed her thanks for the loyalty of the ladies and her appreciation of the hearty cooperation of each member of the organization. Mrs. W. H. Keenan of Culebra read a paper describing the different types of immigrants that have come to America since the first English settlement in 1607, and setting forth the motives which prompted each class to emigrate to the new world. Mrs. W. E. Hoffman of Empire read a paper on "Modern immigration," telling of the work of the Bureau of Immigration under the national government, and the problem confronting the American nation in making law abiding citizens and useful members of society of the thousands of immigrants who land at Ellis Island each day. After a solo by Mrs. Keenan, an exercise was given by the children who were dressed in costumes representing the different countries from which most of the immigrants come. The society hopes to become an important factor in relieving those less fortunate in the Canal Zone, and as a whole, the organization extends an invitation to other societies to join in the effort to improve the condition of the immigrants and to make them useful members of society.

Dedication of Baptist Church in Panama.

The final exercises in connection with the dedication of the new church building of the Baptist church, in the district of Guachapali, Panama, were carried out on Monday evening, March 16. Seated on the platform were the pastor of the church, the Rev. Mr. Thorbourne, Mr. Richard Lee Metcalfe, chairman of the meeting, the Hon. William Jennings Price, American Minister to Panama, the Hon. Ernesto T. Lefevre, Secretary of Foreign Relations, Dr. Julio Arjona, and Dr. C. A. Mendoza. The pastor gave a brief outline history of the beginning of his work here, when as missionary of the National Baptist Convention of Tennessee, he established it in 1908. The new building is located on the site of the first building which

was opened in 1909, and is much larger. The auditorium occupies the second story of the building, and underneath are the schoolroom and social hall. Auxiliary organizations in connection with the church are a Sunday school association, and a Christian Endeavor society.

Church Notes.

The Woman's Altar Guild of the Episcopal Church, Gatun, has disbanded owing to the moving away of so many of its members. The money remaining in the treasury was given to the rector of Christ Church, Colon Beach, who has been chaplain of the guild since its organization. This society was organized solely for the purpose of bringing the women of the church together for corporate communion and monthly meetings, at which members were appointed for the preparation of the chapel for the celebrations of the Holy Communion.

On Easter Monday, April 13, the women of the parish of Christ Church, Colon, will hold an entertainment in the parish schoolroom.

Last Evening Session of the Rebekahs.

Isthmian Canal Rebekah Lodge, No. 1, will hold its last evening meeting in the lodge hall, Empire, on Saturday, March 28. Invitations have been extended to all Odd Fellows and their wives, and all Rebekahs and their husbands. There will be a program, and refreshments will be served, a social hour following. The program will begin at 9 o'clock. The entertainment committee consists of Mrs. S. E. Calvit, Mrs. Janet Martin, and Mrs. Clara Rhodes.

Farewell Entertainments for Colonel Sibert.

The Washington Cotillion Club will give a reception and dance in honor of Colonel and Mrs. Sibert at the Hotel Washington, Colon, on Saturday evening, March 21.

A farewell banquet will be tendered Colonel Sibert and family at the Hotel Washington, on Thursday evening, March 26. The committee in charge invites all friends and acquaintances of Colonel Sibert to be present. The banquet will not be confined to men; ladies also are invited. Tickets, including transportation on special train, may be obtained at any of the Y. M. C. A. clubhouses.

Ancon High School Reception.

The Ancon high school has issued invitations for a reception to be given to the parents and patrons of the high school on Friday afternoon, March 20, from 2.30 to 4.40 o'clock. There will be a musical program, and a one-act play, by the pupils. Refreshments will be served by the school at the close of the program. The Gatun high school has been invited to attend.

Knights of Columbus.

The first and second degrees will be exemplified in Ancon lodge hall, at 9.30 a. m., Sunday, March 22, Panama Council conferring the first, and Cristobal Council, the second. As this is the regular meeting day of Cristobal Council, members are requested to take note of the change.

Results in Tennis Tournament.

Following are the results of the tennis tournament in singles held at Gatun-Cristobal on March 8:

Preliminaries—Culebra defaulted to Ancon Hospital (Dr. Runyan); Camp Otis defaulted to Cristobal (Mr. Poole); Empire (Mr. Hart)

defeated Corozal (Mr. Sawyer), 6-4; 7-5; Gatun (Mr. Wells) defeated Pedro Miguel (Mr. Bartholomew), 6-1; 6-1; Colon defeated Tivoli (Mr. Cross), 6-1, 7-5; Pacific (Mr. Fechtig) defeated Empire, 6-3, 6-4.

Semifinals—Colon defeated Ancon Hospital, 8-6, 6-4; Gatun defeated Pacific, 11-9, 4-6, 6-4.

Finals—Colon defeated Gatun, 6-3, 5-7, 6-3.

Obituary.

Marquis White, an American residing at Ancon, employed as a locomotive engineer in the Second Division, died at Ancon Hospital on Tuesday, March 10. He arrived on the Isthmus July 3, 1905, and for a number of years was in the transportation service of the old Central Division. He was born at Bainbridge, Ga., 35 years ago, and is survived by his wife, and by his father and mother who live at Orlando, Fla. He was a member of the Brotherhood of Locomotive Engineers, and of several fraternal organizations. The funeral took place at St. Luke's Hospital chapel, on Sunday afternoon, March 15, under the auspices of the Masons, Rev. Charles W. Ports officiating. Interment will be at Orlando, Fla.

James M. Turner, formerly a conductor on the Panama railroad, and at one time an employe in the transportation service of the old Culebra Division, died at the home of relatives in Greencastle, Ind., on February 28. He left Ancon Hospital, where he had been a patient since May 26, 1913, on February 7, 1914. He was 57 years of age, a widower, and is survived by a son, Dr. James Turner, and a daughter, living at Grand Chain, Ill. He first came to the Isthmus in 1885, and for two years and six months was a conductor on the Panama railroad. He then returned to the United States, and worked on various railroads until 1900, when he came to the Isthmus again, and resumed his former position with the railroad, continuing in the service for one year and six months. He then went to Cuba, but returned to the Isthmus in 1904, and on December 22 of that year entered the Canal service as a foreman in the old Culebra Division. He was promoted to yardmaster on February 1, 1905, and on April 28 of the same year, was transferred to the Panama railroad as a conductor, remaining there until May 19, 1906, when he separated from the service. He was reemployed by the railroad on January 15, 1907, left the service on December 29, 1909, was again reemployed on January 24, 1910, and continued in the railroad employment until July 15, 1910.

Married.

COLEMAN-SHAW—On March 16, 1914, Edith Shaw of Brighton, Mass., to Albert James Coleman of Cambridge, Mass., the Rev. S. Witt of Gatun officiating. Canal Zone residence, Gatun.

DICKSON-KERKHOFF—At the home of Mr. and Mrs. Gibson, Cristobal, on January 10, Louise Marie Kerkhoff of Jersey City, N. J., to Thomas Happell Dickson of Gatun, the Rev. S. Witt of Gatun officiating. Canal Zone residence, Gatun.

SMITH-MORRISON—At the First Presbyterian Church, Ambridge, Pa., on January 14, 1914, Janet Morrison of Ambridge to E. C. Smith of Ravenswood, W. Va., the Rev. W. I. Kinter officiating. Canal Zone residence, Culebra.

FOUND—In coach at Administration Building, Ancon, recently, one pair of spectacles. Owner can have same upon proper identification at police headquarters, Ancon, Canal Zone.

WORK AT RADIO STATION.

Tower Erection at Darien Station to Begin Shortly.—New Stations at Colon and Balboa.

The preparation of the footings for the 600-foot steel towers of the proposed Darien radio station at Caimito is approximately 55 per cent completed. The first shipment of steel for the towers, for the fabrication and erection of which contract was awarded to the Penn Bridge Company of Beaver Falls, Pa., is expected to arrive on the Isthmus the last of this month, or early in April. The Central American Construction Company has a sub-contract with the Penn Bridge Company for the erection of the towers.

On account of the irregular topography at the site, locating the footings has been a matter of considerable difficulty, and several surveys and readjustments were made before the present situations were recommended. The present location, which was approved by the Navy Department on December, 3, 1913, will place the center of tower No. 1 about 1,500 feet east of the east bank of the Canal; No. 2, approximately 896 feet north of No. 1; No. 3, approximately 765 feet from No. 2, and about 982 feet from No. 1.

Each of the towers will be built in the form of a steep triangular pyramid, with its base in the form of an equilateral triangle, 150 feet on the side. At each corner of the triangle will be a footing of concrete. The depth of excavation for the footings has varied from 12 to 28 feet below the surface of the ground, the greater depths being necessitated by the irregular surface elevations. The concrete bases will be rectangular in plan, 16 by 20 feet, and 10 feet deep.

The building to serve as quarters for the operators has been practically completed, by forces of the Quartermaster's Department of the Isthmian Canal Commission, and the requisition for furniture for this building has recently been approved by the Navy Department. The location and details of the power house, operating buildings, and quarters for the officer in charge are subject to further consideration before final approval.

New radio stations for relatively local use, as compared with the long distance service of the Darien station, are to be erected at Colon and Balboa, and will supplant the ones now in service at those points. Each of them will have two 300-foot steel towers, 600 feet apart. The present wooden masts at Colon are about 200 feet high, and the antennae of the present Balboa station are suspended at an elevation of about 110 feet above the ground, between one steel tower and the stack of the power plant.

The new station at Colon will occupy the same site as the present station, adjoining the east limit of the grounds of Colon Hospital. No decision has been reached as to the site of the Balboa station. A proposed location near the outer end of Dump 5 was found to be within the extreme angle of fire from the fortifications, and the selection of another site in the same locality, but not interfering with the reservations for barracks and for the quarantine station, has been referred to a board of officers.

Panama Railroad Firemen.

The privilege of bidding for runs according to seniority in service, in the same manner as locomotive engineers and conductors, has been withdrawn from the firemen of the Panama railroad service, and they will here-

after be assigned with their engineers. This ruling is made in the interests of efficiency, as the effectiveness of the fireman depends considerably on his relations with the engineer, and, because confusion and friction resulted from frequent changes.

Heavy Cargo Receipts at Balboa.

The cargo receipts at the port of Balboa for the week beginning March 15 are expected to be unusually heavy. The steamship *Peru* of the Pacific Mail Steamship Company arrived from San Francisco on Monday, March 16, with 2,100 tons; the *Santa Cecilia* of W. R. Grace and Company, from North Pacific coast points, with 1,200 piles and 224,000 feet of lumber for the Canal Commission, and the *Mexico* of the Pacific Steam Navigation Company, with 767 tons of general cargo, also arrived on Monday. The *Thor* of the Grace Line is due from the north on March 18, with about 300 piles and 779,000 feet of lumber for the Canal Commission, and the steamship *Ucayali*, from the south, is expected on the same date, with about 1,000 tons of general cargo. The steamer *Louis Luckenbach* of the Luckenbach Line, from San Francisco, is also due on the 18th. Owing to the breaking of its propeller, it is in tow of the *Lyra* of the same line. Each of these vessels is carrying about 4,500 tons of cargo. The *Barracouta* of the Pacific Mail Steamship Company, with 22,600 bags of coffee, is scheduled to arrive from Central American ports on March 20.

Repairing Lidgerwood Cars for East Breakwater Service.

It is estimated that 630 Lidgerwood cars will be required in the transportation of rock from Sosa Hill to the site of the east breakwater on the Atlantic side of the Isthmus. These cars will be drawn principally from those retired from service when steamshovel work in Culebra Cut was closed down in September, 1913. While the best of the cars only will be selected, it is planned to have each one designated for this service overhauled and placed in serviceable condition at the Balboa shops; the cost of the repairs per car will probably range from a few dollars to several hundred, with an average of about \$250. As this will throw a large amount of extra work on the shops, it has been decided to lay two temporary tracks north of the paint and car shops (buildings Nos. 6 and 7), in the open space between these buildings, and the double track paralleling the roadway, for serving the north ends of the two shops; also, to provide an additional spur track in the open space east of the east end of the lumber and equipment shed (building No. 10). The work of installing the tracks has been begun under the direction of the superintendent of the Balboa terminal. In view of the fact that the Lidgerwoods are required for service by July 1, the average output of repaired cars at the shops must exceed five per day.

The earth embankment through Miraflores Lake, between Pedro Miguel and Miraflores, over which the Panama railroad main line passes, will be ripped with large rock. The work will be undertaken by forces of the Fourth Division as soon as the ripping of the embankment at Miraflores spillway is completed, which will be within a few days.

Mr. José Manuel García Cuervo has been appointed consul for the Republic of Cuba at Colon.

EXECUTIVE ORDER

To establish a Washington Office of The Panama Canal, to provide temporarily for the organization, officials, and employes thereof, and to continue in force for The Panama Canal rules, regulations, and Executive Orders which may have been made for the Isthmian Canal Commission.

By virtue of the authority vested in me it is hereby ordered:

SECTION I.

That an office of the Panama Canal is established in the City of Washington in the District of Columbia.

SECTION II.

That the Washington office of the Panama Canal shall be the office of general records in the United States, and shall succeed to the custody, care, and preservation of all the records and files of the Isthmian Canal Commission, to be retained and preserved in the United States on and after April 1, 1914, and shall also succeed to and become chargeable with all property of every kind and character purchased for the Washington Office of the Isthmian Canal Commission, which is on hand April 1, 1914.

SECTION III.

That the Washington Office of The Panama Canal shall be the headquarters and the principal office of the Purchasing Department of The Panama Canal. The head of the Purchasing Department of The Panama Canal, under the direction of the Governor, shall have administrative control of the Washington Office of The Panama Canal. He shall be subject to orders and supervision of the Chief of Engineers of the U. S. Army to such extent as may be directed by the Secretary of War. He shall be General Purchasing Officer for The Panama Canal, and shall also act as the Chief of the Washington Office of The Panama Canal.

SECTION IV.

That until further ordered, the Washington Office of The Panama Canal shall have the same organization as to offices and departments (except the Office of the Assistant Examiner of Accounts and the Disbursing Office) as the Washington Office of the Isthmian Canal Commission shall have on March 31, 1914. The number, class, and salaries of officials and employes in each of the offices and departments, except as hereinafter provided, shall be the same as those authorized for the Washington Office of the Isthmian Canal Commission on March 31, 1914, and any change in the salary of any position, or in the number of positions in any office or department, shall be made only as now provided by law. The officers and employes, except as hereinafter provided, shall perform the same class of duties that they may be assigned to on March 31, 1914.

SECTION V.

That the Assistant Auditor provided for in Executive Order No. 1885, dated January 27, 1914, shall be appointed April 1, 1914. His salary shall be fixed by the Governor. He shall perform such duties of the Accounting Department to be performed in the United States, as may be assigned to him by the Auditor, and also such other duties of a general nature as may be assigned to him by the Chief of the Washington Office of The Panama Canal.

On and after April 1, 1914, there shall be transferred to the Assistant Auditor, and he shall be charged with the custody, care, and

preservation of, all records and property of the Disbursing Officer and of the Assistant Examiner of Accounts of the Isthmian Canal Commission, with which those officers shall be charged on March 31, 1914.

The Chief of the Washington Office may, however, transfer to and place in the custody of the Disbursing Clerk, hereinafter provided for, such of the property and records above described, as he may deem to be essential to enable the Disbursing Clerk to properly perform his duties under this Order, but the Disbursing Clerk shall not be permitted, without specific authority from the Chief of Office, to keep a separate set of records and files. He shall be required to rely upon, and consult, when necessary, the records and files in the office of the Assistant Auditor, in verifying the legality of claims and accounts submitted to him for payment, or to verify the details of any collection for which he is required to account. Disbursements will be made by the Disbursing Clerk only after examination of the claim or account in the office of the Assistant Auditor.

Such of the officers and employees employed in the office of the Assistant Examiner of Accounts and the Disbursing Office of the Isthmian Canal Commission on March 31, 1914, as the Governor determines to retain, shall be transferred to and employed in the Accounting Department in the United States, and their salaries fixed at such amounts as the Governor deems just and reasonable.

There shall be a disbursing clerk for that part of the Accounting Department in the United States, who shall perform similar duties to those that are required to be performed by the Collector and Paymaster on the Isthmus, in so far as there are such duties to be performed in the United States, and shall be subject to the same supervision by the Assistant Auditor, as the Collector and Paymaster on the Isthmus are by the Auditor. He shall give bond in such amount as may be fixed by the Governor, or by his authority.

Such of the officers and employees as are transferred to and employed in the Accounting Department in the United States, shall be distributed between the office of the Assistant Auditor and that of the Disbursing Clerk, respectively, as the needs of the service require. They shall perform such duties as may be assigned to them by proper authority. They shall be subject to similar financial responsibilities, and to the same general rules and regulations that have been prescribed for like officers and employees employed in the Accounting Department on the Isthmus.

It is the purpose of this Order, and it shall be so construed, as to require the Assistant Auditor of The Panama Canal to examine all claims and accounts before their payment by the Disbursing Clerk; to carry on all general correspondence in relation to claims and accounts required to be conducted by the Accounting Department in the United States; to prepare all vouchers and certify to the validity of all claims and accounts before they are submitted to the Disbursing Clerk for payment; to furnish to the Disbursing Clerk all necessary data to enable that officer to make reply to any exceptions that may be taken to his account by the Auditor for the War Department; to keep all general records required to be kept in the Accounting Department in the United States; to make all reports as to statistical data required to be sent to the Auditor on the Isthmus; to give an admin-

istrative examination to all accounts of the Disbursing Clerk before they are transmitted to the Auditor; to make an administrative examination of all claims which are to be submitted to the Auditor for direct settlement; to keep a complete record of all collections to be made and all moneys received by the Disbursing Clerk; to certify to the correctness of the Disbursing Clerk's accounts for collections; to see that bills collectible are issued and collections made in all proper cases; to have charge of all general files which are required to be kept by the Accounting Department in the United States, and to perform such other duties as may be assigned to him by the Auditor, or the Chief of the Washington Office.

SECTION VI.

That any person holding appointment or employment in or under the Washington Office of the Isthmian Canal Commission on March 31, 1914, shall be eligible for appointment to, or employment in a like position in or under the Washington Office of The Panama Canal, created by this Order, and all except those employed in the Accounting Department, will be considered to be transferred and appointed to such like position in or under the Washington Office of The Panama Canal, as of April 1, 1914, without further order or appointment. The oath of office shall be taken by all officials and employees of the Washington Office.

SECTION VII.

This Order shall remain in force as a provisional Order only, for the establishment of the Washington Office of The Panama Canal, until an Order for the permanent organization of such office shall have been made.

SECTION VIII.

All rules, regulations, and Executive Orders, not inconsistent with the provisions of this Order and the Executive Orders of January 27, and February 2, 1914, heretofore made for the Isthmian Canal Commission, and applicable to conditions that will exist under these Orders, shall be and are hereby continued in full force and effect, as rules, regulations, and Executive Orders for the government of officers and employees of The Panama Canal, and the transaction of the business of The Panama Canal.

WOODROW WILSON.

THE WHITE HOUSE,
March 2, 1914.

[No. 1897.]

Ancon Crusher.

Following is a statement of rock crushed at Ancon quarry during the week ending March 14:

DATE.	Hours worked.	Cubic yards.
March 9.....	7.30	2,076

COMMISSION CLUBHOUSES.

Activities of the Young Men's Christian Association.

GENERAL.

The schedule for moving picture entertainments for the week March 23 to 28 is, as follows: Monday, Gatun; Tuesday, Empire and Balboa; Wednesday, Culebra; Thursday, Corozal; Friday, Pedro Miguel; Saturday, Cristobal.

The standing of the teams in the all-Isthmian bowling league, on March 16 was, as follows:

Team.	Won.	Lost.	P. C.
Cristobal.....	8	4	.667
Empire.....	9	6	.600
Corozal.....	10	8	.556
Pedro Miguel.....	6	6	.500
Culebra.....	7	8	.467
Gatun.....	4	11	.267

BALBOA.

Mr. Dewey of Gatun, the expert pool player, defeated R. Johnson and J. Dubendorf of Balboa in an exhibition game at the local clubhouse on Friday night, March 13. The game was close throughout, and there was a large number of spectators. Mr. L. Wheeler of Corozal acted as referee and scorekeeper.

The tables in the pool room are being recovered and equipped with new pockets.

On Friday night, just before the pool match, Mr. Barte of Cristobal played six men at one time at checkers, with the following results: Watson won three and lost one; Smith lost one; O'Hagan lost one; Grund lost one; Delano lost one; Hulsebosch won one and lost one; Heller played a draw, and Montgomery won one and lost two.

The pressing club, which was started on March 1, is doing better than was expected for the first month. Another man will be engaged shortly to take care of the increased work.

A number of Morris chairs and settees have been added to the reading room on account of the increased number of men during noon hour.

If suitable speakers can be procured, a discussion club will be started shortly.

Walter Eccles and the Four College Girls are due here on March 23. Arrangements are being made to have the stage suitably arranged for the occasion, and a number of extra-seats will be procured.

COROZAL.

A "Smoker" was given on Tuesday evening, March 10, with the usual cigars and refreshments, supplemented by home made cakes furnished by the ladies of Corozal. The program follows: Selections by Tenth Infantry orchestra; motion pictures; pianologue by Pearsall; bass solos by Cantor; fencing by Russell and Cantor; juggling by Brennan; intermission and refreshments; comedy sketch, "Wise and otherwise, by Brittain and Cantor; violin solo by Whitehead; sleight of hand feats by Christiansen; contortion acts by Arranilla; wrestling exhibition by Christy and Martinoff.

On Sunday evening, March 15, an open air concert was given by the Tenth Infantry band, on the campus directly in front of the clubhouse. The program consisted of the following numbers:

1. March—*The Federal*.....Sousa
 2. Suite in four parts—*Atlantis*.....Lafranck
 - (a) Nocturne and morning hymn.
 - (b) A court function.
 - (c) "I love thee." (Prince and Anna.)
 - (d) Destruction of Atlantis.
 3. Intermezzo—*Aisha*.....Lindsay
 4. Excerpts from "The sunshine girl".....Rubens
 5. Waltz—*Tousjours au jamais*.....Waldteufel
 6. Popular hits—*Remicks No. 13*.....Arr. by Lampe
- The Star Spangled Banner.

PEDRO MIGUEL.

The membership now totals 149, representing about 60 per cent of the male population of Pedro Miguel.

The first meeting of the glee club was attended by 16 persons. Under the leadership of Mr. Frank Gill, the club promises to be a success.

The study club organized on Thursday evening, March 12, selected for its course of study the evolution of the physical, mental, and spiritual life. The next meeting on Friday evening, March 20, will be devoted to the study of astronomy in its relation to the beginning of life. This topic will be under the leadership of Mr. Ira W. Dye.

The first meeting of the first aid class, under the leadership of Dr. Gibson, was attended by 28 men and boys. The first lesson was devoted to a lecture on anatomy and physiology, covering the structure and functions of the different parts and organs of the human body. This class meets every Friday evening at 7 o'clock, and is free to all members. The lesson this week will be on the different kinds of bandages, and the use thereof. The secretary suggests that every member should avail himself of the privilege of attending this class.

The boys will "hike" on Saturday, March 21, to the

native village of Arraijan, where typical Panamanian town life may be seen.

CULEBRA.

High scores in duckpins for the past week were, as follows: Schmeck, 105; Barnes, 101.

At the Sunday night service on March 15, Rev. J. A. Dunkum officiated. His subject was "Love constraineth us."

Forty new library books, and a Rand-McNally atlas, have been added to the library.

EMPIRE.

The Empire bowling team bowled the Corozal team on the local alleys on Thursday, March 12, and lost two out of three games. Scores:

Empire.	Corozal.
Barrett.....	85 83 96 Davis.....
King.....	106 100 101 King.....
Sims.....	95 78 100 Lowande.....
Potter.....	91 94 101 Steele.....
Gustaveson.....	102 81 85 Parks.....
	Sims.....

Totals.... 479 436 483 452 453 494

A lecture was given on accounting, by Mr. H. A. A. Smith and Mr. Oakey, on Wednesday evening, March 11. Until further notice, these lectures will be given weekly. All are invited to attend.

There will be a return engagement of the Walter Eccles company, the date to be published later.

GATUN.

Corozal defeated Gatun three straight games of duckpins on Saturday evening, March 14.

Mr. and Mrs. M. Conley won first prize in a bowling contest held recently.

Special drum and piano music was furnished at the motion picture entertainment on March 12, by Messrs. Sales and White of Cristobal.

The officers and men of the submarine flotilla, now stationed at Gatun, are invited to make use of the privileges of the clubhouse.

Walter Eccles and the Four College Girls will appear at the Gatun clubhouse, on Saturday evening, March 21. There will be reserved seats for this entertainment.

The following are the prize winners of the handicap pool tournament held during the month of February: First, W. R. Baxter; second, J. W. Ludlum; third, M. Hamill. These men will receive gold, silver, and bronze medals, respectively.

Pictures of the "Smoker" taken at the clubhouse recently are now on sale at 50 cents each.

CRISTOBAL.

Colonel Rothwell, in his lecture on General Booth, on Wednesday night, March 11, referred to the work of the Salvation Army in hospitals, rescue homes for girls, homes for the weak minded, employment agencies for released prisoners, employment agencies for the unemployed, and eating and sleeping quarters where bed and breakfast can be procured for as low as 10 cents.

Nearly every boy in Cristobal and Colon Beach, and 27 fathers attended the "Father and son" supper on Friday, March 13. After a "Dutch" luncheon finished off with ice cream, each boy present gave his name, age, and home address; the fathers also gave their names and home addresses, and were requested to each tell a story. Nineteen states and three foreign countries were represented. At the speakers' stand were Mr. Richard L. Metcalfe, Mr. Charles C. Branson, Mr. Charles E. Wiedman, and Mr. John W. Thompson.

Entries are now open for the monthly single folks bowling tournament, to be held on Monday, March 23.

Cristobal took three games from Culebra in the all-Isthmian duckpin tournament, held on Saturday, March 14. The scores follow:

Culebra.	Cristobal.
Barnes.....	83 85 78 Pinney.....
Koperski.....	84 77 77 Farr.....
Kiernan.....	79 96 89 Collins.....
DeCorra.....	91 94 93 Barte.....
Case.....	84 88 77 Smith.....

Totals.... 421 440 414 434 446 466

Gatun will play duckpins at Cristobal on Saturday, March 21.

Following the volleyball game with Culebra on Saturday, March 21, House 83 will play the "Secret Seven" at indoor baseball.

The Cristobal young men's team athletic contest, which was held on Monday evening, March 9, resulted in a victory for team No. 1. There were 39 entries, the largest in the history of the local clubhouse. These were divided into three teams, and points were scored on the per cent basis. The events were a 100-yard dash (indoor), standing broad jump, running high jump, standing hop, step, and jump, and team relay. F. W. Parker of team No. 1 was the winner of the individual all-around championship with 62.375 points. Following are the winners of the different events:

Standing broad jump—First, Quinn, team No. 2, nine feet; second, Gill, team No. 2, eight feet, 11 inches; third, Bradshaw, team No. 1, eight feet, 10 inches.

100-yard dash, (indoor)—First, tie between Quinn,

team No. 2, and M. Cotton, team No. 1. Time, 13 4/5 seconds. Second, tie between W. Fraser, team No. 2, Russell and Bradshaw, team No. 1, and Farrell and Schradley, team No. 3. Time, 14 seconds.

Running high jump—First, Nash, team No. 2, five feet one inch; second, Parker, team No. 1, five feet; third, tie between W. Fraser, team No. 2, and Purvis, team No. 1, four feet, 11 inches.

Standing hop, step, and jump—First, W. Fraser, team No. 2, 24 feet one inch; second, Quinn, team No. 2, 24 feet one-half inch; third, Parker, team No. 1, 23 feet, nine and one-half inches.

Relay race—First, team No. 2, three minutes, 19 4/5 seconds; second, team No. 1, three minutes, 22 2/5 seconds; third, team No. 3, three minutes, 23 1/5 seconds.

Points—Team No. 1, 479.475 points; team No. 2, 477.545 points; team No. 3, 444.55 points.

The individual standing of contestants was, as follows:

Name.	Team.	Points.	Name.	Team.	Points.
Parker.....	1	62.375	Warburton.....	1	56.500
Nash.....	2	61.975	J. Raymond.....	2	56.300
Quinn.....	2	61.620	Wechsler.....	1	55.805
Purvis.....	1	61.275	Winters.....	2	55.775
Bradshaw.....	1	61.075	Gill.....	2	54.500
Jimenez.....	3	60.575	Moore.....	3	54.350
W. Fraser.....	2	60.050	Bell.....	3	54.125
Farrell.....	3	59.325	Stone.....	3	53.050
M. Cotton.....	1	58.675	Schradley.....	3	53.000
D. Raymond.....	1	58.375	Kaunitz.....	3	52.025
A. Fraser.....	1	58.000	Anderson.....	2	51.850
E. Cotton.....	1	57.735	Consineau.....	2	51.225
Margon.....	2	57.700	J. Gibson.....	1	51.050
Russell.....	1	57.325	Ashton.....	3	49.775
Billett.....	3	56.900	Vaucher.....	2	47.750
Hagan.....	2	56.600	A. Gibson.....	3	45.750

Drew and Tuttle, team No. 1, Jaeger and Schwallenberg, team No. 2, and Hughes, Nicholson, and Barcroft, team No. 3, did not compete.

Supplies for the Canal.

The following steamers, with supplies for the Isthmian Canal Commission and Panama Railroad Company, arrived at the ports of Colon, Balboa, and Cristobal during the week ending March 14:

Nor, March 12, from Baltimore, with 30,000 pounds ferro silicon, for Mechanical Division; five pieces dredge machinery, for Dredging Division; 715 packages steel bolts and rivets, for Second Division; 396 packages chain fender material, for First Division; 7,414 pieces pipe, 168 pieces fittings, 770 sacks oats, 700 kegs paint, 150 pieces (5,046 board feet) maple lumber, for stock.

Pastores, March 14, from New York, with 18 cases steel shutters, for Mechanical Division; 2,436 pieces steel, 40 cases paint, 60 handles shovels, 48 packages miscellaneous material, for stock.

Lost—A set of drawing instruments in coach X-57 in Colon, or Cristobal, on Sunday, March 15, between 6.30 and 7.30 p. m. Reward, if returned to F. D. Hurwitz, Corozal.

OFFICIAL CIRCULARS.

Appointment of Subsistence Officer.

CULEBRA, C. Z., March 9, 1914.

CIRCULAR No. 530:

Effective February 25, 1914, Captain F. O. Whitlock is appointed subsistence officer, vice Lieut.-Col. E. T. Wilson, resigned.

H. F. HODGES,
Acting Chairman and Chief Engineer.

Annulment of Circular No. 529.

CULEBRA, C. Z., March 11, 1914.

CIRCULAR No. 529-A:

Referring to Circular No. 529, reading, as follows: Mr. D. C. Nutting, superintendent of the Mechanical Division, is hereby designated an accountable officer of the Isthmian Canal Commission, effective March 1, 1914, and as such will make return for all property of the Mechanical Division for the period ending June 30, 1914.

The above circular is annulled, and the accountable officers of the Mechanical Division will remain as they were prior to the issuance of this circular.

H. F. HODGES,
Acting Chairman and Chief Engineer.

Requests for Transfer of Equipment.

CULEBRA, C. Z., March 11, 1914.

CIRCULAR No. 370-A:

Effective March 7, 1914, the surveying officer will investigate and make recommendations on requests for transfer of equipment. This supersedes Paragraph 4, Circular 370-D.

H. F. HODGES,
Acting Chairman and Chief Engineer.

Accountable Officer, Department of Civil Administration.

CULEBRA, C. Z., March 11, 1914.

CIRCULAR No. 490-A:

On account of the resignation of Mr. Geo. A. Ninas, chief clerk, Department of Civil Administration, who is accountable officer for all property in use by the Department of Civil Administration, Mr. A. C. Fechtig, storekeeper, Department of Civil Administration, is hereby designated as accountable officer for the property in use in the present Department of Civil Administration, effective as of April 1, 1914. Mr. Ninas will make final return of property as of March 31, and, on final audit and transfer of his accountability, will be given final release by the Examiner of Accounts.

H. F. HODGES,
Acting Chairman.

Signaling at Double Track Wye Connections Between Panama and Balboa.

PANAMA RAILROAD COMPANY,

OFFICE OF GENERAL SUPERINTENDENT,

COLON, R. P., March 12, 1914.

G. S. BULLETIN No. 54:

All concerned—The double track wye connections between Balboa and Panama are considered main line in the scheme of signaling at west leg interlocking. The top arm of the 2-arm home signal, therefore, governs the southward wye track to Panama; the lower arm governs the old main line to Balboa Junction.

F. MEARS,
General Superintendent.

Installation of Gauntlet Track, Miraflores Tunnel.

PANAMA RAILROAD COMPANY,

OFFICE OF GENERAL SUPERINTENDENT,

COLON, R. P., March 12, 1914.

G. S. BULLETIN No. 56:

All concerned—The interlocking plants at north and south cabins will be put out of service at 10 a. m., Saturday, March 14, for the installation of a gauntlet track which will be placed in service at 9.15 a. m., Sunday, March 15. All signals governing trains entering the tunnel from either end will be left in service, and the staff machines will continue to operate the same as in the past until such time as they will be superseded by automatic signals.

F. MEARS,
General Superintendent.

New Main Line Switch to Margarita Point.

PANAMA RAILROAD COMPANY,

OFFICE OF GENERAL SUPERINTENDENT,

COLON, R. P., March 12, 1914.

G. S. BULLETIN No. 55:

All concerned—A new main line switch leading to Margarita Point has been installed about 200 feet north of the southward home signal at Mount Hope cabin. An indicator will be installed at this switch stand within the next few days showing the condition of the tracks as to southward trains. All trains entering the main line at this point must observe this switch indicator in regard to the southward trains, and must observe the southward home signal operated from the Mount Hope cabin as to northward trains.

Until the switch indicator is installed, trains will

protect themselves from southward movements when entering the main line at this point, and they must also have a proceed aspect on the southward home signal at Mount Hope cabin before entering the main track.

F. MEARS,
General Superintendent.

Train Order Signal Taken Out of Service.

PANAMA RAILROAD COMPANY,

OFFICE OF GENERAL SUPERINTENDENT,

COLON, R. P., March 16, 1914.

G. S. BULLETIN No. 58:

All concerned—Effective at 12 noon, Wednesday, March 18, the train order signal on the Gold Hill line, opposite, and operated from Paraiso Junction cabin, will be taken out of service.

F. MEARS,
General Superintendent.

Installation of Duct Line Between Colon and Cristobal.

PANAMA RAILROAD COMPANY,

OFFICE OF GENERAL SUPERINTENDENT,

COLON, R. P., March 16, 1914.

G. S. BULLETIN No. 57:

All concerned—Construction forces will be installing a duct line between Cristobal and Colon, beginning Tuesday, March 17. All trains to run through this territory carefully during the time the excavations are being made under and around the tracks.

F. MEARS,
General Superintendent.

Examinations by Board of Local Inspectors.

BOARD OF LOCAL INSPECTORS,

ANCON, C. Z., March 14, 1914.

The Board of Local Inspectors will conduct examinations at the Administration Building, Ancon, on Wednesday, March 25, 1914, beginning promptly at 2 p. m., for persons desiring the following classes of licenses: Pilots, masters, mates, marine engineers, chauffeurs, and navigators of motor boats. All applicants for licenses must procure from the Executive Office, Ancon, forms of application and information respecting the filling out of the same, not later than the day previous to the examination. In addition, all persons desiring chauffeurs' licenses must provide themselves with automobiles with which to demonstrate their ability to properly operate the same.

NOTE—The demonstration test for applicants for chauffeurs' licenses will be given on Tuesday, the day preceding the regular examination, at 2 p. m., at the Administration Building, Ancon, and on Wednesday, the day of the regular examination, for out-of-town applicants, at 2 p. m., at the Administration Building, Ancon. No demonstration tests will be given at Cristobal, except by appointment.

HUGH RODMAN,
Chairman, Board of Local Inspectors.

Commissary Cold Storage.

No changes are reported in the list of cold storage supplies sold at the commissaries published in THE CANAL RECORD of March 11.

Misdirected Letters.

ANCON, C. Z., March 16, 1914.

Will carry mail for Alabama, Arkansas, Louisiana, Mississippi, and Texas.

Panama Railroad Company's steamers sail from Pier 11, Cristobal, at 3 p. m.

Royal Mail steamers leave for New York on alternate Tuesdays at 2 p. m.; for Southampton, on alternate Tuesdays at 10 a. m.

United Fruit Company's ships for New Orleans direct, leave on Thursdays at 3 p. m.; for New Orleans, via Bocas del Toro and Havana, on Thursdays at 4 p. m.; ships for New York, via Kingston, on Thursdays, at 2 p. m.; for New York, via Limon and Havana, on Sundays at 5 p. m.; for Limon and Bocas del Toro on Saturdays at 4 p. m.; for Bocas del Toro direct, on Thursdays at 4 p. m.; and for Boston, via Port Antonio, on Sundays at 1 p. m.

Hamburg-American steamers sail for New York, via Kingston and Fortune Island, on Tuesdays, at 10 a. m.; the *Prinz August Wilhelm* and *Prinz Joachim* call also at Santiago de Cuba.

CANAL

RECORD

Volume VII.

ANCON, CANAL ZONE, WEDNESDAY, MARCH 25, 1914.

No. 31.

The Canal Record

Published weekly under the authority and supervision of the Isthmian Canal Commission.

The Canal Record is published free of charge, one copy each to all employees of the Commission and Panama Railroad Company whose names are on the gold roll. Extra copies and back numbers can be obtained from the news stands of the Panama Railroad Company for five cents each.

Address all Communications,

THE CANAL RECORD,

Ancon, Canal Zone,

Isthmus of Panama.

No communication either for publication or requesting information, will receive attention unless signed with the full name and address of the writer.

NOTES OF PROGRESS.

Additional Appointments.

The following additional appointments have been made in the permanent Panama Canal organization:

DEPARTMENT OF OPERATION AND MAINTENANCE.

Col. Harry F. Hodges, Corps of Engineers, U. S. A., to be Engineer of Maintenance, and to act as Governor in the absence or disability of the Governor of the Panama Canal.

PURCHASING DEPARTMENT.

Maj. F. C. Boggs, Corps of Engineers, U. S. A., to be General Purchasing Officer, and Chief of the Washington Office.

SUPPLY DEPARTMENT.

Capt. Robt. E. Wood, United States Cavalry, to remain as Chief Quartermaster for the present, and until the organization of a Supply Department.

HEALTH DEPARTMENT.

Passed Assistant Surgeon, Marshal C. Guthrie, United States Bureau of Public Health, to be Chief Quarantine Officer.

ACCOUNTING DEPARTMENT.

Mr. B. F. Harrah to be Assistant Auditor, with headquarters at Washington.

The following nominations have been sent to the Senate by the President:

Mr. W. H. Jackson, at present Judge of the Circuit Court of the Second Judicial Circuit of the Canal Zone, and Associate Justice of the Canal Zone Supreme Court, to be District Judge.

Mr. W. K. Jackson, now Prosecuting Attorney, to be District Attorney.

Mr. W. H. May, now Private Secretary to Colonel Goethals, to be District Marshal.

Last of Dry Excavation for Culebra Cut.

The dry excavation for Culebra Cut will be terminated on March 31, when the three 95-ton steamshovels now engaged in lessening the pressure on the east Culebra slide, north of Gold Hill, will be withdrawn from their pits and made ready for dismantling. The crews of the shovels and of the dump trains which have handled their spoil will be dis-

charged, effective April 1, on account of reduction of force.

Dry excavation at the bottom of the Cut was discontinued on September 10, 1913, on which date 13 steamshovels were engaged on high levels at various points. The number has since been gradually reduced as the work was completed. In the latter part of November, six shovels remained; two of these, on the west bank at Culebra, were withdrawn in December. Since that time, the dry excavation has been confined to the Gold Hill slide. Four shovels were working until the latter part of February, when one was withdrawn. The completion of the dump near New Culebra station, on which the spoil was wasted, and the general condition of the Gold Hill slide, have led to the decision to abandon the use of all the shovels.

Launching of the Pontoon Barge.

The pontoon barge for the permanent crossing of the Canal at Paraiso, which was built on the east bank of the French canal near the Cristobal dry dock shops, was launched on Wednesday, March 25. The launching occurred at about 10.12 a. m., and was a complete success, the whole of the 378-foot length of the barge moving evenly down the ways, with every part of it apparently taking the water at the same time. The momentum carried the vessel well toward the far side of the French canal and it was brought to a stop by lines from the shore. The barge will be taken through Gatun Locks and Gatun Lake, in tow of two tugs, probably on Friday of this week. On reaching Paraiso, a force of men from the shops of the Dredging Division will begin work on the trestle superstructure. As most of the timbers for this purpose are already shaped, it is probable that the trestle work can be completed in about three weeks' time. The Mechanical Division will then make the necessary connections with the bank approaches.

Last Two 1,000-Cubic Yard Barges Arrive.

The last two of the six 1,000-cubic yard steel barges contracted by the Canal Commission from the Maryland Steel Company, arrived at Colon in the forenoon of Wednesday, March 25, in tow of the tug *Rescue*. The tug sailed, with its tow, from Sparrow's Point, Md., on March 7, and the voyage was without particular incident. The first two of the barges arrived at Colon on December 18, and the second two on January 30.

96,000 Bricks Laid in a Single Day.

In the laying of the brick floor of the completed portion of the quay wall at the Balboa terminals, a squad of five West Indian masons, serving in relays, three men working at the same time, with two resting in reserve, laid in one day of 10 working hours, a total of 96,000 bricks. The entire gang, including the white foreman, Mr. Park T. Andrew, and

the men engaged in handling the bricks from the cars, mixing and carrying mortar, etc., consisted of 67 men.

The masons laid the paving between the inner rail of the track along the face of the wharf and the inner coping, a width of 50 feet, over a distance of over 400 feet, covering an area of approximately 20,000 square feet. Counting five men in the squad, each laid at the rate of 1,920 bricks per hour, or 32 per minute; three men being actually at work, the bricks were laid at the rate of 3,200 per man per hour, or 53.33 by each man each minute. The masons were paid 13 cents per hour.

Sosa Hill Quarry Operations Suspended.

Operations at Sosa Hill quarry were suspended at the close of Monday, March 16, and rock for the fill on the Naos Island breakwater will be supplied from the excavation for the dry docks at the Balboa terminals. It is estimated that on March 1 there remained about 292,000 cubic yards of hard rock to be taken from the site for the two dry docks; that this amount will be sufficient for the completion of the breakwater, and that if the Sosa Hill quarry were continued in operation at this time the output from the dry docks would have to be wasted. It is anticipated that operations in the quarry will be resumed about June 1, to supply hard rock for the east breakwater at the entrance to Colon harbor.

One of the two shovels engaged in the quarry has been transferred to the dry dock excavation, where four were previously at work. Excavation in the dry dock site has been carried to over 30 feet below mean sea-level at the lowest point, approximately two-thirds of the final required depth of 45 feet.

Grading East Wing of Gatun Dam.

Forces of the Fourth Division are engaged in grading the north, or downstream, slope of the east wing of Gatun Dam to general evenness and symmetry. Similar work on the lake slope of this wing, and on both slopes of the west wing, has been completed, and the borrow pit in the hills beyond the west end of the dam has been closed.

Red clay is being used in depressions and to grade the crest of the wing at elevation 108 feet above sealevel. This will allow a settlement of nearly three feet and still keep the top above the proposed elevation of 105 feet. Final grading and shaping will be done by the landscape forces. For the present operations, it is estimated that approximately 10,000 cubic yards of clay will be used. This material is being borrowed from a hill to the west of Gatun Locks and southwest of the former storage for rock and sand, used in the concrete of the locks. The borrow pit is in the site of the former village known as Jamaicatown, where foundations of buildings once occupied by the French canal workers are still standing. Some of these have been dug

out by the steamshovel. They are thrown aside, as the material required for the grading is smooth clay, without stones. The clay is handled in 18-yard dump cars, dumping from two tracks, which are handled, in the advance of the filling, by a trackshifter. A total of about 100 men is engaged in the operations.

Fares Collected on Panama-Balboa Train.

The passenger coach on the north, or Panama, end of the Panama-Balboa labor train has been reserved to first-class pay passengers, and fares are collected in the same manner as on main line trains. Gold employees of the Canal Commission, the Panama railroad, and the steamship companies with offices at Balboa, are carried without charge in a labor car next to this coach. This change has been made, because the recent increase in the number of gold employees using the train make it impracticable to provide coach accommodations for all of them, and, because it is necessary to provide first-class accommodations, without undue crowding, for the outside patrons of the line who purchase first-class transportation.

Excavation for Quay Wall Extension.

The ladder dredge *Badger*, recently engaged in slide excavation in Culebra Cut, is now excavating at the site of the former sand wharf at Balboa, for the purpose of clearing away rock fill and piling from the site of the proposed extension of the concrete quay wall at the terminals. This extension is designated as Section e-f, and is directly west of the completed portion of the quay wall. The dipper dredge *Cardenas* excavated a quantity of spoil from the site before its transfer to Culebra Cut, but after 17 of the steel caisson shells had been sunk to rock, it was found necessary to continue the clearing. The *Badger* and claret No. 9 were transferred from Culebra Cut to the Pacific entrance for this work on March 18. Their passage through bridge No. 57½ at Paraiso was effected between the crossing of northbound train No. 42, at about 9.10 a. m., and southbound returning train No. 43, at about 11.10, and caused no delay to either train.

Missing Men.

Any one having information regarding the whereabouts of Mr. David J. Bedall, who is thought to be on the Isthmus of Panama, is requested to communicate with Mr. A. P. Connor, No. 121 Carroll Street, Southeast, Washington, D. C.

Any one having information regarding the whereabouts of Mr. James B. Osborne, who is supposed to be on the Isthmus, is requested to communicate with the American Legation, Panama.

Portable Staging for Plastering Buildings.

Economy in the plastering of the outside of the lengthwise walls of the general storehouse at the Balboa terminals is being effected by means of staging erected on trucks and moved from section to section, in place of tearing down and reerecting the staging as the work advances. The building is about 402 feet long, outside measurement, and will be plastered from one set of staging, 42 feet long, reaching to the eaves, which are about 30 feet above the surface of the ground. The staging has five horizontal bays, on each of which work four plasterers and a helper. Plaster, mixed by a ½-yard portable concrete mixer, is supplied to the bays by means of an elevator,

running up a shaft at the center of the structure. With this outfit, a section 42 feet long receives its first coat of rough plaster in two or three hours, and the rest of the day is devoted to finishing the surface. On the next day, the adjacent section is covered and

finished. It is estimated that this arrangement, in addition to being convenient and expediting the work, will effect a saving of approximately \$1,000 in the cost of scaffolding for the plastering of one side of the building.

LABOR FORCE AND QUARTERS IN FEBRUARY.

The force report for February 25, shows the actual working force of the Canal Commission on that date to have been 26,817; of the Panama railroad, 4,719, and of the contractors, 265, a total effective working force of 31,801, a decrease of 1,818, as compared with the statement for January. The gold force on the Canal work, composed almost exclusively of white Americans, was 3,908, a decrease of 36, as compared with the previous month. A statement of the Canal force, by divisions, follows:

DEPARTMENT OR DIVISION.	SILVER EMPLOYEES*											Total silver.	Total gold.	Grand total.		
	Artisans.					European laborers.		West Indian laborers.

(5) Includes 32 East Indians, eight American citizens, and 54 Panamanians. (6) Includes 25 Coast Artillery and 413 Tenth Infantry men. (7) Includes 16 Asiatics. Gold force of contractors (included above): four families, 101 bachelors.

SOCIAL LIFE OF THE ZONE.

Cristobal Woman's Club.

The subject of the March programs in the Cristobal Woman's Club was government and politics. At the general meeting on Wednesday, March 4, Justice Thomas E. Brown, Jr., spoke on the Government of the United States, and on March 18, papers were read by club members on the Democratic and Republican parties, their formation and development, woman suffrage, its status and outlook, and socialism, a philosophic outline. The meeting on April 1 will be a program meeting. The subject will be announced later. On April 15, the annual meeting will be held, which will celebrate the seventh year of the club's existence.

Church Notes.

The West Indian section of the parish of St. Ferdinand's Roman Catholic Church, Empire, held an entertainment in the parish house on Saturday evening, March 21, in honor of St. Joseph's Day.

The Woman's Altar Society of St. Ferdinand's Church has suspended its monthly card party until after Easter. It is probable that an entertainment similar to the euche parties that have been held during the year will be arranged to take place in the parish house in April.

High School Reception.

The Ancon high school held its first entertainment and reception for the year at the schoolhouse on Friday afternoon, March 20. Parents and friends of the students and faculty were present. The assembly hall was decorated with palms and branches of bougainvillea. At the close of the program, ice cream and cakes were served by the pupils of the school. The program was, as follows: Chorus.....Ancon high school Dance, three girls of Gatun high school, assisted by Annie Lollan '17; Mary Sibert, '17; Miss Charlotte Rowe '17, and Maud Chester, '17.

Violin solo.....Helen Swinehart, '16 Piano duet.....Marion Blake, '14; Dorothy Magnuson, '14.

Resumé of the events of the year in the high school.....Joe Udry, '14 Chorus.....Ancon high school Vocal solo.....Margaret Griley, '16 Address.....Mr. A. R. Lang, Superintendent of Schools. One-act play, "Six cups of chocolate"—Dorothy Magnuson, '14; Blossom Compton, '14; Mildred Herman, '17; Gladys Mergendoller, '15; Esther Francis, '15; Eleanor Comber, '14.

Song—Star Spangled Banner.....The high school President of the day...Eva Swinehart, '14, class senior

Farewell Banquet for Lieutenant Colonel Sibert.

The committee on arrangements for the farewell banquet to be given Lieut.-Col. W. L. Sibert at the Hotel Washington, Colon, on Thursday evening, March 26, at 9 p. m. is, as follows: Dr. A. G. Farmer, chairman; Frank Gardner Smith, secretary and treasurer; C. W. Duey, H. B. Furlong, W. C. Gayer, J. Fred Huber, T. W. MacFarlane, H. M. Reid, B. F. Sisson, and C. E. Wood. Justice Thomas E. Brown, Jr., will act as toastmaster, and music will be furnished by Gray's orchestra. A special train will leave Bas Obispo on the evening of the banquet at 5.45, run to Panama, thence to Colon, stopping at all stations, and returning, will leave Colon at about 12 midnight. The tickets, which include transportation, will be \$3 each, and may be obtained from any of the Commission clubhouses, from any member of the committee, or from the following: Harry Allen, R. E. Snedcker, J. J. Fitzpatrick, E. S. Waid, J. H. Stevenson, J. D. Daly, C. O. Jones,

F. H. Wang, John Kiernan, Lieutenant Wilbur, C. O. Carlson, Arthur Kenny, Isaac Andrews, R. M. Gamble, Geo. A. Barte, W. H. Greene, Tim Donahoe, M. Nolan, and F. G. Swanson.

Closing of Schools for Easter Vacation.

The Canal Zone schools will close for the Easter vacation at the conclusion of the afternoon session on Friday afternoon, April 3, and will reconvene on Monday, April 13.

Tennis Tournament.

Following are the results of the tennis tournament, in doubles, held at Empire-Culebra on March 22:

Preliminaries—Corozal (Neely and Sawyer) defeated Empire (Smith and Hart), 6-2, 7-5; Gatun and Cristobal defaulted to Ancon Hospital (Fessler and Erbe); Pacific (Fechtig and Pearman) defeated Culebra (Malsbury and Van Zandt), 6-1, 6-3; Pedro Miguel defaulted to Tivoli (Edwards and Ohlson); Pacific defeated Camp Otis (Swartz and Stewart), 6-1, 6-4.

Semifinals—Corozal defeated Ancon Hospital, 6-4, 6-2; Pacific defeated Tivoli, 6-2, 6-3.

Finals—Pacific defeated Corozal, 6-8, 6-0, 6-4.

The next association tournament will be the "All comers' doubles," and will be held at Ancon on April 10 and 12. The tournament is open to all members of clubs affiliated with the association. The entrance fee for this tournament is \$1 for each team, and must be in the hands of the secretary-treasurer, E. F. Ohlson, Ancon, not later than April 7, when the drawing will be made.

Civil Service Examinations.

Examinations will be held, probably on May 3, for the positions of stenographer and typewriter, Isthmian Canal Service; stenographer and typewriter, Philippine Service; and typewriter, Isthmian Canal Service. Applications will not be received after April 7; this date may be changed if necessary. Persons interested should request a copy of Form 1424, which contains information in regard to the abovenamed examinations.

The examinations will be held probably in the Commission clubhouse at Empire, but the place and date should be omitted in applications.

A card of admission will be sent to those found eligible to be admitted, just before the examination.

Competitors in the abovenamed examinations must bring their own typewriting machines to the examination room.

In answer to the questions as to residence, applicants must show residence in a State or Territory in the United States, and county thereof, up to the time of filing application.

ISTHMIAN CIVIL SERVICE BOARD.

CULEBRA, C. Z., March 21, 1914.

Verdict of Acquittal in the Case of C. B. Winn.

The trial of C. B. Winn, an American employed by the Panama railroad as a foreman at the Balboa freight wharf, on the charge of assault with intent to do great bodily harm, took place in the Circuit Court of the First Judicial Circuit at Ancon, on Monday, March 23, Judge H. A. Gudger presiding. The man whom Winn was charged with assaulting was Alfred Meade, a West Indian dock employee. The defendant requested a jury trial in accordance with the Executive Order made

effective July 4, 1913. The arguments were completed and the case given to the jury about 11 a. m. on Monday; a verdict of acquittal was returned at 8.25 p. m. on the same day.

PERSONAL.

Col. Geo. W. Goethals, accompanied by Mrs. Goethals, and by Mr. Wm. H. May, his private secretary, sailed from New York on the *Colon*, which is due to arrive at Cristobal on Thursday, March 26.

Col. Henry A. Greene of the Tenth Infantry, U.S.A., accompanied by Mrs. Greene, will sail for New York on the *Ancon*. He has been relieved of the command of the Tenth Infantry, and has been ordered to Chicago to take charge of the militia affairs of the States comprising the Central Department. As lieutenant-colonel, he was with the General Staff of the Army from August 15 to December 6, 1903, and from January 29, 1904 to October, 1906. On October 20, 1906, he was promoted to a colonelcy, and was placed in command of the Tenth Infantry, which was ordered to the Isthmus for duty in September, 1911, arriving at Colon on October 4. Colonel Greene will be given a banquet by his brother officers at the Hotel Tivoli, on Thursday evening, March 26. Maj. Chas. Gerhardt will be in command of the regiment and of the post, as senior officer, until the appointment of a new commander.

Mr. Henry Pittier of the Bureau of Plant Industry in the Department of Agriculture, who has made extensive botanical researches in Central America, and who, a few years ago, establishing his headquarters at Culebra, made several expeditions into the provinces of Panama, returned to the Isthmus on March 14. At the request of the Panama Government, the Department of Agriculture at Washington has granted him six months' leave of absence, for the purpose of preparing the proposed agricultural exhibit at the Panama National Exposition.

Obituary.

Mr. Frank F. Cameron, an employe of the Mechanical Division living at Corozal, who had resigned effective March 18, and was to have sailed for the United States on March 21, was found dead on March 19 near the Panama railway station at Corozal. His death was found to have been caused by hemorrhage of the brain. He was 41 years of age, born in Chicago, Ill., and had been on the Isthmus five years. He is survived by his wife.

Mrs. Catherine Cody of Renovo, Pa., died at the home of her son, M. J. Cody, at Corozal on Sunday, March 15, aged 79 years. She was born in Dublin, Ireland, and had been on the Isthmus for two years.

Mrs. Jennie Stepp, wife of Norman E. Stepp, died at Ancon Hospital on March 21. She was born on June 18, 1872, in Shamokin, Northumberland County, Pa.

The general superintendent of the Panama railroad has requested that all mail from departments and divisions of the Canal Commission intended for the offices of the company in Panama be addressed to Ancon, instead of Panama.

FLOATING CRANES FOR CANAL.

Report of Commission Representative at Works of Contractor in Germany.

The status of work on the two floating cranes of 250 tons capacity, under manufacture for the Panama Canal by the Deutsche Maschinenfabrik A. G., of Duisburg, Germany, is indicated in the latest report received from Mr. Henry Schoellhorn, the representative of the Isthmian Canal Commission stationed at the shops of the contractor. The report is dated February 16, and is about, as follows:

Pontoons.—To date the following material has arrived at Emden for the construction of the pontoons:

ARTICLE.	Estimated weight to finish. Tons.	Material on hand Feb 15.	Per cent delivered.
Plates.....	1,236	1,236	100
Profiles.....	713	713	100
Rivets.....	140	119	85
Boiler stack.....	70.5	40	56.7
Condenser.....	3.6	3.6	100
Piping.....	6.5	4.5	69.2
Deck fittings.....	55	30	54.5
Anchor winches.....	16	16	100
Capstans.....	13	6.5	50
Anchor.....	6	0	0
Anchor chains.....	10.6	10.6	100

Deliveries of the fender oak are complete; none of material for the ventilators has been delivered.

The pontoon for the crane *Ajax* is about 98 per cent erected and 90 per cent riveted. It is presumed that work will be finished on this pontoon about April 15. All the material is in place, except the deck fittings, anchor winches, and piping. There is still a large amount of finishing work to be done, and some drilling, reaming, and riveting on the inside rooms, for which much time will be required. Work has been started on cleaning the compartments, and the painting and cementing of them.

The pontoon *Emden No. 54* is about 95 per cent erected and 70 per cent riveted. It is thought that the red lead paint on it will be sufficiently hard to permit its launching on February 20. In this pontoon the remaining seven watertight compartments have been filled and accepted as watertight. It is presumed that this pontoon will be completed on April 25.

Structural steel above deck.—All material for this subdivision has been inspected and all except 28 tons has been delivered at Benrath. Out of a total of 1,200 tons, 947 tons have been completed, or are under construction; 447 tons have been shipped to Emden for erection; 300 tons have been drilled, cut, bent, and partly fitted, and about 200 tons more have been assembled and riveted.

The contractor has begun working night shifts at the Benrath shops. Both bell rings are now completed, and the side walls for the bell for the *Ajax* are ready for shipment. Both king girders have been shipped to Emden. Work will begin shortly on the jibs. These will be completely assembled in one piece at the shops, and then knocked down and shipped. It is expected that both jibs will leave Hamburg about March 28. The erecting crew expects to leave May 1.

Machinery above deck.—The structural steel foundations for the machinery houses for both cranes will be assembled next week, and it is thought same can be finished about March 10. The machinery parts for the main hoists, auxiliary, and the luffing gear will be built in during this time. One king pin and bearing (weight, 10.6 tons) have been sent to Emden. The 20 pressure wheels for the bell

ring (weight, 6.5 tons) have likewise been shipped.

Electrical equipment.—The 300-horsepower steam engines, with generators, have left the works of the manufacturers for Emden. The 17 kilowatt units have likewise been shipped.

Several photographs accompanied the report. They show the bell side walls under construction at the Benrath shops, and the progress of erection on the *Ajax*, the pontoon of which has been launched. The tower, with cap, is completely in place, and about 20 per cent field riveted; a 5-ton erecting crane has been mounted on top, for assistance in further work of erection. Some of the bell ring segments have been placed on the deck.

Contract for the fabrication and erection of the cranes was let in May, 1913, and 580 days were allowed for the delivery of both. The present indications are that they will be delivered within the contract period.

Visiting Days at Palo Seco Leper Asylum.

The steam launch *Louise* will make a special trip to the Palo Seco leper asylum on the first Friday in each month for the purpose of carrying relatives of the inmates in the institution, and no charge will be made for this service. Visitors will not be allowed at Palo Seco at any other time, without special permission. The above arrangement has been made at the request of the governor of the province of Panama, through the Secretary of Foreign Relations of Panama, on behalf of the relatives of inmates of the asylum, who, up to recently, had been furnished transportation facilities in going to and returning from Palo Seco.

Emigration Falls Off.

There was a decided falling off in emigration in February, the excess of departures over arrivals being smaller than at any time during the past six months. The figures for the quarantine service show 3,555 persons as having landed from foreign ports, as compared with 3,847 embarkations, a net emigration of 292. The total net emigration for seven months ending February 28, 1914, was 12,440, the greater part of which consisted of Canal employees.

The total number of steamship passengers embarking from the ports of Colon and Cristobal for foreign ports during February was 3,250, consisting of 1,408 cabin, and 1,842 steerage passengers. The number of persons landing from foreign ports was 3,104, consisting of 1,557 cabin, and 1,547 steerage passengers. The number of persons who embarked over those who landed at these ports was 146. There was a considerable increase in the immigration of steerage passengers from West Indian ports, but other countries contributing to this class of immigrants showed no appreciable increase. The immigration of steerage passengers from Europe established a new low record for recent years, only 34 persons in this class arriving during February. There were 109 passengers arriving in steerage from the United States, 99 from Colombia, 50 from Guatemala, and 82 from Costa Rica. The number of persons arriving at the Atlantic ports "In transit" during February, nearly all tourists, was 4,052, as compared with 2,392 in January, the previous best month during the present tourist season.

The number of persons arriving at the ports of Ancon and Panama from foreign ports during February was 451, consisting of 342

cabin, and 109 steerage passengers. The number of persons embarking for foreign ports was 597, consisting of 364 cabin, and 233 steerage passengers. The number of those who embarked over those who landed was 146.

The total number of vessels arriving at Colon during the month of February was 89. The number of vessels arriving at the port of Ancon was 18.

Concrete in the Locks and Auxiliary Works.

The following is a statement of the concrete laid in the Canal locks and auxiliary works up to March 1, 1914:

	Cu. Yds.
Gatun Locks.....	2,068,424
Gatun spillway.....	232,256
Gatun hydroelectric station.....	11,026
Gatun control house, ducts, etc.....	3,170
Pedro Miguel Lock.....	927,943
Miraflores Locks.....	1,506,563
Miraflores dam and spillway.....	79,004
Pedro Miguel-Miraflores duct line.....	6,193
Total.....	4,834,579
Total for the month.....	3,842

Construction Company in Hands of Receiver.

The Central American Construction Company, Limited, of Colon, was placed in the hands of a receiver on March 12, by the Third Circuit Court of the Canal Zone, in session at Cristobal. The action was in response to a motion brought by one of the company's creditors. Mr. Louis F. Phillips, manager of the Colon branch of the International Banking Corporation, was appointed receiver, with authority to continue the business of the company, to the extent of completing present contracts.

This company has a contract with the Panama Railroad Company for the completion of the Masonic building in rear of the commissary store at Cristobal; for the present, pending developments as to the ability of the receivership to complete the work, the contract remains in *statu quo*. Under the terms of the contract for the construction of the sheds on Docks 9 and 10 at Cristobal, the work was taken over by the Panama Railroad Company on March 5, on account of lack of diligence displayed by the contractor. The contract for the erection of the Panama railroad passenger station at Panama has been practically completed, and will remain in force.

Repairs to P. R. R. Passenger Equipment in Panama Yard.

For the proper inspection, cleaning, watering and icing, and for the making of minor repairs to passenger equipment in the Panama yard of the railroad company, it has been decided to install four additional tracks, spaced on 16-foot centers, directly west of that part of the yard used by the Panamanian Government for storage purposes. The work for which these tracks are designed will require the use of compressed air, and a 2-inch main will be laid from the Balboa shops to the yard for this purpose. The cost of the installation will be borne by the railroad company.

Strangers Club.

The entertainment committee of the Strangers Club announces a change in date of the semimonthly dances to Saturday evening, beginning March 28. Subsequent dates will be published in the next issue of THE CANAL RECORD.

FRANK SCOTT, *Chairman*.

Colon, R. P., March 25, 1914.

P. R. R. GRAVEL PLANT.

Unloading Crane, Formerly at Balboa, Now in Service at Gamboa Gravel Bins.

The unloading crane at the Panama railroad's gravel handling plant on the bank of the Chagres River at Gamboa was placed in service last week, and is now delivering gravel into the storage bins at the rate of two barge loads a day. The crane is one of the three sand unloaders formerly in use at Balboa in the Punta Chamé service. It is operated by electricity generated by a 300-kilowatt motor-generator installed in a building of temporary construction, situated about 100 yards distant from the unloading plant. The machine was formerly used by the McClintic-Marshall Construction Company in its machine shop at Gatun Locks. In addition, the power plant is equipped with a 175-horsepower Buckeye tandem engine, formerly used in the pumping plant on the bank of the Chagres River at Gamboa, and prior to that time in the old planing mill at Empire; and a boiler, formerly belonging to railroad locomotive No. 203. The latter is provided with oil-burning apparatus, the oil being supplied from a small tank located on a hill nearby, which, in turn, is supplied direct from the oil company's main.

Until recently, gravel has been unloaded from barges by a locomotive crane, and the demand to date has about kept pace with the supply, although a small amount has been placed in the storage pile, just south of the bins. Gravel is dredged and brought to the unloading dock by floating equipment of the Dredging Division. Dredge No. 1 is engaged in this service, and is now working in a gravel bed a short distance up the river from the site of the old town of Cruces. When the gravel dredging operations were first begun, it was found that the dredge buckets brought up the material in so dry a condition that the chute frequently became clogged. In order to remedy this difficulty, two jets of water are made to play under pressure continuously on the material as the buckets dump it into the chute, which serves to wash it down into the barges. When the barges are full, part of the water is expelled naturally over the sides, and the remainder is siphoned out. Three barges, one of 600 cubic yards capacity, and two of 500 yards capacity each, together with the tug *De Lesseps*, comprise the remainder of the floating equipment in this service.

With the unloading crane operating steadily, it is expected that from two to three barge loads of sand will be handled daily, except Sunday. The bins have a capacity of about 2,000 cubic yards, and are similar in construction to the sand bins at Balboa. It has been found, however, that the valves which control the flow of gravel into cars underneath the hoppers frequently become clogged on account of large stones occurring in the gravel, and to obviate the loss of time in dislodging them, the openings will probably be enlarged.

The force employed on the floating equipment consists of three gold, and 38 silver employees; and at the unloading plant and generator room, three gold, and eight silver employees. In addition, there is train service attached to the plant, with a regular qualified train crew. About six dump cars are used about the plant in transferring gravel to the storage pile, etc. The foreman of the plant is Mr. A. B. Kratz, who occupies married

quarters converted from the building formerly occupied by the Panama railroad as a signal station, and known as Tower R. The most of the silver men at the plant live in box cars, while the men of the floating equipment eat and sleep on board. It is probable that gravel dredging operations will continue for a period of about two years, and a large amount will be stored against future requirements.

Concentration of First Division Offices at Pedro Miguel.

Effective March 16, the offices of the First Division at the Pacific Locks were concentrated at Pedro Miguel. The general office for the supervisors is in the building situated about midway between the railroad station and the east emergency dam, and the office for the foremen engaged at Pedro Miguel is in the storage building at about the center of the east backfill.

When the First Division began the installation of machinery on the Pacific side, about two years ago, most of the work was at Pedro Miguel Lock, where the concrete work was farther advanced than at Miraflores Locks. A branch office was opened at Miraflores Locks about six months later, and, during the period of greatest activity there, the principal office was at that point; now that most of the work at both locks has been done, the offices are concentrated at Pedro Miguel for greater convenience, and on account of reduction in messenger and telephone expenses, etc.

Increase in Second Division Organization.

The organization of the Second Division (Atlantic terminals) was increased on March 10 by the employment of one foreman and one steam engineer on the gold force, and one foreman, one fireman, one clerk, one boat-swain, five boatmen, two piledriver helpers, 20 carpenters, 10 laborers, and one boy on the silver force. These additions will permit of a double shift being placed on the trestle construction at Coco Solo Point. The employment of one watchman on the silver roll has also been authorized.

McClintic-Marshall Company to Close Local Office

The work of the McClintic-Marshall Construction Company, the lock gate contractors, has been practically completed for several weeks, but a temporary office has been maintained in the old division headquarters at Gatun since the abandonment of the company's office near the locks, for the closing up of its remaining affairs. This office, which has been in charge of Mr. H. J. Zane, Jr., the local auditor, will be closed on March 31, and the representatives now on the ground will leave for the United States shortly thereafter. All mail for the McClintic-Marshall Construction Company should be addressed on and after that date to the company's head offices in Pittsburgh, Pa.

Removal of Coca Cola Bottling Works.

The bottling works of the Panama Coca Cola Bottling Company, Incorporated, situated at Cartagenita, on the west bank of the Canal, nearly opposite the village of Paraiso, will be moved into Panama city in the near future. This was one of the first industrial enterprises established in the Canal Zone after the American occupation. It was opened in 1905, by Mr. W. N. Seitz, who conducted it mainly as a soda water factory until its sale to the Panama Coca Cola company a few years

ago. Mr. Seitz selected the site, because of its proximity to the Paraiso springs, which share with the springs on the island of Taboga, the reputation of being the purest water to be found in this part of the Isthmus. The springs are a few hundred yards from the factory, which is situated at a point lower down, so that the water is piped in by gravity; they enjoy a perennial flow, although a protracted dry season affects them to some extent. Both the springs and the works were formerly directly on the old main line of railroad, and when the route was changed to the present location, east of the factory, the loading platform had to be extended for some distance. The present move is in accordance with the Government policy of depopulating the Canal Zone.

Suez Canal Traffic in 1913. (Engineering News.)

Traffic through the Suez canal, which has shown an almost continuous growth ever since its opening, was less in 1913 than in 1912. Had this falling off occurred a year later, it would have been ascribed, of course, to the opening to traffic of the Panama Canal. As it is, the cause must be sought elsewhere, and it is doubtless found in some slackening in the phenomenal activity in international trade which prevailed in 1912.

What makes the falling off in traffic quite remarkable is that it occurred just after the rate of toll on vessels passing through the canal had been reduced, which might have been expected to stimulate the traffic. The figures for the number of vessels, total tonnage, and total receipts from tolls, for the last three years are, as follows:

YEAR.	No. Vessels.	Total tonnage.	Receipts.
1911.....	4,969	28,008,945	\$25,287,632
1912.....	5,373	27,737,180	25,652,016
1913.....	5,085		23,735,140

Dock Construction at Cristobal.

The last of the steel shell caissons to support Dock 10, connecting the outer end of Dock 9, at the extremity of Cristobal Point, with the old timber wharf known as Pier 11, have been placed and will be filled with concrete, reinforced vertically by four 70-pound steel rails. Forms are being built on the completed caissons for the extension of the reinforced concrete superstructure. The superstructure is completed for about 200 feet from the juncture with Dock 9, and the steelwork for the shed has been erected over about half of this distance. The total length of Dock 10 is to be 426 feet, and its other features of construction are to be similar to those of Dock 9.

Dock 9 is completed, with the exception of about 200 feet at the outer end, where the construction of the roof and walls, and the encasing of the truss members in concrete, in place of painting, are in progress. Dock 8 has been completed and placed in commercial service.

Arrival of Lieutenant-Colonel Deshon Delayed.

Lieut.-Col. George D. Deshon, detailed by Paragraph 21 of War Department Special Orders No. 53, dated March 5, 1914, for duty as superintendent of Ancon Hospital, has been given permission to report to the Governor of the Panama Canal on May 1, 1914, instead of April 1. This will not, however, affect the relief of Colonel Phillips, mentioned in *The Canal Record* of March 18.

COMMISSION CLUBHOUSES.

Activities of the Young Men's Christian Association.

GENERAL.

The schedule for moving pictures for the week March 30 to April 4 is, as follows: Monday, Empire; Tuesday, Culebra and Balboa; Wednesday, Corozal; Thursday, Pedro Miguel; Friday, Cristobal and Porto Bello; Saturday, Gatun.

The standing of the teams in the all-Isthmian duckpin tournament on March 23 was, as follows:

	Won.	Lost.	P. C.
Cristobal.....	10	5	.667
Empire.....	9	6	.600
Corozal.....	11	10	.524
Culebra.....	9	9	.500
Pedro Miguel.....	7	8	.467
Gatun.....	5	13	.235

The schedule for the special reels showing the pilgrimage of the Osman Temple Shriner, St. Paul, Minn., to the Canal Zone is, as follows: Cristobal, March 24; Corozal, March 30; Empire, April 1; Pedro Miguel, April 2; Balboa, April 3; Gatun, April 7.

COROZAL.

High scores for the week on the bowling alleys were, as follows: *Duckpins*—McDonald, 102; Webb, 100; Regan, 100. *Tenpins*—Roberts, 220; Parkis, 214; Sims, 204.

On Saturday, March 21st, 19 boys from the Corozal and Pedro Miguel associations had an excursion to Fort San Lorenzo. They were accompanied by Mr. Page and Mr. Dwelle.

There was an attendance of nearly 500 at the concert given by the Walter Eccles and the Four College Girls on March 16.

PEDRO MIGUEL.

The results of the chess match between the Corozal and the Pedro Miguel teams, played on Friday night, March 20 were, as follows:

	Pedro Miguel.	Corozal.
	Won.	Lost.
Wilson.....	1 1/2	1 1/2
Shropshire.....	1	1
Capwell.....	0	2
	1 1/2	4 1/2

The results of the bowling games rolled on the Pedro Miguel alleys on Friday night, March 20, between the Corozal and Pedro Miguel teams were, as follows:

Pedro Miguel.....	443.....	461.....	380
Corozal.....	469.....	433.....	446

New shoes and gymnasium uniforms have just been received, and are now on sale at the desk.

Increasing interest is shown in the first aid classes, and the lesson given by Dr. Gibson on methods of resuscitation and the treatment of dislocations and fractures on Thursday evening, March 19, was very instructive. All those who have not attended the classes are invited to do so.

The entertainment given last Thursday evening, by the four college girls company was attended by over 400 people. There will be an entire change of program at the return engagement on Thursday evening, March 26.

CULEBRA.

There was the largest attendance of the season at the entertainment given by Walter Eccles and the four college girls on Tuesday night, March 17. This company will give a return engagement on Friday night, March 27, with a change of program. The entertainment will begin at 8 p. m.

High scores in duckpins for the past week were, as follows: R. Koperski, 110; Ferguson, 104; Palmer, 103, 102, 103, 102, 102; Case, 105; Holme, 104; Seeley, 103, 108; Bechlem, 105; Kiernan, 102, 101; Brown, 108, 102; Phillips, 105; Ellsworth, 105, 121.

Culebra took two out of three games from the Corozal bowling team on Wednesday, March 18, with the following scores:

	Corozal.	Culebra.
Davis.....	94	95
Steele.....	87	92
King.....	84	81
Lowe.....	92	80
Parkis.....	107	94
	464	442

On Sunday night, March 28, slides entitled "Strolling through Old England" with a descriptive lecture, will be shown. Admission will be free to all. The program will begin at 7.30 sharp.

EMPIRE.

A match tenpin bowling game was played on the Empire alleys on March 19, between the 1907 Cristobal team and the 1907 Empire team. The Cristobal team won two out of three games, with the following scores: Cristobal..... 786..... 881..... 788

Empire..... 812..... 829..... 765

The lectures on accounting given by Mr. H. A. A. Smith and Mr. Oakley have been changed, and will be

given twice weekly, on Monday and Thursday evenings, until further notice. All are invited to attend.

On Saturday, April 4, there will be a gathering of all the chess clubs at Empire. The winner of the recent Isthmian chess tournament will be presented with a medal. A special program is being prepared and all those interested are invited to attend.

GATUN.

The gymnasium floor is being improved by the repainting of the lines for handball, baseball, and basketball.

The college girls company will give a return engagement at the clubhouse on Tuesday evening, March 31. Three hundred and thirty-five people attended the first entertainment.

Mr. P. P. Scott gave an interesting lecture on the past present, and future of Florida on Thursday evening, March 19.

The new game of indoor hockey was tried out at the clubhouse on Saturday morning, March 21. The boys are greatly interested in the new game.

Four girls of the gymnasium class gave an exhibition of folk dancing at the Ancon high school reception on Friday afternoon, March 20. They were chaperoned by Mrs. Cheatham and Mrs. Rowe.

The "Sports" and "Millionaires" played a game of basketball on Wednesday evening, March 18. The score was tied at the end of the second half, making it necessary to play an extra period, in which the "Millionaires" won. The final score was 30 to 28.

Following the challenge of Mr. T. Wehmeier of Cristobal, to Mr. H. E. Dewey of Gatun, a championship pool match was played, as follows: 150 balls at Gatun on Wednesday evening, March 18, and 150 balls at Cristobal on Thursday evening, March 19. Mr. Dewey won the match. The results were: At Gatun, Dewey, 161; Wehmeier, 139; at Cristobal, Dewey, 139; Wehmeier, 113. Totals, Dewey, 300; Wehmeier, 252. Mr. Dewey, therefore, retains the championship of the Isthmus. The Gatun Y. M. C. A. challenges any other Y. M. C. A. on the Isthmus to a championship game of pool or billiards.

In the gymnasium classes, which are being held twice each week, particular attention is paid to dumb bell and pyramid exercises. New members may join the classes at any time. If a sufficient number of men are interested in the study of first aid to the injured, a class will be organized.

CRISTOBAL.

Three hundred and seventy-six people attended the Walter Eccles and the Four College Girls' entertainment on Friday, March 20. This is probably the largest attendance on record for a United States entertainment at the Cristobal clubhouse. There will be a return engagement on Monday, March 30.

The Culebra volleyball team defeated the Cristobal team by the scores of 21 to 3, and 21 to 11, on Saturday night, March 21.

House 83 defeated "Secret seven" at indoor baseball immediately following the volleyball game. Score, 21 to 14. The line-up was, as follows: House 83—Russell, MacSparren, Schradley, Gordon, Schwallenberg, and Parker. *Secret seven*—D. Raymond, J. Raymond, Bradshaw, Tuttle, W. Fraser, and A. Fraser.

Cristobal took two out of three games from Gatun in the all-Isthmian duckpin tournament, held on Saturday, March 21. The scores follow:

	Gatun.	Cristobal.
Dunville.....	81	86
Walsh.....	106	111
Richardson.....	80	70
Ryan.....	86	84
Claherty.....	95	94
	448	445

Totals..... 448 445 443

A variation bowling tournament will be held on Wednesday night, April 1. A progressive match will be played with a different game on each alley. The Cristobal bowlers are urged to be present at this tournament.

High scores in duckpins were, as follows: Pinney, 119; G. R. Farr, 118; Russell, 115; G. Scheid, 102; Patterson, 100; Hurst, 100.

Thirty-six new library books were received for general circulation during the past week.

Mr. W. M. Baxter, who is connected with the sight-seeing train, will address the discussion club on Thursday, April 2, "On some misconceptions held of the Panama Canal."

PORTO BELLO.

A "Smoker" was held on Saturday night, March 21. During the evening, medals were presented to the winners in the handicap pool tournament recently completed, E. F. Baker winning the gold medal, and L. J. King the silver medal. The following program was given: Fancy dancing, by H. D. Brittin; baritone solo, by Mr. Cantor; fancy trick skating, by J. Carson; solo, by Mrs. J. H. Murray; tumbling, by H. D. Brittin;

solo, by Mr. Cantor; juggling, by J. T. Brennan; solo, by Mrs. Murray.

About 100 slides, illustrating the work on the Canal at various points, including recent pictures, were shown at the song service on Sunday night, March 22.

The college girls are booked for Porto Bello on Saturday night, March 28.

Supplies for the Canal.

The following steamers with supplies for the Isthmian Canal Commission and Panama Railroad Company, arrived at the ports of Colon, Balboa, and Cristobal during the week ending March 21:

Panama, March 15, from New York, with 30 boxes electric lamps, 450 pieces car castings, 24 cases machinery, 29 cases electrical machinery, 12 barrels car coupler parts, 51 boxes electric lighting material, 135 bundles conduit, for Mechanical Division; 300 bags sawdust, 992 bundles reinforcing bars, 1,500 bags plaster, 1,560 bags plaster, 200 barrels cement, 2,000 bags limoid, 75 barrels plaster, for permanent buildings; 171 bundles reinforcing bars, for Panama Railroad Company; 56 reels copper wire, for light-house subdivision; 150 cases electrical machinery, for First Division; 28 coops live poultry, for Sanitary Department; 80 kegs galvanized nails, 101 crates valves, 100 cases soap, 992 bales hay, 111 rolls galvanized wire, 20 drums lubricating oil, 37 crates machine tools, 1,150 bundles steel bars, 20 drums marine engine oil, 600 pigs lead, for stock, and a miscellaneous cargo, the whole consisting of 12,933 packages, weighing 747 tons.

Santa Cecilia, March 16, from San Francisco, with 9,600 board feet redwood lumber, for permanent buildings; 141 pieces Douglas fir untreated piling, for Toro Point breakwater; 10 pieces Douglas fir spud timbers, for Dredging Division; 489,935 board feet redwood lumber, for stock.

Prinz Sigismund, March 16, from New York, with eight packages electrical material, for Mechanical Division; seven cases blasting fuse, 279 bundles galvanized pipe, 257 pieces galvanized pipe, for stock.

Hilding, March 17, from Mobile, with 37,802 pieces clay conduit, 58 bags pins, for Panama Railroad Company; 1,600 pieces sewer pipe, for stock.

Almirante, March 18, from New York, with 13 barrels porcelain insulators, seven cases electrical machinery, for Mechanical Division; 10 cases electrical machinery, for First Division; 350 pieces plate steel, eight reels wire rope, 450 steel bars (stock steel), 2,260 bundles steel bars (stock steel), 420 pieces angles, steel, 25 pieces channels, for stock.

Parismina, March 18, from New Orleans, with 22 cases electrical material, for Mechanical Division; 174 packages doors and windows casings, for permanent buildings; 800 pieces pipe, 1,500 pieces pipe-fittings, 17,905 board feet yellow pine flooring, for stock.

Turrialba, March 19, from New Orleans, with 303 pieces untreated yellow pine piling, for Second Division, 412 packages doors and window casings, for permanent buildings; 999 pieces cast iron pipe, 14,880 board feet yellow pine lumber, for stock.

Lewis Luckenbach, March 20, from San Francisco, with 803 barrels asphalt, for Balboa terminals; one piece marine machinery, for Dredging Division; 40 cans carbon bisulphide, for stock.

Alliance, March 20, from New York, with 50 barrels cement, 121 crates roofing paper, 15 boxes roofing cement, 41 barrels paint, 20 tubs putty, 400 barrels cement, 88 crates roofing material, 400 barrels cement, for permanent buildings; 180 crates tiling, 235 cases electrical machinery, 29 cases woodwork, for First Division; 22 cases electrical machinery, 170 crates fire brick, 32 sacks fire clay, 56 bundles conduit, 37 packages electrical material, for Mechanical Division; 21 packages signal material, for Panama Railroad Company; 20 cases sal soda, for Dredging Division; 76 pieces pipe, for Division of Municipal Engineering; 67 boxes paper napkins, 175 pieces steel beams and channels, 193 pieces steel bars, 50 cases paint, 32 boxes solder, 49 bundles rubber hose, 363 drums lubricating oil, 50 cases lubricating grease, 33 crates hooks, 25 barrels iron valves, for stock; and a miscellaneous cargo, the whole consisting of 3,367 packages, weighing 358 tons.

OFFICIAL CIRCULARS.

Observance of Good Friday.

CULEBRA, C. Z., March 19, 1914.

CIRCULAR No. 533:

So far as consistent with the transaction of public business, Friday, April 10, (Good Friday), will be observed as a holiday in the Canal Zone.

Good Friday is not included in the list of holidays for which gratuity pay is allowed, and pay for services performed on that day will be calculated the same as for Sundays.

Holy Thursday will be considered an ordinary working day and payment made accordingly.

H. F. HODGES,

Acting Chairman and Chief Engineer.

Leave Privileges.

CULEBRA, C. Z., March 19, 1914.

HEADS OF DEPARTMENTS AND DIVISIONS:

The Executive Order "Providing conditions of employment for the permanent force for the Panama Canal" states:

"Section 20. All employees who are citizens of the United States, and aliens whose compensation is more than \$75 per month, or 40 cents per hour, shall be entitled to leave privileges."

You are requested to send at once to the Office of the Chairman information slips (Form C. E. 195-3) completely filled out for each employee in your department or division who is:

1. A citizen of the United States on the silver roll.

2. An alien with compensation of more than \$75 a month, or 40 cents an hour.

In order that the leave record of such employees may be properly kept, changes in their status will be reported after April 1, the same as in the case of employees on the gold roll.

Your attention is also called to the fact that after April 1, the only aliens that may be employed in grades paying more than \$75 a month, or 40 cents an hour, are those who have occupied similar positions during the construction of the Canal for two years or more. Steps should be taken, therefore, to discharge, as soon after April 1 as possible, all aliens not in the excepted class.

H. F. HODGES,

Acting Chairman.

Appointment of Accountable Officers.

CULEBRA, C. Z., March 23, 1914.

CIRCULAR No. 535:

In future, accountable officers will be designated by the Examiner of Accounts, subject to the approval of the Chairman. No accountable officer will be relieved from accountability until final audit has been made of his property accounts, unless another accountable officer assumes entire accountability for all property carried on the return for the current period.

H. F. HODGES,

Acting Chairman, Isthmian Canal Commission,
Second Vice-President, Panama Railroad Company.

Rates for Supplying Electric Current to Employees for Other than Standard Lights.

CULEBRA, C. Z., March 20, 1914.

CIRCULAR No. 311-B:

Effective April 1, 1914, electric current for other than standard lights will be supplied employees of the Panama Canal and Panama Railroad Company who are occupying quarters assigned by the Quartermaster's Department, under the following regulations:

Current will be sold to employees for the operation of small electric appliances and electric heating apparatus, when approved by the Governor of the Panama Canal, at the following monthly rates:

For each piece of apparatus, excepting lamps, having a maximum power consumption of 100 watts or less..... \$.50

For each piece of apparatus having a maximum power consumption of more than 100 watts, and not more than 550 watts..... \$.75

For each piece of apparatus having a maximum power consumption of more than 550 watts, and not more than 1,000 watts..... \$1.00

For each piece of apparatus having a maximum power consumption of more than 1,000 watts, and not more than 1,500 watts..... \$1.25

A special rate will be fixed for any apparatus having a power consumption in excess of 1,500 watts.

Application for the above service should be made by the employee to the Chairman and Chief Engineer on Form No. C. E. 350-1, provided for that purpose.

Any employee using or permitting electric current to be used in his quarters, after March 31, for any other purpose than for lighting with the standard lights furnished by the Commission, without securing authority therefor in advance, and paying for the current thus used, will be subject to discharge.

Suitable outlets for the use of all electric appliances

requiring more than 100 watts will be provided in wooden quarters upon approved application from employees. No additional outlets, however, can be provided in the permanent quarters now in course of construction.

Any employee occupying quarters not on the 24-hour circuit, desiring continuous service, shall pay the expense of providing same.

No charge will be made for less than a full month. Charges shall date from the first of each month, and shall be payable in advance. Circular No. 311 of March 1, 1910, is hereby revoked.

H. F. HODGES,

Acting Chairman and Chief Engineer.

Accountable Officer, Subsistence Department.

CULEBRA, C. Z., March 16, 1914.

CIRCULAR No. 532:

Effective February 25, 1914, Capt. F. O. Whitlock is designated an accountable officer, and as such will account for the property of the Subsistence Department, vice Lieut.-Col. E. T. Wilson, resigned.

H. F. HODGES,

Acting Chairman.

Accountable Officer, Balboa Store.

CULEBRA, C. Z., March 16, 1914.

CIRCULAR No. 534:

Effective March 9, 1914, Mr. R. K. Morris, assistant to the Chief Quartermaster, is designated accountable officer, and as such will account for the property at Balboa store, vice Mr. Charles L. Parker.

H. F. HODGES,

Acting Chairman.

Scale of Charges, and Regulations Governing Cremation.

CULEBRA, C. Z., March 23, 1914.

CIRCULAR No. 531:

With the exception of bodies embalmed for future disposition, the bodies of persons dying while in the military or naval service of the United States, and the bodies of American employees which cannot be embalmed, the bodies of those dying in Ancon Hospital, or brought there for disposal, will be cremated, unless taken away within 24 hours after death.

The ashes of those cremated will be placed in suitable receptacles and delivered to relatives or friends of the deceased, provided such relatives or friends make application therefor to the superintendent of Ancon Hospital in advance; otherwise, the ashes will be placed in common graves.

Bodies embalmed for future disposition must be removed as soon as possible; if not removed within 90 days from date of embalming, they will be cremated.

The bodies of American employees, which cannot be embalmed, will be buried immediately but cannot be disinterred for a period of 18 months, in accordance with the laws of the Canal Zone.

The following scale of charges for cremation will govern:

For bodies buried in Ancon Hospital cemetery prior to February 1, 1914..... No charge

For all other bodies, as follows:

(a) Of employees..... No charge

(b) Of families of employees whose pay is more than \$50 a month..... \$10.00

(c) Of families of employees whose pay is \$50 a month, or less..... 2.00

(d) Of nonemployees..... 30.00

For receptacles, as follows:

(a) For ashes of adults, other than employees..... 1.00

(b) For ashes of children..... .75

(c) For ashes of employees..... No charge

No burial fee will be charge for bodies cremated. Coffins will be charged for as at present.

H. F. HODGES,

Acting Chairman and Chief Engineer.

Requests for Payment of Accrued Leave.

CULEBRA, C. Z., March 23, 1914.

HEADS OF DEPARTMENTS AND DIVISIONS:

Your attention is called to the frequent delay in forwarding requests for the payment of accrued leave of absence. Please see that in cases where employees resign, or their services are otherwise terminated, their applications for the payment of accrued leave, if any is due, are filled out and forwarded promptly to this office. By direction of the Acting Chairman.

C. A. McILVAINE, Chief Clerk.

Establishment of Post-Office at Gambna.

ANCON, C. Z., March 20, 1914.

CIRCULAR No. 200:

To all postmasters—You are advised that a post-office has been established at Gambna, Canal Zone, effective to-day, for the receipt and dispatch of ordinary and registered mail only. No money order or postal savings

business will be transacted at this office. The agent of the Panama railroad will act as postmaster.

TOM M. COOKE,

Director of Posts.

Royal Mail steamers leave for New York on alternate Tuesdays at 2 p. m.; for Southampton, on alternate Tuesdays at 10 a. m.			
United Fruit Company's ships for New Orleans direct, leave on Thursdays at 3 p. m.; for New Orleans, via Bocas del Toro and Havana, on Thursdays at 4 p. m.; for New York, via Kingston, on Thursdays, at 2 p. m.; for New York, via Limon and Havana, on Sundays at 5 p. m.; for Limon and Bocas del Toro on Saturdays at 4 p. m.; for Bocas del Toro direct, on Thursdays at 4 p. m.; and for Boston, via Port Antonio, on Sundays at 3 p. m.			
The Hamburg-American steamers <i>Prinz Eitel Friedrich</i> and <i>Prinz Sigismund</i> sail for New York, via Kingston and Fortune Island, on Mondays at 10 a. m.; the <i>Prins August Wilhelm</i> and <i>Prins Joachim</i> sail for New York, via Kingston, Santiago de Cuba, and Fortune Island on Tuesdays at 10 a. m.			

CANAL

RECORD

Volume VII.

ANCON, CANAL ZONE, WEDNESDAY, APRIL 1, 1914.

No. 32.

The Canal Record

Official publication of The Panama Canal.

The Canal Record is published weekly free of charge, one copy each to all employees of The Panama Canal and Panama Railroad Company whose names are on the gold roll. Extra copies and back numbers can be obtained from the news stands of the Panama Railroad Company for five cents each.

Address all Communications,

THE CANAL RECORD,

Ancon, Canal Zone,

Isthmus of Panama.

No communication either for publication or requesting information, will receive attention unless signed with the full name and address of the writer.

NOTES OF PROGRESS.

Status of Canal and Panama Railroad Employees.

CULEBRA, C. Z., March 30, 1914.

CIRCULAR No. 536:

1. The entire personnel of the organizations of the Isthmian Canal Commission and the Panama Railroad Company on the Isthmus is hereby notified that at the close of business on March 31, 1914, all contracts of employment will terminate, with the exception of those of employees on sick or injury leave, in which cases, the contracts will be annulled at the termination of the period of disability.

2. This action is necessitated by the discontinuance by law of the present organization on that date, the inauguration, on April 1, 1914, of the permanent organization for The Panama Canal, as provided in the Executive Order of January 27, 1914, and the adoption for all the present force, including the Panama Railroad Company's employees on the Isthmus, of new conditions of employment, as provided in the Executive Order of February 2, 1914.

3. All employees, except those noted in Paragraph 1, who are on the rolls as of March 31, 1914, and who have not resigned or been notified that their services are no longer required, will be considered transferred to the new organization on April 1, 1914, and will from the date upon which service and compensation begin in the new organization be subject to the conditions of employment contained in the Executive Order of February 2, 1914, and to the further rules and regulations of the Governor, except that teachers will not be granted cumulative or travel leave.

4. The rates of pay of all employees so transferred will remain unchanged, except that in special individual cases some changes in pay will be made, which will be covered by written orders. Further information relative to rates of pay will be published as soon as the Urgent Deficiency Act is approved, a provision being contained in that Act which, if approved, will

amend the provision of the Panama Canal Act with respect to wage scales.

GEO. W. GOETHALS,

Chairman.

Circulars referring to the general organization, the new appointments, and the organization of the Department of Operation and Maintenance, will be found on Pages 305 and 306 of this issue of THE CANAL RECORD.

Rafts of Piles to be Towed through the Canal.

The steamship *Thor* arrived at Balboa on March 22 from Seattle, with a cargo of piles requisitioned for use in the trestles of the east breakwater in Limon Bay. The vessel has anchored in the channel above the steel pier, and is now unloading its cargo with its own tackle. The piles are lowered into the water and lashed together in booms; they will be towed through the Canal in rafts. This procedure is designed to effect economy in transportation, in addition to allowing the vessel to discharge without occupying a berth at the docks, which are taxed at this time by heavy movements of freight.

Closing Down of Gatun Machine Shops.

The Mechanical Division shops at Gatun were closed, effective April 1; thereafter, the services formerly performed at these shops for various departments and divisions operating in the locality of Gatun will be performed at the dry dock shops at Cristobal.

The Gatun shops were opened in 1909 for making minor repairs to the locomotives, steamshovels, and other machinery used in the work at Gatun, on the locks, dam, and spillway. General overhauling and extensive repairs for steamshovels were performed at the Empire shops, and repairs to standard gage locomotives were made at the Panama railroad shops at Cristobal, when the estimated cost of repairs was more than \$50, and less than \$500; if the estimated cost exceeded \$500, the repairs were made at the Gorgona shops. Narrow gage locomotives, locomotive cranes, etc., were repaired at the Gatun shops, which also performed general planing mill work in the construction of the culvert forms, and other carpentry work. The maximum force employed in the shops was about 250 men.

On April 5, 1911, the shops were transferred from the Atlantic to the Mechanical Division, and placed in charge of T. H. Jordan, as general foreman; he was succeeded by C. S. Perry in October, 1911, who has retained charge of them up to the date of closing. In July, 1912, the blacksmith shop, previously maintained at Gatun Locks by the First Division, was consolidated with the Gatun shops. During that year, the shops performed light repairs for the dredges excavating the Canal channel immediately north of Gatun Locks.

The force employed at the shops on March

31 included eight gold men and 30 silver employees. The gold, and part of the silver, employees are to be transferred to other shops of the Mechanical Division and the remainder discharged on account of reduction of force.

Submersion of Submarines in Gatun Locks.

In dry docking the dredge *Corozal* on March 17 in the upper east chamber at Gatun Locks, the five submarines, which had been docked previously in the same chamber, were completely submerged while the filling process was going on. The submarines rest on especially constructed cradles situated almost directly over the culvert openings in the floor, and in view of the fact that during the filling of the chamber, the water comes up through these openings with considerable force, care had to be taken to see that the vessels were not moved from their position. This was accomplished by placing crosspieces below and athwart these openings, and by lashing the vessels firmly to them. In addition, the ballast tanks in each vessel were filled, which assisted in weighing them down. The precautions thus taken were successful; it is believed that this is the first time on record where a similar operation has been conducted.

Work on the repairs to the submarines is progressing satisfactorily. Practically all the work is being done by members of the crews, which include skilled workmen in various trades. Some necessary riveting, the building of a foundation for an air compressor, which is to be installed in one of the vessels, and a few other isolated items, have been turned over to the Mechanical Division, but the greater part of the work is performed by the crews themselves. A stairway has been constructed down one side of the lock chamber for the use of the men working on the submarines, and also on the *Corozal*.

Final Retirement of the Dredge "Mole".

The hull and boilers of the ladder dredge *Mole*, which was retired from service last December, have been sold by the Quartermaster's Department to Mr. William Lambert for \$2,500. At the time of its retirement, it was appraised by the Board of Local Inspectors at \$4,825, complete. Practically all of its parts, with the exception of the boilers, have been stripped, and some have been placed in use on other vessels. The two boilers are of the Scotch marine type, 114 inches in diameter and 115 inches long, with an aggregate capacity of 106.1 horsepower. The hull is of steel, 170 feet long, 26 feet wide, and 12 feet deep.

The *Mole* was built by Lobnitz and Company at Renfrew, Scotland, in 1884. After years of service with the French canal forces under the name of A-2, it was beached on the flat opposite the wharves at Balboa. In 1901, it was recovered and rebuilt by the Panama Railroad Company under a rental

arrangement with the French company of that time, and used in the channel between the steel pier at Balboa and deep water. In 1904-1905, it was given a general overhauling and put in the service of the Isthmian Canal Commission. Up to May 20, 1907, when the dipper dredge *Cardenas* began work, it was the only barge in service in the Pacific entrance, and was referred to in the division reports of that period as "The dredge". It continued at work in the channel, and at Punta Chamé reclaiming sand, until the latter part of 1913.

The dredge *Gopher*, which is still in the service, is a twin of the *Mole*, was built by Lobnitz and Company at the same period, and has a very similar subsequent history.

PERSONAL.

Lieut.-Col. William L. Sibert, Corps of Engineers, U. S. A., former member of the Isthmian Canal Commission and Division Engineer of the old Atlantic Division, will sail for New York, accompanied by his family, on the *Ancon*, on Thursday, April 2. He was appointed a member of the Canal Commission in the reorganization of April 1, 1908, and sailed for the Isthmus on March 10. Shortly after his arrival, he was placed in charge of the old Department of Lock and Dam Construction, with headquarters at Culebra, and remained at the head of that organization until the creation of the Atlantic Division on July 1, 1908, when he was made its division engineer, in charge of the construction of Gatun Locks, Dam, and Spillway, of the west breakwater at Toro Point, and of work in the harbor and channel section of the Atlantic entrance. All of the abovementioned projects were practically completed under his jurisdiction and the work was so far finished on February 1, 1914, as to permit of the division being abolished as of that date. Colonel Sibert was born in Gadsden, Ala., on October 12, 1860. He was a student in the University of Alabama at Tuscaloosa from 1878 to 1880, and in July of the latter year entered West Point, where he was graduated with the class of 1884. He received his commission as second lieutenant on June 15, 1884, but continued his studies by entering the Engineering School of Application, from which he was graduated in 1887. He was promoted to first lieutenant on April 1, 1888; to captain, on March 31, 1896; to major, on April 23, 1904, and to lieutenant-colonel, on September 21, 1909. From 1887 to 1892, he was in charge of lock and dam work on the Kentucky, Green, and Barren Rivers, and during the ensuing two years was engaged in the work of excavating a ship channel in the connecting waters of the Great Lakes. Following this, he spent four years in river improvement work in Arkansas, and from 1898 to 1899, he was an instructor in the Engineering School of Application. In the latter year, he was detailed for duty in the Philippines as chief engineer of the Eighth Army Corps. He also served as chief engineer and general manager of the Manila and Dagupan Railroad. On his return to the United States, he was placed in charge of a river and harbor improvement district, embracing the Louisville and Portland canal, and the Green, Barren, and Wabash Rivers, with headquarters at Louisville. From December, 1901, until his appointment to the Canal Service, he had charge of a river and harbor improvement district

near Pittsburgh. He has been directed to report to the War Department for further orders.

Richard Lee Metcalfe, member of the last Isthmian Canal Commission, and Head of the Department of Civil Administration to April 1, the date of the change in the Panama Canal organization, will sail for New York, accompanied by Mrs. Metcalfe, and their sons, Kenneth and Lee, on the *Ancon*, on Thursday, April 2. Mr. Metcalfe was appointed a member of the Isthmian Canal Commission, by Executive Order of the President, on August 9, 1913, succeeding Maurice H. Thatcher. He was born near Upper Alton, Ill., on October 11, 1861, and entered the office of a country newspaper at an early age; at 19, he was editing a weekly. In 1888, he became connected with the *Omaha World-Herald*, and was its editor from 1896 to 1905. Previous to this time, in 1894, he became associated with the Hon. William J. Bryan, and after leaving the *World-Herald*, he was offered and accepted the position of associate editor of the *Lincoln, Neb. Commoner*, which he was filling at the time of his appointment to the Canal Service. His address for the present will be No. 716 14th Street, Northwest, Washington, D. C.

Col. John L. Phillips, formerly Assistant Chief Sanitary Officer, was relieved from duty with the Isthmian Canal Commission, effective March 31, and sails for the United States on the steamer *Ancon*, on April 2.

Colonel Phillips was detailed for duty with the Commission in 1905, and has served as Superintendent of Ancon Hospital, Assistant Chief Sanitary Officer, and since the departure of Colonel Gorgas for South Africa in October last, has been in charge of the Sanitary Department as Acting Chief Sanitary Officer.

He entered the Medical Corps of the Army in 1883, and has served through the various Commission grades in that Corps, having been promoted to colonel in April, 1912. During the Spanish-American War, he accepted service with the volunteer army, and was commissioned, first as Brigade Surgeon, and afterward, as Division Surgeon.

Mrs. Phillips and Miss Phillips left the Isthmus several months ago and are at present in New York.

Commander Douglas E. Dismukes, U. S. N., captain of one of the terminal ports under the permanent organization, sailed from New York on the *Cristobal*, on Thursday, March 26, and is due to arrive on Friday, April 3. Lieut.-Commander H. V. Butler, U. S. N., captain of the other terminal port, arrived on the Isthmus on the United Fruit Company's steamer *Abangarez* from New Orleans, on Wednesday, March 25.

Passed Assistant Surgeon Marshal C. Guthrie, U. S. Bureau of Public Health, the new Chief Quarantine Officer, arrived on the *Colon*, on Thursday, March 26. Capt. Daniel W. Harmon, Medical Corps, U. S. A., one of the new health officers, arrived on the *Abangarez*, on Wednesday, March 25.

Thomas M. Cooke resigned as Collector of Revenues in the former Department of Civil Administration, effective March 31, and, accompanied by Mrs. Cooke, sailed for New York on the *Colon*, on Wednesday, April 1. He received his appointment as Collector of Customs for the Canal Zone at San Juan,

Porto Rico, on July 13, 1904, and arrived on the Isthmus to take up the duties of the position on July 26 of that year. On September 2, 1904, the title of his office was changed to Collector of Revenues, and it has been maintained as such ever since, although in addition to his other duties, he has been in charge of the Canal Zone postal system, of the administration of estates of employes who have died on the Isthmus, of the leasing of lands and buildings, and was identified with the organization of the Canal Zone public school system. He was born in Ashtabula County, Ohio, in 1864, and later removed to Nebraska. His future address will be Sharon, Mercer County, Pa.

Joseph A. LePrince resigned as chief sanitary inspector of the Department of Sanitation on March 26, and will sail for New York on the *Ancon* on Thursday, April 2. Mrs. LePrince, her four children, and her mother, Mrs. Lloria, sailed for Havana, Cuba, on the *Cartago*, on Thursday, March 26. Mr. LePrince was appointed to the Canal Service on June 7, 1904, and arrived on the Isthmus on June 28. He was charged with the work of mosquito extermination, and, during the yellow fever campaign in 1905, he served as acting health officer of Panama, in addition to performing the duties of chief sanitary inspector. He was engaged in mosquito work during his entire period of service. Mr. LePrince was born in Leeds, Eng., in 1875, but his parents removed to New York City when he was seven years old. He received his earlier education at Sach's Collegiate Institute, New York City, and subsequently entered the College of Mines of Columbia University. He was graduated therefrom in 1898, with the degree of civil engineer, and in 1899, he took a post graduate course, receiving the degree of master of arts. During the cleaning up of Havana, after the Spanish-American War, he was assistant chief sanitary officer of the Department of Health.

George A. Ninas resigned as chief clerk of the Department of Civil Administration, effective March 31, and will sail for New Orleans on the United Fruit Company's steamer *Abangarez*, on Thursday, April 2. He was appointed to the Canal Service on March 23, 1905, arrived on the Isthmus on March 28, and was assigned to duty in the old Executive Department, better known at that time as the Office of the Governor. He was appointed chief clerk of the Department of Civil Administration, effective July 20, 1908, and has held the position continuously since. He was born in 1878, at Concordia, Mo., and prior to his coming to the Isthmus, he was connected with various business houses in Kansas City, Mo. Mrs. Ninas and son returned to the United States several months ago.

Fatal Accident.

Theodore A. Buker, a conductor employed in the Second Division, living at Corozal, fell from a platform at the rock bin at Ancon quarry, under the wheels of a moving train, on Tuesday, March 24, and received injuries which resulted in his death the same day. He was 33 years of age, and had been on the Isthmus since October 1, 1909. His first employment was with the Panama railroad, and later, he was transferred to the Canal service. He is survived by his wife, living at Corozal, and by his father, residing at Cambridge Junction, Vt.

SOCIAL LIFE OF THE ZONE.

Women's Exposition Auxiliary.

The deferred meeting for the purpose of forming the Panama Auxiliary to the Woman's Board of the Panama-Pacific International Exposition will be held at the Hotel Tivoli on Thursday afternoon, April 2, at 3 o'clock. The cordial invitation extended to the women of Panama by the representative of the board, Mrs. S. M. Healey, to organize as an auxiliary to that body has been iterated in letters received from the chairman on organization, and other members of the Woman's Board. Membership in the auxiliary carries no obligations; it entitles the holder to the privileges of the rest and tea rooms in the California Host Building, which will be furnished and operated by the Woman's Board.

Women who desire to become members of the auxiliary may send their names to Mrs. Edwin L. Luce, Ancon, and they will be registered at the meeting on April 2. Membership cards and pins will be forwarded to those whose names thus appear on the register. Attendance at the mass meeting is not necessary for registration. Membership dues are \$2, and the official pin of the Woman's Board is sold to members at \$1.

Cristobal Woman's Club.

The Cristobal Woman's Club held a musical at its regular meeting on Wednesday afternoon, April 1. The Cecelian trio sang, and there were several other selections by members of the club. The sixth annual meeting will be held on April 15.

Selfdenial Week.

The annual selfdenial week, practised throughout the Salvation Army, will begin in April, extending over a period somewhat longer than a week. The object of the fund so collected is to provide for the support of the local and foreign missions, and to aid in carrying on the social work of the army. The Salvation Army work among the West Indians in Panama, and the countries adjacent, is controlled from a central office located in Kingston, Jamaica. The territory includes 92 corps and outposts (organized mission stations), social institutions, such as cheap lodging houses, food depots, and night shelters. About 100 officers, or missionaries, men and women, are engaged in directing these missions and institutions, or assist in the various administrative offices. Approximately 30 of these officers are Europeans; the remainder are West Indians. The moneys collected here for the selfdenial offerings are used largely for local missions and social work.

Isthmian Sunday Schools.

The quarterly convention of the Isthmian Sunday School Association will be held at the Commission clubhouse at Pedro Miguel, on Sunday afternoon, April 5, the exercises beginning at 2.30 o'clock. The Rev. Aquila Lucas, representative of the International Sunday School Association for Central America and the West Indies, will be present. Mrs. William Harrison of Cristobal will speak on special phases of primary work in the Sunday schools. Delegates will take the trains, as follows: Leave Panama at 12.15 p. m., leave Bas Obispo at 1.20 p. m., and leave Colon at 11 a. m.

The Rev. Aquila Lucas will visit the Empire Sunday school at its session on April 5, and

on the evening of the same day, he will address a meeting in the chapel at Gatun.

The Isthmian Sunday School Association is arranging an all day excursion for Friday, April 10, on the sightseeing barge. The barge will leave Paraiso as soon as possible after the arrival of the trains from Panama and Colon, and will pass through Culebra Cut and Gatun Lake to Gatun. About an hour and a half will be spent at Gatun before starting on the return trip. The barge in returning, will arrive at Paraiso in time for the excursionists to take the evening trains to their homes. A liberal rate has been made for this trip, and Sunday school workers and their friends are invited to join the party. It is requested that early application for tickets be made. Children must be accompanied by their parents, or some person who will be responsible for their care. Further details of the excursion may be had from Sunday school superintendents in the various villages.

Church Notes.

At St. Luke's Hospital chapel, Ancon, the services during Holy Week will be, as follows: Monday and Tuesday, at 5 p. m.; Wednesday and Thursday, at 10 a. m.; on Good Friday, at 10 a. m. and 5 p. m.

The services at St. Paul's Church, Panama, will be at 11 a. m., and the three hours' service, from 12 to 3 p. m., on Good Friday.

The services at Christ Church, Colon Beach, for Palm Sunday and Holy Week will be, as follows: On Palm Sunday, April 5, there will be a service of blessing the palms and palm procession at 10.30 p. m.; choral evensong, processional, and litany at 7.30 p. m. During the week, there will be daily eucharist at 7.30 a. m., until Thursday. On Thursday, the celebration of the Holy Communion will be at 9 a. m. On Good Friday, the services will be *Pro Anaphora* at 11.30 a. m. and the three hours' service from 12 noon to 3 o'clock; at 7.30 p. m., the story of the Cross will be sung, and pictures of the Passion will be shown.

Knights of Columbus.

Members of the Knights of Columbus, who are unaffiliated with either Isthmian council, and are in good standing, will confer a favor on the joint degree committee by sending their names and addresses to the undersigned.

J. V. DELGADO, Cristobal, C. Z.

March 30, 1914.

Transfer of Lake Area Inhabitants to New Gorgona Completed.

The Panama Railroad Company has completed the delivery of household goods and building materials to New Gorgona, for persons who moved to that site from the Gatun Lake area, principally from the vicinity of Gorgona and Matachin. The number of people who have gone to New Gorgona and the territory near it, from the Canal Zone, is estimated at approximately 1,000. The transfer has been in progress since last August. Five trips of a tug with lighters were made, a total of 15 lighterloads of goods having been handled. The materials for 73 houses were moved, in addition to quantities of furniture, domestic animals, etc.

The U. S. S. *Denver* arrived in Panama Bay, from Corinto, Nicaragua, on Monday, March 30, for coal. It will return to Corinto about April 6.

GROWING OF HYBRID COTTON.

Canal Employee Produces a New Species.

A cotton grower from North Carolina has been conducting experiments for several months past in hybridizing the native tree cotton with the American cotton plant with encouraging results, using for the purpose a plot of ground near his quarters on the slope of Sosa Hill at Balboa. It is claimed that the crossing of the plants has given the new product an added tenacity as to life, has resulted in an increased production, and has improved the fibre. The spot where the experiments have been made would seem least promising for the successful growth of the plant. The ground was lacking in richness originally, and was brought up to its present high state of cultivation by the introduction of chemicals, something after the manner of the fertilization methods employed by the cotton planters of the Southern States. The grower produced his hybrid by means of pollenization, the process having been aided to some extent by winged insects which transfer the pollen from one cotton bloom to another. Although the production is highest in the rainy season crop, the present dry season has not materially affected the plant growth; the plants have been constantly pruned down to the bare stalk, but put out new shoots at once. Hybridization has also increased the size of the bolls, actual weights showing an average of 18 bolls to the pound, whereas, ordinary cotton is said to require from 70 to 80 bolls to the pound. Bolls have been produced at the Balboa experimental station weighing over an ounce.

Another advantageous factor is that the plant in this climate will continue to produce for several seasons without replanting. The life of the native cotton tree is not exactly known, but observations extending over a period of 10 years show that the tree has invariably produced a crop, and that during the whole time, there has been no appreciable difference in the output from year to year. A Canal employee took a quantity of this tree cotton to the Bureau of Plant Industry in the Department of Agriculture at Washington in the year 1905. The officials of the bureau at that time had heard of this cotton, but had seen no samples. A careful analysis of it was made, with the result that the opinion was given that it compared favorably in texture and length with the American product.

The grower has also conducted experiments looking to the production of a substitute for silk. This he believes has been accomplished by crossing the blooms of certain wild fibre plants with the cotton plant, resulting in a staple of unusually fine texture. Comparisons of the threads of this product, with cocoon silk, or even the threads of a spider's web, under a magnifying glass, show that the vegetable substitute is considerably finer, yet the tensile strength is about five times greater, as shown by actual tests. The grower is saving his hybrid seeds, and has negotiations under way with the Panama Government looking to the planting of a certain acreage in a section of the country, where the soil is naturally better adapted to the purpose than here. He has also received a number of inquiries from abroad, and has had samples of the cotton passed upon by the plant experts in the Department of Agriculture at Washington. The British Minister, Sir Claud Mallet, recently inspected the plants for the purpose of making a report on the subject to his Government.

EXECUTIVE ORDER

**Providing Compensation for Personal Injuries—
New Regulations in Effect April 1, 1914.**

By virtue of the authority vested in me by Section 5 of the Panama Canal Act, approved August 24, 1912, directing the President to "Provide a method for the determination and adjustment of all claims arising out of personal injuries to employes thereafter occurring while directly engaged in actual work in connection with the construction, maintenance, operation, or sanitation of the Canal, or of the Panama railroad, or of any auxiliary canals, locks, or other works necessary and convenient for the construction, maintenance, operation, or sanitation of the Canal, whether such injuries result in death or not, and prescribe a schedule of compensation therefor," I hereby establish the following Order:

Section 1. The United States or the Panama Railroad Company shall pay compensation as hereinafter specified for personal injuries to their respective employes occurring on and after April 1, 1914, while such employes are directly engaged in actual work in connection with the construction, maintenance, operation, or sanitation of the Panama Canal, or of the Panama railroad, or of any auxiliary canals, locks, or other works necessary and convenient for the construction, maintenance, operation, or sanitation of the Panama Canal, whether such injuries result in death or not; provided, however, that no compensation shall be paid to any employee for any injury occurring to himself, nor shall any compensation be paid to his legal representatives or other person in the event of his death, if such injury or death occurred to him as the result of an intention upon his part to cause such injury to himself, or to cause his own death; and no compensation shall be paid to any employee who is injured as the result of an intention upon his part to cause injury or death to another person, nor shall any compensation be paid to his legal representatives, or to any other person in the event of his death, as the result of an intention upon his part to cause injury or death to another person; and provided further, that no compensation shall be paid to any employee for any injury to himself which was brought about by reason of his own intoxication; and similarly, no compensation shall be paid to the legal representatives, or to any other person, for or on account of the death of any employee, when such death was brought about by reason of the intoxication of such employee.

Section 2. *Compensation the exclusive remedy*—Except as provided in this Order, the United States and the Panama Railroad Company shall not be liable for personal injury to, or the death of an employee, for which compensation is provided in Section 1 hereof.

Section 3. *Waiting period*—No compensation shall be paid for a period of disability unless such period shall cover seven full consecutive days following the day of the inception of such disability. For any part of the day on which disability on account of injury begins and for the first four days of disability following, no compensation shall be paid at any time, except as provided in Sections 9 and 10.

Section 4. *Permanent total disability*—If the injury results in permanent total disability, compensation shall be paid to the employee, except as provided in Section 16, for a period of eight years. For the first three months of such period, following the fourth entire day of disability, the monthly compensation shall equal 75 per cent of his monthly pay, and for the remainder of the period 50 per cent of his monthly pay.

The following cases shall be included among those held to result in permanent total disability, to-wit:

The total and irrecoverable loss of sight in both eyes.

The loss of both feet at or above the ankle.

The loss of one hand and one foot.

The loss of both hands at or above the wrist.

Paralysis of the legs, arms, feet, or hands, or an arm and a leg.

Injury resulting in incurable imbecility or insanity.

Section 5. *Temporary disability*—If the injury results in temporary disability, compensation shall be paid to the employee, except as provided in Section 16, until the end of the period for which compensation is payable as fixed below unless such employee in the opinion of the Governor of the Panama Canal is sooner able to resume work. For the first three months of such period, following the fourth entire day of disability, the monthly compensation shall equal 75 per cent of his monthly pay, and for the remainder of such period, 50 per cent of his monthly pay.

For the fracture of the skull, both tables, thirteen months.

For the fracture of the thigh, twelve months.

For the fracture of the arm between the elbow and shoulder, twelve months.

For the fracture of the pelvis, ten months.

For the fracture of the leg, eight months.

For the fracture of the patella, eight months.

For the fracture of the forearm between the wrist and elbow, six months.

For the fracture of two or more ribs, four months.

For the fracture of the foot, five months.

For the fracture of the clavicle, three months.

For the fracture of the lower jaw, three months.

For the fracture of two or more toes, two months.

For the fracture of two or more fingers, two months.

In all other cases of injury resulting in temporary disability, or in the event of two or more injuries listed above, the Governor shall fix the period for which compensation shall be paid, basing his decision on the relation that the injury or injuries received bears to those given above.

If, before the expiration of the period for which compensation is payable, the Governor of the Panama Canal determines that the employee is capable of performing any class of work, and it is desired to continue such employee in the service, there shall be paid to the employee until the end of the period, or during such temporary partial disability, a monthly compensation equal to 75 per cent of the difference between the monthly rate of compensation received by him at time of injury, and the wages per month of the particular class of work which the Governor determines the employee capable of performing.

Section 6. *Permanent partial disability*—If the injury results in permanent partial disability, compensation shall be paid to the employee, except as provided in Section 16, until the end of the period for which compensation is payable, as fixed below. For the first three months of such period, following the fourth entire day of disability, the monthly compensation shall equal 75 per cent of his monthly pay, and for the remainder of the period, 50 per cent of his monthly pay.

(A) If the injury is included in the following list the period for which compensation is payable as stated for such injuries may be increased by the Governor of the Panama Canal, at his discretion, by not to exceed 50 per cent of the period specified, having regard

to the nature of the employee's trade or qualifications for work:

For the loss by separation of one arm, at or above the elbow joint or permanent or complete loss of the use of one arm, 40 months.

For the loss by separation of one hand at or above the wrist joint, or the permanent and complete loss of the use of one hand, 32 months.

For the loss by separation of one leg at or above the knee joint, or the permanent or complete loss of the use of one leg, 36 months.

For the loss by separation of one foot at or above the ankle joint, or the permanent or complete loss of the use of one foot, 24 months.

For the permanent and complete loss of hearing in both ears, 40 months.

For the permanent and complete loss of hearing in one ear, 18 months.

For the permanent and complete loss of the sight of one eye, 16 months.

(B) If the injury is included in the following list, the period shall be that stated for such injury:

For the loss by separation of a thumb, 10 months.

For the loss by separation of a first finger, seven months; a second finger, five months; a third finger, four months; a fourth finger, three months.

The loss of one phalanx of a thumb or two phalanges of a finger shall be considered equal to the loss of one-half a thumb or finger, and compensation for one-half of the above period shall be payable.

The loss of more than one phalanx of a thumb and more than two phalanges of a finger shall be considered as the loss of an entire thumb or finger.

For the loss by separation of a great toe, compensation for eight months, and any other toe, compensation for three months will be paid.

In all other cases of injury resulting in permanent partial disability, or in the event of two or more injuries listed in Clauses A and B, the Governor shall fix the period for which compensation shall be paid, basing his decision on the relation that the injury or injuries bears to those given in Clauses A and B, provided, however, that in no case shall payment be made for a period greater than 60 months.

If, before the expiration of the period for which compensation is payable, the Governor of the Panama Canal determines that the employee is capable of performing any class of work, and it is desired to continue such employee in the service, there shall be paid to the employee until the end of the period, a monthly compensation equal to 75 per cent of the difference between the monthly rate of pay received by him at the time of injury and his wage earning capacity per month.

Section 7. *Affidavit as to wages*—After the beginning of partial disability the Governor of the Panama Canal may, from time to time, require the injured employee to make affidavit as to the wages per month which he is receiving. In the statement of the wages, the value of rent, board, lodging, and other advantages received from the employer, which can be estimated in money, shall be taken into account. If the employee at any time fails to make such affidavit, he shall not be entitled to any compensation while such failure continues, and the period of such failure shall be deducted from the period during which compensation is payable to the employee; provided, however, that if the said employee, in any such affidavit furnished, shall swear falsely with respect to any material fact within his knowledge, the compensation otherwise payable to him shall, from time of the filing of such affi-

davit, or the ascertainment of the falsity thereof, cease and determine.

Section 8. Refusal to work—If an employee, determined to be capable for such work, refuses to work after suitable work is furnished to or secured for him by the United States or by the Panama Railroad Company, he shall not be entitled to any compensation while such refusal continues, and the period of such refusal shall be deducted from the period during which compensation is payable to the employee.

Section 9. Sick leave—If at the time disability begins the employee has to his credit any unused sick leave, he may, at his option, subject to the approval of the Governor of the Panama Canal, use such leave until it is exhausted. During such time no compensation under this Order shall accrue, and any period of sick leave so used after the first four days of disability following the day of injury shall be deducted from the period for which compensation under this Order is payable to the employee.

Section 10. Medical, surgical, and hospital treatment—There shall be furnished to the injured employee such medical, surgical, and hospital service and supplies as may in the opinion of the Governor of the Panama Canal be deemed just and reasonable, except that when an injured employee not on the Isthmus of Panama elects to furnish his own physician, or to care for himself, the expense thereof is to be borne by the employee and no allowance therefor will be made under this Order. If any such injured employee shall refuse to submit to the medical or surgical treatment prescribed for him and determined by the Governor of the Panama Canal to be reasonable and proper, the Governor may in his discretion either reduce the amount of compensation to which said employee might otherwise be entitled, or consider such refusal on the part of the employee to be a waiver by him of any right to compensation under this Order.

Section 11. Transportation of injured employees—If, in the opinion of the Governor of the Panama Canal, it is not desirable to continue the injured employee in the service, such employee, so soon as he is able to travel, may be furnished, in the discretion of the Governor of the Panama Canal, transportation to his home port, or to any other port requiring no greater expenditure. If an injured employee, who is a citizen of the United States, desires to go to a port in the United States, the cost of transportation to which is greater than the cost to his home port, an amount may be paid toward the cost of such transportation, not in excess of the cost of transportation to his home port. In addition, an injured employee may be furnished railway transportation to or toward his home in the United States costing not in excess of \$30. If at the time of the injury, the employee is on the Isthmus, the Governor of the Panama Canal may, in his discretion, suspend for such period as such employee remains on the Isthmus after free transportation has been offered, as herein provided, the compensation payable to such employee.

Section 12. Death payments—If the injured employee shall die within one year from the date of and as the result of injuries received while directly engaged in actual work, the persons mentioned in this section, except as provided in Section 16, shall be entitled to receive compensation as set forth in the following schedule after deducting from the periods mentioned therein any period for which payment has been made to the deceased employee, provided, however, that the total amount of compensation paid to employees and beneficiaries shall not exceed the sum of \$5,000.

(a) If the deceased employee leaves a widow to whom he was married at the time of the injury, she shall be paid monthly for eight years, unless she sooner marries or dies, a

sum equal to 25 per cent of the monthly pay of the employee.

(b) If the deceased employee leaves a widow to whom he was married at the time of the injury, with one or two children incapable of selfsupport and dependent on her for support, there shall be paid her monthly for each such child an additional allowance of 10 per cent of the monthly pay of the employee, such additional allowance to continue until the child dies, marries, or in the opinion of the Governor of the Panama Canal, becomes capable of selfsupport. If there shall be more than two children dependent on her for support the additional monthly allowance for all children shall be 25 per cent of the monthly pay of the employee. In no case, however, shall the additional monthly allowances continue beyond a period of eight years.

(c) If the deceased employee leaves a widow, or a widow and children, entitled to compensation under Paragraphs *a* or *b* of this section, and also leaves another child or children incapable of selfsupport and not supported by the widow, there shall be paid monthly for the benefit of such child or children last named, to such person as may be designated under the provisions of Section 16, such proportions as the Governor of the Panama Canal may decide, of the deceased employee's monthly pay, not exceeding 10 per cent for each such child, provided, that the total proportion of monthly pay of deceased employee to widow and all children under this paragraph and Paragraphs *a* and *b* of this section shall not exceed 35 per cent for widow and one child, 45 per cent for widow and two children, and 50 per cent for widow and three or more children, and; provided that, in order to make payment to the children under this section, the Governor, may, if necessary, reduce the proportion payable to widow or children under Paragraphs *a* and *b* of this section; and provided further, that payment for the benefit of a child or children not supported by the widow shall continue until the child dies, marries, or in the opinion of the Governor, becomes capable of selfsupport, but in no case shall such payments continue more than eight years.

(d) If the deceased employee has left no widow entitled to compensation under this Order, but has left a child or children incapable of selfsupport, there shall be paid monthly for the benefit of such child or children to the person designated under the provisions of Section 16, not more than 25 per cent of the monthly pay of the deceased employee for one child, and not more than 50 per cent of the monthly pay for two or more children, provided that payments shall continue until the child dies, marries, or in the opinion of the Governor, becomes capable of selfsupport, but in no case shall such payments continue more than eight years.

(e) If the deceased employee leaves a widow or children entitled to compensation under this Order, and shall also leave a parent either partially or wholly dependent on him for support, or a brother, sister, grandparent, or grandchild wholly dependent on him for support, there may be paid to such relation monthly such portion or portions of the monthly pay of the employee as may be determined by the Governor of the Panama Canal, provided that the total compensation to all beneficiaries under this and Paragraphs *a*, *b*, *c*, and *d* of this section shall not exceed 50 per cent of the monthly pay of the deceased employee, and provided that, in order to make payment to the relatives under this paragraph, the Governor of the Panama Canal may, if necessary, reduce the proportion payable to widow or children under Paragraphs *a*, *b*, *c*, and *d* of this section, and provided further, that payment for the benefit of a relative under this paragraph shall cease if he dies, marries, or in the opinion of the Governor, becomes capable of selfsup-

port, but in no case shall payment continue more than eight years.

(f) As used in this section, the terms "Child" and "Children" include stepchildren, adopted children, posthumous children, and illegitimate children. The terms "Brother" and "Sister" and their plurals include stepbrothers, and stepsisters, half brothers and half sisters, and brothers and sisters adopted by the parent of the deceased employee. The terms "Grandchild" and "Grandchildren" include children of adopted children, and children of stepchildren, but do not include stepchildren of children, stepchildren of stepchildren, or stepchildren of adopted children. The terms "Parent" and "Parents" include stepparents and the parents by whom the deceased employee was adopted. The terms "Grandparent" and "Grandparents" include the parents of the parents by whom the deceased employee was adopted, but do not include parents of stepparents, stepparents of parents, or stepparents of stepparents.

(g) If a beneficiary should die, or for any other reason cease to be entitled to compensation under this Order, the amounts payable to the remaining beneficiaries shall be recast; the amount payable to each for the remainder of the period during which he is entitled to compensation being determined in accordance with the provisions of the preceding paragraph of this section.

Section 13. Burial expenses—If, as the result of the injury, an employee whose home is in the United States dies while on the Isthmus of Panama, or while away from his home or his office, such absence being under instructions from the Panama Canal authorities, and the right to compensation has not ceased, his body, if practicable, and if desired by his relatives, and if transportation has not been furnished the employee under Section 11 before his death, shall be embalmed and transported in a hermetically sealed casket to his home. If death occurs on the Isthmus, and the body is not transported from the Isthmus, the body shall be interred or cremated on the Isthmus at the expense of the United States, or of the Panama Railroad Company.

Section 14. Computation of pay—For the purpose of calculating compensation under this Order, the monthly pay of the employee shall be taken as the basis, to be computed as provided hereunder, except that where such monthly pay so computed amounts to \$200 or over, \$200 shall be taken as the basis for computing compensation. Subject to the maximum herein fixed, monthly pay shall be computed, as follows:

(a) If the employee is paid by the year, divide his yearly pay at the time of the injury by 12.

(b) If the employee is paid by the month, take his monthly pay at the time of the injury.

(c) If the employee is paid by the week, multiply his weekly pay at the time of the injury by 52, and divide the result by 12.

(d) If the employee is paid by the day, divide his daily pay at the time of the injury by the number of hours worked per day, and multiply the result by eight. When his daily rate of pay on the basis of eight hours per day has been ascertained, multiply the result by 26.

(e) If the employee is paid by the hour, multiply his hourly pay at the time of the injury by eight. When his daily rate of pay on the basis of eight hours per day has been ascertained, multiply the result by 26.

(f) If the employee is paid by his output, find his daily pay at the time of the injury by dividing the total amount earned by him in the employment in which and at the rate of pay at which he was employed at the time of the injury by the number of days he was so employed during the 30 days immediately preceding the injury, then multiply the result

by 26, except as provided in Paragraph g. In all cases under this paragraph (f), in which the employe works more than eight hours per day, and in such other cases as the Governor of the Panama Canal may deem proper, he may fix the compensation that shall be paid in case of injury, based upon an average wage of employes working eight hours per day in the same occupation as that of the injured employe.

(g) Payments for a fractional part of a month to or on account of employes who were on a per diem, hourly, or piece work basis, shall be made for regular working days only, except that employes who were at time disability was incurred entitled to pay for holidays will receive pay therefor.

(h) Subsistence shall be included as a part of the pay, and commutation therefor at a rate fixed by the Governor of the Panama Canal shall be paid during any period subsistence is not actually furnished to an employe entitled to subsistence.

Section 15. *Commulation of periodical payments*—Unless it shall appear to the Governor of the Panama Canal to be for the best interest of the United States, or of the Panama Railroad Company, or for the best interest of the injured employe or the beneficiary, the liability of the United States, or the Panama Railroad Company, for compensation to such injured employe or beneficiary shall be discharged by the payment of a lump sum which will equal the total sum of the probable future payments, capitalized at their present value, calculated at four per cent per annum with annual rests. The probability of the death of the injured employe or the beneficiary before the expiration of the period for which compensation is payable shall be determined according to the *American Table of Mortality*. The probability of the happening of any other contingency affecting the amount or duration of the compensation shall be disregarded. Upon paying such amount all further liability on the part of the United States, or the Panama Railroad Company, on account of such injury or death shall cease.

Section 16. The true intent and meaning of this Order is to provide a fund for the injured employe, or, in the event of his death, for those beneficiaries herein provided for, and to that end payment shall be made directly to the employe as herein provided for, or to the beneficiary as herein provided for, excepting in those cases where such employe or such beneficiary is, by reason of lunacy, infancy, or other legal disability, not in a position to receive and give legal acquittance for such payment. In all cases of that character, where the employe or beneficiary named herein is under legal disability whatever, so that his receipt and release would not be an acquittance, the Governor of the Panama Canal shall pay the sum which would otherwise go directly to such employe or beneficiary to whomsoever has been qualified by legal proceedings to receive the same for, or on account of, such employe or beneficiary, if any such there be who has made application therefor to the Governor; and in the event that no such application is made to the Governor, then the Governor may appoint some one to receive the money for, and on account of, such employe or beneficiary so under disability, and may require such person to make such formal application with respect, thereto and to furnish such bonds for the security of the money and the performance of his duties as to the Governor may seem proper.

Section 17. *Notice of injury or death*—Immediately after the injury, the injured employe, or someone on his behalf, shall give to the immediate superior of such employe notice, written, if practicable, of the injury, and if the injury results in the death of the employe, one of the persons entitled to compensation, or some person on his behalf, shall at once give

either to the immediate superior of such employe, or to the Governor of the Panama Canal, a written notice of such death. The notice shall state the name of the employe, his class of service, the year, month, day, and hour when, and the particular locality, where the injury or death occurred, the cause of the injury or death, the nature of the injury, and the address of the employe, and of the person giving the notice. The notice may be given personally, or sent by mail.

Failure to promptly give the notice herein specified may, in the discretion of the Governor of the Panama Canal, be decided by him to be a waiver by the employe or his beneficiary of any claim to compensation under this Order.

Section 18. *Report of injury or death*—Immediately after an injury to an employe resulting in his death, or in his probable disability, the immediate superior of the employe shall at once make a report to the Governor of the Panama Canal, containing such information as the Governor of the Panama Canal may, by regulation, require.

Section 19. *Claim for compensation*—No compensation under this Order shall be allowed to any person unless he, or someone on his behalf, shall make a written claim therefor upon the Governor of the Panama Canal within the time specified in Section 21. The claim may be served personally upon, or sent by mail, either to the Governor of the Panama Canal, or to such person as he may, by regulation, require.

Section 20. *Contents of claim*—The claim shall be signed by, or on behalf of the person making the claim, and shall state the name of the employe, the age, sex, nationality, and class of service of such employe, the year, month, day, and hour when, and the particular locality, where the injury or death occurred, the cause of the injury or death, the nature of and extent of the disability resulting therefrom, the monthly pay of the employe at the time of the injury, the relationship to the employe of the person claiming to be entitled to compensation, the names and addresses of all persons entitled to compensation on account of such injury or death, and the address of the person making the claim. The claim shall be sworn to by the person entitled to compensation, or by the person acting on his behalf, and, except in case of death, or as otherwise provided in regulations prescribed by the Governor of the Panama Canal, shall be accompanied by a certificate of the employe's physician, if any, stating the nature of the injury, and the nature and extent of the disability. The claim shall, wherever possible, be made on forms furnished by the Governor of the Panama Canal, and, in addition to the statements above required, shall contain such other information as the Governor of the Panama Canal may require.

The Governor of the Panama Canal may waive the making of and swearing to claims and the inclusion therein of any of the above requirements in such cases as he may deem proper.

Section 21. *Time within which claim must be made*—Claims for compensation shall be made within 60 days after the beginning of disability resulting from an injury, or, in case of death, within one year after the death. For any reasonable cause shown, the Governor of the Panama Canal may allow claim for injury to be filed within one year after the injury.

No claim for compensation shall be allowed where the disability commences more than six months after the occurrence of the alleged injury, nor where the disability begins after the separation of the employe from the service.

Section 22. *Medical examination*—After the injury and during disability the employe shall as frequently and at such times and places as may be reasonably required submit himself to examination by a medical officer of

the United States, or by a physician designated by the Governor of the Panama Canal and paid by the United States or by the Panama Railroad Company, as the case may be. The employe may have a duly qualified physician designated and paid by him present to participate in such examination. If an examination of an employe is ordered while he is away from the Isthmus of Panama, and such order requires him to travel from the place wherein he dwells, then he shall be paid his reasonable traveling and other expenses and loss of wages incurred in order to submit to such examination. If the employe refuses to submit himself for, or in any way obstructs, any examination, his right to claim compensation under this Order shall be suspended until such refusal or obstruction ceases. No compensation shall be payable while such refusal or obstruction continues, and such period shall be deducted from the period for which the compensation would otherwise be payable.

Section 23. *Disagreement between physicians*—In case of any disagreement between the physician making an examination on the part of the United States or the Panama Railroad Company and the employe's physician, the Governor of the Panama Canal shall appoint a third physician. The decision of the majority shall be final. A reasonable fee shall be allowed and paid by the United States, or by the Panama Railroad Company, as the case may be, to such third physician if he is not a medical officer of the United States.

Section 24. *Assignment of right against third person*—If an injury or death for which compensation is payable under this Order is caused under circumstances creating a legal liability upon some person other than the United States or the Panama Railroad Company to pay damages therefor, no compensation shall be payable to any beneficiary for such injury or death until he assigns to the United States or to the Panama Railroad Company, as the case may be, any right of action which he may have to enforce such liability of such other person, or any right which he may have to share in any money (or other property) received in satisfaction of such liability of such other person. The United States or the Panama Railroad Company, as the case may be, if it realizes upon such right shall, after deducting the amount of any compensation already paid to the beneficiary and the expenses of such realization or collection, pay over to the beneficiary any surplus remaining. Such surplus so paid over shall be credited on future installments of compensation as they become due. The Governor of the Panama Canal may waive the requirement of such assignment, or may waive it for such period as he may deem proper.

Section 25. *Assignment of right against Panama Railroad Company*—If an injury or death for which compensation is payable under this Order is caused under circumstances creating a legal liability upon the Panama Railroad Company to pay damages therefor under the laws of the United States or of any State, Territory, or possession of the United States or of the District of Columbia, or of any foreign country, no compensation shall be payable to any beneficiary for such injury or death until he releases to the Panama Railroad Company, any right or action which he may have to enforce such liability of the Panama railroad, or until he assigns to the United States or to the Panama Railroad Company, as the case may be, any right which he may have to share in any money (or other property) received in satisfaction of such liability of the Panama Railroad Company. The Governor of the Panama Canal may waive the requirement of such assignment or release for such period as he may deem proper.

Section 26. *Assignments and attachments*—No claims for compensation under this Order shall be assignable, and all compensation and

claims therefor shall be exempt from all claims of creditors.

Section 27. *Attorneys' fees*—No claim for legal services in connection with any claim arising under this Order shall be enforceable unless approved by the Governor of the Panama Canal.

Section 28. *Modification of allowance of compensation*—The Governor of the Panama Canal may at any time review, and, in accordance with his determination thereon, enl, diminish, or increase any compensation previously fixed or determined.

Section 29. *Recovery of compensation erroneously paid*—If any compensation is paid under mistake of law or of fact the Governor of the Panama Canal shall have power to cancel any order under which such compensation has been paid, and shall be entitled to recover whatever has been so paid.

Section 30. *Powers of the Governor of the Panama Canal*—The Governor of the Panama Canal shall make all necessary rules and regulations for the proper, effective, and economical enforcement of this Order, and shall decide all questions arising under this Order, or in regard to the interpretation thereof. His determination of any fact necessary to, or underlying any claim hereunder, shall be final and conclusive.

Section 31. *Singular, masculine, and person*—Wherever used in this Order the singular includes the plural and vice versa, and the masculine gender includes the feminine and neuter, and the word "Person" includes any firm, association, or corporation.

Section 32. *Liability of the United States and of the Panama Railroad Company*—If the payment of compensation under this Order on account of an injury or death is from the funds of the United States, the Panama Railroad Company shall be released and discharged from all liability on account of such injury or death, and if it is from the funds of the Panama Railroad Company, the United States shall be released and discharged from all liability on account of such injury or death.

Section 33. *Repeal of laws of Canal Zone*—All laws of the Canal Zone inconsistent with any of the provisions of this Order are hereby repealed.

Section 34. *Time of taking effect*—This Order shall take effect on April 1, 1914.

WOODROW WILSON

THE WHITE HOUSE,
March 20, 1914.

Metal Trades Council.

At a meeting of Canal employes held at Empire on Sunday, March 29, the provisional metal trades council organized on Sunday, March 22, was dissolved, and a metal trades council, to be affiliated with the Metal Trades Department of the American Federation of Labor, was organized. Officers for the ensuing year were elected, as follows: President, S. J. Osten of the International Brotherhood of Blacksmiths and Helpers; vice-president, A. MacKenzie of the International Brotherhood of Boilermakers; secretary, H. A. S. Levering of the Pattern Makers' Association; treasurer, C. Hansen of the Sheet Metal Workers; sergeant-at-arms, Mr. Brown of the Sheet Metal Workers; board of trustees, Messrs. Patterson, William Nelson, and William Harris. Seven organizations of the metal trades were represented at the meeting. The next meeting will be subject to call of the president.

Order of Isthmian Conductors.

The next regular meeting of the Order of Isthmian Conductors will be held at Ancon lodge hall, on Sunday morning, April 5, at 9.30 o'clock.

GEO. B. ALLEN, *Secretary-Treasurer*.

CANAL WORK IN FEBRUARY.

Report of the Acting Chairman and Chief Engineer to the Secretary of War.

CULEBRA, C. Z., March 19, 1914.

The Honorable the Secretary of War,
Washington, D. C.

SIR: I have the honor to submit the following report of operations on the Isthmus for the month of February, 1914:

The following changes in organization were made:

Effective February 1, the timekeeping of the Subsistence Department of the Isthmian Canal Commission, and the commissary department of the Panama Railroad Company, were transferred to the Fourth Division of the Chief Engineer's Office; the Atlantic and Fifth Divisions were abolished, and the property accountability of these divisions transferred to the Quartermaster's Department, their records being transferred to the Fourth Division of the Chief Engineer's Office; the breakwater construction and the operation of Porto Bello quarry were transferred to the Second Division, Office of the Chief Engineer; the work remaining at Gatun Dam, El Caño saddle, backfill at Miraflores, Miraflores spillway channel, Ancon quarry, and the sluicing at Gold Hill, will be completed under the direction of the Chief Engineer, the personnel required for these works being carried on the rolls of the Fourth Division of the Chief Engineer's Office; the Sixth Division of the Chief Engineer's Office was designated the Dredging Division, Department of Construction and Engineering.

Effective February 11, the accounting division of the commissary department, Panama Railroad Company, was placed in charge of the Examiner of Accounts, Isthmian Canal Commission.

Department of Construction and Engineering.

The following table summarizes the principal items of work accomplished by the construction divisions during the month:

ITEM.	Unit.	1st Div.	2d Div.	4th Div.	Dredging	Municipal Eng'n'g	Total.
Work excavation, wet.....	Cubic yds.			144,550	1,024,121		1,168,671
Work excavation, dry.....	Cubic yds.		104,488	152,695			257,183
Total work excavation.....	Cubic yds.		104,488	297,245	1,024,121		1,425,854
Plant excavation, dry.....	Cubic yds.		4,196				4,196
Plant excavation, wet.....	Cubic yds.						
Total.....	Cubic yds.		4,196				4,196
Total Canal excavation.....	Cubic yds.		108,684	297,245	1,024,121		1,430,050
Concrete placed in locks, dams, and spillways.....	Cubic yds.	3,541					3,541
Fill placed in dams.....	Cubic yds.			15,980			15,980
Explosives used.....	Tons (Gr.)	32.39		18.19	20		70.58
Rock drilled.....	Feet	59,059		2,191	14,797		75,956
Tracks removed.....	Miles	3.82		7.66			11.48
New tracks laid.....	Miles	4.19		4.61			8.80
Rock crushed.....	Cubic yds.	17,934		41,880			59,814
Cement used.....	Barrels	4,487		7,785		3,132	15,404
New roads built.....	Miles					40	40
Water mains laid.....	Feet		1,205			15,620	16,825
Sewers laid.....	Feet					3,837	3,837
Open drains and ditches dug.....	Feet		2,422			1,214	3,636
Average daily force.....		3,831	4,714	1,566	2,319	2,227	14,657
Average rainfall.....	Inches.	.57	.66	.72	.33	.57	.53

First Division—Office of the Chief Engineer.

LOCK GATES AND PROTECTIVE DEVICES.

Work on the lock gates consisted of the application of bitumastic enamel to the top girders; there remains a small amount of painting and similar work.

Three complete chain fender machines have been delivered, and eight additional will be received early in March. Work on the chains and procuring material for them is advancing.

The keel for the lock entrance caisson was

laid on February 5. Practically all of the material for the caisson and anchor chains has been authorized for delivery.

PONTOON BRIDGE.

It is expected that the barge of the pontoon bridge that will span the Canal at Paraiso will be launched in the latter part of March.

OPERATING MACHINERY AND ELECTRICAL EQUIPMENT.

Work at the hydroelectric station at Gatun advanced so far that it is expected that both the mechanical and electrical equipment will be completely installed during March.

Electrical apparatus for the rising stem valve machines is 98 per cent installed; cylindrical valve machines 99 per cent; auxiliary culvert valves, 98 per cent; guard valve machines, mechanical erection, 91 per cent, electrical, 25 per cent.

Mechanical installation of the miter gate moving machines, and of the miter gate forcing machines, is complete; electrical installation is, respectively, 76 per cent and 87 per cent completed.

Mechanical erection of the chain fender machines so far received is advancing, and electrical installation has been begun at Gatun.

Towing track at the locks is 98 per cent installed, and all single crossovers, and 87 per cent of double crossovers, are in place.

Mechanical and electrical work on the spillway gate machines at Gatun is completed; at Miraflores, mechanical completed, and electrical, 80 per cent.

Except one motor for chain fender machines, all pumps and motors with float switches and starters have been received complete. The percentage of completion of mechanical and electrical installation is, respectively, 100 and 94, on miter gate sump pumps; 34 and one, on chain fender sump pumps; 100 and 76 on drainage sump pumps, and 100 and 20, on culvert pumps.

The installation of transformer rooms is 90

per cent complete at Gatun, 89 at Pedro Miguel, and 86 at Miraflores.

Contracts were let during February for 100,000 feet additional of cable, making the total 2,510,295 linear feet. The total pulled into ducts is 1,702,522 linear feet.

The control houses are practically completed, and the control board is 99 per cent complete at Gatun, 80 at Pedro Miguel, and 20 at Miraflores.

Reflectors for exterior and interior illumina-

nation are complete. All but one of the 206 lamp posts are erected at Gatun Locks, and the installation at Pedro Miguel and Miraflores is over half completed.

On the transmission line, 769 foundations for track-span bridges are in place, only 37 remaining to be placed. Bridges have been erected along about 35 miles of the railroad, the total to date being 628.

LOCK AND SPILLWAY OPERATIONS.

Seven lockages were made at Gatun in February, two at Pedro Miguel, and two at Miraflores. Seven of the 14 spillway gates at Gatun were operated satisfactorily during February, with the surface of the lake at 85 feet above sealevel.

EMERGENCY DAMS.

The emergency dam at the west lock at Miraflores was completed during the month, completing the contract for the six dams.

AIDS TO NAVIGATION.

Work advanced all along the Canal in the construction of towers, reference targets, and beacons, installation of lighting apparatus, placing poles for the transmission line through Culebra Cut, and similar routine connected with the lighting of the Canal.

Second Division—Office of the Chief Engineer.
BALBOA TERMINALS.

Permanent shops.—The work of design layout, and preparing requisitions for machines and materials was advanced. Out of a total of 319 machines to be installed, 66 are in operation, and 99 are about to be installed. Excavation for the shops and yards amounted to 2,353 cubic yards; yard fill, 15,151 cubic yards; concrete placed, 378 cubic yards in shop foundations, 1,443 cubic yards in footings, floors, and walls.

Dry docks.—Design of dry dock No. 1 was continued and specifications for machinery and valves were started. General revised plans for dry dock No. 2, and its structures, were practically completed. Four steam-shovels at work in the excavation for the docks, entrance basin, and coal pocket, excavated 97,884 cubic yards. The maximum depth continued at 30 feet below mean sealevel, but the area at this depth was enlarged.

Coaling plant.—Study was continued on the design of the reloader wharf, and detail plans were practically completed for berm crane supports, and reinforced concrete retaining wall along the line of the conveyor track. Excavation amounted to 11,544 cubic yards.

Pier and quay walls.—The work of design and computation was continued. Excavation amounted to 4,221 cubic yards; fill, 1,980 cubic yards; concrete placed, 2,220 cubic yards; reinforcing steel used, 144,828 pounds. On the pier, all the caissons, 209, have been sunk to rock; 104 have been filled with concrete, and the balance are being excavated and filled. On Section e-f of the quay wall, six caissons have been started. On Section g-h-i, 63 cubic yards of concrete were placed in the floor. On Section i-j-m-n, the sinking of caissons was completed, 65 in all, of which 49 have been filled with concrete.

Naos Island breakwater.—Fill placed upon the breakwater amounted to 84,218 cubic yards by this division, and 136,775 cubic yards by the Fourth Division.

ATLANTIC TERMINALS.

Coaling plant.—A plan for a concrete structure, resting upon piling as support for the stocking and reclaiming bridge track of the 700-foot extension, was practically completed,

and studies were continued for the construction and support of form work for the deck structure.

West breakwater.—The total fill at the end of the month was 1,909,984 cubic yards, of which 16,678 cubic yards were Porto Bello rock added during February. The total of breakwater completed at the end of the month was 6,241 linear feet.

Porto Bello quarry.—Breakwater rock shipped during the month amounted to 17,934 cubic yards.

East breakwater.—The surfacing and aligning of tracks from Mount Hope to Coco Solo, and unloading of material for the breakwater continued during February.

METEOROLOGY AND HYDROLOGY.

Rainfall was below normal, that over the Gatun Lake watershed being about 50 per cent below the February average in all localities, except the Trinidad valley. The total yield of Gatun Lake watershed was 43 per cent below the 6-year normal for February.

Twenty-two seismic shocks were recorded in February, only three of which were appreciable. None caused damage.

Fourth Division—Office of the Chief Engineer.
Excavation amounted to 173,265 cubic yards; daily average number of steamshovels at work, 6.7. Excavation from Gold Hill amounted to 115,894 cubic yards; from Miraflores spillway, 36,801; from Coccolli borrow pit, 20,570 cubic yards. Fill placed on Naos Island breakwater amounted to 136,775 cubic yards. The volume of material excavated by the hydraulic method from the back of Gold Hill amounted to 132,900 cubic yards.

Dredging Division.

Excavation by dredging in the Canal prism and Balboa harbor was, as follows:

LOCATION.	February, Cu. yds.	Remaining, Cu. yds.
Miraflores Locks to the Pacific	9,275	2,081,113
Inner harbor, Balboa.....	135,150	5,997,694
Miraflores Lake.....	328,872
Culebra Cut.....	432,786	2,801,626
Gatun Lake.....	113,437	51,000
Gatun Locks to the Atlantic..	265,197	410,973
Total.....	955,845	11,674,278

In Culebra Cut, nine dredges removed 97,781 cubic yards of earth, and 335,005 cubic yards of rock. Of the total, 287,223 cubic yards were taken from Cucaracha slide.

Division of Municipal Engineering.

The new waterworks for Colon and Cristobal were placed in operation on February 24.

Work was continued on the new water system for Panama and vicinity, including the purification plant at Miraflores, the pipe lines, new pump station at Ancon, and the high service reservoir at Ancon. The wash water tank at Miraflores was completed, and 11,271 feet of 30-inch pipe were installed from Miraflores to Diablo.

Quartermaster's Department.

Labor force.—The force report for February 25 shows a decrease of about 1,800 from the previous month, the totals being: Americans, 4,621; European laborers, 1,400; West Indian negroes, 25,515. Grand total, 31,536.

Buildings.—The amount of new construction and other building work going on is greater than at any other time since 1906. Of the 4,800 men now shown on the rolls of this department, over 2,900 are in the building division. Of these, approximately 800 are on the La Boca townsite, the radio station, and Ancon commissary, while the balance are on

the administration building, permanent gold quarters at Balboa, substations, and hydro-electric station work.

Quarters.—The transfer of quarters continues. The beginning of the movement of the shop forces from Empire to Balboa was made during the month, when the entire Empire shops office force was transferred to Balboa. A number of vacancies in bachelor quarters still exist at Corozal and Ancon, but it has been necessary to supplement the family quarters by the use of the Hotel Tivoli annexes. The occupants of quarters numbered: Americans, 5,187 men, 1,792 women, 1,721 children; Europeans, 1,916 men, 91 women, 160 children; West Indian negroes, 6,707 men, 946 women, 1,522 children.

Subsistence Department.

The 13 line hotels served 158,998 meals; 12 laborers' messes, 206,637; Hotel Tivoli, 14,760; Hotel Aspinwall, 1,080. The net profit was \$5,385.37, including \$6,391.57 profit on Hotel Tivoli.

Department of Civil Administration.

COURTS.

The circuit court disposed of 71 civil and 41 criminal cases; district courts, 35 civil and 425 criminal cases.

POSTS, CUSTOMS, AND REVENUES.

Money order sales for February amounted to \$282,885.96; fees, \$1,383.33; receipts from stamp and card sales, \$6,571.16; deposits in savings accounts, \$121,836; withdrawals \$89,788. Revenue collections amounted to \$12,277.24; court fines, costs, and fees, \$1,519.13.

POLICE AND PRISONS.

Arrests numbered 432, of which 38 were of women. Seven convicts were committed to the penitentiary, and 13 were discharged; total in confinement at the close of the month, 85. The cost of guarding and subsisting the convicts was \$2,018.66, and the value of their work on the Gamboa-Empire road was \$1,319.20.

FIRE PROTECTION.

Forty-two fires occurred in February; damage, \$547.05.

SCHOOLS.

The net enrollment in the white schools was 1,211, the average number belonging, 999.2, and the average daily attendance, 955.9. In the colored schools, the net enrollment was 1,361, the average number belonging, 892.7, and the average daily attendance, 722.1. At the close of the month, there were 45 teachers in the white schools and 24 in the colored schools.

Department of Sanitation.

The total number of deaths from all causes among employes was 30 (disease, 22; violence, eight), an annual average per thousand of 5.34 and 1.91, respectively. The annual average death rate per thousand in the cities of Panama and Colon, and in the Canal Zone, including both employes and civil population, for the month of February, was 23.67. Among employes, deaths from the principal diseases were: Lobar pneumonia, four; organic disease of the heart, one; tuberculosis, seven; typhoid fever, one, leaving nine deaths from all other diseases, and eight deaths from external violence. No case of yellow fever, smallpox, or plague originated on, or was brought to the Isthmus, during the month.

Respectfully,

H. F. HODGES,
Acting Chairman and Chief Engineer.

EXECUTIVE ORDER

Relating to the Canal Zone Judiciary.

By virtue of the authority vested in me, I hereby establish the following Order for the Canal Zone:

Section 1. The Balboa Division of the District Court of the Canal Zone, in conformity with the Panama Canal Act, shall include all that part of the Canal Zone which lies within the lines of the 10-mile zone and extends from the south bank of the Chagres River and the shore line of Gatun Lake, 87 feet above mean sealevel, to the Pacific Ocean; and the Cristobal Division of said Court shall include all of the territory within the lines of the 10-mile zone, extending from the Balboa Division to the Atlantic Ocean, and the area of Gatun Lake beyond the lines of the 10-mile zone up to the contour line of 100 feet above mean sealevel and the islands in said lake; and the peninsulas bordering on said lake which have been taken by the United States for the purposes of the Panama Canal.

Section 2. Civil and criminal cases within the original and appellate jurisdiction of the District Court arising in the division of Balboa shall be tried in the town of Balboa, and those arising in the division of Cristobal shall be tried in the town of Cristobal. The Governor of the Panama Canal shall provide a suitable place in each of said towns for the holding of the sessions of the District Court.

Section 3. The Canal Zone is hereby divided into two subdivisions to be known as the subdivision of Balboa and the subdivision of Cristobal. The territorial limits of the subdivision of Balboa shall be coterminous with those provided in this Order for the Balboa Division of the District Court, and the territorial limits of the subdivision of Cristobal shall be coterminous with the Cristobal Division of the District Court.

Section 4. The town of Balboa shall include the townsite at the Pacific terminus of the Canal of that name, as well as the other settlements within the Balboa subdivision; and the town of Cristobal shall include the townsite of that name as well as all other settlements within the Cristobal subdivision of the Canal Zone.

Section 5. There shall be a magistrate and a constable for each of the towns of Balboa and Cristobal to be appointed by the Governor, in conformity with Section 7 of the Panama Canal Act. The said magistrates shall hold court at such places in their respective towns as may be designated by the Governor of the Panama Canal from time to time.

Section 6. Appeals in civil and criminal cases are hereby authorized from the judgments and rulings of the Magistrate Courts to the District Court of the Canal Zone in like manner as appeals have been heretofore allowed from the District Courts of the Canal Zone to the Circuit Courts thereof.

Section 7. Magistrates and constables appointed for the Magistrate Courts, before assuming office, shall be required to subscribe an oath of office before an officer of the Canal Zone authorized to administer the same, to the effect that they will faithfully and impartially discharge the duties of their respective offices; and the constables of said courts shall be required to execute a bond with two or more good and sufficient sureties, or by a bonding company, to be approved by the Governor, in the sum of One Thousand Dollars, conditioned

that the officer executing said bond will faithfully comply with his duties as constable, and will turn over all moneys, properties, and effects coming into his hands by virtue of his office to the persons entitled thereto in accordance with law; and the bond may be sued upon in any court of competent jurisdiction by any person who may be injured by reason of a failure of official duty on the part of the constable, and the bond shall not become void upon the first recovery, but successive suits may be instituted thereon until the full amount thereof is exhausted.

Section 8. The rules heretofore governing the District Courts of the Canal Zone and prescribing the duties of the District Judges there, and bailiffs, and those respecting the disposition of fines, costs, forfeitures, and enforcement of judgments in said courts and providing for appeals therefrom to the Circuit Court, shall apply to the Magistrate Courts established by this Order and to the magistrates and constables thereof.

Section 9. The District Judge, in selecting jurors to render jury service in the district court, shall choose them from among those residing within the division in which they are called upon to serve as such jurors.

Section 10. The rules of evidence, practice, and procedure heretofore established in the Circuit Courts of the Canal Zone, not inconsistent with the provisions of the Panama Canal Act, shall govern in the trial of cases in the District Court of the Canal Zone.

Section 11. The District Judge may order a change of venue in any case, civil or criminal, when in his opinion that is necessary to an orderly and due administration of justice, or when for any cause it is not practicable to hold a session in the division where the case was originally instituted; and he may, at his discretion, order a change of venue in any case by consent of the parties. When a change of venue is ordered in any civil or criminal case, the Judge shall state his reasons therefor in the order directing the change of venue.

Section 12. Whenever a change of venue has been ordered by the Court, the clerk shall immediately make out a true transcript of all the orders made in said cause, and certify thereto under his official seal, and transmit the same with the original papers in the case to the other division of the District, and the case shall be tried therein as if it had been instituted there originally.

Section 13. The Supreme Court of the Canal Zone and the judges thereof shall continue to act after this Order takes effect until the cases and business pending therein have been finally determined and disposed of; but cases tried in any of the Circuit Courts prior to April 1, 1914, shall not be heard in the Supreme Court unless the appeal is perfected and the case docketed in the Supreme Court before May 1, 1914.

Section 14. This Order shall take effect from and after April 1, 1914.

WOODROW WILSON.

THE WHITE HOUSE,
March 12, 1914.
[No. 1898.]

I. B. of S. S. and D. M.

Local No. 19, I. B. of S. S. and D. M., will hold its next regular meeting in Ancon lodge hall, on Sunday, April 5, at 1.30 p. m.
J. I. MAJOR, Secretary-Treasurer.

OFFICIAL CIRCULARS.

General Organization.

THE PANAMA CANAL,
OFFICE OF THE GOVERNOR.
CULEBRA, C. Z., April 1, 1914.

CIRCULAR No. 660:

1. The Isthmian Canal Commission, together with the organization thereunder, has been abolished by Executive Order, under authority of the Panama Canal Act.

2. By authority of the Executive Order of January 27, 1914, providing a permanent organization for The Panama Canal, and the Executive Order of March 2, 1914, to establish a Washington Office of The Panama Canal, the following departments are hereby established, with duties and jurisdiction, as provided by Executive Order:

- (a) A Department of Operation and Maintenance.
- (b) A Purchasing Department.
- (c) A Supply Department.
- (d) An Accounting Department.
- (e) A Health Department.
- (f) An Executive Office.
- (g) A Washington Office of The Panama Canal.

3. The Panama Railroad Company, under the jurisdiction of the President of the Company, who is the Governor of The Panama Canal and Head of the Department of Operation and Maintenance, will be operated practically as a division of the Department of Operation and Maintenance, but will still retain its entity as a corporation.

4. The duties and jurisdiction of officials and the assignment of specific duties to divisions or subdivisions of departments will be ordered in other circulars.

5. The heads of departments will be named in a separate circular, and they are hereby directed to submit, as soon as possible, but not later than April 13, the immediate organizations proposed to perform the duties assigned, these organizations to be based on the minimum force necessary to perform these duties during the remainder of the fiscal year. New organizations will afterward be prepared and submitted, to take effect July 1, 1914.

GEO. W. GOETHALS,
Governor, The Panama Canal.
President, Panama Railroad Company.

Appointments.

THE PANAMA CANAL,
OFFICE OF THE GOVERNOR.
CULEBRA, C. Z., April 1, 1914.

CIRCULAR No. 661:

OPERATION AND MAINTENANCE.

1. Colonel Harry F. Hodges, Corps of Engineers, U. S. A., in addition to other assignment, will assume the duties of the Engineer of Maintenance, Department of Operation and Maintenance.

2. Civil Engineer Harry H. Rousseau, U. S. N., in addition to other assignment, will assume the duties of Engineer of Terminal Construction.

3. Captain Hugh Rodman, U. S. N., is appointed Superintendent of Transportation, Division of Canal Transportation.

4. Naval Constructor Daniel C. Nutting, Jr., will continue as Superintendent, Mechanical Division.

5. Captain William H. Rose, Corps of Engineers, U. S. A., is appointed Electrical Engineer, Electrical Division.

6. Lieutenant George R. Goethals, Corps of Engineers, U. S. A., will continue as Assistant Engineer, Fortification Division.

7. Mr. William G. Comber will continue as Resident Engineer, Dredging Division.

8. Mr. George M. Wells will continue as Resident Engineer, Division of Municipal Engineering.

9. Mr. Edward Schildhauer will continue as Electrical and Mechanical Engineer, Division of Erection.

10. Mr. Walter F. Beyer will continue as Assistant Engineer, Division of Lighthouse Construction.

PURCHASING DEPARTMENT.

11. Major Frank C. Boggs, Corps of Engineers, U. S. A., is appointed General Purchasing Officer, Purchasing Department, and Chief of Office, Washington Office of The Panama Canal.

SUPPLY DEPARTMENT.

12. Captain Robert E. Wood, U. S. A., is appointed Chief Quartermaster, Supply Department.

13. Captain Frank O. Whitlock, U. S. A., is appointed Assistant Chief Quartermaster, Supply Department.

ACCOUNTING DEPARTMENT.

14. Mr. H. A. A. Smith is appointed Auditor, Accounting Department.

15. Mr. B. F. Harrah is appointed Assistant Auditor, with headquarters at Washington.

16. Mr. Thomas L. Clear is appointed Collector, Accounting Department.

17. Mr. John H. McLean is appointed Paymaster, Accounting Department.

HEALTH DEPARTMENT.

18. Lieutenant-Colonel Charles F. Mason, U. S. A.,

is appointed Chief Health Officer, Health Department.
19. Doctor Marshal C. Guthrie, Passed Assistant Surgeon, U. S. Bureau of Public Health, is appointed Chief Quarantine Officer.

EXECUTIVE OFFICE.

20. Mr. C. A. McIlvaine is appointed Executive Secretary, Executive Office.

PANAMA RAILROAD COMPANY.

21. Lieutenant Frederick Mears, U. S. A., will continue as Superintendent and Chief Engineer, Panama Railroad Company. The title General Superintendent is abolished.

COURTS.

22. The appointment by the President of Mr. William Howard May, as Marshal, is announced.

23. Mr. Samuel E. Blackburn is appointed Magistrate of the town of Balboa.

24. Mr. John W. Thompson is appointed Magistrate of the town of Cristobal.

25. The above appointments are effective this date.

GEO. W. GOETHALS,
Governor.

Organization of Department of Operation and Maintenance.

THE PANAMA CANAL,
OFFICE OF THE GOVERNOR,
CULEBRA, C. Z., April 1, 1914.

CIRCULAR No. 660-1:

1. The Governor is, by Executive Order, the head of this department, and to him, the heads of certain divisions will report direct, the other heads of divisions reporting to an Engineer of Maintenance, who is second in authority over The Panama Canal.

2. The following divisions of this department are hereby ordered:

(a) *The Division of Terminal Construction*, under the supervision of an Engineer of Terminal Construction reporting to the Governor. This division will embrace the forces of the Second Division, Chief Engineer's Office, engaged in the design, inspection, and construction of dry docks, shops, coaling and fuel oil plants, floating cranes, docks, and other terminal facilities, construction transportation by rail and water (not including dredging work), the road, street, and sewer work under the landscape architect, and breakwater construction at the Atlantic terminal. The central office designing, drafting, and clerical forces will be carried on the rolls of the Executive Office, although under the supervision of the Engineer of Terminal Construction. The headquarters of the division will be the Executive Office.

(b) *The Office Engineer and his force*, and the forces engaged on meteorology and hydrography, and on general surveys, heretofore in the Second Division, will report to the Engineer of Maintenance.

(c) *The Division of Erection*, under the supervision of the Electrical and Mechanical Engineer reporting to the Engineer of Maintenance. This division will have charge of the completion and operation of the structures of the locks and spillways, the installation, erection, testing, operation, and care of lock and spillway operating and protective machinery, the construction of power plants and transmission line, the handling of vessels while in the locks, and the designing and drafting forces necessary thereto. The central office designing, drafting, and clerical forces will be carried on the rolls of the Executive Office, although under the supervision of the Electrical and Mechanical Engineer. The headquarters of this division will be the Executive Office.

(d) *The Electrical Division*, under the supervision of an Electrical Engineer reporting to the Engineer of Maintenance, will have charge of power plants and transmission line, when completed, and of the inspection and testing of electrical equipment.

(e) *The Division of Municipal Engineering*, under the supervision of a Resident Engineer reporting to the Engineer of Maintenance, will remain unchanged. Headquarters for the present will be at Gatun.

(f) *The Division of Lighthouses*, under the supervision of an Assistant Engineer reporting to the Engineer of Maintenance, will have charge of the construction of lights and beacons. The central office designing, drafting, and clerical forces will be carried on the rolls of the Executive Office, under the supervision of the Assistant Engineer. Headquarters will be the Executive Office.

(g) *The Dredging Division*, under a Resident Engineer reporting to the Governor, will remain unchanged. Headquarters will be at Paraiso.

(h) *The Mechanical Division*, under a Superintendent reporting to the Governor, will remain unchanged, except that the power plants and forces engaged on electrical installation will be transferred to the Electrical Division. Headquarters will be at Balboa.

(i) *The Division of Canal Transportation*, under the supervision of a Superintendent of Transportation reporting to the Governor, will be charged with the safe conduct of vessels through the Panama Canal, except at the locks. The port captains, the Board of Local

Inspectors, the pilots, the care and operation of lights and beacons, when completed, the inspection and the admeasuring of vessels, will be under his jurisdiction. Headquarters for the present will be at Ancon.

(j) *The Fortification Division*, under the supervision of an Assistant Engineer reporting to the Governor, will remain unchanged. Headquarters will be the Executive Office.

(k) The forces engaged in sluicing at Gold Hill, grading and filling at the locks and dams, constructing Naos Island breakwater, and in connection with construction transportation at the Atlantic end, will be under the direct supervision of the Governor.

3. The heads of the above divisions will be named in a separate circular, and are hereby directed to submit through proper channels, as soon as possible, but not later than April 13, the immediate organizations proposed to perform the duties assigned them, these organizations to be based on the minimum force necessary to perform these duties during the remainder of the fiscal year. New organizations will afterward be prepared and submitted, to take effect July 1, 1914.

GEO. W. GOETHALS,
Governor.

Leave Regulations.

THE PANAMA CANAL,
OFFICE OF THE GOVERNOR,
CULEBRA, C. Z., April 1, 1914.

CIRCULAR No. 602:

1. The following extract from the Executive Order of February 2, 1914, "Providing Conditions of Employment for the Permanent Force for the Panama Canal," is published for the information and guidance of all concerned:

LEAVE REGULATIONS.

20. All employees who are citizens of the United States, and aliens whose compensation is more than \$75 per month or 40 cents per hour, shall be entitled to leave privileges.

21. Leave will be divided into three classes, viz: (1) annual leave, (2) cumulative leave, and (3) travel leave.

ANNUAL LEAVE.

22. Twenty-four days annual leave will be allowed each employee for each year after entry into service, and, if not granted prior to the close of the year, is forfeited and may not be accumulated, except that any annual leave remaining to an employee's credit in a year in which he is granted cumulative leave may be added to the cumulative leave if taken within two months after the close of his service year.

23. The service year shall date from the day on which an employee's pay in the permanent organization begins.

24. Absences of one-half day, or more, when regularly authorized, will be charged against annual leave; also, absences on account of illness or injury, upon the certificate of an authorized physician in the service of the Panama Canal, except that in the following classes of cases no payment shall be made for time lost, but the time shall be charged against the annual leave.

(a) Illness due to the fault of the employee, as venereal disease and alcoholism.

(b) Injury due to the employee's wilful intention to bring about the injury or death of himself or another.

(c) Elective surgical operations to relieve conditions existing prior to service on the Isthmus.

25. In the case of hourly or per diem employees annual leave on account of sickness or injury shall be based upon a day of eight hours.

26. Not more than 14 days annual leave may be taken during the first six months of a service year. In case of illness or injury in the first six months, to cover which no annual leave remains to the employee's credit, the time lost will be charged against the annual leave remaining for the year, and payment will be made after completing 10 months of the service year. After the entire 24 days annual leave has been used, additional leave in that service year on account of illness or injury will be deducted from the cumulative leave for that year, and when the cumulative leave becomes due the employee will be paid.

27. After exhausting both annual and cumulative leave for the year, additional absence on account of illness or injury will be without pay, except such compensation as may be prescribed by law for employees receiving personal injuries.

CUMULATIVE LEAVE.

28. Thirty days cumulative leave will be allowed each employee paid on a monthly or annual basis for each year of his service, and 20 days to each employee paid on an hourly basis. This leave will be due after completing 10 months' service each year, and may be taken when the employee's service can be spared. It may be taken annually or left to accumulate to the credit of the employee, provided, however, that leave may not be accumulated for more than three years. If it is not desired to take the entire leave accumulated, the leave earned for the first year, or the first and second years, may be taken, provided that no employee, except at termination of service, may be granted more than 90 days leave with pay at one time. Employees will be paid for cumulative leave at the rate earned when the leave became due at the end of the tenth month of each respective year.

29. In case an employee serves part of a year on the monthly or annual basis and part on the hourly basis, he will be allowed 20 days cumulative leave, except that

if he has served eight months or more on the monthly or annual basis during the year he will be granted 30 days cumulative leave.

TRAVEL LEAVE.

30. Employees who travel to points outside the tropics, when on cumulative leave, will be allowed seven days additional leave (or travel leave) with full pay. Travel leave may be allowed approximately once a year and is not cumulative.

31. Employees will be compensated for travel leave and annual leave taken in conjunction with cumulative leave at the rate earned when cumulative leave last became due.

32. After accumulating leave for three years, an employee ceases to earn additional cumulative leave until he is granted all or part of the cumulative leave already earned, unless he shall enter on cumulative leave within two months after completing the third year, or be ordered by the Governor to defer taking leave for official reasons.

33. When an employee's services are terminated on account of misconduct or unsatisfactory service, any annual leave due and travel leave will be forfeited, and cumulative leave will also be forfeited unless written notification has been given that the employee has accumulated the leave, or the four months period within which the employee may enter on leave has passed. Such written notice must be given by employees as soon as possible after cumulative leave becomes due.

34. When an employee's service is terminated, a cash payment in commutation of leave will be made to him for the number of days' cumulative leave due, plus the annual leave due. In the event of his death his estate will be paid the sum due.

35. Employees must enter on cumulative leave within four months after the date when it becomes due, except when accumulated, or unless otherwise authorized by the Governor.

36. Employees must report from leave within one week after the authorized leave expires, or forfeit pay for the leave. In case of unavoidable delay, the Governor will decide whether the circumstances warrant an exception to this rule.

37. No restrictions are placed on the localities where leave may be spent.

38. Any employee transferred from the present force to the permanent operating force will be paid at the time of transfer, in addition to his regular compensation, the amount he would have received in payment for leave had he been separated from the service at the time of transfer.

39. Leave may be taken only at the convenience of heads of departments, who may direct an employee to accumulate his leave if necessary for the conduct of the work.

40. Leave without pay may be granted by the Governor to all employees, including laborers, for such period as may be prescribed by him.

2. Leave of absence for more than five days must receive prior approval of the Executive Office and will be entered on the daily leave order.

3. Permission to be absent five days, or less, may be granted, prior to taking the time off, by the head of the department, or by such officers of the department as may be given authority to permit absences. In such cases the employee will turn in an excuse card (Form PC-425) to the timekeeper when he reports for duty. No time will be allowed for days absent with permission, except when covered properly by an excuse card signed by proper authority.

4. Permission to be absent with pay will not be granted for a period of less than one-half day, or for any fraction of a day other than one-half. Half-day absences should be avoided and only full days granted, unless employee's services are urgently needed for part of the day.

5. Employees must report from leaves of absence and sick leave at the beginning of the forenoon or afternoon period of their working day, and will not be permitted to report during working hours. Time will begin only after reporting for duty.

6. In case of absence on account of illness, certificate of disability, after the employee has shown same to his superior, must be turned in to the timekeeper in the first period after reporting for duty.

7. Upon return to duty of an employee, timekeepers will report to the Executive Office the date and time of return to duty, the date and time absence began, total number of days absent, and authority for absence, on Form PC-465.

8. In all cases where a Sunday or holiday falls within a leave of absence, so that the employee is on leave both prior and subsequent to such day, the day shall be counted as one day of leave. If an employee either enters upon, or returns from, a leave of absence on a Sunday or holiday, or on the day following a Sunday or holiday, the Sunday or holiday shall not be considered a part of his leave if the employee worked the full day preceding, in case of entry on leave, or the full day following, in case of return from leave.

9. Except when necessitated by illness or injury, the total amount of annual leave used by an employee within the first seven months of his service year shall not aggregate at any time more than two days for each month. After seven months service any part or all of the unused annual leave due for the service year may be granted by proper authority.

10. Leave without pay will not be granted, except in meritorious cases, and will be limited to periods of

not more than 42 days, except in cases of great necessity.

11. The service year dates from the day on which an employee's pay in the permanent organization begins, and the date of the commencement of the service year remains constant until the employee's service is terminated.

12. If an employee is absent from duty on account of (a) leave without pay, or (b) on account of illness or injury not chargeable to annual or cumulative leave credits, for a period of 30 or more consecutive days, he shall forfeit for each full period of 15 days in excess of the first 15 days two days of any unused leave allowable for the service year in which the absence begins, the two days to be charged to annual or cumulative leave credits. If such absence is less than 30 days, no forfeit will be charged. In other words, if absent as stated above, deductions will be made from annual and cumulative leave, instead of changing the date of the service year.

13. In the case of employees transferred from the Isthmian Canal Commission organization to the new organization who would have had a leave due between April 1, 1914, and February 1, 1915, under the old rules, or who shall have had no leave for approximately a year, or more, and who desire to take a leave without pay within that period, 42 days without pay may be granted, without any forfeiture of privileges, and only leave in excess of that amount shall be counted under Item (a), Paragraph 12, above.

14. Cumulative leave for any one year must all be taken at one time; i. e., it cannot be divided, except when it is used to cover absence on account of illness or injury, as provided in Paragraph 26 of the Executive Order above quoted.

15. Annual leave may be divided to suit the convenience of the employee and his superiors.

16. Employees are expected to report for duty on the day their authorized leave terminates.

17. Hereafter, all days or half days off with permission, or reserve days, must either be charged against the annual leave of employees, or be without pay. In case a monthly employee regularly employed in the day time works at night, he may be allowed time off the following day, if needed, for rest or recuperation.

18. Service in the new organization of employees transferred thereto from the Isthmian Canal Commission, who on April 1, 1914, are on leave of absence, sick leave, or injury leave, will date from the day their pay in the new organization begins upon their return to duty.

19. Employees who receive two rates of pay, with and without subsistence, will be paid for leave of absence and transit time in accordance with the following rules:

(a) An employee appointed in the United States for duty on the Isthmus, who is granted free transportation will be paid for his time in transit at the subsistence (or lower) rate of pay.

(b) Cumulative leave, travel leave, and such annual leave as is taken in connection therewith, and any time spent in transit, going to or returning from such leave, will be paid at the nonsubsistence (or higher) rate, provided, that no part of the transit time is in excess of the total amount of leave granted with pay.

(c) Employees who are under treatment in hospitals of the Panama Canal, and whose time off on account of sickness is properly chargeable to annual leave, will be paid at their subsistence (lower) rate of pay.

(d) No employee who is being furnished subsistence will be paid the higher, or non-subsistence rate for any time off taken by him and charged against his annual leave, unless such time consists of more than two consecutive days.

20. An employee who resigns and commutes his leave into a cash payment shall be ineligible for re-employment within a period of 30 days.

GEO. W. GOETHALS,
Governor.

Leave Privileges.

CULEBRA, C. Z., March 28, 1914.

CIRCULAR No. 132-0:

Employees who on March 31, 1914, shall have served less than six months for which no leave has been granted and who on April 1 are transferred to the new organization, will be granted leave at the rate of 3½ days in the case of monthly employees and 2½ days in the case of hourly employees for each such full month's service, this leave to be commuted into a cash payment under the following provisos:

1. All employees in the service continuously from April 1, 1914, to June 30, 1914, will be paid the commutation for the leave allowed above for service prior to April 1.

2. If the employee should be discharged on account of unsatisfactory workmanship or conduct on or prior to June 30, 1914, no allowance will be made.

3. If the employee should be discharged on account of reduction of force or resign on or before June 30, 1914 the allowance will be made, provided his service in the new organization, added to

the time prior to April 1 for which the leave is to be allowed, aggregates six months or more. If such service aggregates less than six months no allowance will be made.

GEO. W. GOETHALS,
Chairman.

Preparation of Memorandum Receipts.

CULEBRA, C. Z., March 28, 1914.

CIRCULAR No. 535-C:

Memorandum receipts will be prepared in accordance with Paragraph 2, Circular 535-A, as follows:

Form C. E. 395 will be used, and articles shall be listed in alphabetical order, giving full information regarding description and sizes, so that articles can be readily priced. Great care must be taken in the preparation of these receipts, as they are to be used as a basis for the physical and financial accounting on the Panama Canal. No items should be taken up on these memorandum receipts which are absolutely unserviceable, but same should be collected and presented for survey in the regular manner. Items that are so badly worn that they have actually lost their value must be so noted on memorandum receipts, and lists made of such items separate from serviceable items. In case any question arises as to manner in which these memorandum receipts are to be prepared, the accountable or responsible officers should communicate direct with the surveying officer at Culebra, who will give necessary instructions.

The foregoing regulations will not apply to the taking of memorandum receipts by district quartermasters from occupants of quarters for furniture. The memorandum receipts to cover furniture in quarters will not be required until July 1, 1914, when same should be taken by all accountable officers, and submitted as required in the series of Circulars Nos. 535-A, B, etc.

GEO. W. GOETHALS,
Chairman, Isthmian Canal Commission.
President, Panama Railroad Company.

Standardization of Stationery Forms.

CULEBRA, C. Z., March 27, 1914.

HEADS OF DEPARTMENTS AND DIVISIONS:

All stationery forms, except those of the Auditing Department, the Panama railroad, and the Commissary-Subsistence Department, will, hereafter, be issued under one series of numbers, bearing the prefix "PC."

Numbers will be assigned by this office for all forms of the "PC" series. All existing forms will retain their present numbers until it becomes necessary to reprint them, when they shall be forwarded to this office for renumbering, and transmission to the printer.

To facilitate the printing of forms which are being "Rushed," especially at present, form numbers will be furnished upon telephone request.

The printer will furnish this office a copy of each form hereafter printed in the "PC" series. Otherwise, the provisions of the circular for the standardization of stationery will govern.

GEO. W. GOETHALS,
Chairman and Chief Engineer

Property Accounting.

CULEBRA, C. Z., March 23, 1914.

CIRCULAR No. 535-A:

1. Property returns for the period ending March 31, 1914, will be rendered by all accountable officers and will not thereafter be required.

2. All accountable officers will require all responsible officers and employees to renew their memorandum receipts April 1, 1914. The memorandum receipts will be so prepared as to describe definitely the different kinds and sizes of the various items of property for which receipt is given. Detailed instructions in regard to the manner of preparing memorandum receipts will be issued by the surveying officer.

3. Accountable officers will consolidate the memorandum receipts and send two copies of the consolidated statements to the Auditor as soon as possible after the first of April, 1914.

4. As of April 1, 1914, the Board of Local Inspectors will appraise, in company with the surveying officer, all floating equipment: the Chief Quartermaster and the surveying officer will appraise all rolling stock and other large units of equipment, except that all machinery and equipment of the Mechanical Division shall be appraised by or under the direction of the Superintendent of the Mechanical Division and the surveying officer. All appraisals shall be sent currently to the Auditor, as completed.

5. One copy of the statement made by accountable officers of the property in their possession shall be furnished by the Auditor to the surveying officer, who will insert the current prices opposite all items not appraised. The Chief Quartermaster, the Superintendent of the Mechanical Division, and the surveying officer shall determine what items are to be appraised, and what items are to be given current prices.

6. The original, duplicate, and quadruplicate of fore-

men's orders for nonexpendable property shall be forwarded by storekeepers to the Auditor. The Auditor will make a record of the property issued to divisions after April 1, 1914, and forward the quadruplicate copy of foremen's orders to the accountable officer to use as a basis for obtaining the memorandum receipt from the responsible officer or employee having possession of the property. When nonexpendable property is transferred from stores to divisions, one copy of invoice should be sent direct to the Auditor by storekeepers, and three accomplished copies by receiving division. One accomplished copy of the invoice will be sent by the Auditor to the accountable official for property record.

7. When nonexpendable property is transferred from one division to another, five copies of invoice will be sent to the Auditor, one copy to be forwarded direct by the invoicing official, and four accomplished copies by the receiving official. One accomplished copy will be forwarded by the Auditor to each of the accountable officials interested, for property records.

H. F. HODGES,
Acting Chairman, Isthmian Canal Commission.
Second Vice-President, Panama Railroad Company.

Superintendent of Mechanical Division an Accountable Official.

CULEBRA, C. Z., March 23, 1914.

CIRCULAR No. 529-B:

Mr. D. C. Nutting, Superintendent of the Mechanical Division, is designated an accountable official, and will account for the property of the Mechanical Division, with the exception of that carried on the return of Mr. Hartley Rowe.

H. A. A. SMITH,
Examiner of Accounts.

H. F. HODGES,
Acting Chairman and Chief Engineer.

Inventory of Nonexpendable Property, P. R. R., and P. R. R. Commissary Department.

CULEBRA, C. Z., March 23, 1914.

CIRCULAR No. 535-B:

The Panama Railroad Company, and the commissary department of the Panama railroad, will take an inventory April 1, 1914, of all nonexpendable property on hand, for use in establishing accountability for such property.

In the inventory all articles should be definitely described, so that similar items on the inventory of one division may be readily consolidated with similar items on the inventory of other divisions.

After April 1, the records of nonexpendable property shall be maintained under the rules governing the maintenance of the record of nonexpendable property of the Panama Canal.

H. F. HODGES,
Acting Chairman, Isthmian Canal Commission.
Second Vice-President, Panama Railroad Company.

Discontinuance of Labor Trains.

BALBOA, C. Z., March 28, 1914.

TRANSPORTATION BULLETIN No. 81:

Effective at the close of business March 31, 1914 labor trains Nos. 123 and 102, running between East Balboa and Caimito, will be discontinued.

The following labor trains between Gold Hill engine house and the suspension bridge will also be discontinued at the same time: Nos. 149, 148, 151, 150, 153, 152.

W. J. HOLMES,
Superintendent of Transportation.

Telegraph Office at Caimito Closed.

PANAMA RAILROAD COMPANY.
OFFICE OF GENERAL SUPERINTENDENT.
COLON, R. P., March 26, 1914.

G. S. BULLETIN No. 63:

All concerned—Effective April 1, the telegraph office at Caimito will be closed. Arms and lamps will be removed from train order signal.

F. MEARS,
General Superintendent.

Automatic Signals Between Caimito and Pedro Miguel.

PANAMA RAILROAD COMPANY.
OFFICE OF GENERAL SUPERINTENDENT.
COLON, R. P., March 26, 1914.

G. S. BULLETIN No. 64:

All concerned—Automatic signals will be placed in service between Caimito and Pedro Miguel within the next 15 days, the exact date to be covered by a later bulletin. Train crews will please familiarize themselves with the location of signals, and all foremen using hand cars and push cars within this territory will see that they are insulated before the signals are placed in service.

F. MEARS,
General Superintendent.

Married.

MEACHAM-RAMSBROK—At Christ Church, Colon, on Thursday, March 26, Miss Julia Taylor Ramsbrok to Mr. Jerome Franklin Burnett Meacham, Rev. E. J. Cooper officiating. Canal Zone residence, Empire.

COMMISSION CLUBHOUSES.

Activities of the Young Men's Christian Association.

GENERAL.

The schedule of moving picture dates for the week April 6 to 11 is, as follows: Monday, Pedro Miguel; Tuesday, Culebra and Balboa; Wednesday, Cristobal; Thursday, Empire; Friday, Gatun; Saturday, Corozal Balboa.

Moving pictures of the Shriners' visit to the Canal Zone will be shown at the clubhouse on Friday night, April 3, consisting of 40 scenes in four reels. Special music will be provided for the occasion. The usual moving picture prices will prevail.

The barber shop is almost completed. Prices for work will be the same as at other clubhouses.

COROZAL.

Duckpin activities occupied the bowling alleys the entire week; scores of 100, or over, were, as follows: Steele, 106; Davis, 103, 105, 106, 108; Phillips, 105; Louch, 105; Ruggles, 105; Barte, 104; King, 100; Webb, 100.

Walter Eccles and the Four College Girls Company gave a return engagement at Corozal on Tuesday, March 24. There was a complete change of program. An informal reception was held after the entertainment.

The films of the Osman Temple pilgrimage were shown on Monday, March 30. The regular "movies" will be shown April 1.

PEDRO MIGUEL.

On March 27, two months after the formal opening of the Pedro Miguel clubhouse, the membership was 158.

The high scores in duckpins for the week ending March 29 was, as follows: Davis, 109; Whiston, 105; Piper, 102; Barlow, 102.

The boys enjoyed an outing into the jungle on Saturday, March 28.

F. F. Dougherty, the bowling alley manager, who has spent several weeks at Ancon Hospital and Taboga Island, on account of illness, has returned to work. Fred Whiston relieved him during his illness.

The Gatun gymnasium team gave an exhibition on Saturday evening. The program was, as follows: Barbell drill by the Gatun boys; tumbling by Mr. Williams; dumbbell drill by the Gatun men; electric club swinging by Messrs. Williams and Russell; pyramids by the Gatun team; parallel bar exercises by Messrs. Williams and Russell.

Mr. Ward of Paraiso, who was away on a leave of absence, has returned, and resumed his duties as desk clerk in the evenings. Mr. J. V. Lyles, who leaves on April 2 for the United States, will be relieved by Mr. Wang, the local postmaster.

At the song service on Sunday evening, the Rev. Mr. Funkhauser spoke on the subject "Making of the man."

CULEBRA.

There was an attendance of 160 at the second entertainment given by Walter Eccles and the Four College Girls Company on Friday night, March 27.

On Sunday night, March 29, a set of colored slides, with accompanying lecture, were shown illustrating John Bunyan's story "The dreamer of dreams." Song slides were thrown on the screen during the reading of the lecture. The date for the exhibition of the set of slides "Strolling through old England" will be announced later.

High scores in duckpins for the past week were, as follows: Seely, 107, 107; Brown, 104, 108, 102, 103; Palmer, 101.

The person taking the library book *V. V.'s Eyes* from the reading room is requested to return same.

EMPIRE.

The chess carnival to be held at Empire on Saturday evening, April 4, is intended for all the chess players in the Zone. A special program has been prepared. The Empire duckpin team will bowl the Cristobal team at Cristobal on Saturday, April 4.

Plans are under way for a celebration to be held on May 5 and 6, of the seventh anniversary of the opening of the Empire clubhouse.

GATUN.

John Gray played several violin solos at the motion picture entertainment on Monday, March 23.

An order for 50 new library books was sent to the United States this week.

Examinations by Board of Local Inspectors.

THE PANAMA CANAL, ANCON, C. Z., April 1, 1914.

The Board of Local Inspectors will conduct examinations at the Administration Building, Ancon, on Wednesday, April 8, 1914, beginning promptly at 2 p. m., for persons desiring the following classes of licenses: Pilots, masters, mates, marine engineers, chauffeurs,

and navigators of motor boats. All applicants for licenses must procure from the Executive Office, Ancon, forms of application and information respecting the filling out of same, not later than the day previous to the examination. In addition, all persons desiring chauffeurs' licenses must provide themselves with automobiles with which to demonstrate their ability to properly operate the same.

NOTE—The demonstration test for applicants for chauffeurs' licenses will be given on Tuesday, the day preceding the regular examination at 2 p. m., at the Administration Building, Ancon; on Wednesday, the day of the regular examination, for out-of-town applicants, at 2 p. m., at the Administration Building, Ancon. No demonstration tests will be given at Cristobal, except by appointment.

HUGH RODMAN,
Chairman, Board of Local Inspectors.

Movements of Vessels, Port of Balboa.

The following vessels arrived at, or departed from, the port of Balboa during the week ending March 28, 1914:

Arrivals—March 22, *Thor*, from Puget Sound; March 23, *Pachita*, from Callao; March 25, *Huasco*, from Valparaiso; March 26, *City of Sydney*, from San Francisco; March 27, *Chile*, from Guayaquil; *Shearwater* (British warship), from northern ports; *Elsinore*, from Port Harford.

Departures—March 23, *Santa Cecilia*, to Antofagasta; *Huallaga*, to Callao; *Manavi*, to intermediate ports; *Mexico*, to Valparaiso; March 27, *Ecuador*, to Guayaquil; March 28, *Barraqueta*, to Central America.

Rainfall, March 1 to March 28, 1914, Inclusive.

Total..... 5,053,311
*Approximate.

Including the work on fortifications, the pontoon barge piers at Paraiso, Quartermaster's construction, municipal engineering, etc., the total concrete placed by the American Canal forces is well above 5,000,000 cubic yards.

Difference in Water Density Causes Current in Lower Locks.

Forces of the meteorology and hydrology subdivision are making a study, at the lower end of Miraflores Locks, of a current caused by the difference in density of the water on the two sides of the lower gates when the gates are opened for the passage of vessels to the sea. At the stage of a downward lockage when the surface of water in the lower chamber has been lowered to evenness with that in the approach, the water within the chamber is more than half fresh. It has, in consequence, less density than the sea water beyond the lower gates and when the gates are opened the heavier water thrusts its way inward against the lighter, causing a current opposed to the outward passage of a vessel.

Surface indications are that the current has a velocity of from three to four miles per hour. Being temporary, it causes no serious inconvenience and it is being studied principally to determine accurately the conditions for the manipulation of the towing locomotives. The density of sea water is about 2.5 per cent

greater than that of fresh water; a simple illustration of the difference is seen in the fact that chewing gum will float in sea water, but not in fresh. At the lower end of the locks, the difference in density of the water on both sides of the gates is less, because a considerable proportion of sea water is mixed with the fresh water in the lower chamber before the lower gates are opened. The conditions exist only at Miraflores and Gatun Locks, the water at both ends of Pedro Miguel Lock being fresh at present.

New 15-Yard Dredge Begins Operations.

The dipper dredge *Gamboa*, which arrived at Colon on March 15 and was towed to Paraiso on March 17 for the reerection of parts of its machinery, was placed at work on April 3. It is excavating at the base of Hagan's slide, on the west bank of Culebra Cut, about opposite the Lirio planing mill. This slide is not actively encroaching on the Canal channel, but the channel opposite it is not at full depth. The *Gamboa* is excavating rock from a depth of approximately 35 feet below the surface of the water, and its machinery is, in general, working satisfactorily. It is using a dipper of 15-yards capacity. The spoil from its excavation is being handled in some of the new 1,000-cubic yard steel barges, and is being dumped in shallows of Gatun Lake, south of the site of the former village of Gorgona.

Terminal Construction Work at Atlantic End.

Effective April 1, the work of the Division of Terminal Construction at the Atlantic end has been divided, as follows: Atlantic breakwater construction, in charge of Assistant Engineer F. C. Stanton; Cristobal coal-plant construction, in charge of Assistant Engineer R. B. Tinsley; Atlantic fuel oil plants, in charge of Assistant Engineer F. C. Nichols.

Transmission Line Partly in Use.

The portion of the new transisthmian transmission line on the west side of the railroad, between Gatun and Cristobal, was placed in temporary service on March 29, in substitution for the former 6600-volt transmission line between the steam generating station on the west side of Gatun Locks and the transformer substation at Cristobal. The current is generated at 2,200 volts and stepped-up, through transformers, to 6,600 volts for transmission. At the present Cristobal station, it is reduced to 2,200 volts for primary distribution, the various local circuits receiving it through a smaller pole-line type of transformers, which step the pressure down to 220, or 110 volts, as desired.

This substitution will allow the removal of the old Gatun-Cristobal 6,600-volt line, with two troublesome crossovers; moreover, as the new line has larger wires (No. 00) than the old (No. 2), it effects both an increase in line capacity and a decrease in voltage drop. The

larger wires carry the load so easily that it is proposed to use those on the east side of the track to deliver to Cristobal a supplementary current without the use of transformers, taking it direct from the Gatun generators to the Cristobal mains at 2,200 volts. These connections are temporary, and will be supplanted, in the permanent system, by transmission from the new substation at Gatun to a substation in Cristobal at 44,000 volts.

Two other crossovers, at which high tension lines were in dangerous proximity to the conductors of the new line, have been remedied by raising or lowering the wires of the old line. These were at mile post No. 40, a quarter of a mile north of Pedro Miguel station, and on top of the hill above Miraflores tunnel; both were made necessary by the 11,000-volt line between Miraflores power station and Gold Hill. This line is using 76,000 feet of No. 00 copper wire, borrowed from the stock of the permanent transmission line.

The conductors of the 44,000-volt transmission line, three on each side, have been strung between Pedro Miguel and Mount Hope. The track-span bridges are erected between Cristobal and Diablo, with the exception of one at Gatun and one at Pedro Miguel. The seven at Gamboa, on the Chagres River bridge, and five special spans at Frijoles, 39 feet six inches in length, have been erected during the last month. The completed track-span bridges are being numbered with plates affixed to the cross-bridge girder, connecting the side-frames, directly in the center of the span. Each is numbered with the mile of railroad in which it is set, and its sequence in that mile; thus, No. 7-3, south of Gatun, is the third bridge past the seventh mile post, from the initial point of the Panama railroad at Colon.

Additional Family Quarters Authorized for Balboa.

Authority has been granted by the Government for the construction of 10 additional 4-family, and 30 two-family, concrete quarters at Balboa, and work on them by the permanent building forces of the Supply Department will be begun shortly. In addition, the building of two bachelor quarters of the permanent type for the higher salaried men, and of a police station, fire station, schoolhouse, and clubhouse, has been authorized. The construction of the commissary and railroad station has already been ordered, and the cost thereof will be paid out of Panama railroad funds.

The drafting room force of the permanent building division is now engaged on the plans for some of the new public buildings, including the schoolhouse, which will probably be one of the first to be erected. The present school facilities at Ancon, due to the increase in the Canal population at the Pacific terminus, have been outgrown, and, in order to provide adequate accommodations, and to avoid

a continuance of the brake service, it is desired to have the new schoolbuilding in readiness, if possible, for the opening of the fall term on October 1. Some consideration was given the matter of moving and reerecting the Empire clubhouse at Balboa, but owing to the heavy removal cost, and to the likelihood of quartering troops at Empire, which can make good use of the present building, the erection of a new permanent structure has been definitely decided upon.

The work of the permanent building division of the Supply Department on quarters at Balboa now includes the following: Erection of 80 four-family concrete quarters authorized some time ago; removal and reerection of frame gold married quarters from various Canal Zone settlements; construction of barracks and removal of East Balboa labor camp to the silver townsite at La Boca, and the construction of 400 additional apartments at La Boca.

Since January 24 of this year, the carpenter gangs of the Chief Quartermaster have removed and reerected, or are now engaged in the removal and reerection, of the following type buildings: Quarters at one time occupied by the late Colonel Gaillard at Culebra; one Type-17, and three Type-4 quarters in the same settlement; one Type-20, one Type-10 and two Type-17 quarters at Empire, and four Type-17 houses at Gatun.

The work at the La Boca silver camp, with the exception of that newly authorized, is drawing to a close, and it is thought probable that some of the gangs at this point can be transferred to the removal and reerection work some time this month. It is expected that about all of the frame quarters required for gold employes will be moved by August 1 of this year.

American Institute of Electrical Engineers.

Owing to extraordinary duties in connection with the reorganization on April 1, 1914, the members, who had planned to deliver papers at the April meeting of the Panama section of the American Institute of Electrical Engineers, have been unable to prepare them.

The executive committee, therefore, has cancelled the April meeting. The next meeting will be held early in May. The date of the May gathering, which is the annual meeting to hear reports, to elect officers, etc., will be announced later.

Levelman and Transitman Examination.

Examination for promotion to the positions of levelman and transitman is scheduled to be held in the Canal clubhouse at Empire, on Sunday, May 10.

The examination will commence promptly at 9.35 a. m. and will be divided into three parts, which will be given in the order indicated, viz: Written and oral examinations, and a statement of education and experience. Competitors will be required to complete the written portion of the examination *before 1 p. m.*

Applications for examination should be addressed to the undersigned, *through the head of department or division*, before the close of business on Thursday, May 7.

Applicants should bring to the examination room, pens, ink, pencils, triangles, and tables of circular functions, but no paper or blotters.

Applicants who fail to appear for examination before 9.35 a. m., or who do not apply for examination through the proper channels *before the close of business on Thursday, May*

7, will not be admitted to the examination. No card of admission will be needed.

A. B. NICHOLS,

Chairman, Examining Board.

CULEBRA, C. Z., April 6, 1914.

A Record Repair Operation.

On April 2, pipeline dredge No. 85, engaged in inner harbor excavation at Balboa, was shut down at 8.25 a. m. for complete change of pump. This work was completed, and the dredge resumed operations at 6.45 p. m. on the same day, making a record for renewing machinery of this character.

PERSONAL.

Surgeon James C. Perry, U. S. Bureau of Public Health, resigned as Chief Quarantine Officer on March 31, but was requested to remain in an advisory capacity until April 14. He will sail for the United States on the *Panama* on Tuesday, April 14, and has asked and been granted a year's leave of absence, which he will spend in travel. He was detailed to the Isthmus by the United States Public Health and Marine Hospital Service early in 1904, to make a report on local sanitary conditions, arriving at Colon on February 7. On June 27, 1904, he was transferred to the sanitary service of the Isthmian Canal Commission, and on July 13 of that year, he was appointed quarantine officer at Colon. On May 3, 1905, he was promoted to Chief Quarantine Officer, and since February 14, 1910, in addition to his other duties, he has filled the office of health officer of Panama. He was born in 1865, in Elizabeth City, N. C., and received his early education in the schools of that state. He was graduated from the University of Maryland in 1889; on March 27 of that year, he was appointed to the post of assistant surgeon in the Public Health and Marine Hospital Service, and on March 1, 1904, he was promoted to the rank of surgeon. In 1899, he was at Hong Kong, China, where he made a study of plague conditions, and in the following year, he was transferred to Manila to organize the quarantine service of the Philippine Islands, remaining there until March, 1903.

Mr. John K. Baxter, at one time chief clerk in the former Department of Civil Administration, and later, assistant chief clerk in the office of the Chairman and Chief Engineer at Culebra, in charge of the personnel division, but who resigned in April, 1912, to enter the United States consular service, returned to the Isthmus on Saturday, April 4, and has accepted the position of Chief of the Division of Civil Affairs in the Executive Office, effective as of that date. Mr. Baxter was consul at St. Pierre, a French island possession off the coast of the Dominion of Canada until January 2 of this year, when he was transferred to Maracaibo, Venezuela, where he remained but two months.

First Lieut. Henry P. Carter, Medical Corps, U. S. A., one of the new health officers, arrived on the Isthmus from New Orleans, on the *Atenas*, on Wednesday, April 1.

Maj. Robert E. Noble, Medical Corps, U. S. A., and Dr. S. T. Darling, who accompanied Surgeon General Gorgas on his trip to South Africa, returned to the Isthmus on the *Panama*, which docked at Cristobal, on Wednesday, April 8.

Representatives Henry Bruckner, J. F. Carew, H. H. Dale, and J. H. O'Brien, Mem-

bers of Congress from the State of New York, arrived on the Isthmus on Wednesday, April 8, on the *Panama*. They are accompanied by members of their families.

Maj. G. A. Helfert of the Philippine Constabulary, and former governor of the province of Zamboanga, arrived on the Isthmus on April 2, on the steamship *Atenas*, from New Orleans. He has been requested by the Government of Panama to act as instructor of its police.

Annual Dinner of the Incas.

Invitations have been issued for the annual dinner of the Society of the Incas, which will be held on Monday, May 4, the anniversary of the taking over of the Canal property from the French. The secretary, Milo C. Pratt, advises that he is not in possession of a complete list of the 1904 men still on the Isthmus, and requests that any one overlooked in the matter of invitations communicate with him at Ancon, C. Z.

Special Excursion Through Culebra Cut and Gatun Lake, Good Friday, April 10, 1914.

The Panama railroad sightseeing barge will be run from Paraiso to Gatun and return on the above date, for account of the Isthmian Sunday School Association. For tickets and further information apply direct to Mr. John F. Warner, Executive Office, Culebra.

Positively the last trip of the barge, from Paraiso through to Gatun and return, during the present dry season, will be on Sunday, April 19, on the following schedule:

The Panama railroad sightseeing barge, accommodating 300 passengers, will leave the dredge landing, at Paraiso, at 8.15 a. m., Sunday, April 19, for an excursion through Culebra Cut and Gatun Lake. The barge will arrive at Gatun at 12.30 p. m. The Bas Obispo shuttle train, which leaves Bas Obispo at 7.10 a. m., and the 7.30 a. m., train from Panama will both deliver passengers at Paraiso in time for this trip. A special stop on the main line opposite Paraiso, will be made by the 7.30 train from Panama, to accommodate excursionists.

There will be an afternoon excursion with the sightseeing barge, leaving the concrete dock, Gatun, at 1.30 p. m., going back over the same course to Paraiso, arriving about 5.30 p. m., connecting with both main and branch line trains. Train No. 7, which leaves Colon at 4.45 p. m., will make a stop opposite Paraiso cabin to accommodate excursionists. Passengers from Panama desiring to make the afternoon trip from Gatun to Paraiso, can take train No. 6, which leaves Panama at 11 a. m., arriving at Gatun at 12.34 p. m., giving time for lunch. Passengers from Colon desiring to make the afternoon trip, can take train No. 5, leaving Colon at 11 a. m., and arriving at Gatun at 11.16 a. m., giving time for lunch.

The fare for this trip will be \$1.50, U. S. currency, each way. Employees can use mileage books, from which 32 miles "Mileage" will be detached for each trip.

The barge will *not* be operated Sunday, April 12.

F. MEARS,

Superintendent and Chief Engineer.

Cristobal Dance Club.

The mask ball of the Cristobal Dance Club will be held on Monday, April 13, at the Canal clubhouse. A flashlight photograph will be taken. All members are requested to appear in costume.

EASTER IN ZONE CHURCHES.

Special Services to be Held Commemorative of the Day.

The Easter services in Christ Church, Colon Beach, will be, as follows: Parish communion at 5.30 a. m.; choral eucharist at 10.30 a. m.; choral vespers and anthem at 4 p. m.; evening-song, with sermon, at 7.30 p. m.

At Culebra, there will be a celebration of the holy communion in the upper room of the schoolhouse at 7 a. m., the Rev. H. R. Carson, chaplain of Ancon Hospital, officiating.

At St. Luke's, Ancon, there will be morning prayer at 9 a. m. This will be the children's service, and the Sunday school will make its lenten offering for missions at this time. The holy eucharist will be at 10 a. m. A special service for the Knights Templar, by request, will be held in the afternoon at 4 o'clock.

At St. Paul's, Panama, there will be morning prayer at 5 a. m., the holy eucharist at 11 a. m., and evening prayer and sermon at 7.30 p. m.

In the missions for West Indians, the services will be as usual. Special music for the day will be sung in all the Episcopal churches throughout the Canal Zone.

The Cristobal Union Church Sunday school will celebrate Easter on Sunday evening, April 12, the exercises being held in the chapel at 7.30 o'clock. The program includes numbers by the primary and beginners' classes, and the junior boys and girls, assisted by the adults of the school. The first part of the program is composed of Easter numbers and the second part is a missionary program. The offering of the school will be made at this time, and will be presented to Miss Annie Coope for use in her work among the San Blas Indians.

The Union Sunday school at Empire will have a special program at its regular session on Easter Sunday. The session will be held from 9.45 to 10.45 o'clock, as usual. Immediately after this meeting, the Christian Endeavor Society will hold its regular meeting.

The Methodist Church on the seawall will hold a combination Easter service with the Sunday school, on Sunday morning at 10 o'clock.

There will be special exercises at the mission in Guachapali, in the afternoon, at 3 o'clock.

There will be a simple Easter program at the recently organized Sunday school in East Balboa on Sunday morning.

At the church of the Sacred Heart, Ancon Hospital, the first mass will be said at 6 a. m., and the hour for the second mass, is as usual, 9.30 a. m. At this service, Madam Adolf Faure of Culebra will sing.

First communion will be taken by a Spanish class of children at the church of St. Ferdinand, in Empire, on Easter morning. The services for the day will be according to the usual schedule.

Mass will be celebrated in the new church at Corozal on Easter morning at 8 o'clock, and in the church at Balboa, at 9 o'clock. The Rev. Father MacDonald will be the celebrant in both churches.

The Women's Clubs.

The sixth annual meeting of the Cristobal Woman's Club will be held at the Canal clubhouse on Wednesday, April 15. It is expected that plans will be made to hold the present officers over until the opening of the

club year in October. The year just completed has been one of the best years of the club life in Cristobal.

Mrs. Eleanor Brackenridge of San Antonio, Texas, has been a visitor to the Isthmus during the past week, making interested inquiries concerning the woman's club movement in the Canal Zone. Mrs. Brackenridge was the organizer and, for seven years, president of the Woman's Club of San Antonio, and is president of the Equal Franchise Society of San Antonio.

The Tuesday morning meetings of the Woman's Altar Guild of St. Luke's Hospital Chapel, Ancon, will be discontinued after this week. The regular semimonthly meetings will be resumed. Future plans for the guild's work will be announced later.

There will be no meeting of the Ancon Study Club on Thursday, April 9. Further announcements of meetings will be given in THE CANAL RECORD.

The last meeting for the season of the Ladies' Aid Society of the Cristobal Union Church will be held on Tuesday, May 12, when it is expected that Miss Annie Coope, the American missionary teacher engaged in work among the San Blas Indians, will be present and give an address on her work.

Isthmian Sunday School Association.

The quarterly meeting of the Isthmian Sunday School Association was held at the Panama Canal clubhouse in Pedro Miguel on Sunday afternoon, April 5. Representatives were present from the following Union Sunday schools on the Isthmus: Balboa, Panama (Methodist), Pedro Miguel, Culebra, Empire, Gatun, and Cristobal. The Rev. Aquila Lucas, international secretary of the International Sunday School Association, was present, being at this time making his sixth visit to the Sunday schools in the Canal Zone. Features of the program were an address by Mr. Lucas, and a paper on primary work in the Sunday school by Mrs. Harrison.

Reorganization of Gatun Sunday School.

The Gatun Sunday school has recently been reorganized, the entire system of the school being remodeled. The officers elected were: Superintendent, Frank Gardner Smith; assistant superintendent, Mrs. A. C. Arthur; recording secretary, Frank Sisson. The other officers will be elected at an early meeting. The school has nine classes, and a teacher has volunteered for each class. A meeting of the officers and teachers of the Sunday school will be held in the chapel on Wednesday evening, April 15, when there will be a round table discussion on Sunday school methods, and an address by the international secretary, the Rev. Aquila Lucas.

Corner Stone of New Baptist Church in Panama to be Laid on Good Friday.

On Good Friday, April 10, the foundation stone of a new Baptist church building in the district of Chorrillo, Panama, will be laid, the Hon. William Jennings Price, the American minister to Panama, performing the official act. Others who are to take part in the ceremonies are the Rev. J. L. Wise, superintendent of the Baptist mission work for Panama and the Canal Zone, the Rev. Stephen Witt, pastor of the churches at Colon and New Gatun, the Rev. G. Hardwick, superintendent of the Wesleyan missions in Panama and the Canal Zone, the Rev. J. Pincock, of Panama, and

the Rev. A. Lucas, the visiting secretary of the International Sunday School Association. The church has been built under the direction of the pastor in charge, the Rev. S. Moss Loveridge of Culebra, who will also take part in the program. The ceremonies will take place in the afternoon, at 5 o'clock.

Memorial Services for I. N. DeLong.

On Sunday evening, April 5, the Cristobal Union church united with its affiliated societies in holding a memorial service for the late Mr. I. N. DeLong, who died in Colon Hospital on March 31. Mr. DeLong was president of the Christian Endeavor Society, and had been prominently connected with the work of the church for two years. The service consisted of appropriate musical numbers, Scripture reading, and prayer, with addresses by Mr. Lawson, Mr. Page, and Mr. Larcom. Judge Thomas Edwin Brown, Jr., was the chairman of the meeting, and made a short address. The Odd Fellows' memorial service was held during the program, with Mr. J. P. Mead, as leader.

Miscellaneous Notes.

The Rev. Harry Compton, pastor of the Methodist Episcopal Church in Panama, is in Quito recovering from an attack of yellow fever, which, it is thought, was contracted on the coast. Mr. Compton left Panama on February 23, accompanying the Rev. Mr. Taylor and his evangelistic singer, for a missionary trip in Ecuador. He had expected to be away from his church only one month, but owing to his illness his absence will be protracted considerably beyond that time.

The juvenile library in connection with St. Luke's Sunday school is open for the distribution of books on Wednesday afternoons at 4.30 o'clock.

Obituary.

Irvin N. DeLong, an American employed in the Second Division, with residence at Cristobal, died at Colon Hospital on Tuesday, March 31. He was 25 years of age, married, and had been on the Isthmus four years. His former home was at Allentown, Pa.

Charles W. Crafts, a printer employed in the Isthmian Canal Commission printing plant from 1907 to 1909, died at the home of his father in Silver City, N. M., on March 3, aged 21 years. He was the son of Charles P. Crafts, who was an inspector in the service of the former Department of Sanitation for nine years, resigning a short time ago. A brother, Mr. L. H. Crafts, is employed at the Balboa commissary store.

Dennis D. Sheehy, an employe in the Quartermaster's Department at Cristobal, died on April 1, in a hospital car while on his way to Ancon Hospital. Death was due to brain abscess. He was born 39 years ago in Ireland, but became a citizen of the United States, living in Philadelphia prior to coming to the Isthmus. He arrived on the Isthmus on January 19, 1907, and was employed in the Panama Canal service continuously until the time of his death. He is survived by his wife and two children, living at Cristobal. He was a member of the American Veterans of Foreign Service, and of the Knights of Columbus. Memorial services will be held at St. Joseph's Church, Cristobal on Sunday, April 12, at 1.30 p. m., under the auspices of the Knights of Columbus.

PERMANENT PLAYGROUNDS.

Report of Committee has been Approved and Work Begun.

The report of the playground committee has been approved, and the work of grading the playground area at Pedro Miguel has already been begun.

The following areas have been reserved:

CRISTOBAL.

1. Space immediately adjoining clubhouse.
2. Plot opposite clubhouse, formerly occupied by French buildings.
3. Area between public school and houses Nos. 344 and 35.
4. Area adjoining house No. 27.
5. Low area between Camp Bierd and Dock 13.

GATUN.

1. Various flat areas between clubhouse and small lake.
2. Space now occupied by house No. 2, providing this house is torn down.
3. Space now occupied by machine shops, near locks.

PEDRO MIGUEL.

1. Northerly ridge on which clubhouse is situated, including grove of mango trees.
2. Fill adjoining Miraflores road and lying between this road and Pedro Miguel settlement.

BALBOA.

1. Space immediately in rear of proposed permanent clubhouse, including mango grove.
2. Area adjacent to proposed permanent schoolhouse.
3. Plot of about 10 acres in lee of roundhouse and terminal yards.

The advisability of taking over the present concrete tennis court at Gatun is now being considered.

It is likely that a playground plot for Ancon will be recommended.

The original committee, appointed by Colonel Goethals to consider the provision of playgrounds for permanent towns, consisted of Mr. A. B. Dickson, superintendent of clubhouses, Mr. W. L. Phillips, landscape architect, and Mr. F. P. Wagg, superintendent of schools. Owing to the resignation of Mr. Wagg, Messrs. Dickson and Phillips made the report, in which the following points were considered in the formation of a policy for the creation and conduct of such grounds:

1. Age groups to be provided for.
2. Extent of sex separation needed.
3. Kinds of recreation to be provided for, and facilities.
4. Supervision, including instruction, policing, and maintenance.
5. Regulation of hours of use.
6. Available lands.
7. Cost.

It was the opinion of the committee that recognition should be made of four age groups, namely: Children under six years, children from six to 12 years, 12 to 15 years, and adults, including all over 16 years.

On the point of sex separation, there was a consensus of opinion that separate grounds, or separate use at different hours, should be provided for the two sexes in the 6-12 and 12-15 year groups, and this was recommended.

The following recreative facilities were recommended:

For small children—Simple amusements, sand boxes, a kindergarten swing, scups; these to be placed in a small, shady square,

grove, or garden place, where the mothers can take some pleasure in staying with the children.

For boys six to 12 years old—Informal games and light exercise, gymnastic drill, for which a free space about 100 feet square will be provided, with dirt or gravel surface, swings, giant strides, and see-saws.

For girls six to 12 years old—Same as above.

For boys 12 to 15 years old—Sports, gymnastic exercise, tennis court, trapeze, and baseball diamond.

For girls 12 to 15 years old—Folk dancing, tennis, systematic exercise.

For adults (all over 15)—Sports, tennis courts, and a baseball diamond.

The school yards at Cristobal and Gatun should be made adequate in size, should have a surface suitable for running about on, and should be shaded. At Pedro Miguel and Balboa, the school would be served by immediately adjacent playgrounds.

The committee was of the opinion that trained supervision and instruction are indispensable, where exercise is contemplated involving the use of apparatus, the playing of organized games folk dancing, and the like. The committee recommended that the general supervision be in the hand of the Division of Clubhouses, and the work of supervising the activities be a duty of physical directors of the Y. M. C. A., assisted by teachers of public schools between 4 and 5 p. m.; also, that the hours of use be unrestricted for those under six; that from 3 to 5 p. m., week days, and from 9 to 11 a. m. on Saturdays and holidays, the grounds will be for the use of those six to 12 and 12 to 15 years of age, with the understanding, however, that employees shall have first choice of the tennis courts and baseball diamonds after business hours, and on Sundays and holidays.

Accessibility is thought to be of paramount importance, and as a general ideal, it is thought desirable to place clubhouse, school, and recreation areas in close relation. In no one of the towns, however, has it been found practicable to make a thoroughly ideal arrangement in this respect.

Following the original report, the committee was enlarged and was directed by the Acting Chairman to review the previous plans and make additional suggestions. The final recommendations of the playground committee are given herewith:

"The committee appointed in your letter of February 11 to study a previous report on playgrounds for the permanent towns, and make additional recommendations, have the honor to report, as follows:

The members of your committee agree with the recommendation of the original committee as to age groups, recreation to be provided, supervision, policing, instruction, maintenance, and hours of use. It is our opinion that the various areas mentioned in the original report are conveniently located for playground use, with the exception of the proposed baseball ground at Gatun, which, if possible, should be placed in a more available location. It is suggested that the site of the present shops at Gatun would be suitable for a ball park, providing same would be available after the shops are dismantled. In the opinion of the superintendent of schools, and the committee, the school at Gatun should be moved nearer, or housed in a building nearer, the center of the community. This would bring

the children of Gatun in much closer touch with the proposed playgrounds.

Old French buildings Nos. 41 and 48, opposite Cristobal clubhouse, are now being torn down, and we learn that it is the intention of the Quartermaster's Department to tear down old French buildings Nos. 33, 34, 40, 42, and 43. There is, therefore, ample room now opposite the Cristobal Y. M. C. A. for a tennis court. There is also sufficient space available near the Gatun Y. M. C. A. for a tennis court.

The head of the Division of Police and Prisons advises that while there are district prisoners now on road work near Gamboa who could be used for grading, yet there is so little of this work that could be started at present that he is of the opinion that it could be more advantageously performed by the Municipal Engineer. Furthermore, the availability of these men for playground grading work would depend largely on decision as to the urgency of the road work on which they are now engaged, and will be for some 10 months more.

Your committee recommends, therefore:

1. That the plots described in the drawings be reserved at this time definitely for use of playground work, irrespective of the time of beginning operations.
2. That work be begun on the entire Pedro Miguel system at once, the apparatus to be installed as soon as possible.
3. That work be begun at once on one tennis court, each, for Cristobal and Gatun.
4. That work be begun on the playground adjoining the proposed new schoolhouse at Balboa, the apparatus allotted for this area to be installed and ready for use at the time of opening the school.
5. That no additional work, except that mentioned in preceding paragraph, be started at Balboa until the beginning of the next dry season, inasmuch as the surface soil is not now in proper condition to withstand the coming rainy season.

It is our understanding that the cost of apparatus and tennis court will be paid from clubhouse funds, in accordance with the first paragraph of your letter of the 11th ult

Respectfully submitted,

A. B. DICKSON, chairman of committee,
W. L. PHILLIPS, C. W. BARBER, A. R. LANG,
C. C. MCCOLLEY."

Committee of Inquiry in Case of John Burke.

The Governor of the Panama Canal has appointed a committee of inquiry, consisting of Col. H. F. Hodges, chairman; Lieut. Frederick Mears, and Capt. F. O. Whitlock, to review the evidence presented by John Burke intended to establish his innocence of the charges made against him. Mr. Burke returned to the Isthmus on the *Cristobal*, on Thursday, April 2.

Indoor Pistol Matches.

The indoor matches of the United States Revolver Association will be held April 19 to 26, inclusive. The Ancon Pistol Club will hold its matches at the Balboa range. All those desiring to enter are requested to communicate with M. E. Woodward, secretary and local governor of the United States Revolver Association on the Isthmus, whose address is Balboa C. Z.

Steamship Baggage.

Steamship baggage for Colon should be delivered at the stations at least 30 minutes before leaving time of the train carrying same.

CIRCUIT COURTS CLOSE.

Last Sessions Marked by Speechmaking—Brief Review of Former Zone Judicial System.

The judicial system of the Canal Zone, under the old order, ceased to exist on March 31. The Circuit Court of the Third Judicial Circuit at Cristobal, Judge Thomas E. Brown, Jr., presiding, held its last regular criminal session on Thursday, March 26; at Ancon, the last regular session of the Circuit Court of the First Judicial Circuit was held on Monday, March 30, with Judge H. A. Gudger, presiding, and at Empire, the last session of the Circuit Court of the Second Judicial Circuit was held on Tuesday, March 31, with Judge W. H. Jackson presiding. At all of the closing sessions, speeches were made by the presiding officers, by former Assistant Prosecuting Attorney Chas. R. Williams, and members of the local bar. While all further business relating to these courts was formally ordered over to the new District Court, provided for by the Panama Canal Act, it is probable that attention will be given urgency cases pending the confirmation by the Senate of the nomination of Justice W. H. Jackson, as District Judge, and the organization of the new District Court. The members of the Canal Zone Supreme Court were assigned to the several circuits of the Zone in the capacity of circuit judges; they will continue to exercise their functions as members of the Supreme Court bench, in accordance with the Executive Order of the President, until the Supreme Court docket has been cleared.

When the Canal Zone was taken over by the American authorities on May 4, 1904, justice was administered by the Supreme Court of Panama, composed of five justices, by a superior tribunal, composed of several judges, by several circuit court judges, by the alcaldes, and by the inspectors of police. By order of the Government of Panama, exercise of all judicial functions by these officers ceased on June 16, 1904, at which time it became necessary for Major General Geo. W. Davis, then Managing Representative for the Isthmian Canal Commission, to adopt temporary measures. The municipal officers in four of the then existing municipal districts was instructed to continue to discharge their duties, but this left two districts, Ancon and Cristobal, where there were no officials of the Panama Government, save two or three inspectors of police. In these districts, trustworthy members of the police force were selected to administer local government, and some of the powers of the former alcaldes were conferred upon them. At the time the Panama Government ceased to exercise its judicial powers in the Canal Zone, generally speaking, one-half of the Zone pertained to the judicial circuit of Colon, and the other half to the province of Panama. In each of these circuits there were one or more circuit judges, but they were not only prohibited from continuing in office by the Panama Government order, but were prevented from acting on account of their being alien to the Zone. Thus, the rather extraordinary situation developed, that from June 16 to September 2, 1904, when Act No. 1 of the Canal Zone laws, dated August 16, 1904, went into effect, there was no court that could hear or determine a case ordinarily falling within the jurisdiction of circuit judges.

Under the above Act, a Supreme Court of the Canal Zone, three circuit, and five muni-

cipal courts were created. According to the minutes, a meeting of the Canal Zone Supreme Court was held on January 9, 1905, presided over by Judge Kyle, but this was probably a formality to comply with the Canal Zone laws, as the first appointment on the Supreme Court bench was not made until about two months later. The minutes of that meeting read, as follows:

"ANCON, January 9, 1905.
This being the second Monday in January of this year, the Supreme Court of the Canal Zone met pursuant to law, the Hon. Osceola Kyle, justice of the Supreme Court being present and presiding. There being no other justice, the Court was adjourned until the further order of the Chief Justice, or until the second Monday in July, 1905. And the Court was duly adjourned upon the day and date abovementioned."

Although Mr. H. A. Gudger was appointed Justice of the Canal Zone Supreme Court on February 24, 1905, the organization of the Court did not take place until the first day of June of that year, on which date, Mr. F. Mutis Duran, the newly appointed Chief Justice, took his seat. The first session was also held on June 1, and several cases were taken up. The personnel of the Supreme Court bench was not fully completed until the appointment of Mr. Lorin C. Collins on June 21, 1905.

The first circuit court was established at Ancon, and for a time it transacted all of the circuit court business of the Zone. The first session was held in the old French building, formerly used by the District Court judge, now occupied by the new Magistrate's Court, in the old corral reservation, known in French times, and for a year or so after the Americans came, as "Ancon Section." The date of the first session, as indicated by the existing records, was September 16, 1904. Mr. Osceola Kyle, who was the first circuit court judge, presided, and the first case tried was that of the Government of the Canal Zone vs. Baldomero Cortez, charged with the theft of a quantity of quicksilver from the Pacific Mail steamship *City of Peking*. The court dismissed the case, stating that it was not shown whether the goods alleged to have been taken consisted of "Quicksilver, or shavings."

The Cristobal Circuit Court held its early sessions in a room in the present commissary building; later, it was moved to building No. 2, one of the old DeLesseps houses on Cristobal Point, and, in 1911, when the noise in connection with the work on the new Cristobal docks became too great, the quarters were again changed, this time to the upper floor of the Cristobal lodge hall.

The first circuit court sessions at Empire were held in the old wooden jail building, situated on the east side of the railroad; later, the court was moved into the old, but well preserved one-story French building on the main street, nearly opposite the clubhouse.

The Executive Order of the President, effective April 15, 1907, abolished the municipal districts, and established in their stead, four administrative districts, those of Cristobal, La Boca, Empire, and Gorgona, and five district judges were appointed, including a senior district judge. The district court at La Boca was transferred to Ancon in the latter part of June, 1908. Judge S. E. Blackburn held court at La Boca on June 26 of that year, and on the following day, presided over a session at the new location in Ancon. Since the removal to Ancon the district courthouse has been the old French building, east of the frame structure that has housed the Supreme and Circuit Courts. The

district court at Gorgona was consolidated, consequent on the abandonment of that village, by the Executive Order of the President, dated September 12, 1913, with the administrative district of Empire.

Transportation and Traffic Conditions.

Superintendent D. C. Nutting, Jr., of the Mechanical Division, Trainmaster F. R. Blunt of the Panama railroad, Superintendent J. A. Walker of the Balboa terminals, Mr. W. T. Snyder, assistant superintendent of transportation, and Mr. R. K. Morris of the Supply Department, have been appointed a committee to consider and report on existing transportation and traffic conditions at Balboa, covering the Panama railroad, as well as the Panama Canal, and to include train and car movements, use of tracks, the best means of securing cooperation, etc. The committee held its first meeting at the office of the superintendent of the Mechanical Division at Balboa on Friday, April 3.

CANAL CLUBHOUSES.

Activities of the Young Men's Christian Association.

GENERAL.

On another page of this issue of THE CANAL RECORD will be found a summary of the report of the playgrounds committee, which has been approved. The general supervision of the playgrounds will be in the hands of the Division of Clubhouses, and the work of supervising the activities will be looked after by the physical directors, who will be assisted at times by school teachers.

The feature film "Passion play" 3,500 feet in length, hand colored throughout, and with reading matter in English, will be presented at the clubhouses on the following dates: Wednesday, April 15, Cristobal; Thursday, April 16, Corozal; Friday, April 17, Empire; Tuesday, April 21, Gatun; Wednesday, April 22, Culebra; Thursday, April 23, Pedro Miguel; Friday, April 24, Balboa.

Arrangements have been made whereby a larger number of comic reels will hereafter be shown in the motion picture exhibitions given at the clubhouses.

The schedule for the week April 13 to 18, is, as follows: Monday, Corozal; Tuesday, Pedro Miguel; Wednesday, Empire and Balboa; Thursday, Cristobal; Friday, Gatun; Saturday, Culebra.

The Misses Crosby, Leavitt, Sherin, and LaSheck, and Messrs. Eccles and Madden, sailed on the *Tivies* for Boston, on Sunday, April 5. During their stay on the Isthmus, this company appeared 17 times under the auspices of the Y. M. C. A. It is estimated that there was a total attendance of 6,000 at the entertainments given.

BALBOA.

The barber shop was opened to the public on Monday, April 6. This shop is intended for the use of all the men of Balboa, whether members or not.

A competent tailor has been placed in charge of the pressing club, which, it is expected, will insure good work in future.

There was an attendance of 150 at the special exhibition of motion pictures of the visit of the Shriners to the Canal Zone.

COROZAL.

High scores in bowling during the past week were, as follows:

Rubber duckpins—McDonald, 108; Violette, 107; Louch, 120; Regan, 105; Goodnow, 109; McNeil, 101; Davis, 119; Parkis, 143; Hutchison, 105.

Duckpins—Louch, 104; King, 103; Regan, 107; Parkis, 109; Davis, 131; Barte, 100; Ruggles, 101; Steele, 111.

Tenpins—Edwards, 233; Parkis, 217.

The new books for the library have arrived, and are ready for issue.

The regular moving pictures this week will be shown on Thursday, April 9.

PEDRO MIGUEL.

Sixty-five of the children of Pedro Miguel and Paraiso gave a surprise party to their friend, Mr. J. V. Lyles, on Tuesday evening, March 31, on the occasion of his departure from the Isthmus. A number of games were played, and a home made lunch, consisting of cakes and sandwiches, was served. The children made Mr. Lyles the present of a set of Canal souvenir stones, set in a tie clasp and tie pin.

An April fool banquet was given at the clubhouse on Wednesday evening, April 1, as a farewell to former Pedro Miguel and Paraiso residents, who were leaving the Isthmus. A program of toasts and speeches was given, and music was furnished by Gray's orchestra. Mr. H. Darnell Brittin acted as toastmaster, and the following toasts were offered: "To the Canal builders," by Mr. Funkhauser; "To April Fool," by Dr. Gibson; "To those who are leaving," by Mr. F. H. Wang; "To those who are to stay," by Mr. G. W. A. Palmer. The banquet was further enlivened by April Fool jokes. About 100 were present.

On Thursday evening, April 2, the Culebra duckpin team took two out of three games from the Pedro Miguel team. Scores:

Culebra.				Pedro Miguel.

Total....	424	461	459		448	453	449

CULEBRA.

High scores in bowling for the past week were, as follows: Ferguson, 100; Case, 104; Kronmiller, 102. In the handicap billiard tournament just closed, E. E. Barnes, scratch, won first place without losing a game.

A handicap pool tournament will start soon. Those desiring to enter are requested to sign their names on the notice posted in the pool room, or see Mr. Cook.

A "Smoker" will be held on Wednesday night, April

15. Admission will be free for men only. Every member is requested to be present.

EMPIRE.

Empire took three games from the Culebra team on Tuesday evening, March 31, in tenpins. Scores:

Empire.				Culebra.			
Barrett.....	104	86	88	Koperski....	77	84	89

Totals.... 478 469 477

403 435 438

On Saturday, April 11, the Empire team will bowl at Gatun.

The Empire association entertained the chess clubs of the Isthmus on Saturday evening, April 4. Twenty-eight players were present, representing Corozal, Pedro Miguel, Culebra, Gatun, Cristobal, and Empire. A souvenir program was prepared, containing a picture of the Empire clubhouse; also, of Mr. H. A. Smith, the winner of the individual chess tournament of the Isthmus, and of Mr. William Dubois, the organizer and promoter of chess activities in the Canal Zone. The program opened with a reception at 8 o'clock, followed, at 8.15, with chess play, silent partners. At 9.30, refreshments were served, Mr. J. F. Warner acting as toastmaster. Toasts were responded to by Mr. S. P. Verner, on "Chess and other games;" Mr. W. H. Warr, on "Why I play chess;" Mr. D. Wilson, on "Chess secrets;" and by Mr. Francis Oakley on "Chess problems." The following prizes were awarded: One, for scholarship, to Mr. J. B. Shropshire; one, for generosity, to Mr. George Strong, and one, for the first losers, to Messrs. Stevenson and Patterson. The presentation of a medal was made to Mr. H. A. A. Smith, by Mr. William Dubois, and the presentation of a Hamilton watch was made to Mr. William Dubois, by Mr. Smith, on behalf of the former's Canal Zone chess friends.

GATUN.

At the motion picture entertainment given on Saturday evening, April 4, Mr. Thos. L. Byrne of the submarine flotilla sang two baritone solos, accompanied by Mr. S. C. Fagard.

On Thursday evening, April 2, a basketball game was played between the "Millionaires" and the "Sports." At the end of the second half, the score was tied, 29 to 29, making it necessary to play an extra period. The final score was 31 to 29 in favor of the "Millionaires."

Group photographs of the various gymnasium classes were taken recently, and will be placed on sale in the near future.

A handsome silver medal will be given to the bowler who rolls the largest number of games of 100, or over, during the month of April.

Phillip Marquand and Chester Logan represented Gatun clubhouse at the chess carnival held at Empire on April 4.

The two boys who were prize winners in the recent athletic tournament have been selected as captains of two teams, which are holding a team contest during the month of April. Essex Griffiths is captain of the "Blues," and Francis Loulan is captain of the "Golds."

The game of basketball is being exploited in the girls' gymnasium class. A spirited game took place on Friday afternoon, April 3.

CRISTOBAL.

Two games of indoor baseball in the boys' league resulted in the following scores: Team No. 1 28, Team No. 3 12; Team No. 2, 12; Team No. 4, 11.

The total attendance of all gymnasium classes during March was 788. The attendance for the first month of 1914 was 495. The Cristobal young men's gymnasium class would like to compete with any other clubhouse on the Zone, in athletics, handball, volleyball, or indoor baseball.

Twenty-two men participated in the variation bowling tournament on Wednesday night, April 1. Cocked hat with a feather, Newport, and five-back, were played. For having the highest percentage for pinfall, Mr. Sylhrett was given a box of cigars. A solid silver match case was presented to Mr. C. M. Bullard by the bowlers present for his long service in charge of the alleys.

In one of the closest matches ever played on the Cristobal alleys, Empire took two out of three games on Saturday night, April 4, by the following scores:

Empire.				Cristobal.			
Barrett.....	88	98	85	Pinney.....	90	86	102
King.....	97	90	99	Scheid.....	101	95	83
Sims.....	93	93	113	Bullard.....	96	97	91
Potter.....	83	108	88	Barte.....	98	97	91
Gustavson..	93	99	85	Smith.....	85	93	102

Total.... 454 488 470

470 468 469

Mr. Pinney made the unusually high score of 140 at duckpins this week. Other high scores were: Scheid, 111; Smith, 105; Buser, 104; Gill, 104; Brittin, 100; Ott, 100.

The monthly married folks duckpin tournament will be held Monday, April 13. Entries are in order.

Mr. Baxter, of the Panama railroad sightseeing

service, gave an exceedingly instructive address before the discussion club, on Thursday night, April 2. He spoke of the purchase from the French, the United States agreement with Panama regarding land, the variation in tides on the Atlantic and Pacific sides, the water supply in Gatun Lake, etc. The meeting for April 9 will be devoted to discussion of The United States Express Company's dissolution, the unrest in Ireland, and the present status of our relations with Mexico.

Supplies for the Canal.

The following steamers, with supplies for The Panama Canal and Panama Railroad Company, arrived at the ports of Colon and Cristobal during the week ending March 28:

Prinz Joachim, March 23, from New York, with 71 kegs rivets, 1,343 pieces galvanized pipe, 50 drums lime, for stock.

Rescue, (tug) March 25, from New York, with two barges, for Dredging Division.

Cartigo, March 25, from New Orleans, with 212 pieces untreated yellow pine piling, for Second Division, five barrels dipper teeth, for stock.

Abangarez, March 25, from New Orleans, with 602 bundles sash, doors, etc., for permanent buildings, 206 pieces untreated yellow pine piling, for Second Division.

Santa Marta, March 25, from New York, with 1,500 sacks plaster, four cases hardware, for permanent buildings; 57 pieces chain fender material, for First Division; 280 pieces bridge iron, for Division of Municipal Engineering; 280 cases varnish, 40 boxes lead washers, 35 cases paint, 167 kegs wire nails, 600 cases linseed oil, for stock.

Colon, March 26, from New York, with 464 crates roofing tile, 153 cases glass shades, nine cases machinery, 10 cases hardware, 116 boxes plumbing supplies, for permanent buildings; 10 steel couplings, for Dredging Division; 50 boxes electric lamps, two cases electrical machinery, 72 bundles pipe and fittings, 38 barrels fire brick, 18 boxes iron pipe and fittings, eight cases paint, for Mechanical Division; 287 cases electrical machinery, 177 bundles steel bars, for First Division; 89 cases electrical machinery, for Lighthouse Division; 300 pieces steel ties for Panama Railroad Company; 230 crates roofing tile, 14 boxes range parts, 313 bags oats, 500 bundles plain wire, 235 pieces steel bars, 32 pieces steel plates, 500 garbage cans, 160 bales oakum, 20 cases lubricating oil, 75 cases lubricating grease, 37 kegs washers, 106 cases paper, 20 cases galvanized stove pipe, 30 cases sheet brass, 32 reels wire rope, 40 cases lump black, 145 packages iron pipe-fittings, 150 boxes candles, 133 bundles steel bars, for stock; and a miscellaneous cargo, the whole consisting of 5,463 pieces, weighing 201 tons.

Carillo, March 28, from Boston, with 20 reels copper cable, for First Division.

Culmores, March 28, from New York, with 19 cases hardware, 1,560 sacks plaster, for permanent buildings; five pieces car bumpers, for Panama Railroad Company.

Tyskland, March 28, from Jacksonville, with 15 pieces yellow pine car lumber, for Mechanical Division; 540 pieces switch ties, for Panama Railroad Company; 782.056 board feet yellow pine lumber, 687 pieces yellow pine untreated piling, 200 drums and 500 cases gasoline, for stock.

Movements of Vessels, Port of Balboa.

The following vessels arrived at, or departed from, the port of Balboa during the week ending April 4, 1914:

Arrivals—March 30, *U. S. S. Deuster*, from Corinto, Nic.; March 30, *Ucayali*, from Callao; March 30, *Peru*, from Callao; March 30, *Rupanco*, from intermediate ports; April 2, *Pleides*, from San Francisco; April 3, *Manavi*, from intermediate ports.

Departures—March 30, *Pachitea*, to Callao; March 30, *Huasco*, to Valparaiso; March 30, *Elsinore*, to Port Harford; April 4, *Shearwater*, to northern ports; April 4, *Chile*, to Guayaquil; April 4, *City of Sydney*, to Central America and San Francisco.

Proposals for Clearing Trails.

OFFICE OF THE CHIEF QUARTERMASTER,

CULEBRA, C. Z., April 6, 1914.

Sealed proposals will be received at this office until 3 p.m., Wednesday, April 15 1914, and then opened for:

1. Clearing the Arraijan-Rio Grande trail from the Canal Zone boundary, east of the village of Arraijan, to Rio Grande reservoir, a distance of 32,722 feet, or 6.20 miles.

2. Clearing the Arraijan-Cochinito trail from the Canal Zone boundary, south of Arraijan, to Cochinito village, a distance of 33,970 feet, or 6.43 miles.

Full information can be secured upon application to this office. Bids must be accompanied by cash, certified check, or post-office money order for five per cent (5%) of amount bid. Proposals should be marked "Proposal for clearing trails," and addressed to Capt. R. E. Wood, Chief Quartermaster, Culebra, Canal Zone.

Shoulder, for roasting (not under 4 pounds), per pound.	13
Chops, shoulder, per pound.	17
Chops, per pound.	26
Loins, for roasting, per pound.	26
Cutlets, per pound.	30
Beef—Suet, per pound.	2
Soup, per pound.	8
Stew, per pound.	8
Plate, per pound.	9
Corned, No. 1, per pound.	14
Corned, No. 2, per pound.	12
Chuck roast, (3 lbs., and over), per pound.	12
Rib roast, second cut (not under 3½ pounds), per pound.	16
Rib roast, first cut (not under 3 pounds), per pound.	18
Pot roast, per pound.	19
Rump roast, per pound.	19
Porterhouse roast, per pound.	20
Steak, chuck, per pound.	20
Round, per pound.	13
Rib, per pound.	18
Sirloin, per pound.	19
Rump, per pound.	19
Porterhouse (not less than 1½ pounds), per pound.	20
Tenderloin (Western), per pound.	30
Pork—Hams, fresh, per pound.	\$20
Loins chops or roast, per pound.	19
Shoulders, fresh, per pound.	\$17
Spare ribs, per pound.	15
Backbones, per pound.	15
Pigs' feet, each.	7
Pigs' heads, whole.	60
Pigs' heads, ½-head.	30
Sausage, home made, per pound.	20

MISCELLANEOUS.

Livers—Beef, per pound.	13
Calf, each.	60
Half, each.	30
Steak, Hamburger, package.	13
Sausage—Bologna, per pound.	13
Frankfurter, per pound.	13
Liebowurst, per pound.	12
Devonshire Farm, per pound.	22

CANAL

RECORD

Volume VII.

ANCON, CANAL ZONE, WEDNESDAY, APRIL 15, 1914.

No. 34.

The Canal Record

Official publication of The Panama Canal.

The Canal Record is published weekly free of charge, one copy each, to all employes of the Panama Canal and Panama Railroad Company whose names are on the gold roll. Extra copies and back numbers can be obtained from the news stands of the Panama Railroad Company for five cents each.

Address all Communications,

THE CANAL RECORD,

Ancon, Canal Zone,

Isthmus of Panama.

No communication either for publication or requesting information, will receive attention unless signed with the full name and address of the writer.

NOTES OF PROGRESS.

First Handling of Vessels by Towing Locomotives.

The first use of the electric towing locomotives for handling vessels through the locks, was effected on April 1 at Gatun Locks, when locomotives Nos. 641, 642, 643, and 644 towed the launch *Balboa*, clapet No. 1, and a scow through the west flight from Gatun Lake to the Atlantic entrance channel.

The clapet and the scow were lashed together, alongside, the scow leading by about one-half length, and as they have low freeboards the conditions made about as unfavorable angles for the towing lines as are ever likely to obtain. For precautions in the first use of the locomotives and on account of the doubtful strength of the chocks and cleats on the vessels, all of which are old, four manila towing lines were carried along the lock walls by laborers. The extra lines were not needed, and the lockage, starting at 9.12 a. m., was accomplished in one hour and 17 minutes, which is only two minutes more time than is to be allowed for a passage through Gatun Locks, under the schedule contained in Circular No. 650.

Raft of Piles Towed through the Canal.

The piles unloaded from the steamship *Thor*, which arrived at Balboa on March 22 and discharged its cargo overboard in the entrance channel, opposite the inner harbor, have been towed in a raft through the Canal, as far as Gatun Locks. They were handled through the Pacific entrance channel and Miraflores Locks and Lake on April 8 by the Panama railroad gasoline harbor tug *Naos*. In the lift through Pedro Miguel Lock to Culebra Cut, on April 1, they were towed by the recently installed electric towing locomotives. As the raft was about 800 feet long by 90 feet wide, it was necessary to divide it into several sections for the passage through the 60-foot gap under the steel girder in bridge No. 57½. The *Naos* was used in the work of dividing and assembling. The raft was towed by stages, through the Cut and across Gatun Lake to Gatun Locks, arriving in the

east upper forebay at 11.30 a. m., Wednesday, April 15, in tow of the tug *Chamé*. From the lower end of Gatun Locks the raft will be towed to its destination at Coco Solo Point. The piles, which are creosoted, are to be used in the trestle construction for the east breakwater, protecting the Atlantic entrance and Colon harbor.

Submarines and "Corozal" Removed from Dry Dock in Gatun Locks.

The submarines C-1, C-2, C-3, C-4, and C-5, which were placed in the east chamber of Gatun Locks on March 9 for general cleaning and overhauling, were withdrawn on April 11. They spent two days in maneuvers and tests in Gatun Lake. In company with the tender *Severn*, which had been moored alongside the upper approach wall of the locks and killing its barnacles in the waters of Gatun Lake, they were towed through the locks by the electric towing locomotives during the forenoon of April 15, on their way to Dock 13, Cristobal. The flotilla will leave shortly for Bocas del Toro for target practice.

The ladder dredge *Corozal*, which was placed in dry dock in the chamber with the submarines on March 17, was also withdrawn on April 11. It returned on the following day, under its own steam, to its work in Culebra Cut.

Marine Encampment Consolidated with Bas Obispo.

The buildings of Camp Elliott at Bas Obispo, formerly occupied by the Panama Battalion of the United States Marine Corps, have been turned over to the Supply Department. The battalion sailed for Vera Cruz, Mexico, on January 21, leaving behind the post quartermaster with 27 enlisted men to finish packing the equipment and close the camp. The latter left the Isthmus to join their command on March 27.

Such of the buildings of the camp as are of quality and condition to warrant moving will be torn down and reerected at other Canal villages, principally Ancon. Others will be sold. For the present, the encampment has been consolidated with the Canal buildings in the village, for the purposes of supervision and maintenance. It was originally the purpose to abandon the village entirely at this time, as the employes formerly quartered there were principally those employed at Empire and Las Cascadas and required the operation of labor trains. Recently, however, a number of employes of the Dredging Division have been allowed to occupy quarters at Bas Obispo, with the understanding that any expense for maintaining the quarters in habitable condition should be borne by them, and they were not to be accorded the usual commissary privileges of delivery of supplies, coal, ice, etc. With these provisions the commissary store has been maintained there for their benefit. The post-office was closed

on February 5, since which date all mail for the village goes to the Las Cascadas office, or the recently opened office at Gamboa.

Completing New Trestle South of Miraflores Locks.

The new 600-foot trestle crossing the Rio Grande diversion, which is now the discharge channel for Miraflores Spillway, is practically completed. It was placed in service on the morning of Monday, March 30, the final gap over the old trestle, which was six feet lower than the new, having been completed by rush work over Sunday. The bents of the old trestle are being pulled up by cranes, and the channel is being widened by excavation of the embankments which formed the approaches to the old trestle.

Additional Corozal-Balboa Labor Train.

An additional labor train between Corozal and Balboa was placed in service on April 2, to take care of employes working on the night shift at the shops. It will be operated on the following schedule: Leave Corozal, at 4.30 p.m.; arrive at building No. 4, Balboa shops, at 4.45 p.m.; leave building No. 4, at 1.15 a. m., run to Ancon, and return over Canal tracks to Corozal, arriving there at 1.35 a. m. Since putting this train into service, the employes carried have averaged 42 gold and 92 silver, daily.

Alternating Current Motors for Cargo-Handling Cranes.

For purposes of economy in future operations, the direct current motors on the 20-ton French crane and the five cargo-handling Shaw cranes on the steel pier at Balboa are to be supplanted by alternating current motors. These will conform with the 3-phase, 25-cycle standard set for the Canal equipment, beginning with the steam electric plants at Gatun and Miraflores, and followed by the hydroelectric station and the motors in the locks.

In making these changes, as well as current repairs to the superstructure of the wharf, the Superintendent and Chief Engineer of the Panama railroad, who controls the docks, is bearing in mind the provisions of the circular of November 11, 1913, that all wooden dock structures in the Canal Zone shall be destroyed, or so altered as to be made ratproof, by January 1, 1919. It will probably be practicable to retain this wharf in service after that date; in any event, the cranes could be transferred to any of the new concrete terminal docks.

Interior Decorations at Hotel Washington.

Work on the interior decorations of the Hotel Washington was begun on Friday, April 3, under the direction of Mr. E. H. Henry, superintendent of the firm of Mack, Jenney, and Tyler of New York. The contract was awarded to this firm after a competitive contest, the judges being the Na-

tional Committee of Fine Arts. This committee is composed of Daniel Chester French, Cass Gilbert, John W. Alexander, Frederic Law Olmstead, and Thomas Hastings. The portions of the hotel interior to be decorated are the lobby, the two dining rooms, and the ballroom. The designs follow the general architectural style of the building and are to be executed in "Cool" colors. Twelve decorators have been sent to the Isthmus by the firm, under the direction of Mr. Henry. It is expected that the work will be completed in two and one-half to three months.

Ancon Crusher.

Following is a statement of rock crushed at Ancon quarry during the four weeks ending April 11:

DATE.	Hours worked.	Cubic yards.
March 16.....	8.50	1,593
March 17.....	7.10	2,368
March 18.....	7.20	2,076
March 19.....	8.15	2,102
March 20.....	7.45	2,481
March 21.....	8.45	2,414
Total.....	48.05	13,034
March 23.....	7.55	2,952
March 24.....	8.45	2,317
March 25.....	7.50	2,116
March 26.....	8.00	2,355
March 27.....	8.25	2,512
March 28.....	8.20	2,110
Total.....	49.15	14,362

April 11.....	8.05	2,165
Total.....	39.20	11,372

Drawing on Storage Pile of Crushed Rock.

On account of an increased demand for crushed rock of No. 2 size, especially in the construction of pier No. 1 at the Pacific terminals and in the municipal work for the permanent town of Balboa, steamshovel No. 128 was placed at work on April 8, loading dump cars from the storage pile at Miraflores. The storage pile, which has been built up in the past six months with surplus output, in provision for such a contingency as has arisen, contains now about 15,000 cubic yards of rock. About 800 cubic yards are being taken from it each day to supplement the regular output of the crusher.

Emigration in March.

There was a slight increase in the emigration from the Isthmus during the month of March, as compared with February, the figures of the quarantine service showing that 3,764 persons landed from foreign ports with the intention of remaining, as against 4,161 embarkations, making the net emigration 397. The total net emigration for eight months ending March 31, 1914, was 12,840, the greater part of which consisted of Canal employees.

The total number of steamship passengers embarking from the ports of Colon and Cristobal for foreign ports during March was 3,602, consisting of 1,670 cabin, and 1,932 steerage passengers. The number of persons landing

from foreign ports was 3,108, consisting of 1,318 cabin, and 1,760 steerage passengers. The number of persons who embarked over those who landed at these ports was 494. There were but 57 steerage passengers from all of Europe, 78 from Colombia, 68 from Guatemala, 102 from Costa Rica, and 38 from the United States. Jamaica and the other West India islands, as usual, contributed the larger number of passengers in this class, namely, 1,370. The number of persons arriving at the Atlantic ports "In transit" during March, nearly all tourists, was 3,211, as compared with 4,052 in February.

The number of persons arriving at the ports of Panama and Ancon from foreign ports during March was 656, consisting of 531 cabin, and 125 steerage passengers. The number of persons embarking for foreign ports was 562, consisting of 388 cabin, and 174 steerage passengers. The number of those who landed over those who embarked was 94.

The total number of vessels arriving at Colon during the month of March was 102; at Ancon, 18.

Red Cross Finances.

The financial statement of the Canal Zone Chapter, American National Red Cross, for the month of March is, as follows:

RECEIPTS.	
March 1, Balance on hand, transferred to me by Colonel John L. Phillips.....	\$4,395.29
March 1, Accrued interest.....	8.63
March 4, Collections on account of Red Cross ball.....	3.00
March 5, Return of unused balance of amount appropriated for benefit of stranded American at Colon.....	16.50
March 10, Proceeds of sale of Red Cross seals.....	30.00
March 31, Membership dues.....	4.00
	\$4,457.42
DISBURSEMENTS.	
March 3, Relief of disabled and stranded Jamaican.....	15.00
March 12, Remittance to Treasurer, American National Red Cross, Washington, D. C., one-half of membership dues received.....	25.00
March 14, Percentage of proceeds of sales of Red Cross seals remitted to Secretary, American National Red Cross, Washington, D. C.....	58.49
March 15, Postage, treasurer.....	1.00
March 22, Panama railroad for Red Cross ball badges.....	147.20
March 30, Isthmian Canal Commission, printing.....	2.21
	\$248.90
March 31, Balance on hand.....	\$4,208.52
	T. L. CLEAR,
	Treasurer.
Approved:	
EDW. SCHILDHAUER,	
Chairman.	
A. F. and A. M.	

Funeral services over the remains of the late Theodore A. Buker will be held in St. Luke's Church, Ancon, April 26, at 2 p. m. All Masons attending the services will meet in Ancon lodge hall at 1 p. m. There will be a special car, attached next to the chair car on train No. 5, leaving Colon at 11 a. m., for the accommodation of those who attend the funeral services.

FRANK L. HEALD, W. M.

The Corozal Sunday school teachers' association will meet on Friday, April 17, instead of on Thursday.

SAILING CHART FOR CANAL.

Standard Type of Mariner's Chart Showing All Aids to Navigation.

A sailing chart for the Canal, patterned after the standard form for mariners' charts, similar to those prepared by the United States Coast and Geodetic Survey and the Great Lakes Survey, has recently been completed by the Division of Lighthouses. It is on a scale of one to 40,000, with an inset map of the Culebra Cut section on a scale of one to 20,000. It shows all the aids to navigation and gives the true azimuth and compass bearing of each course through the Canal. At the ends of the Canal, the depths of ocean water adjacent to the approaches are given, in feet. Those shown for the Pacific waters are from soundings taken by the Coast and Geodetic Survey in 1912; for the Atlantic waters, they are from soundings taken by the Coast and Geodetic Survey at various times, and by the former Atlantic Division. Notes on the chart give information concerning the reference planes, depths of water, sailing directions, signs, abbreviations, tides, etc.

With the exception of the soundings, the chart was prepared from various trigonometric surveys made by the Isthmian Canal Commission forces from 1904 to 1914. The original drawings are in two sheets, each measuring 56 by 72 inches. They have been mailed to the United States, where they will be photolithographed for the printing of charts in colors. The printed charts will be in two sections, each 28 by 36 inches. The first section, Chart No. 1, will show the Canal from deep water in Limon Bay to Mile 29, which is approximately opposite the site of the former village of Gorgona. The second section, Chart No. 2, will show the territory from Mile 29 to deep water in Panama Bay. The inset map of Culebra Cut will appear on Chart No. 2.

Steamship "Advance" to Be Converted into Freight Vessel.

The steamship *Advance* of the Panama Railroad Steamship Line, now laid up at New York for repairs to its hull, is to be converted into a freight vessel for carrying explosives. A completely insulated magazine of 300 tons capacity will be installed, at a cost of about \$10,500. The vessel will not carry passengers and will be operated otherwise in accordance with the regulations of the Department of Commerce and Labor with regard to the transportation of explosives. It will be operated on an independent "wild cat" schedule, making such calls as are required by its new service. In addition to its cargoes of explosives, it will carry as ballast on both outward and homeward voyages such freight as will stand the delays incident to its principal service.

Laying of Transisthmian Duct Line Begun.

The first excavation for the laying of the proposed 4-way transisthmian duct line began on Saturday, April 11, at Gamboa. It was intended to begin this work at the beginning of the dry season, but delays in arrival of material have made this the earliest practicable time to begin operations. Some of the tile has been laid and concreted over, and work is to advance north and south from Gamboa.

ALASKA RAILROAD BILL.

Sum of \$35,000,000 Appropriated for Government Development of Territory.

The Act (S. 48) authorizing the President of the United States to locate, construct, and operate railroads in the Territory of Alaska, and for other purposes, was signed by President Wilson on Thursday, March 12. The bill reads, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the President of the United States is hereby empowered, authorized, and directed to adopt and use a name by which to designate the railroad or railroads and properties to be located, owned, acquired, or operated under the authority of this Act; to employ such officers, agents, or agencies, in his discretion, as may be necessary to enable him to carry out the purposes of this Act; to authorize and require such officers, agents, or agencies to perform any or all of the duties imposed upon him by the terms of this Act; to detail and require any officer or officers in the Engineering Corps in the Army or Navy to perform service under this Act; to fix the compensation of all officers, agents, or employees appointed or designated by him; to designate and cause to be located a route or routes for a line or lines of railroad in the Territory of Alaska not to exceed in the aggregate 1,000 miles, to be so located as to connect one or more of the open Pacific Ocean harbors on the southern coast of Alaska with the navigable waters in the interior of Alaska, and with a coal field or fields, so as best to aid in the development of the agricultural and mineral or other resources of Alaska, and the settlement of the public lands therein, and so as to provide transportation of coal for the Army and Navy, transportation of troops, arms, munitions of war, the mails, and for the other governmental and public uses, and for the transportation of passengers and property; to construct and build a railroad or railroads along such route or routes as he may so designate and locate, with the necessary branch lines, feeders, sidings, switches, and spurs; to purchase or otherwise acquire all real and personal property necessary to carry out the purposes of this Act; to exercise the power of eminent domain in acquiring property for such use, which use is hereby declared to be a public use, by condemnation in the courts of Alaska in accordance with the laws now or hereafter in force there; to acquire rights-of-way, terminal grounds, and all other rights; to purchase or otherwise acquire all necessary equipment for the construction and operation of such railroad or railroads; to build or otherwise acquire docks, wharves, terminal facilities, and all structures needed for the equipment and operation of such railroad or railroads; to fix, change, or modify rates for the transportation of passengers and property, which rates shall be equal and uniform, but no free transportation or passes shall be permitted, except that the provisions of the interstate commerce laws relating to the transportation of employees and their families shall be in force as to the lines constructed under this Act; to receive compensation for the transportation of passengers and property, and to perform generally all the usual duties of a common carrier by railroad; to make and establish rules and regulations for the control and operation of said railroad or railroads; in his discretion, to lease the said railroad or rail-

roads, or any portion thereof, including telegraph and telephone lines, after completion under such terms as he may deem proper, but no lease shall be for a longer period than 20 years, or in the event of failure to lease, to operate the same until the further action of Congress: *Provided,* That if said railroad or railroads, including telegraph and telephone lines, are leased under the authority herein given, then and in that event they shall be operated under the jurisdiction and control of the provisions of the interstate commerce laws; to purchase, condemn, or otherwise acquire upon such terms as he may deem proper any other line or lines of railroad in Alaska which may be necessary to complete the construction of the line or lines of railroad designated or located by him: *Provided,* That the price to be paid in case of purchase shall in no case exceed the actual physical value of the railroad; to make contracts or agreements with any railroad or steamship company or vessel owner for joint transportation of passengers or property over the road or roads herein provided for, and such railroad or steamship line or by such vessel, and to make such other contracts as may be necessary to carry out any of the purposes of this Act; to utilize in carrying on the work herein provided for any and all machinery, equipment, instruments, material, and other property of any sort whatsoever used or acquired in connection with the construction of the Panama Canal, so far and as rapidly as the same is no longer needed at Panama, and the Isthmian Canal Commission is hereby authorized to deliver said property to such officers or persons as the President may designate, and to take credit therefor at such percentage of its original cost as the President may approve, but this amount shall not be charged against the fund provided for in this Act.

The authority herein granted shall include the power to construct, maintain, and operate telegraph and telephone lines so far as they may be necessary or convenient in the construction and operation of the railroad or railroads as herein authorized and they shall perform generally all the usual duties of telegraph and telephone lines for hire.

That it is the intent and purpose of Congress through this Act to authorize and empower the President of the United States, and he is hereby fully authorized and empowered, through such officers, agents, or agencies as he may appoint or employ, to do all necessary acts and things in addition to those specially authorized in this Act to enable him to accomplish the purposes and objects of this Act.

The President is hereby authorized to withdraw, locate, and dispose of, under such rules and regulations as he may prescribe, such area or areas of the public domain along the line or lines of such proposed railroad or railroads for townsite purposes as he may from time to time designate.

Terminal and station grounds and rights-of-way through the lands of the United States in the Territory of Alaska are hereby granted for the construction of railroads, telegraph and telephone lines authorized by this Act, and in all patents for lands hereafter taken up, entered or located in the Territory of Alaska there shall be expressed that there is reserved to the United States a right-of-way for the construction of railroads, telegraph and telephone lines to the extent of 100 feet on either side of the center line of any such road

and 25 feet on either side of the center line of any such telegraph or telephone lines, and the President may, in such manner as he deems advisable, make reservation of such lands as are or may be useful for furnishing materials for construction and for stations, terminals, docks, and for such other purposes in connection with the construction and operation of such railroad lines as he may deem necessary and desirable.

Section 2. That the cost of the work authorized by this Act shall not exceed \$35,000,000, and in executing the authority granted by this Act the President shall not expend nor obligate the United States to expend more than the said sum; and there is hereby appropriated, out of any money in the Treasury not otherwise appropriated, the sum of \$1,000,000 to be used for carrying out the provisions of this Act, to continue available until expended.

Section 3. That all moneys derived from the lease, sale, or disposal of any of the public lands, including townsites, in Alaska, or the coal or mineral therein contained, or the timber thereon, and the earnings of said railroad or railroads, together with the earnings of the telegraph and telephone lines constructed under this Act, above maintenance charges and operating expenses, shall be paid into the Treasury of the United States as other miscellaneous receipts are paid, and a separate account thereof shall be kept and annually reported to Congress.

Section 4. That the officers, agents, or agencies placed in charge of the work by the President shall make to the President annually, and at such other periods as may be required by the President or by either House of Congress, full and complete reports of all their acts and doings and of all moneys received and expended in the construction of said work and in the operation of said work or works and in the performance of their duties in connection therewith. The annual reports herein provided for shall be by the President transmitted to Congress.

Approved March 12, 1914.

The provisions of the Act are to be carried out under the direction of the Secretary of the Interior.

PERSONAL.

Mr. Frank Feuille sailed for the United States on Monday, April 13, on special leave of absence.

Mr. Thomas E. Brown, Jr., associate justice of the Supreme Court of the Canal Zone, sailed for the United States on special leave, on April 9. He is due to arrive at Colon, on his return, on April 29.

Mr. Howard T. Critchlow, chief hydrographer in the hydrology and meteorology subdivision, resigned from the service of The Panama Canal, effective April 14, and sailed for the United States the same day.

Mr. C. D. Christie, resident engineer in the employ of the United States Steel Products Company, left for the United States on Tuesday, April 14. During his stay on the Isthmus he has had charge of the contractor's forces in the erection of the emergency dams, the steel framework of the buildings at the Balboa terminals, the framework of the electric substations at Gatun, Cristobal, and Miraflores, and the assembling of the track-span bridges of the 44,000 volt transmission line.

TRAVELING CONCRETE PLANT.

Portable System for Mixing and Placing Concrete in Pier Construction.

A concrete mixing plant with elevator tower and distributing chute is being used for mixing and placing the concrete in the caisson shells and superstructures of the quay wall and pier now under construction at the Balboa terminals. Four units of the type are in use. The system has advantages of convenience, speed, and reduced labor cost.

Each unit consists of a hoisting engine, of approximately 20 horse-power, steam-driven; a $\frac{1}{2}$ -cubic yard portable mixer; an elevator for raising the concrete so that it can be distributed from a hopper by gravity; and a jointed distributing chute, for placing the concrete from the hopper. All of these items are mounted on a single flat car, resting on a 5-foot gage track. The plant is advanced along the track with the progress of the placing. The sand, rock, and cement for the concrete may be handled to the mixer direct from cars coupled to the flat car in the rear, or from stock piles alongside the site of operations. In either case, they are carried to the mixer in wheelbarrows, over suitable staging.

The hoisting engine boiler furnishes steam for the mixer, and, by cables running over

chute. It has a capacity of about one cubic yard.

The distributing chute is of 14-inch steel pipe. It is in two sections of equal length,

TRAVELING CONCRETE MIXING PLANT—FRONT VIEW.
connected by means of a swivel joint. The upper section is known as the swivel arm, and the lower section as the nozzle arm. The upper section is connected with the hopper dis-

with extraneous supports for the nozzle arm, and with the services of laborers in carrying it from point to point.

The system allows the mixing and placing of from 180 to 200 cubic yards of concrete per day from the $\frac{1}{2}$ -yard mixer. The arrangement of the chute allows the placing of concrete all over the semicircle in front of the mixer without the use of men with wheelbarrows, operating on runways laid over the reinforcement. These features are especially desirable in the pier construction, where it is important to complete a section, including a main girder and extending half-way to the girders on either side, in one day, in order that the concrete may harden in a complete unit.

In the new pier No. 1, each section is 29 feet six inches long by 75 feet 11 inches wide, and contains 191 cubic yards of concrete. One mixing unit will complete a section a day; but in case of breakdown, another unit can be withdrawn from caisson work and sent to supplement the placing for the pier. Each outfit is practically as portable as a wrecking crane.

The force for each unit consists of approximately 30 silver employees in charge of a white foreman. Twenty-five men are engaged in wheeling materials from the cars or stock piles and supplying the mixer; one man is in

TRAVELING CONCRETE MIXING PLANT—SIDE VIEW.

sheaves at the top of the elevator tower, raises and lowers the elevator car.

The elevator is a hollow timber framework, $4\frac{1}{2}$ by six feet in plan. In the unit of which the side and front views are shown herewith, the tower rises to a height of 41 feet three inches above the deck line; in this type, the distributing chute is 52 feet long, with a distributing radius of 48 feet. In two other units of similar general design, the chute is longer, having a distributing radius of 78 feet. The elevation of the tower is determined by the requirements of distributing the concrete by gravity. In each case, the tower is braced by timber outriggers.

The elevator car is the body of an ordinary $\frac{1}{2}$ -yard Decauville dump car, mounted on trunnions. At an elevation determined by the length of the chute, it dumps automatically into a hopper which rests on a projection on the front side of the elevator shaft. The hopper is six by six feet in plan at its top, converging into juncture with the distributing

charge by a swivel joint, and can swing to either side to a position at right angles with the axis of the flat car. The nozzle arm, swinging under the upper section, can describe a circle, the center of which is the joint between the two sections. This combination of motions allows the mouth of the chute to be placed over any point in the semicircle described by swinging the chute with both sections extended in the same plane.

The method of supporting the chute is of especial interest. Both sections of the chute are supported by means of a pivoted lattice-work boom, projecting outward and upward from the front of the base of the elevator tower. The timbers of the boom pass on both sides of the upper section of the chute, allowing its support to be effected by the cross pieces. In addition, the boom passes far enough beyond the upper section to allow vertical guys to be attached to the intermediate joint, and slanting guys to be extended to the end of the nozzle arm. This does away

with the support of the chute by means of extraneous supports for the nozzle arm, and with the services of laborers in carrying it from point to point.

This system is a development, for the local conditions, of the system used for the manufacture of the concrete caisson shells at Balboa, described in THE CANAL RECORD of February 19, 1913. Both systems were originated by Mr. J. A. Walker, the superintendent in charge of the construction of the Balboa terminals.

The forces of the shops and dry dock at Mount Hope have completed repairs to the tug *Rey del Rio*, which is operated at Bocas del Toro by a subsidiary corporation of the United Fruit Company. The repairs consisted principally of remedying a bent propeller shaft and a broken wheel, and required two days' work.

HYDRAULIC GRADER.

For Sluicing Slides and Sloping Banks of Culebra Cut.

The General Purchasing Officer has been instructed to purchase in the open market boilers, pumps, and other specified machinery for the conversion of the hull of a vessel, now in the Canal dredging service, into a hydraulic grader. The hull of dredge No. 3, a nonpropelling iron vessel, equipped at either end with a stiff-legged derrick for the operation of orangepeel or clamshell buckets, will be used for mounting the new equipment. The equipment will be purchased according to specifications furnished by the Mississippi River Commission, and will be practically the same as that in use on two new graders, No. 1011 and No. 1012, placed in service during the past year in the Memphis district. The river commission has been requested to forward the foundation plans, in order that the hulls in which the equipment is to be mounted may be prepared in advance.

The grader will be simply an arrangement of high pressure boilers and pumps to pump water from alongside the vessels, and deliver it at high pressure to pipeline, or hose, for sluicing material down from the banks of the Canal. Essentially the same kind of work is being done now at Cucaracha slide by pipeline suction dredge No. 82, pumping to monitors, but the dredge pumps give a discharge pressure of from 45 to 50 pounds at the pumps, in contrast with which, the grader will deliver at a pressure of from 225 to 235 pounds to the square inch. Discharging through a 3-inch hose at an elevation of 50 feet above the water line, it will sluice down approximately 3,000 cubic yards in a working day of eight hours. It will be able to work at levels considerably above the 50-foot elevation, though with diminishing effectiveness. The high pressure will give the stream a sharp cutting power, which will be effective in grading the banks to an even slope.

The grader will be used principally in sluicing at Cucaracha slide, and in grading the banks on both sides of the Canal between Gold Hill and Empire.

The principal items for the equipment of the grader will conform, in general, to the following specifications:

Boilers—The set will consist of two horizontal boilers of 125 horsepower, with at least 1,250 square feet of heating surface, with the furnace not less than 45 inches in diameter, and flues not less than 3½ inches in diameter, made to withstand a working pressure of 200 pounds to the square inch. The boilers will be tested hydraulically to a pressure of 300 pounds to the square inch before acceptance. The two boilers will be erected side by side and connected with a suitable circulating pipe below the water level.

Pumping equipment—The vessel will be equipped with two steam turbines, direct-connected to centrifugal pumps. The duty required of each will be the discharge of 1,500 gallons of water per minute against a pump pressure of 225 pounds to the square inch, from a suction lift of eight feet. The turbines are to make not more than 2,000 revolutions per minute. Each pump will be of the horizontal, four or more stage, turbine type, and will be furnished with independent suction and discharge pipe. The equipment will be designed with reference to the sand and dirt

likely to be encountered in the water which it will handle.

A surface condenser, with at least 600 square feet of cooling surface, will be furnished with each turbine set.

Electric plant—A steam turbine of sufficient capacity to drive, direct-connected, a generator of 7½ kilowatts capacity, will be furnished. The generator will deliver current at 110 volts.

The total weight of the machinery to be installed is about 60 tons.

No Plague on Board the "Aysen."

An examination of a reported case of bubonic plague on board the steamship *Aysen*, held in quarantine at the Culebra Island station, was conducted on April 10 by Dr. Samuel T. Darling, chief of Ancon Hospital laboratory and member of the board for the diagnosis of infectious diseases, with negative results. The Chief Health Officer and the Chief Quarantine Officer were present during the examination. Bacteriological examinations of material obtained at the time of examination were also negative for plague.

Operations at Frijoles Plantation.

Authority has been given for the purchase of a pulverizer, at a cost of \$650, f. o. b. at Chicago for use in pulverizing limestone to be spread on the cleared tracts of the Frijoles Plantation, which is being operated by the Supply Department. In addition to the areas in whole or part cultivation at the time the plantation was taken over by the Subsistence Department, in August, 1913, approximately 50 acres of new land have been cleared. It has been decided not to clear any more at present, but to proceed with the liming of the areas ready for cultivation. The limestone will be recovered from a bed near milepost No 24 on the Panama railroad, about a mile north of Radio Station. This is one of the deposits recommended by Mr. A. B. Nichols in a report submitted in January. The pulverizing will be done at Frijoles, at a central location for distribution to the soil.

Up to March 1, 1914, the expenditures on the plantation exceeded the receipts by \$2,369.22. The charges of operation have included an overhead general office and plant charge amounting to \$585.37, and in view of the potentially productive operations which have been carried on, the superintendent of the plantation believes that adequate returns may soon be realized. At the time the tract was acquired the planted areas were much overgrown: these and 50 acres of new land have been cleared, 1,500 alligator pear seedlings have been raised, 300 budded orange and grapefruit trees and 3,500 plants of unbudded nursery stock have been purchased, and the number of pineapples has been increased by about 250. At the present time, the banana fields are in good shape and a crop of cane is ready for harvesting.

Liming the soil is expected to begin shortly after the beginning of the rainy season. The pulverizer will be used to prepare lime for the Corozal Farm, as well as the Frijoles Plantation.

Obituary.

Mr. Harry Gray, an employe in the Dredging Division, died at Ancon Hospital on April 8. He was 52 years of age, had lived on the Isthmus four years, and is survived by his wife, living in Colon. His body was buried in Mount Hope cemetery.

CHURCH WORK CONTINUES.

On Independent Basis Since Reorganization.—Church Notes.

The established church work in the Canal Zone has not suffered by the reorganization that has been taking place in the Canal forces. The newly formed Union Church of the Canal Zone is winning members among those who are adherents of the nonsectarian idea as being the practical solution of the question of religious activity in the Canal Zone. Newly organized Sunday schools are increasing in membership and organizations are being developed for work among the young people and children of the church. The present transition period has served to place the religious activities of the Canal Zone people on a permanent and independent basis; independent, that is, of the financial support of the government of The Panama Canal.

The churches in the Canal Zone were filled to the doors at the services on Easter Sunday. Beginning with the celebration of the holy communion, in the Episcopal and Roman Catholic churches at 5.30 a. m., the Easter bells were rung at intervals from the various churches until the beginning of the latest service at 11 o'clock. Special music was rendered at all the services; Easter offerings were made and the Easter message was preached. The churches were decorated with white flowers, ferns, and palms.

The next meeting of the Woman's Altar Guild of St. Luke's Hospital chapel, Ancon, will be held at the home of Mrs. Charles F. Mason on Tuesday morning, April 21, at 9.30 a. m. The guild will continue its work for the church orphanage in South Carolina for a number of weeks longer. Meetings will be held semimonthly, instead of weekly, as during Lent. The hour and nature of these meetings will be announced later.

The April meeting of the woman's foreign missionary society of the Methodist Episcopal Church was held in Corozal on Saturday, April 4, the society being entertained by Mrs. Hackenberg and Mrs. Bray. There was a full attendance. On Saturday, May 2, the meeting will be in Balboa, at the residence of Mrs. James Stokoe.

A special song service has been planned for the Christian Endeavor meeting at Corozal, Sunday, April 19, at 7.30 p. m. The subject for discussion will be, "The consecration of time."

Final Volume of Supreme Court Decisions.

The publication of a second volume of decisions of the Supreme Court of the Canal Zone has been authorized. The first volume, published in 1909, contains opinions or abstracts of decisions in 81 cases, and is a book of 153 pages. Since its publication, from 65 to 70 opinions have been handed down and it is probable that there will be 10 or 12 more before the final adjournment of the Supreme Court, which is now engaged in clearing its docket, in accordance with Section 13 of Executive Order No. 1898.

Cards of Authorization to Buy Coupon Books.

As the result of attempts by white ex-employees to purchase commissary and hotel books on presentation of the metal checks which they were allowed to retain on termination of their services with the Canal Commission, or the Panama railroad, cards of identification have

been issued to employees, to be presented in lieu of metal checks.

This form of abuse was not anticipated when the privilege of retaining checks was granted to gold employees, in October, 1912, as the cash sale of commissary and hotel books was authorized at a later date. The great number of checks in circulation, with the possibility of other abuse and misrepresentation, renders impracticable the issuing of bulletins by which cash sale clerks might keep themselves advised of the validity of checks. The clerks have been authorized to confiscate checks presented by exemployees.

Order of Isthmian Conductors.

The next regular meeting of the Order of Isthmian Conductors will be held in Ancon lodge hall, on Sunday morning, April 19, at 9.30 o'clock.

GEO. B. ALLEN,

Secretary-Treasurer.

COROZAL, C. Z., April 13, 1914.

Ancon Club to Shoot in Championship Pistol Matches.

The Ancon Pistol and Rifle Club will compete in the indoor championship matches of the United States Revolver Association, which will be shot simultaneously, in the period from April 18 to April 26, by various clubs throughout the United States and its possessions, affiliated with the association. The matches will be shot at night, and the Mechanical Division has been authorized to install the requisite electric wiring and lights at the range of the local club, at Balboa, at the expense of the organization.

Lowering Water in Miraflores Lake.

The surface of Miraflores Lake is being lowered approximately 10 feet, after which it will be raised by water let in from Culebra Cut, through Pedro Miguel Lock, in order to allow the making of certain tests. The lowering began on April 3, when the surface was at 50.1 feet above sealevel, and is being accomplished by means of lockages through the west flight of Miraflores Locks. Eleven lockages made on April 11 lowered the surface 1.8 feet. On the morning of April 13, the surface was at elevation 45.0 feet. The surface will be lowered to 42 feet, and possibly to 40, depending on the effect of the decreased head of water on the pump intake at the temporary pumping station north of Miraflores tunnel.

Postal Savings Transactions.

A statement of postal savings transactions at Canal Zone post-offices for the month of March, follows:

OFFICE.	Amount issued.	Amount paid.
Ancon.....	\$16,846.00	\$18,329.00
Balboa.....	24,532.00	27,526.00
Corozal.....	25,724.00	27,866.00
Cristobal.....	17,123.00	16,630.00
Culebra.....	9,029.00	7,266.00
Empire.....	18,471.00	10,927.00
Gatun.....	10,339.00	12,099.00
Las Cascadas.....	2,110.00	1,909.00
Paraiso.....	12,877.00	13,420.00
Pedro Miguel.....	8,233.00	5,290.00
Cristobal, Sta. "A".....	500.00	795.00
Cristobal, Sta. "B".....	1,672.00	1,427.00
Total.....	\$147,456.00	\$143,484.00
Balance on hand March 1, 1914.....	\$595,776.00	
Deposited during month.....	147,456.00	
Withdrawn during month.....		\$143,484.00

CANAL CLUBHOUSES.

Activities of the Young Men's Christian Association.

GENERAL.

Moving picture dates for the week of April 20 to 25 are, as follows: Monday, Pedro Miguel; Tuesday, Cristobal and Balboa; Wednesday, Corozal; Thursday, Gatun; Friday, Culebra; Saturday, Empire.

The following is the standing of the all-Isthmian duckpin league, up to and including games of April 11, 1913:

Cristobal.....	24	15	9625
Empire.....	27	15	12555
Corozal.....	27	14	13518
Pedro Miguel.....	24	12	12500
Culebra.....	27	12	15444
Gatun.....	21	7	14333

High single game—Davis, Corozal, 135.

High three games—Davis, Corozal, 320.

Individual standings for those over 90 pins per game were, as follows:

Name.	Team.	G'ms.	Total.	Avg.
Sims.....	Empire.....	21	2,037	97.00
Davis.....	Corozal.....	26	2,500	96.04
King.....	Empire.....	21	2,009	95.14
Parkis.....	Corozal.....	27	2,565	95.00
Webb.....	Corozal.....	1	95	95.00
Smith.....	Cristobal.....	21	1,986	94.12
Bullard.....	Cristobal.....	3	284	94.02
Claherty.....	Gatun.....	15	1,409	93.14
Davis.....	Pedro Miguel.....	6	562	93.04
Walsh.....	Gatun.....	13	1,211	93.02
Potter.....	Empire.....	21	1,948	92.16
Dougherty.....	Pedro Miguel.....	15	1,387	92.02
Gustaveson.....	Empire.....	21	1,938	92.06
Barrett.....	Empire.....	21	1,934	92.02
Kiernan.....	Culebra.....	22	2,018	91.16
Chadbourne.....	Culebra.....	12	1,098	91.06
Krommiller.....	Culebra.....	5	459	91.04
Barte.....	Cristobal.....	20	1,822	91.02

BALBOA.

The regular moving picture show will be held on Tuesday night, April 21. Mr. C. G. Fagard of Panama will furnish music during the evening.

Easter service was held at the Y. M. C. A. hall on Sunday morning, April 12, the Rev. A. P. Funkhouser conducting the service.

A new talking machine has been purchased for the clubhouse to replace the old one, which was badly in need of repairs. The new records for April have been received.

A fountain pen was found on the writing table last week, and an umbrella was left at the refreshment room. These articles may be secured by the owners by application to the secretary.

A movement has been started to hold "Mothers' day" in Balboa the second Sunday in May.

Wednesday afternoon of each week will be ladies' day at the local clubhouse. All the ladies of Ancon and Balboa are invited to use the privileges of the Y. M. C. A. on that day.

COROZAL.

The regular motion picture show was held Monday night, April 13. An extra picture show will be given on Thursday night, April 16, with the "Passion play."

The high scores in tenpins for the past week were made by A. Sims, 213, 203, and Thurst, 237, 212.

An open double duckpin tournament, held on Friday, April 10, resulted, as follows: Parkis and A. Sims 620; Davis and Boesen, 564; high score by Parkis, 112.

Mr. Ralph Regan having resigned his position with The Panama Canal, his place as manager of the bowling alleys will be taken by Mr. C. E. Davis.

Fifty-seven new books have been added to the library.

PEDRO MIGUEL.

On Tuesday evening, April 7, the Pedro Miguel duckpin team defeated the Empire team in three games. The scores were, as follows:

Empire.	Pedro Miguel.
Barrett.....	91 79 102
King.....	97 97 99
Sims.....	84 90 89
Potter.....	92 84 84
Gustaveson.....	93 100 88
Dougherty.....	92 86 102

Totals.... 457 450 462

The Pedro Miguel chess club meets every Tuesday evening. All members interested in this game are invited to meet with the club and to help further the interest in chess.

The gymnasium floor has been painted recently in preparation for a number of the indoor games, such as basketball, volleyball, handball, and baseball. With the floor in good condition now for any of these games, it is hoped that those who are interested will join a class which will have two evenings each week for recreation games. Teams from other clubhouses will be secured for competitive games if enough men will join this class.

On Wednesday evening, April 22, a "Shipored" social will be held at the clubhouse for the members and their friends. All adults are invited to be present to enjoy the fun and the games. Games similar to those played on board a ship will be indulged in. The men should be attired in white duck trousers and without coats. The ladies will wear sailor blouses.

The children of the Pedro Miguel Sunday school gave a pleasing Easter program on Easter Sunday, which was enjoyed by all who attended.

CULEBRA.

On Saturday night, April 11, the Cristobal bowling team took two out of three games from the local team, with the following scores:

Cristobal.	Culebra.
Pinney.....	87 91 93
Schied.....	85 89 97
Farr.....	85 91 94
Barte.....	82 92 89
Smith.....	78 86 95
Koperski.....	90 98 68
Kiernan.....	82 91 90
Barnes.....	85 85 83
DeCora.....	105 86 94
Case.....	105 87 101

Totals.... 417 449 468

High scores for the week were, as follows: Ellsworth, 102; Kiernan, 109; Koperski, 101; Case, 107.

At the regular service on Sunday evening, colored slides of "Majestic Niagara" were shown. Mr. J. F. Warner read the accompanying lecture.

The date of the next moving picture show has been changed to Friday, April 17.

EMPIRE.

On Tuesday evening, April 7, Mr. W. W. Warwick spoke on the accounting of the Treasury Department. About 100 men attended.

Arrangements are being made to celebrate the closing up of the work at Empire on April 23 and 24. On April 23, a "Smoker" will be given to the men of Empire, and those who have recently moved to other points are invited to attend. On April 24, a special program and reception will be given to the people of Empire, and all friends of the Empire clubhouse are invited. Arrangements are being made for a special train to run from Panama and return on that evening. Mr. W. W. Warwick will be the speaker of the evening. A reception and refreshments will follow the program. Music will be furnished by the Tenth Infantry Band.

GATUN.

The boys of the Cristobal Y. M. C. A., in company with their physical director, Mr. Brittin, were guests of the Gatun Y. M. C. A. on Tuesday, April 7. The morning was spent in athletics and the afternoon in a baseball game. The boys spent a very enjoyable day. In the athletic contests, Cristobal scored 39 points, and Gatun, 25; the baseball score was 10 to 8, in favor of Cristobal.

Robert Pearson, general agent of the Southern Settlement and Development Organization, gave a lecture at the clubhouse on Tuesday evening, April 14, under the auspices of the Colonization Club of the Canal Zone.

Gatun won two out of three games of duckpins from Empire on Saturday, April 11. The results were, as follows:

Gatun.	Empire.
Dumville.....	85 81 98
Walsh.....	67 85 100
Conley.....	81 97 86
Richrson.....	78 89 75
Claherty.....	97 92 89
Barrett.....	82 82 81
King.....	94 88 84
Sims.....	117 95 81
Potter.....	80 82 87
Gustaveson.....	106 94 103

Totals.... 408 444 448

An unusually large number of out-of-town people were visitors at the Gatun clubhouse on Easter Sunday.

CRISTOBAL.

The C. A. club defeated the C. T. club in a dual athletic meet; score 67-72. The new intercollegiate system of scoring was used and proved very satisfactory. In this system the first five contestants to finish receive credit points. S. McKeown, competing unattached, lead all contestants, making 18 points. Messrs. Wehmeier and Hagan are the winners of the handball tournament, having ten victories and two defeats.

The present standing of the boys' athletic teams is:

	Won.	Lost.	P.C.
Team No. 1.....	2	1	.666
Team No. 2.....	1	1	.500
Team No. 3.....	0	2	.000

Plans are being arranged to hold a circus about the middle of May. Approximately 130 persons will participate in the various acts.

Pedro Miguel will bowl at Cristobal on Saturday night, April 18, in the all-Isthmian duckpin tournament. This series of games will practically decide the standing of the teams in the league for this year. At the present time, Cristobal is in the lead.

Mr. A. R. Lang, superintendent of schools of the Canal Zone, will address the discussion club on Thursday night, April 30, on "The present trend toward vocational schools."

OFFICIAL CIRCULARS.

Wage Scales.

THE PANAMA CANAL,
OFFICE OF THE GOVERNOR,
CULEBRA, C. Z., April 8, 1914.

CIRCULAR No. 669:

1. The Urgent Deficiency Act, approved April 6, 1914, provides:

Section 53. The wage scale of the persons employed in the construction of the Panama Canal in effect prior to April first, nineteen hundred, and fourteen, shall continue unchanged during the period of actual construction, but not later than June thirtieth, nineteen hundred and sixteen, and no claim of any person employed in connection with the construction of the Panama Canal shall be recognized or paid by the United States for longevity service or lay-over days accruing subsequently to June thirtieth, nineteen hundred and nine.

2. The effect of the first part of the section quoted is that no change will be made in schedules of wages now being paid, except as certain parts of the organization are placed on a permanent basis from time to time, or as other parts develop in connection with the operation and maintenance of the Canal, as, for instance, the forces to be organized to operate the locks and to conduct vessels through the Canal. The entire force as organized on April 1 will meanwhile be considered a construction force, and the wage scales of such classes of construction men as railroad transportation employees, steamshovel men, track men, skilled mechanics, etc., will not be changed until the period of construction is ended; this period not to extend in any case beyond June 30, 1916.

3. The effect of the second part of the section quoted is to affirm the stand heretofore taken by Congress on the question of longevity and lay-over days; it does not change the percentage of longevity paid to employees now in the service, nor does it allow longevity pay to any class of employees who have not received it heretofore. Longevity will not be paid to employees in organizations declared on a permanent basis and it will cease for all classes after June 30, 1916.

GEO. W. GOETHALS,
Governor.

Special Attorney and Attorney for the Panama Railroad Company.

THE PANAMA CANAL,
OFFICE OF THE GOVERNOR,
CULEBRA, C. Z., April 1, 1914.

CIRCULAR No. 661-3:

1. Judge Frank Feuille is appointed special attorney, reporting to the Governor. He will perform the same duties in connection with the handling of land matters heretofore performed by him as Head of the Department of Law, and will, in addition, be charged with the codification of the various laws, Executive Orders, and ordinances in effect for the Canal Zone. This appointment is effective April 1, 1914.

2. Mr. Chas. R. Williams is appointed attorney for the Panama Railroad Company, on the Isthmus, reporting to the President of the Company. He will represent the company before the courts of the Isthmus and will assist the special attorney in land and such other matters as the President may direct. This appointment is effective April 1, 1914.

GEO. W. GOETHALS,
Governor, The Panama Canal,
President, Panama Railroad Company.

Chief Clerk, Executive Office.

THE PANAMA CANAL,
OFFICE OF THE GOVERNOR,
CULEBRA, C. Z., April 1, 1914.

CIRCULAR No. 661-2.

Effective April 1, 1914, Mr. W. P. Copeland is appointed chief clerk, Executive Office, Culebra.

GEO. W. GOETHALS,
Governor.

Examinations by Board of Local Inspectors.

THE PANAMA CANAL,
BOARD OF LOCAL INSPECTORS,
ANCON, C. Z., April 11, 1914.

The Board of Local Inspectors will conduct examinations at the Administration Building, Ancon, on Wednesday, April 22, 1914, beginning promptly at 2 p. m., for persons desiring the following classes of licenses: Pilots, masters, mates, marine engineers, chauffeurs, and navigators of motor boats. Applicants for licenses must procure from the office of the board, Ancon, forms of application and information respecting the filling out of the same, not later than the day previous to the examination. In addition, all persons desiring chauffeurs' licenses must provide themselves with automobiles with which to demonstrate their ability properly to operate the same.

NOTE—The demonstration test for applicants for

chauffeurs' licenses will be given on Tuesday, the day preceding the regular examination, at 2 p. m., at the Administration Building, Ancon; on Wednesday, the day of the regular examination, for out-of-town applicants, at 2 p. m., at the Administration Building, Ancon. No demonstration tests will be given at Cristobal, except by appointment.

HUGH RODMAN,
Chairman, Board of Local Inspectors.

PANAMA RAILROAD COMPANY,
OFFICE OF SUPERINTENDENT AND CHIEF ENGINEER,
COLON, R. P., April 11, 1914.

CIRCULAR No. 420:

Heads of departments—For your information, the following cablegram received from our New York office:

"Steamship *Ancon* sails April 20, in place of steamship *Advance*. Steamship *Advance* sails April 27, in place of *Panama*."

"Following departures during May: Steamship *Alliance* 2nd, *Panama* 9th, *Advance* 16th, *Colon* 22nd, *Alliance* 28th. Will send print schedules on *Ancon*."

F. MEARS,
Superintendent and Chief Engineer.

Panama Railroad Company's steamers sail from Piers 8, 9, and 11, Cristobal, at 3 p. m.

Royal Mail steamers leave for New York on alternate Tuesdays at 2 p. m.; for Southampton, on alternate Tuesdays at 10 a. m.

United Fruit Company's ships for New Orleans direct, leave on Thursdays at 3 p. m., for New Orleans via Bocas del Toro and Havana, on Thursdays at 4 p. m.; ships for New York, via Kingston, on Thursdays, at 2 p. m.; for New York, via Limon and Havana, on Sundays at 5 p. m.; for Limon and Bocas del Toro on Saturdays at 4 p. m.; for Bocas del Toro direct, on Thursdays at 4 p. m.; and for Boston, via Port Antonio, on Sundays at 3 p. m.

The Hamburg-American steamers *Prinz Eitel Friedrich* and *Prinz Sigismund* sail for New York, via Kingston and Fortune Island, on Mondays at 10 a. m.; the *Prinz August Wilhelm* and *Prinz Joachim* sail for New York, via Kingston, Santiago de Cuba, and Fortune Island, on Tuesdays at 10 a. m.

The Canal Record

Official publication of The Panama Canal.

The Canal Record is published weekly free of charge, one copy each, to all employees of The Panama Canal and Panama Railroad Company whose names are on the gold roll. Extra copies and back numbers can be obtained from the news stands of the Panama Railroad Company for five cents each.

Address all Communications,

THE CANAL RECORD,

Ancon, Canal Zone,

Isthmus of Panama.

No communication either for publication or requesting information, will receive attention unless signed with the full name and address of the writer.

NOTES OF PROGRESS.

Considering Bids on New Tugs.

Bids for two and for four tugs, for use in handling and docking vessels at the entrances to the Canal, were opened by the General Purchasing Officer, in Washington, on March 23. They were forwarded to the Isthmus for consideration by the local officials. A committee consisting of Capt. Hugh Rodman, Superintendent of Canal Transportation, chairman, Mr. W. G. Comber, resident engineer in charge of the Dredging Division, and Naval Constructor C. W. Fisher, superintendent of erection, has been appointed by the Governor to consider the bids and make recommendations. The committee held its first meeting at the office of its chairman in Ancon, on Thursday, April 16.

Ancon-Panama High Service Reservoir Completed.

Concrete work on the new high service reservoir for the water systems of Ancon and Panama, situated on Ancon Hill, was completed on Monday, April 20. One-third of the reservoir has been in service for about two months and the remainder will be used immediately. The completed reservoir has a capacity of 2,500,000 gallons, including the 1,000,000-gallon capacity of the former concrete reservoir, adjacent to the new construction. The entire reservoir has been covered with a 5-inch reinforced concrete slab roof to protect the water from the sun, the rays of which might otherwise cause the growth of objectionable algae and bacteria in the filtered water.

Recent Changes in Automatic Signals.

Automatic signals between Caimito and Pedro Miguel, were placed in service on April 13.

The existing signals between old Tower "R" and Pedro Miguel have been rearranged on account of the removal of tracks at Tower "R" and Canal Siding, and the elimination of the interlocking plants at Tower "R" and Obispo. Three signals south of New Culebra were relocated on account of virtual interference

from the track-span bridges. Twelve new signals were erected between Caimito and the south end of the Chagres River bridge. The entire territory between Caimito and Pedro Miguel now contains 29 automatic signals.

This addition gives continuous automatic signal protection from Colon to Pedro Miguel, a distance of 40.25 miles. There are now 106 power-operated arms in service, consisting of 12 power train order signals, 10 power-operated home signals, and 84 automatic block signals.

Work is now in progress to supersede the staff system at the Miraflores tunnel with automatic signal protection and later to fill in the gap between that point and Pedro Miguel. The automatic signals will then be extended to the north end of the new Balboa yard.

Completion of Municipal Work at Pedro Miguel.

The municipal work authorized to date for the proposed permanent town of Pedro Miguel is practically completed. The street work in the town proper, including the laying of water mains, and sanitary and storm sewers, and the construction of roadways, with curbs and gutters, has been finished. All of the houses in the village have been connected to the new water and sewer systems, and a number of lateral pipes have been laid in provision for future construction. The municipal grading, for drainage, will soon be finished. Grading of the areas devoted to playgrounds will be done separately, after the plots have been definitely located. The forces of the Division of Municipal Engineering are now building a road to the incinerator, which is outside the village limits beyond the hill on which the Canal clubhouse is situated, on the eastern limit of the village.

Curundú Culvert Completed.

The reinforced concrete culvert, 307½ feet long by 25 feet wide, for passing the waters of the Curundú River under the proposed main line of the Panama railroad, leading to Balboa, and numerous tracks of the terminal yards, was completed on April 11, and the river was turned from its temporary diversion channel through the culvert on April 14. The dumping of backfill and support for proposed tracks was begun at the same time, from a trestle directly south of the culvert. Tidal gates of 4-inch timber have been installed at the west, or sea, end of the culvert to prevent tidal inundation of swamps east of the tracks. The position and construction of the culvert were described in THE CANAL RECORD of March 4, 1914.

Fourth Division Steamshovel Operations in March.

During the month of March, the total amount of material excavated by the Fourth Division in Culebra Cut and in the Miraflores Spillway discharge channel was 147,998 cubic yards. All of this amount was primary

excavation for the Canal; 45,130 cubic yards were classified as earth excavation, and 102,863 cubic yards as rock excavation. In addition thereto, the Fourth Division excavated at Cocoli Hill 19,520 cubic yards, at Diablo Hill 8,360 cubic yards, and at Pedro Miguel borrow pit 4,480 cubic yards, for backfilling and sanitary fills.

All of the yardage handled by this division was excavated by steamshovels.

Office at Filtration Plant Destroyed by Fire.

The field office of the Division of Municipal Engineering at the site of the filtration plant, under construction near Miraflores Spillway, was destroyed by fire between 4 and 5 o'clock in the morning of Wednesday, April 15. The building, made with corrugated iron walls and roof, was of no great value, and the blueprints for the work at the filtration plant and the pumping station east of the Panama railroad are being replaced by new prints made from the tracings which are stored in a fireproof vault in the head offices of the division, at Gatun; the most serious loss occurred in the destruction of transits, levels, rods, and drafting instruments, and books belonging to the engineers.

Canal Excavation in March.

The grand total of Canal excavation to April 1, 1914, was 219,618,104 cubic yards, leaving 12,734,986 cubic yards remaining to be excavated under the revised estimate of July 1, 1913.

The total excavation for the month of March was 1,226,644 cubic yards, as compared with 1,430,050 cubic yards for February. The wet excavation amounted to 964,055 cubic yards, and the dry excavation to 262,589 cubic yards.

In the Atlantic section, the total excavation for March was 284,634 cubic yards, all by dredges. Of this amount, 259,615 cubic yards were removed from the Atlantic entrance by the suction dredges *Caribbean* and *Culebra*, and 25,019 cubic yards were taken out at the coaling basin.

Of the 617,887 cubic yards excavated in the Central section, comprising Culebra Cut and the Chagres territory, all but 118,278 cubic yards consisted of material removed by the dredges or hydraulic monitors. The dry excavation consisted of material taken out by Fourth Division steamshovels on the west bank of Culebra Cut, south of Culebra village, in relieving the pressure as a preventive against slides. Work was resumed there on April 1, immediately after the closing down of the shovels on the opposite bank, north of Gold Hill. Of the wet excavation, 364,139 cubic yards were removed by dredges from Culebra Cut, including Cucaracha slide, and 135,470 cubic yards were sluiced from the sides of Gold Hill, and at Cucaracha slide.

In the territory of the old Pacific Division, operations by dredges resulted in the re-

moval of 166,092 cubic yards from the inner harbor, and 13,720 cubic yards from the Pacific entrance. Dry excavation in this section amounted to 144,311 cubic yards, of which 114,591 cubic yards were excavated at the terminal site.

A total of 1,279 cubic yards of concrete was placed in the locks, in connection with the installation of machinery.

A detailed statement of excavation, and a summary of the work on the locks and dams, follow:

Mean rainfall along Canal (nine stations), 0.26 inches.

By "Work" excavation is meant excavation actually made for one of the constituent parts of the Canal, such as prism, diversions, locks, etc.; that is, it represents material taken from the area to be occupied by the Canal and constitutes excavation useful for the completed Canal.

By "Plant" excavation is meant excavation outside any of the constituent parts of the Canal, such as prism, diversions, locks, etc. It includes material necessary to be excavated for construction purposes only, and is chargeable against the particular plant item for which it is performed, such as prism, diversions, locks, etc.

ESTATES BEING SETTLED.

Claims and Information Should be Directed to Administrator of Estates.

Estates of the following deceased or insane employees of The Panama Canal or Panama Railroad Company are now in process of settlement by the office of the Administrator of Estates. Any claims against these estates or any information which might lead to the location of heirs, or to the recovery of property, bank deposits, postal savings or postal

money order deposits, or any other moneys due them, should be presented at the office of John K. Baxter, Administrator of Estates, Ancon, C. Z., at once in order that the estate may be settled as soon as possible.

All claims should be itemized, sworn to before a notary public, or other public officer having a seal, and submitted in duplicate. These names will be published but once, but notices of other estates in settlement in the future will be published in THE CANAL RECORD.

Assignments in Wrecking Service.

A committee consisting of Mr. H. H. Rousseau, chairman, Mr. D. C. Nutting, Lieut. F. Mears, and Mr. W. J. Holmes, appointed on April 1, by the Governor, to consider and report on the assignment of wrecking equipment so as best to serve the interests of the Government, has recommended that no changes be made, at this time, in the present assignments. Its report has been approved. One wrecking outfit, using the 100-ton crane No.

32, in charge of the Mechanical Division and stationed ordinarily at Paraiso in the day time, is capable of taking care of all the wrecking work. This crane ties up at night at Empire, principally because most of its crew is quartered there; later, it will probably tie up at Balboa shops. The Mechanical Division has also the 75-ton wrecking crane No. 64 in use at the Mount Hope dry dock shops; while available, it is practically never required for wrecking service.

WOMAN'S CLUB ACTIVITIES.

Seventh Annual Meeting of the Cristobal Woman's Club—General Notes.

The seventh annual meeting of the Cristobal Woman's Club was held in the clubhouse on Wednesday afternoon, April 15. At the close of this meeting, the club adjourned for the season, to reconvene on the first Wednesday in October, 1914. The present officers will hold over until the adjourned session, when new officers will be selected and plans for the year will be made. The meeting on Wednesday took the form of a farewell reception for the president, Mrs. Thomas Edwin Brown, Jr., who expects to leave the Isthmus in a short time. Mrs. Mears, the first vice-president, delivered an address of farewell on behalf of the club, and Mrs. Charles A. Hearne presented the president with a large bouquet of red roses and carnations, in the name of her associates and fellow clubwomen. Special refreshments were served by the social committee. Mrs. Brown has been actively associated with the Cristobal Woman's Club since November, 1908. She was chairman of the philanthropy department in 1908-1909, and president of the club in 1909-1910, and again president in 1913-1914. In 1909-1911, she was president of the Canal Zone Federation of Women's Clubs.

The year of the Cristobal club just closed has been one of the most pleasant and successful years of its activity. Realizing that the membership would be decreasing as the personnel of the Canal force changed, the executive board, at its first meeting, decided to do away with the departments in the club organization and have the meetings open to all the members. The program arranged for each month followed one general subject; at the first meeting, an address was delivered, and at the second meeting the club followed up the same subject, or related topics, with short papers and discussion. The subjects taken up have been, as follows: The newspaper of today, speaker, Mr. Richard Lee Metcalfe; higher education for women, speaker, Miss Mary E. Woolley, president of Mount Holyoke College; eugenics, speaker, Dr. M. E. Connor; popular military education, speaker, Maj. Charles Gerhardt; the Government of the United States, speaker, Justice Thomas E. Brown, Jr.; woman suffrage, socialism, and political parties, speakers, Miss J. M. Beattie and club members.

On April 1, the club gave an informal musical, the program of vocal solos, duets, and trios being rendered by the members of the Cecilian Trio, Mrs. Williamson, Mrs. Diers, and Mrs. Mears, with Mrs. Ullrich as pianist and director. Mrs. Hearne gave a recitation.

The club has expended \$80 on philanthropic work during the year; a part of this money was given to the Salvation Army, a donation was made to the colored Sunday schools in Colon and Cristobal, the Christmas box to the leper asylum received a gift, and a sum of money was voted to the relief of a destitute family in Colon. At its last meeting, the club voted \$15 to the endowment fund of the General Federation of Women's Clubs.

Obituary.

Helen Spamer, a niece of Mr. J. F. Kelly, living at Ancon, died at Ancon Hospital on Thursday, April 16. She was 13 years old, and had been on the Isthmus three and a half years.

Missing Man.

Any one having information regarding the

present whereabouts of Mr. Bert H. Gier, who was formerly on the Isthmus and has not been heard from since September 21, 1913, is requested to communicate with his wife, Mrs. B. H. Gier, 1219 South Erie Street, Massillon, Ohio.

Ancon Study Club.

Meetings of the Ancon Study Club will be held at the Hotel Tivoli on the second and fourth Thursday afternoons in each month, until further notice. The hour of meeting has been changed to 3 o'clock.

Cristobal Club Dance.

The Cristobal Dance Club will hold its "May dance" on Saturday, April 25. It will be a shirt waist dance.

W. H. MARSH, *Secretary*.

Changes at Cristobal Retail Commissary.

The following changes are being made at the Cristobal retail commissary stores, and in future this commissary will be operated on practically the same basis as all line commissaries:

Effective April 21, there will be one delivery of groceries and cold storage daily, the cold storage delivery starting at 6.30 a. m., and the grocery delivery at 9.30 a. m. Beginning April 20, solicitors will call at all Panama Canal married quarters in Colon and Cristobal and take orders for groceries and cold storage to be delivered the next morning.

Solicitors will collect coupons at time of taking orders, provided that until April 30 they will also accept orders to apply on deposits in the commissary cashier's office. The commissary cashier will accept no Cristobal-Colon deposits after April 25, and will close out all Cristobal-Colon deposit accounts on April 30.

No standing bread orders from residents of Cristobal-Colon will be accepted by the commissary cashier after April 30. All such present standing orders will be cancelled on that date, and beginning May 1, bread will be ordered daily with groceries.

Ice notices will be sent to all Cristobal-Colon customers. Payments may be made to solicitors, at the retail stores, or to the commissary cashier.

The women's department and the retail boot and shoe department will remain open during the same hours as rest of the retail stores, effective April 20.

Order of Telegraphers.

There will be a regular meeting of Panama Railroad Division, No. 158, Order of Railroad Telegraphers, in the circuit court room at Cristobal, at 8 p. m., Saturday, April 25.

J. F. STAHL,

Secretary-Treasurer.

Masonic Records will be distributed, as follows:

Cristobal, Sunday, April 26, at the Y. M. C. A., from 9.45 a. m. to 10.30 a. m.; Gatun Sunday, April 26, at the Y. M. C. A., from 1 p. m. to 4.30 p. m.; Pedro Miguel, Monday, April 27, at the Y. M. C. A., from 8 p. m. to 10.30 p. m.; Corozal, Tuesday, April 28, at the Y. M. C. A., from 8 p. m. to 10.30 p. m.; Ancon, Saturday, May 2, at lodge hall (council), 8.15 p. m., to 10 p. m.; Balboa, every working day, at Y. M. C. A., from 11.30 a. m. to 12.30 p. m.; Culebra, Wednesday, April 29, at Y. M. C. A., from 7.45 p. m. to 10 p. m.

J. L. CALDWELL,

Secretary-Treasurer.

TO REBUILD ANCON HOSPITAL.

Committee Appointed to Consider Best Way of Placing Hospital on Permanent Basis.

A committee consisting of Capt. R. E. Wood, Chief Quartermaster, chairman, Dr. A. B. Herrick, acting superintendent of Ancon Hospital, and Mr. Samuel Hitt, Canal architect, has been appointed to submit recommendations regarding the most practicable plan for reconstructing Ancon Hospital on a permanent basis.

In appointing the committee, the Governor submitted for its consideration a letter from the Chief Health Officer, in which the latter set forth that many of the buildings in present use are in bad condition, needing constant and expensive repairs, and offered the following suggestions: That a general plan should be drawn up for constructing the entire hospital in concrete buildings, with tile roofs and floors; that the pavilion system, on which the present hospital was laid out, is desirable, but for purposes of economy in construction and administration, the ward buildings should be of two stories; that an effort should be made to concentrate all the administrative features of the hospital in one building, and to place the commissary, and medical and quartermaster's storerooms together; that the Tivoli dispensary should be consolidated with the outpatient department of the hospital; that the two existing steam plants in the hospital should be consolidated, if practicable; and that space for 800 beds should be provided, exclusive of those for the insane, with a minimum allowance of 100 square feet of floor space for each bed.

Reduced Rate to New York Direct.

The General Agent of the United Fruit Company advises that Panama Canal and Panama Railroad Company employes will be charged a reduced rate of \$48.75 from Colon to New York, on steamers sailing direct every Wednesday. This rate does not include meals. The agent states that it costs passengers on an average of \$2 to \$3 per day for their meals under the *à la carte* system.

Public School Athletic League.

A meeting was held at the Pedro Miguel clubhouse on Saturday, April 18, which was attended by those in charge of the physical work of the various clubhouses and a representative of the Division of Schools. It was decided that the schools and the Y. M. C. A. would cooperate in forming a public school athletic league of the Canal Zone, this league to be governed by a board of directors which would consist of the principal or representative teacher from each school, the superintendent and assistant superintendent of schools, physical directors of the Y. M. C. A's, and the superintendent of clubhouses. There will be a local association in each town which will be directly concerned with the organization of the work in that town. The object of the association will be to advance and direct clean athletics among the pupils of the public schools. There will be an executive committee and a committee on games. It is planned to hold an athletic meet to be participated in by the members of this league in the latter part of the month of June.

Personal.

Lieut. F. Mears sails for the United States on his annual leave, on the *Calamares*, sailing for New York on Wednesday, April 22.

BENDING RAILS AND RODS.

Devices in Use in Preparing Reinforcements for Concrete at Balboa.

A device for the quick and economical bending or breaking of railway rails has been designed and assembled at the Balboa terminals. It is in use at Balboa in the preparation of old rails for reinforcement in the concrete construction of the proposed dry dock No. 1.

The plan and end elevation of the apparatus are shown in the accompanying sketches. It consists of a base or table of trapezoidal shape, with a depth of five feet and with its greatest base six feet four inches long, on which is mounted the mechanism for bending or breaking the rail. The base is of $\frac{3}{4}$ -inch steel plate,

the rail stops on the sides of the table. It thus attains the maximum leverage for bending.

The strain thus set up is sufficient to bend the rail to a considerable curvature. In addition, when the rail is under the strain of pressure, it may be broken by a sharp blow from a sledgehammer, applied opposite the point of the wedge-shaped block.

The cylinder is supplied with compressed air, at the regular working pressure. Its operations are controlled by a $\frac{1}{2}$ -inch 3-way valve. In order to afford relief of pressure and avoid blowing the cylinder head off if the operator should neglect the proper manipulation of the controlling valve, a row of $3/16$ -inch holes has been drilled in the cylinder at a

"cold cut" method, of striking repeated sledge-hammer blows on a chisel or pointed hammer held against the side of the rail.

A substitute for the forge and anvil for the bending of steel rods to be used as reinforcement for concrete, also has been placed in use at Balboa, in connection with the construction of the quay wall and pier of the permanent terminals.

It is similar in principle and general form to the apparatus for bending rails. The rods are bent by the thrust of the piston rod of an engine cylinder, while they are held on place on a table in front of the cylinder. The table is a steel plate, bored with number of holes in which movable steel pegs, or studs, are set according to the point and degree of bending desired.

Two such equipments are in use. One uses a single cylinder, 10 inches in diameter, which was recovered from an old French locomotive. This outfit places a single crimp in the $\frac{3}{4}$ -inch rods which are used in the lengthwise beams of the construction, and the cylinder has sufficient power to bend three or four of the rods at the same time. The second equipment employs two 14-inch cylinders, taken from the dumping mechanism of a 2-cubic yard concrete mixer, which are mounted on opposite sides of the table. These make, at one placing on the table, opposite bends in the larger rods which are used in the main girders. They bend, without difficulty, rods as large as $1\frac{1}{4}$ inches in diameter. All the cylinders are operated by compressed air, under pressure of about 80 pounds to the square inch.

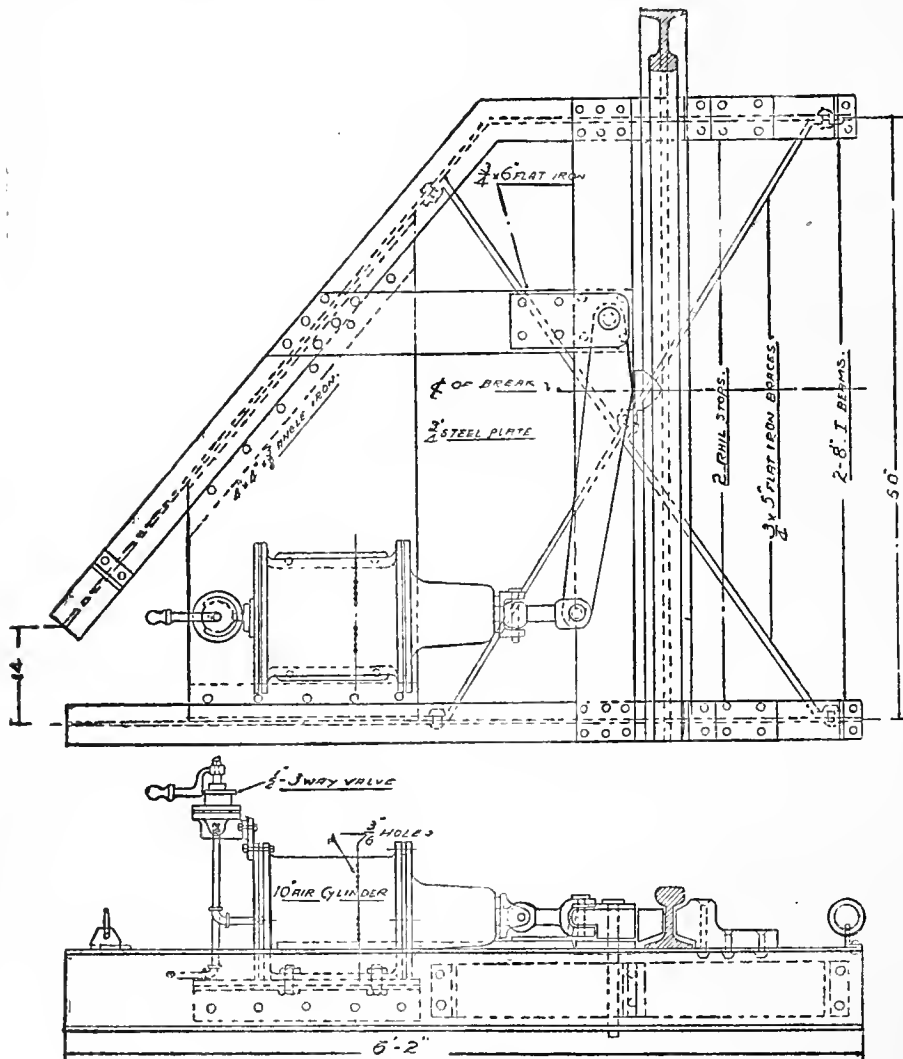

By the use of these equipments, five men are able to bend in an hour as many rods as they could bend in an 8-hour day by the former process of heating them in forges and bending over anvils. As the quay wall and pier require a total of approximately 4,000,000 pounds of bent rods in their reinforcement, the saving in time and money by the use of these equipments is considerable. The cold-bending process, instead of lessening the strength of the steel, is believed to conserve it.

Attendance at Canal Zone Schools.

The Canal Zone public schools were reopened after the Easter holidays of one week on Monday, April 13, with a total attendance of the first day, for both white and colored schools, of 1,360; this number includes the 54 pupils in the high schools at Ancon and Gatun. There were 35 teachers in the white grade schools and seven in the high schools. The number of grade schools for white children is 10; the total attendance on the opening day of school was 863. The largest of these schools is at Ancon, where there were 191 pupils in attendance; the next largest is at Cristobal, where 189 pupils reported, and the third is at Empire, with an attendance of 154. The smallest school is at Porto Bello, where eight children were present on the first day.

The total attendance for the day in the eight colored schools was 497. The largest of these schools is at Cristobal, where there were present 161 pupils on the opening day of school.

The average daily attendance in the white schools for March was 710.7. The average daily attendance in both white and colored schools for March was 1,667.

PLAN AND ELEVATION OF RAIL-BENDING DEVICE.

set on 8-inch 1-beams and braced beneath by plates of steel, $\frac{3}{4}$ -inch thick by five inches wide. Heavy studs, or rail stops, are set at each end of the base to hold the rail in place, while the pressure is applied.

The pressure is supplied by a 10-inch air cylinder, with a 10-inch stroke, mounted in one corner of the table. The piston of the cylinder is jointed to a heavy iron bar, two feet four inches long, the other end of which is set in a stationary pivot alongside the rail. Near this fulcrum is attached to the bar a wedge-shaped block of steel which fits between flanges of the rail. The forward stroke of the cylinder thrusts the wedge-shaped block against the web of the rail, midway between

point about two-thirds of the distance of the forward stroke.

The outfit weighs about 650 pounds, and is portable. It may be used in railroad construction, for the bending of rails, by connecting the cylinder to the air brake system of a locomotive or train. The cut made when a rail is broken, however, is not clean enough to allow pieces to be joined up properly, in laying track, without finishing them off with a cold chisel.

The system has been very satisfactory in operation at Balboa. A gang using it can bend rails much faster than by any other simple field process, and can break rails a great deal more rapidly than by using the familiar

CANAL MEDAL LIST.

Below are lists of employees of the Isthmian Canal Commission who are entitled to received a Canal medal or a service bar. The date shown opposite each name is that from which medal or bar service is computed.

There are four lists. Those who have served continuously from 1911 to 1913 are entitled to medals. Those who have completed two periods of two years each of continuous service are entitled to a first bar. Those who have completed three periods of two years each of continuous service are entitled to a second bar. Those who have completed four periods of two years each of continuous service are entitled to a third bar.

There are also four lists for employees of the Panama Railroad Company, arranged in the manner above indicated.

The lists are now published in order that they may be carefully checked by those interested. Any omissions, errors in spelling of names, or in the dates from which service is reckoned should be promptly reported to the office of the Executive Secretary, Culebra.

Heads of divisions are requested to check carefully their lists of American silver employees and report any omissions on the medal or bar lists.

As soon as the lists are revised, consecutive numbers will be assigned, according to dates of service, employees who entered the service on the same date having their names arranged according to alphabetical order of surnames.

The lists will then be forwarded to the Washington Office of The Panama Canal, where arrangements will be made for the proper engraving.

Distribution of the medals and bars will be made about October of this year, and ex-employees will receive their medals or bars from the Washington Office.

OFFICIAL CIRCULARS.

Hospital Farm at Corozal.

THE PANAMA CANAL,
OFFICE OF THE GOVERNOR,
CULEBRA, C. Z., April 1, 1914.

CIRCULAR No. 625:

CONDITIONS OF EMPLOYMENT.

- The rates of pay for hourly men will be 3, 5, 7, and 10 cents gold per hour, and for monthly men (foremen, clerks, etc.) \$15, \$20, and \$25 gold per month.
- Eight hours will constitute a day's labor.
- The 3, 5, and 7-cent rates only will be paid to colored laborers and the 5, 7, and 10-cent rates to European laborers.
- Employees will be furnished bachelor quarters, subsistence similar to that now furnished at kitchens and messes of the Supply Department, necessary laundry work, and plain work clothes.
- All laborers must work at least two weeks at the lowest rate—3-cent and 5-cent for colored and European laborers, respectively—and until they show that they can earn a higher rate, before receiving higher pay.
- Men having families dependent upon them and living with them at the farm will be allowed commutation of subsistence at the rate of 27 cents a day for colored men and 40 cents a day for white men for each day they are on duty or sick with a doctor's certificate covering, and shall be allowed the same commutation for Sundays and holidays, provided they shall have

worked the day preceding and the day following such Sundays and holidays, or provided absence on those days was due to their illness.

7. Employees of the farm may purchase products of the farm for use of themselves and families at wholesale market prices.

8. Married quarters, when available, will be furnished in cases found to be most deserving after investigation by the farm advisory board.

9. Leave of absence without pay for any length of time may be granted by the superintendent of the farm, upon approval by the Governor.

10. Employees will be free to come and go as they please outside of regular working hours.

11. Employees will be subject to the orders of the superintendent. They must perform the tasks allotted to them, and on failure to do so, will be subject to discipline. When, in the opinion of the advisory board, such action becomes necessary, employees will be deported to their native countries, and will thereafter not be entitled to further assistance by the Government in any form.

12. Only men permanently disabled in line of duty with the Isthmian Canal Commission, Panama Railroad Company, Panama Canal, or in service connected with the construction of the Canal will be employed, except such supervisory force as may be necessary.

13. To receive employment, application must be made to the Governor of The Panama Canal on form provided for that purpose. When the application is approved, the applicant will be given employment.

DUTIES OF THE SUPERINTENDENT.

14. He will plan the work and general layout of the farm, subject to the approval of the Chief Health Officer and the Governor.

15. He will superintend the execution of all farm projects and the sale of products.

16. The government and assignment of duty of all employees, under such rules as may be approved by the Governor, will be in his hands.

17. The physician in charge of the insane will look after the health of the farm employees and will cooperate with the superintendent in the administration of the farm, should any question of jurisdiction arise.

18. The superintendent will grade and classify the laborers according to their various classes of employment and earning power.

FARM ADVISORY BOARD.

19. There shall be an advisory board, appointed by the Governor, to consist of three members, one from the Health Department, one from the Accounting Department, and one from the Governor's office.

GEO. W. GOETHALS,
Governor.

Santo Tomas Hospital.

THE PANAMA CANAL,
OFFICE OF THE GOVERNOR,
CULEBRA, C. Z., April 1, 1914.

CIRCULAR No. 623:

1. Santo Tomas Hospital in the city of Panama is maintained for the purpose of treating persons in the

Republic of Panama who are not entitled to treatment in the hospitals of The Panama Canal. Persons in the city of Colon sent to Santo Tomas Hospital will be carried in the hospital car, upon presentation of proper authority, and the nurse in charge of the hospital car is instructed to accept such cases and to notify Santo Tomas Hospital that they are coming, prior to leaving Colon.

2. The alcalde of the city of Colon, the superintendent of Colon Hospital, and district physicians in The Panama Canal service, are proper officials to sign requests for treatment of patients in Santo Tomas Hospital.

3. Patients discharged from Santo Tomas Hospital, who must use the railroad in order to reach their destinations, will be provided with transportation by the superintendent of Santo Tomas Hospital, in order that they may be carried in the hospital car.

4. The part of the personnel of Santo Tomas Hospital which The Panama Canal will furnish is, as follows:

	Per annum
One superintendent.....	\$3,600
Two physicians.....each..	1,800
One chief nurse.....	1,500
Two nurses.....each..	720

GEO. W. GOETHALS,
Governor.

Reports of Absences.

THE PANAMA CANAL,
OFFICE OF THE GOVERNOR,
CULEBRA, C. Z., April 1, 1914.

CIRCULAR No. 602-1:

1. Effective immediately, all absences from work of employees for whatever reason must be covered either by:

- (a) An excuse card (Form No. PC 464), or,
- (b) Report of absence (Form No. PC 465).

2. Excuse cards will be issued to employees prior to absence to cover a leave of not less than one-half day or more than five days, either with or without pay, and upon return to duty must be handed to the timekeeper immediately. The timekeeper will forward the same to the time office with the time book.

3. In case of absence without permission, or on account of illness, or suspension, or return from leave authorized on regular leave order, a report of absence (Form No. PC 465) must be made out, "OK'd" by the proper official, and handed to the timekeeper immediately upon employee's return to work. In case of illness or injury, the doctor's certificate must be attached to this report.

4. These two forms constitute the basis for the leave records of employees and the authority to pay for leave, and failure to comply with this order will not be countenanced. Timekeepers must require an "excuse card" or a "report of absence" to cover every absence from work.

5. A dozen books of each form are sent to the head of each department and division herewith. Additional books may be requisitioned from Mount Hope.

GEO. W. GOETHALS,
Governor.

Commutation of Accrued Leave.

THE PANAMA CANAL,
OFFICE OF THE GOVERNOR,
CULEBRA, C. Z., April 9, 1914.

CIRCULAR No. 602-3:

1. Employees granted leave without pay to be spent in the tropics will not be paid the amounts due them for accrued leave earned prior to April 1, 1914, until the general payment of commutation of accrued leave is made, on or about July 1.

GEO. W. GOETHALS,
Governor.

Freight or Express Shipments to Employees.

THE PANAMA CANAL,
OFFICE OF THE GOVERNOR,
CULEBRA, C. Z., April 1, 1914.

CIRCULAR No. 612:

PANAMA RAILROAD LINE.

1. An employee of The Panama Canal on the Isthmus, who desires to have goods or merchandise intended for his personal use forwarded to him by the Panama steamship and railroad lines at the special reduced freight rate allowed employees, must send his request for such forwarding, in sextuplicate, on the form provided for that purpose, through the head of the bureau or division in which he is employed, to the office of the Executive Secretary. Further instructions are found on the form provided for such requests.

OTHER LINES.

2. Approved requests for entry free of duty, of employees' shipments coming to the Isthmus via other than the Panama Railroad Steamship Line, or by express, will be returned to the employees submitting the requests, who must present the approved request to the agent of the steamship line or express company. If the shipment

is destined for any station on the Panama railroad beyond the port of entry, the consignee must arrange for its forwarding. Employees may obtain the reduced freight rate over the Panama railroad by application to the office of the Executive Secretary.

3. Shipments for which formal requests for free admission have not been made, may be left in the hands of the transportation company until a request is approved by the Panama Government; but if the duty is paid, either by the employee or the transportation company, the Panama Government will not be asked to make a refund, unless it can be clearly shown that the payment of the duty was made without the authority of the employee, and that failure to forward request prior to arrival of shipment was due to circumstances beyond his control.

GEO. W. GOETHALS,
Governor.

Parcels Post Packages.

THE PANAMA CANAL,
OFFICE OF THE GOVERNOR,
CULEBRA, C. Z., April 1, 1914.

CIRCULAR No. 613:

1. Parcels post packages containing articles for the exclusive use of an employee of The Panama Canal or of a contractor for The Panama Canal, or the family of such an employee, will be admitted free of duty.

2. Duty will not be remitted on articles imported for sale, or on tobacco in any form, spirituous liquors, or playing cards.

3. When the declared value of the contents of a package does not exceed three dollars United States currency, the package will be released by postmasters without the submission of a special form request.

4. To procure release from duty of packages whose declared value is greater than three dollars, the employee must submit a request in duplicate to the head of his department on the form provided for that purpose. The head of the department will certify the forms and send them to the office of the Executive Secretary for approval. The approved original will be sent to the employee making the request, who will present it to the postmaster.

5. Sealed packages on which a customs declaration has not been made by the sender will not be exempted under the provisions of paragraph 3. In such cases, the form must be submitted, and postmasters may require the addressee to open sealed packages before delivery to see that the declaration made on the form is a correct description of the contents.

GEO. W. GOETHALS,
Governor.

Official Records.

THE PANAMA CANAL,
OFFICE OF THE GOVERNOR,
CULEBRA, C. Z., April 1, 1914.

CIRCULAR No. 615:

1. All official records must be carefully preserved and no records shall be disposed of without authority of the Governor.

REMOVAL OR DESTRUCTION.

2. Sections 5403 and 5408 of the Revised Statutes prescribe penalties for the fraudulent or wrongful destruction, withdrawal, or removal from any public office, of any public record, paper, or document therein deposited.

3. When records become obsolete or useless, and have no permanent or historical value, they shall be listed on a form provided therefor and submitted to the Governor, who will authorize disposition thereof upon receipt of a recommendation from the committee on the destruction of records, appointed in accordance with Section 5 of the Sundry Civil Act, approved August 24, 1912.

GIVING OUT INFORMATION.

4. Information obtained by employees in the course of office routine must not be discussed outside of the office, and employees will not handle or peruse official records which have not been referred to them in the course of business. Section 5498 of the Revised Statutes prescribes penalties for employees who aid or assist in the support of claims against the United States, other than in the discharge of official duties.

GEO. W. GOETHALS,
Governor.

Special Train Service.

THE PANAMA CANAL,
OFFICE OF THE GOVERNOR,
CULEBRA, C. Z., April 1, 1914.

CIRCULAR No. 609:

1. With the approval of the Governor, special train service on the Panama railroad will be furnished employees at reduced rates, which will be quoted on application to the Superintendent of the railroad.

2. No special trains of Panama Canal equipment will be operated on the main line of the Panama railroad.

3. Requests for special train service should be made direct to the Governor, giving full details regarding the

nature of the trip, number of passengers, points between which it is desired to travel, and starting and returning time. Only employees and their families will be allowed to ride on special trains authorized at employees' rates, and no transportation will be collected on such trains.

GEO. W. GOETHALS,
Governor.

Sick Leave for Periods of Less than Half a Day.

THE PANAMA CANAL,
OFFICE OF THE GOVERNOR,
CULEBRA, C. Z., April 8, 1914.

CIRCULAR No. 602-2:

1. In case of disability on account of injury or illness covering only part of a half-day working period, no charge shall be made against annual leave, but the time shall be allowed as gratuity time and charged into the work upon which the employee is engaged.

2. In these cases, request for medical treatment shall be made on the usual form and a notation will be made on the reverse of the request form by the physician, showing time under treatment. The employee will turn this form in when he returns to work. The employee will be allowed the time necessary for treatment, as determined by the physician, and time necessary to go to and return from the dispensary.

GEO. W. GOETHALS,
Governor.

Leprosy.

THE PANAMA CANAL,
OFFICE OF THE GOVERNOR,
CULEBRA, C. Z., April 1, 1914.

CIRCULAR No. 621:

1. All cases of leprosy occurring in the cities of Colon and Panama, and the Canal Zone, in which the bacteriological examination is positive for bacillus leproe, shall be sent to the leper asylum for detention.

2. Cases of leprosy from the cities of Colon and Panama and other parts of the Republic of Panama shall be admitted to the leper asylum upon the written request of the alcalde of the city, or the governor of the province, that such cases be admitted and maintained at the expense of the Republic of Panama. The charge for such maintenance shall be 75 cents per day.

GEO. W. GOETHALS,
Governor.

Binders for Circulars.

THE PANAMA CANAL,
OFFICE OF THE GOVERNOR,
CULEBRA, C. Z., April 17, 1914.

HEADS OF DEPARTMENTS AND DIVISIONS:

The official circulars now being issued are largely a codification of decisions reached under the Isthmian Canal Commission's administration. They are to form the basis of rules for the guidance of administrative officers and employees, and as occasion arises additions will be made to them by the issue of supplementary circulars.

In order that they may be available at all times and in convenient places, it is proposed to furnish loose-leaf binders in which they may be kept, and a printed index with blank spaces for such additions as may be necessary as new circulars are issued. The number of these binders will be limited. Heads of departments and divisions are requested to notify this office at once as to the number they will require to supply their main and field offices.

GEO. W. GOETHALS,
Governor.

Accountable Officials.

THE PANAMA CANAL,
OFFICE OF THE AUDITOR,
EMPIRE, C. Z., April 7, 1914.

CIRCULAR No. 56:

Effective April 1, 1914, the following are designated as the accountable officials of The Panama Canal:

Mr. D. C. Nutting, Jr., Superintendent, Mechanical Division.
Capt. W. H. Rose, Electrical Engineer, Electrical Division.
Lieut. Geo. R. Goethals, Assistant Engineer, Fortifications Division.
Mr. W. G. Comber, Resident Engineer, Dredging Division.
Mr. W. F. Beyer, Assistant Engineer, Division of Light-house Construction.
Capt. F. O. Whitlock, Assistant Chief Quartermaster, Supply Department.
Lieut.-Col. Chas. F. Mason, Chief Health Officer.
Mr. C. A. McIlvaine, Executive Secretary.
Lieut. F. Mears, Superintendent and Chief Engineer, Panama Railroad Company.
Mr. George M. Wells, Resident Engineer, Division of Municipal Engineering.
Mr. E. E. Lee, Superintendent of Erection.

Mr. Frank Holmes, Resident Engineer, Supply Department.
 Mr. J. A. Walker, Superintendent, Balboa Terminals, Division of Terminal Construction.
 Mr. W. J. Holmes, Superintendent of Transportation, Division of Terminal Construction.
 Mr. Geo. A. Greenslade, General Superintendent.
 Mr. C. H. Mann, Depot Quartermaster, Supply Department.
 Mr. R. K. Morris, Assistant to the Chief Quartermaster, Supply Department.
 Mr. B. C. Poole, District Quartermaster.
 Mr. J. T. Smith, District Quartermaster.
 Mr. H. F. Sedwick, District Quartermaster.
 Mr. J. H. Humphrey, District Quartermaster.
 Mr. Harry Dundas, District Quartermaster.
 Mr. J. J. Fitzpatrick, District Quartermaster.
 Mr. R. R. Watson, District Quartermaster.

H. A. A. SMITH,
 Auditor of The Panama Canal.
 Approved: GEO. W. GOETHALS,
 Governor.

Acting Freight and Passenger Agent, P. R. R.
 PANAMA RAILROAD COMPANY,
 OFFICE OF SUPERINTENDENT AND CHIEF ENGINEER,
 COLON, R. P., April 15, 1914.

CIRCULAR No. 423:

All concerned—During the absence of Mr. J. C. Angel, freight and passenger agent, on leave, Mr. J. M. Beale is appointed acting freight and passenger agent, effective Tuesday, April 14, 1914.

F. MEARS,
 Superintendent and Chief Engineer.
 Approved: GEO. W. GOETHALS,
 President.

Organization for Supply Department.

THE PANAMA CANAL,
 OFFICE OF THE CHIEF QUARTERMASTER,
 CULEBRA, C. Z., April 7, 1914.

All concerned—The following organization is outlined for the Supply Department, effective April 13, 1914:

Capt. F. O. Whitlock, Assistant Chief Quartermaster, headquarters at Cristobal, will act as purchasing commissary.

The depot commissary at Cristobal, the local commissary buyer at Panama, and the inspector of hotels and messes will report direct to the Assistant Chief Quartermaster.

Mr. Benj. L. Jacobson is appointed depot commissary. The superintendents of manufacturing units, and storekeepers in charge of wholesale departments will report direct to him. He will control the maintenance of stock for the retail commissaries, hotels, and messes. All requisitions for commissary supplies will be made on the depot commissary.

Retail storekeepers and stewards of hotels and messes will report to the district quartermaster of the district in which they are located. This will not apply to retail storekeepers at Balboa, La Boca, Cristobal, and Camp Bied, who will report direct to the Chief Quartermaster, and to the managers of Hotels Washington, Tivoli, and Aspinwall, who will report direct to the Assistant Chief Quartermaster.

Mr. D. W. MacCormack will act as inspector of retail commissaries, with headquarters in the office of the Chief Quartermaster at Culebra. All complaints and matters of a general nature, pertaining to the business of the retail commissaries, will be forwarded to the Chief Quartermaster.

The property and personnel divisions of the former Commissary-Subsistence office will be transferred to the office of the Chief Quartermaster, at Culebra.

District Quartermasters will submit, on or before April 10, a statement showing the present forces within their districts segregated under the headings of quartermaster, subsistence, and commissary, and the proposed consolidated force for this work. The proposed consolidation will be the basis of the allotment to be in force until June 30, 1914.

The depot commissary, the retail storekeepers at Balboa, La Boca, Cristobal, and Camp Bied, and the managers of the Hotels Washington, Tivoli, and Aspinwall will prepare similar statements.

R. E. WOOD,
 Chief Quartermaster.

Will of William Telfer.

FIRST JUDICIAL COURT,
 ANCON, C. Z., April 20, 1914.

Notice is hereby given that the will of William Telfer, who died in this circuit on the 16th day of November, 1913, has been presented by the Administrator of Estates for probate in the Circuit Court of the Circuit aforesaid, and the Court has appointed the 9th day of May, 1914, at 9 o'clock a. m., in the court house at Ancon for all to appear and contest the allowance of said will.

E. M. GOOLSBY,
 Clerk of said Court.

CANAL CLUBHOUSES.

Activities of the Young Men's Christian Association.

GENERAL.

The moving picture schedule for the week of April 27 to May 2 is, as follows: Monday, Cristobal; Tuesday, Empire; Wednesday, Gatun; Thursday, Porto Bello and Corozal; Friday, Culebra; Saturday, Pedro Miguel.

Miss Gay Zenola MacLaren will sail from the United States about April 17, for her fourth tour of the Canal Zone clubhouses. She will give imitative recitals of well known plays. On her last trip to the Isthmus, in December, 1912, and January, 1913, she appeared 29 times. Among the plays she will present this season will be "The auctioneer," "Peg o' my heart" and "The misleading lady."

The standing of the teams in the all-Isthmian duckpin tournament on April 19 was, as follows:

	Won	Lost	P. C.
Cristobal.....	17	10	.630
Empire.....	15	12	.555
Corozal.....	14	13	.518
Culebra.....	15	15	.500
Pedro Miguel.....	13	14	.481
Gatun.....	7	17	.292

BALBOA.

A special fire stairway has been ordered for the hall on the second floor, and moving picture exhibitions will be cancelled, pending the construction of same. It is expected that this stairway will be completed during the next few days.

J. W. Sandrock will be on duty in the barber shop on Tuesdays, Thursdays, and Saturdays until such time as arrangements can be made for him to spend all of his time at Balboa.

A new talking machine has been installed for the benefit of the members.

A minstrel show is being organized by some of the young people of Balboa. All those who are interested are requested to see the secretary.

COROZAL.

The tournament to decide the championship of the Corozal chess club has been won by Mr. F. V. Fields, who lost only two out of 16 games played. The results of the match played recently with Pedro Miguel are, as follows:

Corozal	Won	Pedro Miguel	Won
Wilson.....	1	Capwell.....	1
Moorehead.....	2	Schutt.....	0
Nagle.....	2	Schropshire.....	0
Mills.....	2	Cassell.....	0
Fields.....	1	Wilson.....	0

Totals..... 8 1

The high scores in bowling for the week ending April 18 were, as follows: *Teupins*—Thirsk, 200, 234; Parkis, 213, 215; Denst, 211. *Duckpins*—McDonald, 107; King, C. Sims, Garrett, Ruggles, and Kiley, 101 each. *Baltimore duckpins*—Sims, 156.

Four teams of indoor baseball were organized the past week in the local league. Each team will play the others two games, two games being played each week in the league. The regular team will play Cristobal on Saturday, April 25.

PEDRO MIGUEL.

At a meeting of the local executive council of the Y. M. C. A., Dr. Gibson was elected chairman of the council. The other members are Messrs. Dougherty and Bartholomew of Pedro Miguel and Messrs. MacFarland and Pickett of Paraíso. The purpose of the council is to advise in matters relative to conducting the work of the clubhouse. All suggestions as to the betterment of conditions may be brought before this council for consideration.

A smoker will be held for the men on Tuesday evening, April 28. The program will consist of solos, gymnastic stunts, magic tricks, etc., with a good feed during the intermission. All the men in Paraíso and Pedro Miguel are invited to attend. This will be the first "smoker" given in the Pedro Miguel clubhouse.

A May party will be given for the amusement of the children on May 1. The party will last from 5 to 7 p. m. There will be a number of games for the children to play, and a lunch served to them at the close of the entertainment. All children from Paraíso and Pedro Miguel are invited to attend and have a good time together.

Some of the gymnasium equipment from Empire has been transferred to Pedro Miguel, thus making our equipment more complete. If any of the men are interested in gymnastics or gymnastic games, they may have a special night each week for such work by arranging with the secretary for a class.

The boys have started a ragtime duckpin tournament with 15 boys entered.

The last of the five lectures on first aid to the injured by Dr. Gibson, was given on Friday evening. These lectures dealt with anatomy, physiology, artificial respiration, and the nervous system, sprains, fractures,

and dislocations and their treatment, infections and poisoning, etc.

CULEBRA.

High scores in duckpins during the past week were, as follows:

R. Koperski, 102, 104, 110; Bliss, 103; Seeley, 100, 105.

The smoker on Wednesday night, was attended by 135 men. The following program was given: Solo, with guitar accompaniment, and whistling solo, with piano accompaniment, by W. W. DeLaMater; bass solo, by Louis Cantor; moving picture reel, "Romance in the clouds;" "Wise and otherwise," by Messrs. Brittin and Cantor; juggling, by T. L. Brennan; slight of hand and magic, by Herr Olms and Fraulein Nelly; moving picture reel, "Queen of the sea nymphs." Music was furnished during the evening by Davis' orchestra, with C. C. Pearsall at the piano. Refreshments of homemade cake, ice cream, and cold *agua pura* were served during the program; also cigars.

At the song service on Sunday night, April 19, a lecture was given on "The social world in Christ's time," illustrated by colored and sepia slides, showing the manner of living in ancient times. Song slides were also thrown on the screen, from which the audience joined in singing. This is the first in a series of three illustrated lectures. Next to be given is entitled "The political world in Christ's time," and followed by "The religious world in Christ's time." The slides are copies of photographs taken on the ground.

GATUN.

Motion pictures illustrating the "Life of our Saviour" were shown on Tuesday evening, April 21. Appropriate piano music was played by Mr. S. C. Fagard. There was an unusually large number of children present.

Photographs of Colonel Sibert's banquet are on sale at the clubhouse, at 50 cents each.

A number of members of the Y. M. C. A. who are taking lessons on musical instruments were challenged to a game of basketball by a group of the younger members. The two teams are known as the "Musical Five" and the "Sports." The game was a tie, 7 to 7, at the end of the first half. The second half was hotly contested, and resulted in a victory for the musicians, by a score of 14 to 12. The teams were as follows: "Musical Five"—Walker, F. G. Smith, Wright, Loulan, Konkerton. "Sports"—Griffith, Gray, Godwin, McEwen, Garrison.

The boys' first aid class has started a new course. The physical director is in charge. Any junior member of the Y. M. C. A. may join. As soon as five men sign up, a class for the seniors will be begun. Suggestions for new books for the library will be gladly received.

A special effort is being made to increase the membership of the local association. Members of other clubhouses, now living in Gatun, are urged to transfer their tickets.

CRISTOBAL.

Mr. W. H. Fenley gave an interesting talk on "Railroad signals and interlocking," before the Discussion Club on Thursday evening, April 16.

A combination class will be held in the gymnasium every week, providing schedule of moving pictures and other affairs will permit. This will give both the young men's and men's class two evenings a week of supervised calisthenics and games.

The Corozal indoor baseball team will play the young men's team at Cristobal on Saturday evening, May 2.

All gymnasium classes are rehearsing for the circus which will take place some time in May. There will be about 25 acts.

PORTO BELLO.

Inasmuch as it has not yet been definitely decided when Porto Bello will close down, announcement as to the future of the Porto Bello clubhouse will be deferred until the next issue of THE CANAL RECORD.

Easter Sunday was celebrated in Porto Bello by exercises conducted by the Sunday school. The following program was rendered:

Song, Merry bells of Easter; Bible reading, Mrs. Woolworth; prayer, Mrs. Sehey; recitation, Pauline Smith; recitation, Anna Colberg; recitation, Edward Keene; recitation, John Bruck; song, Bearing fruit for Jesus; recitation, Lillian Colberg; recitation, Gladys Smith; recitation, Hazel Bruck; song, Pauline Smith and Doris Geyer; recitation, Dorothy Bruck; recitation, Mabel Colberg; recitation, Gladys Geyer; song, Mrs. Wilkes; recitation, Doris Geyer; recitation, Claud Smith; recitation, Rachael Allen; recitation, Helen Keene; song, "Sweet is the message."

About 60 stereopticon slides illustrating Bunyon's "Pilgrim's progress" and the "Birth and childhood of Jesus" were shown. The lecture accompanying the views was given by Mr. Woolworth, secretary of the clubhouse.

A "Wind-up" social was held in the clubhouse on Saturday night, April 18, in which all the residents of Porto Bello joined. Four excellent reels were shown and Mr. S. C. Fagard of Niagara Falls, played the piano during the moving picture reels. Coffee, sandwiches, cake, and ice cream were served by the ladies. Mrs. Allen played a piano solo, and Mrs. Wilkes sang.

COMMISSARY DEPARTMENT.

Changes in Cold Storage List.

The following changes have been made, effective April 21, in the prices of cold storage provisions in the commissary stores, as published in last week's issue of THE CANAL RECORD: Eggs have been reduced to 26 cents per dozen; cauliflower has been advanced to 18 cents per pound; lettuce has been reduced to 8 cents per pound; artichokes, asparagus, horseradish, and rhubarb have been placed on sale.

Family Quarters.

Applications for married quarters on file on March 31, were, as follows:

DISTRICT.	List No. 1.	List No. 2
Balboa.....	33 (29)	203 (101)
Ancon.....	45 (37)	222 (130)
Ancon Hospital.....	1 (1)	7
Corozal.....	22 (21)	255 (142)
Paraiso.....	138 (39)
Culebra.....	2 (2)	1 (1)
Empire.....	6
Gatun.....	99 (8)
Cristobal.....	134 (30)
Porto Bello.....	2 (1)
Total.....	103 (90)	1,067 (452)

NOTE—The figures in parentheses show the number of applicants already occupying regular or nonhouse-keeping family quarters at stations other than those at which applications are filed.

Misdirected Letters.

ANCON, C. Z., April 20, 1914.

The following insufficiently addressed letters, originating in the United States and its possessions, have been received in the office of the Acting Director of Posts and may be secured upon request of the addressees:

Anthony, Miss M. B.	Keaney, T. J.
Bodden, Capt. John V.	Lenow, C. B.
Chaddock, Mrs. W. B.	Marckland, George
Hazen, Mrs. C. D.	Miles, John
Heisey, Edward	Phillips, Thos. C.
Henry, John	Roark, Mrs. George M.
Herbert, James	Tripp, Burton A.
	Jones, Alonzo B.

Post-office Established at Frijoles.

ANCON, C. Z., April 16, 1914.

To all postmasters—You are advised that effective this date, a post-office has been established at Frijoles, Canal Zone, and the Panama railroad agent at that point has been designated as the postmaster.

This office has been established for the receipt and dispatch of ordinary and registered mail. No money order or postal savings business will be transacted by it.

J. J. GILBERT,
Acting Director of Posts.

Supplies for the Canal.

The following steamers with supplies for The Panama Canal and Panama Railroad Company arrived at the ports of Colon and Cristobal during the week ending April 18:

Sixaola, April 12, from Boston, with one case electrical goods, for Mechanical Division.

Dallington, April 12, from Baltimore, with 232 boxes window glass, for permanent buildings; 1,211 packages structural steel, for Second Division; 684 pieces steel rails, for Panama railroad; 183 packages chain fender material, for First Division; 250 bundles brooms, for stock.

Movement of Vessels, Port of Balboa.

The following vessels arrived at, or departed from, the port of Balboa during the week ending April 18, 1914:

Arrivals—April 13, *Ecuador*, from Guayaquil, *Victoria*, from Valparaiso, *Tricolor*, from Puget Sound, *Hualaga*, from Callao; April 16, *Newport*, from San Francisco.

Departures—April 13, *Montoro*, to Callao, *Aysen*, to Valparaiso; April 17, *Son José*, to San Francisco; April 18, *Ecuador*, to Guayaquil, *Luckenbach*, to San Francisco.

MOVEMENTS OF OCEAN VESSELS.

The following is a list of sailings and scheduled arrivals of the Panama Railroad Steamship Line; of the Royal Mail Steam Packet Company; of the Hamburg-American Line, and of the United Fruit Company's Line:

*Will carry mail from the United States.

†Will carry mail to the United States.

Will carry mail for Alabama, Arkansas, Louisiana, Mississippi, and Texas.

Panama Railroad Company's steamers sail from Piers 8, 9, and 11, Cristobal, at 3 p. m.

Royal Mail steamers leave for New York on alternate Tuesdays at 2 p. m.; for Southampton, on alternate Tuesdays at 10 a. m.

United Fruit Company's ships for New Orleans direct, leave on Thursdays at 3 p. m., for New Orleans, via Bocas del Toro and Ilavaca, on Thursdays at 4 p. m.; ships for New York, via Kingston, on Thursdays, at 2 p. m.; for New York direct, on Wednesdays at 2 p. m.; for Limon and Bocas del Toro on Saturdays at 4 p. m.; for Bocas del Toro direct, on Thursdays at 4 p. m.; and for Boston, via Port Antonio, on Sundays at 3 p. m.

The Hamburg-American steamers *Prinz Eitel Friedrich* and *Prinz Sigismund* sail for New York, via Kingston and Fortune Island, on Mondays at 10 a. m.; the *Prinz August Wilhelm* and *Prinz Joachim* sail for New York, via Kingston, Santiago de Cuba, and Fortune Island, on Tuesdays at 10 a. m.

The Canal Record

Official publication of The Panama Canal.

The Canal Record is published weekly free of charge, one copy each, to all employees of The Panama Canal and Panama Railroad Company whose names are on the gold roll. Extra copies and back numbers can be obtained from the news stands of the Panama Railroad Company or five cents each.

Address all Communications,

THE CANAL RECORD,

Ancon, Canal Zone,

Isthmus of Panama.

No communication either for publication or requesting information, will receive attention unless signed with the full name and address of the writer.

NOTES OF PROGRESS.

Protecting the Canal.

Pursuant to instructions from the Secretary of War, cabled on April 24, to exercise increased vigilance in the protection of the Canal, Governor Goethals requested the commanding officer of the Tenth Infantry to take over the guarding of the locks, and for this purpose the latter despatched, by special train leaving Las Cascadas at 6 p. m., April 24, two companies of the regiment to Gatun, one company to Pedro Miguel, and one to Miraflores, to protect the locks and spillways.

Pilot Boat for Pacific Entrance.

Requisition was made by cable, on April 24, on the Washington office of The Panama Canal for the purchase, in open market, of a gasoline launch to be used as a pilot boat in the Pacific entrance. The launch is to be similar to the pilot boat *Dixie*, now in use in Colon harbor, and to the Colon quarantine launch *Psyche*, and the *Santa Rita*, in use by the forces constructing the east breakwater in Limon Bay. The specifications on which these launches were built will govern the construction of the new vessel, and delivery is to be made by July 1. This type of launch is 35 feet six inches long, with 8-foot beam, and capable of a speed of about 10 knots.

To Report a Plan for the Operation of Canal Terminal Docks.

A commission consisting of Mr. Carroll S. Smith, of New York City, and Mr. J. M. Barrett, of Buffalo, N. Y., appointed by Mr. E. A. Drake, First Vice-President of the Panama Railroad Company, arrived on the Isthmus on the *Panama* on April 8, accompanied by a statistician, to make a study and report on the most practicable and effective plan for handling cargo to and from vessels at the Canal terminals. They are considering the berthing of vessels, and the rapid handling of cargo, both to other vessels and to the trains of the Panama railroad, and the reloading of cargo. They are to recommend a scale of charges for wharfage, crantage, switching, and the transfer of cargo across and between docks

and slips. They have been instructed to make these charges appropriate, and possibly renumeration, allowing for cost of amortization, interest on the capital invested, and depreciation of plant. It is not, however, the expectation of the management of the railroad that a scale of charges can be instituted that will make the terminals self-supporting at first. On the contrary, it is part of the policy to go to some expense to attract traffic to the Canal, and the commission is instructed to set a scale which shall be equitable and, in its judgment, most likely best to conserve the interests of all concerned.

Vessels Diverted from Tehuantepec Route.

The steamship *Columbian* of the American-Hawaiian Steamship Company, arrived in Panama Bay on Tuesday, April 28, and was berthed at Balboa the following morning, to discharge its cargo of 8,000 tons of sugar for transshipment. This vessel has been diverted from Salina Cruz, the Pacific terminus of the Tehuantepec railway, on account of the recent interruption of traffic over that road. The *Dakotan*, of the American-Hawaiian service, is due to arrive at Cristobal on May 3, to receive the *Columbian's* cargo. The *Nevadan*, of the same line, is expected at Balboa in the afternoon of Wednesday, April 29, with 3,900 tons of general cargo.

Air Compressors Transferred to Paraiso Shops.

Two of the four 550-cubic foot air compressors formerly used at Miraflores Locks by the McClintic-Marshall Construction Company, in the construction of the lock gates, have been transferred to Paraiso shops. They were placed in operation there in the morning of Monday, April 20, to furnish a local supply of compressed air for use in the shops. The other two are being used at Miraflores Locks by the Division of Erection, in its operations in connection with the installation of machinery. One of these may later be transferred to Paraiso shops, or both, with two similarly purchased at Gatun Locks, may be transferred to the dry dock shops at Mount Hope, depending on the development of requirements.

Resumption of Sand Reclamation Service.

Inasmuch as the new docks and sand wharf at Balboa will not be ready for use in connection with the sand service from Punta Chamé within six months, the present and prospective rates of sand consumption threaten to exhaust the storage pile on the east side of Miraflores Locks before that time. At the time the sand service was discontinued, on February 7, there were 75,000 cubic yards in storage.

A committee appointed by the Governor and consisting of representatives of the Dredging Division and of the Supply Department, and Mr. George A. Green-slade, general superintendent, who has

charge of the sand in storage and its distribution to the points of consumption, met at the office of Mr. Comber on Thursday, April 9, to consider the situation and recommend a course of action. The committee recommended that the sand service be resumed at once, the output to be handled at the lower east wing wall at Miraflores Locks, until the sand cranes at Balboa can be placed in service again. The sand will be handled by berm and locomotive cranes.

In conformance with this program, the first 1,000 cubic yards of sand were delivered at Miraflores Locks on the morning of Saturday, April 25.

Duct Line from Hotel Tivoli to New Administration Building.

Forces of the Electrical Division are engaged in laying an 8-way duct line to connect the Hotel Tivoli with the new administration building, on the southwest side of Ancon Hill. This is a part of the proposed permanent system for carrying the wires of the electric light and power, and telephone systems underground.

A transformer substation will be built at Balboa, as part of the transmission system from the Gatun hydroelectric station. Current will be carried to the administration building, and thence to the Hotel Tivoli, on underground lines at a potential of 2,200 volts, distribution to the various consuming circuits being made through local transformers at 110-220 volts.

The duct line now being installed follows the highways, from the hotel to the entrance to Ancon Hospital, and from there through the hospital grounds to the administration building. It will be about 5,500 feet long. It consists of eight separate 5-inch fibre conduits, held parallel in concrete spacers set at intervals of about three feet, and imbedded in rough concrete for protection. The line is being laid from two to seven feet below the surface of the ground, depending on the presence of obstacles to be passed, such as water and sewer pipes. Up to Tuesday, April 28, it has been laid as far as a point above Ward 15, in Ancon Hospital.

Supplying Circulating Water to Condensers at Miraflores Power Plant.

On account of the recent lowering of Miraflores Lake, which brought the surface of the water below the intakes of the pipes which have been installed along the east side of the spillway discharge channel to supply cooling water to the condenser system of the Miraflores steam electric plant, the spillway gate nearest Miraflores Locks has been kept open. A part of the water thus made to flow through the discharge channel has been diverted into the circulating water intake tunnel, passing under the power station, just as part of the Rio Grande used to be diverted, before the

stream was cut off by the building of the spillway dam.

The pipe line system consists of two 20-inch cast iron pipes, leading from intakes, at elevation 45 feet above sealevel, in the lake near the east end of the spillway, to the north end of the circulating tunnel, a distance of about 700 feet. For most of their length, the pipes are imbedded in the concrete of the wall lining the east side of the spillway discharge channel. The circulating tunnel is square in section, four feet on the side, and it is not necessary to use either of the two pipes at full capacity to supply enough fresh water to keep the water in the tunnel cool enough for condensing purposes; but the pipes have been installed in duplicate, in order that the second one may be thrown into immediate use in case the first becomes obstructed.

Temporary Office of Electrical Division

The office of the Electrical Division was moved on Sunday, April 19, from the frame building at Balboa, serving as temporary offices for the Mechanical Division until the permanent office building shall have been completed, to building No. 9 of the terminals. The change was made in order to give more room to both the Electrical Division and the principal office and drafting forces of the Mechanical Division, who have been considerably crowded. Building No. 9 was erected to house the proposed galvanizing plant, but the machinery has not arrived from the United States.

Withdrawal of International Insurance Company from Canal Zone.

The International Insurance Company (Compañía Internacional de Seguros), of Panama, has advised the Executive Secretary of its intention to withdraw from the business of underwriting fire insurance in the Canal Zone. All persons having any claims against the company arising from policies issued by it upon property in the Canal Zone, or who hold the company's policies upon property located in the Zone, are requested to communicate with the office of the Executive Secretary, Ancon, C. Z.

Cigar Stands in Canal Hotels.

Stands for the sale of cigars and cigarettes are to be placed in the canal hotels at Balboa, Ancon, and Pedro Miguel, in charge of the clerks who take up coupons or cash for meals. Commissary coupons only will be accepted in payment. If the patronage of the stands warrants an extension of the system, they will be placed in the other line hotels.

Departing Employees to Advise Postmasters of New Addresses.

On account of current departures from the Isthmus of employees leaving the service of the Canal and Panama railroad, the Acting Director of Posts has issued a circular to all postmasters calling their attention to the desirability of obtaining from such employees their new addresses, for forwarding purposes. Blank cards with the regular postal change of address form are in the hands of all postmasters, and the Acting Director of Posts points out that the cooperation of departing employees in this matter will be to the advantage of all concerned.

Tivoli Dispensary Consolidated with Ancon Hospital.

The Tivoli dispensary, situated on the street leading from the Tivoli road to the Ancon fire station, will be abolished at the

close of business on Thursday, April 30. Thereafter, a district physician having his headquarters in the admitting office at the gate of Ancon Hospital, will look after all Ancon dispensary visits, including physical examinations for employees, and will make visits

to quarters. His office hours will be the same as heretofore at the Tivoli dispensary, that is, from 8 to 9.30 a. m., from 12 m. to 1 p. m., and from 4 to 6 p. m.; on Sundays and holidays, from 8 to 9.30 a. m., only. His prescriptions will be filled at the Ancon Hospital pharmacy.

LABOR FORCE AND QUARTERS IN MARCH.

The force report for March 25 shows the actual working force of the Isthmian Canal Commission on that date to have been 27,392; of the Panama railroad, 4,478; of the Panama railroad commissary department, 1,297; and of contractors, 34; a total working force of 33,201, an increase of 1,400, as compared with the statement for February 25. The gold force on the Canal work, composed almost exclusively of white Americans, was 4,560, divided, as follows: Canal Commission, 3,850; Panama railroad, 467; Panama railroad commissary, 243. A statement of the Canal Commission force, by divisions, follows:

DEPARTMENT OR DIVISION.	SILVER EMPLOYEES*											Total silver.	Total gold.	Grand total.

CHURCHES AND SOCIETIES.

Empire Christian Endeavor Society Disbanded—General Notes.

At the meeting of the Empire Christian Endeavor Society on Thursday, evening, April 16, it was decided to disband the society, on account of changes in membership and the removal of members. At the same time, the officers recommended that those members still remaining in the village should hold informal meetings on Sunday mornings in the chapel, in order to keep alive the Christian Endeavor spirit among the young people.

In accordance with this arrangement, the first of these meetings was held on Sunday morning, April 19. The regular Christian Endeavor subject for the day was discussed in connection with the praise and song service.

The Empire Christian Endeavor Society was organized in a meeting held in the Commission chapel at Empire on July 8, 1913, Mr. Robert Browning being provisional chairman, and Mr. D. L. Johnson, secretary. At this meeting, a committee was appointed to draw up a constitution for the society, which had as its object the promotion of religious work and social intercourse among the young people in Empire. The next meeting was held on July 15, when the constitution presented by this committee was adopted and the organization perfected. The rules provided for four officers, three committees, and active and associate members. The following officers were elected: President, Warren H. Barrett; vice-president, Mary Smith; secretary, Mrs. Frank Peak; treasurer, D. L. Johnson. The committees were the outlook, prayermeeting, music, and social. There were 14 active members. In addition to the regular Christian Endeavor meetings, the society held monthly entertainments and a banquet was given on February 17, 1914. The services maintained have been undenominational and the society has enjoyed the support of the residents of Empire who are interested in protestant church work.

The financial operations during the year were a gift of \$10 to the Balkan Relief Committee, \$10 to the Building Fund of the United Society of Christian Endeavor, \$25 toward the support of a missionary in Central America, and a donation to the community Christmas celebration in 1913.

The smallest enrollment of the society was 14, and the highest membership was 45. The average attendance at the Sunday morning meetings was 35, at entertainments, 45. The officers of the society at the time of its disbanding were, as follows: President, V. W. Koontz; vice-president, H. A. Jackson; secretary, Jacob Sack; treasurer, D. L. Johnson; pianist, Kathryn Moore; assistant pianist, Marguerite Griley; chairman of outlook committee, Amos C. Byle; chairman of prayermeeting committee, H. A. Jackson; chairman of social committee, Mattie Berry; chairman of music committee, Kathryn Moore; chairman of missionary committee, D. L. Johnson.

The disbanding of this organization releases the members living in Corozal, Balboa, Ancon, and Las Cascadas from obligations, thus enabling them to give their time to the building up of two similar societies that have recently been organized, one at Corozal and one at Las Cascadas. Both of these societies were formed through the efforts of members of the Empire organization. The properties of the

Empire Christian Endeavor Society have been divided between these new organizations.

There have been five organizations of Christian Endeavor Societies in the Canal Zone during the American occupation. They were at Empire, Corozal, Las Cascadas, Cristobal, and Gorgona. The oldest and largest of these societies is at Cristobal. It was organized in 1909 and has a membership of about 100.

Independent Order of Odd Fellows.

A letter has been received by the district grand sire on the Isthmus, from the Sovereign Grand Sire of the I. O. O. F., approving the removal of Isthmian Canal Lodge, No. 1, to Ancon from Empire. The first meeting at Ancon will take place on May 7, and Pacific Lodge, No. 4, will also be consolidated with Isthmian Lodge, No. 1, at this time. All members of the Odd Fellows on the Isthmus are invited to attend.

Order of Isthmian Conductors.

The next regular meeting of the Order of Isthmian Conductors will be held in Ancon lodge hall, on Sunday, May 3, at 9.30 a. m. Important business is to be transacted.

GEO. B. ALLEN,

Corozal, C. Z., April 28, 1914. Secretary.

Obituary.

Dr. Herman Canfield, who was formerly Assistant Chief Sanitary Inspector in the old Department of Sanitation, died on Thursday, April 9, at Carrabelle, Fla. He was sixty years of age, and is survived by his wife and two children. Dr. Canfield entered the service of the Isthmian Canal Commission as an interne on January 22, 1906; on July 1, 1906, he became a sanitary inspector, and on September 1, 1906, was appointed to the position of Assistant Chief Sanitary Inspector, which he held until March 31, 1911, when he resigned from the service of the Commission and returned to the United States.

American Institute of Electrical Engineers.

The next regular meeting of the Panama section, American Institute of Electrical Engineers, will be held at Balboa shops, on Wednesday evening, May 6, at 8 p. m. Mr. Hartley Rowe will present a paper on "The power and illumination system at Balboa shops," which will be followed by an inspection of the shops and of their lighting.

Special train service on the Panama railroad has been arranged for the meeting.

Estates Being Settled.

The following estates of deceased employees of The Panama Canal or Panama Railroad Company are now in progress of settlement by the office of the Administrator of Estates, Ancon, C. Z., and any claims against these estates, or any information which might lead to the location of heirs, or to the recovery of property, bank deposits, postal savings or

PERSONAL.

Henry Goldmark, designing engineer, resigned from the service of The Panama Canal on April 15, and sailed for the United States on April 26, to resume, in partnership with his brother, engineering and consulting work in the city of New York. He entered the service of the Isthmian Canal Commission in 1906 and was stationed at its Washington office, in charge of designing, until 1908, when he was transferred to the Isthmus. He has had direct charge, under Colonel Hodges, of the design of the lock gates, floating caissons, chain fender machines, and pontoon bridge, and has supervised the construction of the lock gates. The lock gates were completed in March of this year, several of the chain fender devices have been installed and found satisfactory, and the construction of the accepted types of caissons is in the hands of contractors in the United States. In addition, Mr. Goldmark has served in a consulting capacity in the designing of various operating machines, valves, etc. He was born in New York City in 1857; graduated from the Polytechnic Institute of Brooklyn in 1874; from Harvard University, with the degree of bachelor of arts, in 1878; and from the Technische Hochschule in Hanover, Germany, in 1880. Prior to entering the service of the Isthmian Canal Commission, he was connected with many engineering projects in the United States and Canada, principally in bridge work and steel construction. He is a member of the Western Society of Engineers, of the American Society of Civil Engineers, of the Canadian Society of Civil Engineers, of the Institution of Civil Engineers of Great Britain, and of the International Society for Testing Materials.

A. L. Robinson, former superintendent of the Mechanical Division, is now occupying the position of consulting engineer with the Barber Asphalt Paving Company, with headquarters in Philadelphia.

Society of the Chagres.

Effective at once, Mr. John K. Baxter will act as secretary-treasurer of the Society of the Chagres. Mr. Baxter's address is Ancon, C. Z. All mail for the Society of the Chagres should be addressed to him.

R. E. WOOD, President.

CULEBRA, C. Z., April 24, 1914.

postal money order deposits, or any other moneys due them, should be presented at that office at once on order that the estate may be settled as soon as possible. All claims should be itemized, sworn to before a notary public, or other public officer having a seal, and submitted in duplicate. These names will be published but once.

NEW STATION IN PANAMA.

Modern Structure Designed in Accord with Local Operating Conditions.

The erection of a new terminal station at Panama was taken into active consideration by the Panama railroad officials in February, 1912. Mr. H. E. Bartlett, the Panama railroad architect, submitted several schemes which were considered, revised, and modified until they met the various requirements. The resulting sketches were formally approved on April 19, 1912. They were reproduced in THE CANAL RECORD of June 5, 1912.

These preliminary sketches contemplated the erection, south of the old station, of a two-story main building fronting 167 feet on Avenue "B", with a three-story wing in the rear, extending back 100 feet to the alighting platform. The level of this platform, and of the baggage room leading from it, is about seven feet lower than the street curb in front of the building, which permitted the introduction of a mezzanine story in the rear wing. The steel framework of the rear portion of the building was recovered from the old station.

size. The one for the first-class passengers has a beamed ceiling, executed in plaster, and walls decorated with plain paneling, while the second-class waiting room has no relief decorations at all.

Both the first and second classes are served by the same ticket seller, and use the baggage room in common. Past experience has proved that one man can handle the ticket traffic under normal conditions, owing to the fact that the majority of the first-class passengers use mileage books and passes. Provision is made, however, for dividing the work, in case of a rush, between two men, one selling first-class and the other selling second-class tickets. On the other hand, so few second-class passengers check baggage that it is not worth while making separate provision for them in the baggage room.

Climatic conditions made it advisable to provide carriage accommodations ample in extent and well protected from the weather, to roof all open passageways, and to protect the front and rear walls with porticos.

In accordance with the Panama railroad's long-established custom of providing quarters

it follows that the most logical position for the baggage room is on the axis of the building, adjoining the alighting platform and at the same level. On the north side of the baggage room, a service court four feet below the level of the alighting platform is provided for the use of mail and baggage wagons. Service roads leading to and from this court pass under the passenger and carriage ramps connecting the main building with the alighting platform, an arrangement which makes the handling of baggage absolutely independent of the movement of passengers. Certain incoming trains have, on the rear, either an observation car, or a hospital car bringing patients to Ancon Hospital. The patients are carried across the alighting platform to an ambulance, waiting in the turn-around. When an observation car takes the place of a hospital car, the ambulance is replaced by public carriages.

The carriage and service roads in the grounds form an integral part of the plans. They are laid out with the object of preventing congestion and confusion by keeping all vehicles and pedestrians on a given road or

NEW PASSENGER STATION AT PANAMA.

This fixed many of the dimensions and determined the order of erection of the different parts of the structure. The ground floor of the main building is at the same level as the sidewalk, and contains separate entrances, *portes cochères*, vestibules, and waiting rooms for each of the two classes of passengers. Stairs have been avoided wherever possible, so that almost any portion of the building to which the general public has to have access, can be reached by means of ramps having a seven per cent slope.

Waiting rooms are usually very spacious, in stations from which more than one line of railroads radiate, or from which local and express trains arrive and depart. Here, however, there is no occasion for passengers from incoming trains to await, at the station, the departure of another outbound train. The relatively small waiting rooms provided are intended primarily to accommodate the few people who arrive before the trains are placed. Both waiting rooms are the same

for employees, the entire second story was divided up into rooms for bachelors. Those in the main building are intended for one occupant, while those in the rear wing extend the full width of the building and readily accommodate two. There are two electric lights and a built-in wardrobe per occupant. The walls and ceilings are plastered, and the base and trim consist of flat bands of Keene's cement. Therefore, the only wood used is in the doors, the window sash, and their respective frames.

Offices, and a room for unclaimed baggage are placed in the mezzanine story, directly above the baggage room.

The location of the baggage room was determined by the makeup of the Panama railroad trains. Irrespective of the direction in which these are going, they always have the first-class coaches on the southern end of the train and the second-class coaches on the northern end, and the baggage car, or cars, in the middle. Hence,

sidewalk moving in the same direction. The baggage wagons, for example, will enter the service road from the Twenty-third street extension, whether empty or loaded, and leave by the service road at the north end of the grounds. The "coaches" or carriages, when bringing passengers to a departing train, will enter either the first-class or second-class driveway, and discharge their passengers at the waiting room or continue down the carriage ramp and draw up along the alighting platform. The roof of this platform projects 13 feet over the road, so that passengers, even during a tropical downpour, will be protected from the wet. Coaches awaiting the incoming train will line up along the alighting platform.

In a consideration of the elevations of the building, it will be noted that the general treatment is a free adaptation of the stucco architecture of Palladio as found, for example, in Vicenza and nearby cities of northeastern Italy. A two-story Doric colonnade, crowned

with a balustrade and terminated at the ends by the entrance pavilions, forms the motive of the main façade. At each end is a one-story *porte cochère* through which the main carriage roads pass. Above the roofs of the carriage entrances are large semicircular windows, filled in with cast concrete grilles. These admit light and air to the groined vaults covering the two-story vestibule. On the rear of the main building, free standing columns are replaced by pilasters which support a gallery at the level of the second story. This gallery and the decorative concrete balustrade continue down the sides of the rear wing. A roof of concrete tile, manufactured at Paraiso, covers this wing and adds a note of color to the perspective view of the rear.

The working drawings were started immediately after the preliminary sketches had been approved, and in the following June the foundation plan was issued to the superintendent of bridges and buildings. His forces at once began the work of excavating for the foundations and of pouring the mass concrete. After several month's work, the footings, piers, etc., were brought up to the level of the under side of the first-floor slab; parts of the sidewalk were built; the alighting platform was increased from its original width of 20 feet to 36 feet, and roofed for 600 feet of its length with corrugated iron. At present, there are 150 feet at each end of the alighting platform which are open to the weather.

Forces of the railroad continued to work on the ground as opportunity offered, building sidewalks, curbs, bridges over the service road, the concrete pavement of the service road and court, retaining walls, etc.

The width of Central Avenue at the foot of the ramp leading up to Caledonia bridge has been increased by four feet, and the curb and street pavement readjusted. Opposite the station in the triangular park, the old curb line was abandoned and a new one constructed further away from and parallel to the railroad tracks. Twenty-third street was extended from Avenue "B" to the alighting platform, and increased in width throughout this section to 30 feet. Later on, the portion between Avenue "B" and Central Avenue was correspondingly widened by the Panamanian authorities. The macadam roads were built by the municipal engineering forces of the Isthmian Canal Commission, but the integral curbs and gutters of concrete were made by the Panama railroad forces. Drainage of the grounds is effected by means of a continuation of the "yard drain," a storm-water sewer which collects the rainfall in the Panama railroad yard.

While this preparatory work was in progress, the working drawings and specifications were finished, and on August 21, 1912, they were issued to prospective bidders. By the terms of the specifications, the Panama railroad agreed to furnish, at cost, certain building materials then on order, as, for example, structural terra cotta blocks. Unit prices on other kinds of material, such as cement, reinforcing rods, sand, gravel, etc., were quoted, but the contractor was not debarred from purchasing equally good qualities in other markets. Terra cotta blocks were selected as the most suitable material for walls and partitions. Their cellular structure makes them an excellent non-conductor of heat, and the ragged grooves on the exterior surfaces offer a good key for

plaster or stucco. The floor slabs, wall columns, and girders were made of concrete, reinforced with bars.

The entire exterior and most of the interior first floor of the main building are finished in white cement stucco, tinted with mineral colors. This gives a more pleasing texture and color than the usual painted stucco and possesses the added advantage of lowering the cost of maintenance. Iron and steel corrode so rapidly in the hot, moist atmosphere of the Isthmus that they have been used sparingly, and, whenever practicable, bronze has been substituted. Welch floor tile is used practically throughout the building for floors. The principal exceptions are the concrete floor of the baggage room and the white tile floors of the toilet rooms. The public toilets on the first floor have a 5-foot wainscot of sanitary glass. What little finishing lumber was used in the first-class waiting room and its dependencies, is of mahogany, a wood which is not molested by ants. Cypress, used elsewhere in the building, possesses the same quality of repelling boring insects.

The principal items of equipment are the fittings of the news stand, with its glazed wall cases, counters, etc., and the bulletin boards, two in each vestibule and one in each waiting room. Four of the six are fitted with a train annunciator device in the upper portion. There are also in each vestibule gongs, controlled from the alighting platform, which announce the departure of trains. Ice water is piped throughout the building from a central cooler located in the baggage room. A main panel board in the closet of the main stairs controls all lighting and power circuits on the grounds and building.

Six different contractors submitted bids. Of these, the Central American Construction Company, Limited, of Colon, was the lowest bidder and, on September 10, 1912, the contract was awarded to it. The formal contract was dated three days later. For the sum of \$81,688, the aforesaid company agreed to furnish necessary labor and material for the erection of the superstructure complete and for the razing of the old station. A few items were not included in the contract, but were furnished by the Panama railroad. Under this heading come the bronze lighting fixtures, electric clocks, ticket cases, seats upholstered in cane for the first-class waiting room, and wooden slat seats for the second-class waiting room. All of these were designed by the architect and bought, for the most part, through the office of the General Purchasing Agent. The mahogany seat ends in the first-class waiting room were made at Cristobal in the Panama railroad carpenter shop, just before it was discontinued.

The occupation of the building has proceeded by stages. On August 22, 1913, the bachelors moved into the quarters in the second story of the main building. On September 9, the second-class waiting room was opened for the accommodation of first-class passengers. On November 16, the first-class waiting room was opened for its regular service, and the second-class waiting room was turned over to the second class passengers. About March 1, the offices of the trainmaster were moved to the station from Colon, and at about the same time the baggage room was placed in service. The entire building, including the offices and quarters in the wing, is now in use.

COLLIERS FOR THE CANAL.

Award Made for Two Vessels to Haul Coal to Stations at Entrances.

Contract for building two colliers, equipped ready for service, has been let by The Panama Canal to the Maryland Steel Company, of Sparrow's Point, Maryland, at the price of \$987,500 each. These are the vessels provided for in an Act of Congress, appropriating for sundry civil expenses, approved June 23, 1913, in which the building of two colliers to convey coal to the Canal coaling plants was authorized at a cost of not more than \$1,000,000 each.

The Navy Department was authorized to prepare the plans and specifications and to advertise for bids from both Government and private yards. The vessels are to be approximately 500 feet long, 62 feet in beam, and 39 feet six inches deep. They are to have a cargo capacity of 12,000 tons of coal, with reservations of space sufficient for bunker coal for a trip from Norfolk to Colon and return, and other requisite materials and supplies for operation. Their sea speed, loaded, is to be 14 knots, and their maximum draft is not to exceed 28 feet, in sea water.

The bids, opened on February 2, 1914, ranged from \$970,000 to \$1,436,000 for each vessel. The lowest bid was made by the Maryland Steel Company, and a supplementary bid, providing for certain improvements in construction and material at an additional charge of \$17,500 per vessel, was recommended by the Navy Department and accepted by The Panama Canal.

The ships are to be named *Achilles* and *Ulysses*, in conformance with the practice of giving colliers names from Greek and Roman mythology. They will be built according to Navy Department practice and when completed will be very similar to the *Orion* and the *Jason*, which, after extensive service, are regarded as very satisfactory. It is expected that they will be placed in commission early in 1916.

Value of Material and Supplies Received in March.

The value of material and supplies received on the Isthmus by the Chief Quartermaster during the month of March, 1914, was \$900,045.68, distributed, as follows:

Mount Hope (stock).....	\$321,277.56
First Division.....	293,120.12
Second Division.....	15,526.23
Fourth Division.....	1,128.19
Dredging Division.....	72,982.14
Mechanical Division.....	75,780.47
Municipal Engineering.....	23,504.56
Sanitary Department.....	3,801.44
Panama Railroad Company.....	32,126.88
Civil Administration.....	98.67
Fortifications.....	4,078.21
Law Department.....	12.00
Examiner of Accounts.....	192.95
Permanent Buildings.....	56,416.26

Total..... \$900,045.68

The material came forward in 43 steamers. The total weight of cargo, exclusive of lumber, ties, and piling, was 21,169 tons.

Missing Men.

Any one having information regarding the whereabouts of Luther B. Anderson, a West Indian who is supposed to be on the Isthmus, is requested to communicate with the American Legation, Panama.

Any one having information regarding the whereabouts of the following-named men who are supposed to be on the Isthmus, are requested to communicate with THE CANAL RECORD, Ancon, C. Z.: Jacob Brumley, Benjamin Schwartz, and Edward R. Harkins.

CANAL WORK IN MARCH.

Report of the Chairman and Chief Engineer to the Secretary of War.

CULEBRA, C. Z., April 18, 1914.

The Honorable the Secretary of War,
Washington, D. C.

SIR: I have the honor to submit the following report of operations on the Isthmus for the month of March, 1914:

Department of Construction and Engineering.

The following table summarizes the principal items of work accomplished by the construction divisions during the month:

ITEM.	Unit.	1st Div.	2d Div.	4th Div.	Dredging.	Municipal Eng'ring	Total.
Work excavation, wet.....	Cubic yds.				964,055		964,055
Work excavation, dry.....	Cubic yds.		113,497	147,998			261,495
Total work excavation.....	Cubic yds.		113,497	147,998	964,055		1,225,550
Plant excavation, dry.....	Cubic yds.		1,094				1,094
Plant excavation, wet.....	Cubic yds.						
Total.....	Cubic yds.		1,094				1,094
Total Canal excavation....	Cubic yds.		114,591	147,998	964,055		1,226,644
Concrete placed in locks, dams, and spillways.....	Cubic yds.	1,279					1,279
Fill placed in dams.....	Cubic yds.			31,365			31,365
Explosives used.....	Tons (Gr.)	42.93	7.05		41.40		91.38
Rock drilled.....	Feet	123,747	22,029		20,827		166,603
Tracks removed.....	Miles	4.20	6.86				11.06
New tracks laid.....	Miles	5.72	2.09			.02	7.83
Rock crushed.....	Cubic yds.			43,430			43,430
Cement used.....	Barrels	2,036	13,043			4,711	19,790
New roads built.....	Miles					.43	.43
Water mains laid.....	Feet		2,132			22,092	24,224
Sewers laid.....	Feet					2,249	2,249
Open drains and ditches dug.....	Feet					780	780
Average daily force.....		3,193	4,033	1,731	2,449	1,897	13,303
Average rainfall.....	Inches.	0.49	0.45	0.01	0.30	0.26	0.26

First Division—Office of the Chief Engineer.

LOCKS GATES AND PROTECTIVE DEVICES.

Only painting and similar finishing work remains to be done on the lock gates before they are completed. This is done by Canal forces, the contractor having finished his work.

Delivery of chains ordered for the chain fenders is indefinite, and it may be necessary to purchase some of them in Europe. Ten chain-fender machines for Gatun and 10 for Pedro Miguel, and parts of 22 other machines have been received, and installation is in progress.

Rapid progress was made on the construction of the lock entrance caisson at the contractor's works.

PONTOON BRIDGE.

The barge for the pontoon bridge was launched at Mount Hope on March 25, 1914; and on the 27th of that month it was towed to Paraiso, where the work of assembling the superstructure is now under way.

OPERATING MACHINERY AND ELECTRICAL EQUIPMENT.

It is expected that the entire installation of machinery and electrical equipment at Gatun hydroelectric station will be ready for test in April.

All rising stem, cylindrical, and auxiliary culvert-valve machines have been completely installed. All of the guard-valve machines have been received, and 95 per cent of the mechanical, and 40 per cent of the electrical installation are completed.

All mechanical and 97 per cent of the electrical installation on the miter-gate moving machines have been completed. The miter-gate forcing machines are completely installed.

Track installation is 99 per cent complete at Gatun, 100 at Pedro Miguel, and 98 per

cent at Miraflores; single crossovers, 100 per cent; double, 99 per cent.

Mechanical and electrical installation of the spillway gate machines have been completed at Gatun; all mechanical, and 80 per cent electrical, at Miraflores.

Pumps and motors with floats switches and starters have been received complete, except one motor for chain fender machines. Mechanical erection is 100 per cent complete on miter gate sump pumps, 37 per cent on chain-fender sump pumps, and 100 per cent complete on drainage sump pumps and culvert

pumps. Electrical installation is 97 per cent complete on miter-gate sump pumps, 100 per cent on drainage sump pumps, 20 per cent on culvert pumps, and three per cent on chain-fender sump pumps.

To date, the work on transformer room equipment is 95 per cent completed at Gatun, 92 per cent at Pedro Miguel, and 90 per cent at Miraflores. The installation of all transformer rooms at all locks combined is approximately 92 per cent complete.

Control houses at Gatun, Miraflores, and Pedro Miguel are practically completed, except for placing roofing tile, floors, and windows, which work is now in progress.

About 96 per cent of the total of 2,605,795 linear feet of duct line cable on order have been delivered, and 2,011,788 linear feet have been pulled into ducts.

All but one of the 208 lamp posts on the walls of Gatun Locks, all of those at Pedro Miguel, and at Miraflores, out of a total of 168 lamp posts, 164 bases, 97 posts with single arms, and 56 double arms, and one without arms, have been set.

The main control boards at Gatun and Pedro Miguel are completely installed, the board at Miraflores, about 50 per cent.

Out of a total of 809 foundations for the transisthmian transmission line, 793 have been placed; total concrete to date, 7,233 cubic yards, of which 293.6 cubic yards were placed in March; total track-span bridges in place, 775, of which 147 were placed in March. Stringing of wires continued, 31½ miles of ground and 33 miles of power wire having been strung to the end of March. It is probable that the transmission line will be nearly completed in April.

Building operations at the Gatun substation progressed satisfactorily during the month. Work on the Miraflores substation

is being delayed. At Cristobal substation, the foundations have been completed and are in readiness for the steel contractor. Six hundred piles were driven in preparing this foundation.

LOCK AND SPILLWAY OPERATIONS.

Eleven lockages were made at Gatun, and two each at Pedro Miguel and Miraflores. All of the 14 spillway gates at Gatun were operated satisfactorily, with the surface of the lake at approximately 85 feet above sealevel.

AIDS TO NAVIGATION.

Work was advanced in the construction of range light towers, targets, beacons, and electric light pole line.

Second Division—Office of the Chief Engineer.

TERMINALS AND SHOPS.

Balboa shops.—The work of design and preparing requisitions continued, studies were made of the layout of the yard, the 70-foot turntable was tested and accepted, excavation to the amount of 2,384 cubic yards, and 3,981 cubic yards of filling were accomplished; 1,693 cubic yards of concrete were placed in foundation piers, footings, floors, walls, roofs, and tunnel.

Dry docks, Balboa.—Design work was continued. Excavation for the dry docks entrance basin, and coal pockets amounted to 114,591 cubic yards; the lowest cut in the entrance basin is now at 40 feet below sealevel, in the dry dock, 28 feet below.

Quay wall and pier, Balboa.—The superstructure of section "g-h-i" of the quay was completed, and brick paving and track are now in place. In the construction of section "i-j-m-n", 150 cubic yards of concrete were placed in the caissons, 64 linear feet of floor slab were placed, and work was started on the anchorages. No construction was done on section "e-f."

On the pier, 51 caissons were filled with concrete, 2,602 cubic yards of concrete being used. Work was begun on the superstructure concrete, floor slab 75 feet long and 11 feet wide, using 791 cubic yards of concrete, being placed.

Coaling plants.—Studies were made of the berm cranes used at Miraflores Locks, with a view to adapting them to use in the coal handling plants.

Excavation at the coal pocket at Balboa is practically at grade, except for sea-wall excavation along the entrance basin. One hundred fifteen cubic yards of masonry wall were built along the south side of the coal pocket, to smooth up the rough-rock surface from 18 feet below sealevel to top of rock where inclined wall is to be built. Three hundred and seventy cubic yards of concrete were placed in the berm crane foundations.

Design of various parts of the substructures of Cristobal plant was continued, storage yards for material were considered, and a proposed modification in design of the reloader was submitted.

Fuel-oil plants.—Studies of type, size, and arrangement of equipment to be adopted were made, specifications were prepared for the fuel-oil pumping plants, and a preliminary study was made of a gasoline storage plant. The question of erecting oil storage tanks in a 16-acre tract south of Mount Hope cemetery was taken up. Plans were prepared illustrating the general location of the plant at the Pacific entrance, and the berthing required for tank steamers was determined.

Study of the fire walls was completed, and preparations for construction were begun.

Wireless stations—Work on foundations and design of the station at Caimito was continued, and studies were made for the location of stations at Colon and Balboa.

West breakwater, Atlantic entrance—Twenty-one thousand, two hundred and twenty cubic yards of rock from Porto Bello were dumped on Toro Point breakwater, making the total to date 442,020 cubic yards. Three thousand, two hundred and sixty linear feet of breakwater were completed during March, making the total completed 9,051 linear feet, including the "ell."

East breakwater, Atlantic entrance—Work on the east breakwater consisted of storage track construction, trestle building, and arranging pile yard. Seven thousand, three hundred ninety-five cubic yards of rock were received from Mount Hope borrow pit.

LANDSCAPE ARCHITECT.

Grading, laying sewer, and making streets on the new townsite at Balboa were continued. An analysis was made, on the basis of the latest information as to types to be used, of the number of buildings which can be accommodated on the townsite layout as approved, in which it was found that, unless ground relatively unsuitable for buildings be utilized, the present building program will very nearly take up all of the available street frontage. Building-location plans based on this analysis were made, and submitted to the committee on location of buildings in permanent towns.

METEOROLOGY AND HYDROGRAPHY.

Dry-season weather continued throughout March, the rainfall amounting to about one third of the March average for thirteen years. Monthly totals ranged from zero, at several stations in the Pacific section, to 1.21 inch, at Brazos Brook. The average for the Gatun Lake watershed was .71 of an inch. Evaporation was above station average at all stations except Gatun and Colon. It was 6.519 at Colon and 8.506 at Ancon.

The water yield of Gatun Lake watershed was 25 per cent below the 6-year normal for March; notwithstanding this, and the great evaporation, the lake rose from 84.8 to 84.81 feet above sealevel.

Fourth Division—Office of the Chief Engineer.

A daily average number of steamshovels 6.33, working 164.5 shovel days, excavated 180,358 cubic yards, of which 102,868 cubic yards were rock. Of the total, 118,278 cubic yards were removed from Gold Hill, 29,720 cubic yards from Miraflores spillway, and 32,360 cubic yards from borrow pits. Eighty-one thousand, four hundred cubic yards were dumped on Naos Island trestle; total to March 31st, 1,973,605 cubic yards.

Dredging Division.

The status of dredging in the Canal prism, and Balboa harbor, and Cristobal coaling station on March 31 was, as follows:

Location.	March. Cu. Yds.	Remaining. Cu. Yds.
Miraflores Locks to the Pacific	13,720	2,067,393
Miraflores Lake	328,872	328,872
Culebra Cut	376,809	2,186,733
Gatun Lake	51,000	51,000
Gatun Locks to Atlantic	112,466	410,975
Total Prism	502,995	5,044,973
Balboa Harbor	166,092	5,831,602
Cristobal coaling station	25,019	799,963
Total	694,106	11,676,538

Nine dredges were at work in the Culebra Cut.

Water hyacinths—The work of poisoning

water hyacinths in Gatun Lake was taken up on March 21. A solution of 25 pounds of arsenic, 25 pounds of soda, and 25 gallons of water, boiled for one hour, is mixed with 425 gallons of water, and then sprayed upon the plants. In about 10 days, a plant so treated is apparently dead.

Division of Municipal Engineering.

Work was continued on the new water system for Panama and vicinity, including the purification plant at Miraflores, the pipe lines, new pump station at Ancon, and the high-service reservoir at Ancon, and on the installation of the 20-inch and 30-inch mains.

At La Boca townsite, the municipal work was completed. The storm sewer at Balboa townsite was completed. Municipal improvements in Panama city were carried forward; and various small pieces of construction were advanced in the Canal Zone.

Gold Hill Sluicing.

The sluicing at Gold Hill, part of the work for reducing slides, amounted to 122,800 cubic yards in March. Of this amount, 25,800 cubic yards were classified as earth and 97,000 as rock.

Quartermaster's Department.

Labor force—The total number of employes on the Canal and Panama railroad forces was 33,173 on March 25; divided into 4,560 white Americans, 1,413 European laborers, and 27,200 negroes.

Buildings—Shop employes were moved from Empire to Balboa, resulting in a congestion of bachelor quarters at Balboa and vicinity. Building construction at La Boca advanced and 375 apartments are completed or nearly so. The number of people housed in Canal and railroad quarters was 18,114, of whom 8,398 were Americans, 1,893 Europeans, and 7,923 were negroes.

Subsistence Department.

The 13 line hotels served 173,963 meals; 12 laborers' messes, 229,937; Hotel Tivoli, 14,161; Hotel Aspinwall, 1,578. The net profit was \$5,624.10, including \$4,913.95 profit on Hotel Tivoli.

Department of Civil Administration.

COURTS.

The circuit court disposed of 111 civil and 37 criminal cases; district courts, 25 civil and 385 criminal cases.

POSTS, CUSTOMS, AND REVENUES.

Money order sales for March amounted to \$296,510; fees, \$1,449.10; receipts from stamp and card sales, \$7,181.51; deposits in savings accounts, \$147,456; withdrawals, \$143,474. Revenue collections amounted to \$12,161.10; court fines, costs, and fees, \$1,318.10.

POLICE AND PRISONS.

Arrests numbered 390, of which 30 were women. Four convicts were committed to the penitentiary, and nine were discharged; total in confinement at the close of the month, 80. The cost of guarding and subsisting the convicts was \$1,814.02, and the value of their work on the Gamboa-Empire road was \$1,388.80.

FIRE PROTECTION.

Fifty-four fires occurred in March; damage, \$521.60.

SCHOOLS.

The net enrollment in the white schools was 1,237, the average number belonging, 995.9, and the average daily attendance, 956.3. In the colored schools, the net enrollment was

1,421, the average number belonging, 843.9, and the average daily attendance, 710.7.

Department of Sanitation.

The total number of deaths from all causes among employes was 34 (disease 24, violence 10), an annual average per thousand of 6.18 and 2.57, respectively. The annual average death rate per thousand in the cities of Panama and Colon, and in the Canal Zone, including both employes and civil population, for the month of March, was 25.48. Among employes, deaths from the principal diseases were: Lobar pneumonia, five; organic disease of the heart, one; tuberculosis, three; typhoid fever, one; malaria fever, two; leaving 12 deaths from all other diseases, and 10 deaths from external violence. No case of yellow fever, small pox, or plague originated on, or was brought to the Isthmus, during the month.

Respectfully,

GEO. W. GOETHALS,
Chairman and Chief Engineer.

New Pay Arrangements.

The paymaster advises that, effective with the May payments, the pay car of The Panama Canal will operate on the following approximate schedule, on the 11th and 12th days of each month:

11TH.

Leave Empire at 6 a. m.

At Pedro Miguel, 6.30 to 7.30 a. m.
Paraiso Shops, 7.40 to 8.30 a. m.
Radio Station, 9 to 9.20 a. m.
Gatun, 10.20 a. m. to 12 m.
Rio Grande, 2 to 2.30 p. m.
Culebra, 2.40 to 2.55 p. m.
Las Cascadas, 3.10 to 3.20 p. m.
Empire, 3.40 to 4.30 p. m.

12TH.

Leave Empire at 6 a. m.

At Diablo Hill, 6.30 to 6.45 a. m.
Balboa Shops, 7 to 8.30 a. m.
Ancon Crusher, 8.50 to 9.10 a. m.
Administration Building, 9.12 to 9.42 a. m.
Breakwater and Dumps, 9.50 to 10.20 a. m.
East Balboa, 10.30 to 11.10 a. m.
Corozal, 11.30 a. m. to 1 p. m.
Miraflores Locks, 1.30 to 2 p. m.
Power Plant, via high line, 2.40 to 3.10 p. m.
Miraflores Hill, Filtration Plant, 3.30 to 4 p. m.
Close up and run to Empire.

Outside payments will be made as heretofore from the Cristobal, Empire, and Ancon offices.

To relieve congestion at the Ancon pay office, that office will pay, from the 1st to the 12th of each month, pay receipts for employes working around Ancon only. The men from Balboa and the line must wait for the pay car. Any time voucher will be cashed when presented if properly validated.

When other stops by the pay car are desired, arrangements in advance should be made with the paymaster.

Site for Quarantine Station at Atlantic Entrance.

The chief quarantine officer and Mr. E. H. Chandler, superintendent of the northern district of the Division of Municipal Engineering, have been appointed a committee to select and recommend a site at Cristobal for a permanent quarantine station at the Atlantic entrance to the Canal.

OFFICIAL CIRCULARS.

Work Performed by Employees for Individuals and Companies.

THE PANAMA CANAL,
OFFICE OF THE GOVERNOR,
CULEBRA, C. Z., April 1, 1914.

CIRCULAR No. 641:

1. No employee of The Panama Canal will perform work for any individual or company during the employee's regular working hours unless the performance of the work has been authorized by this office on Form P. C. 159 and the usual work order issued by the proper official, except that the Chief Quartermaster is authorized to approve the performance of work by employees of the Supply Department for employees of The Panama Canal when the total cost of the job does not exceed ten dollars.

2. Heads of departments and divisions are authorized to permit employees of The Panama Canal to use machines, tools, etc., in the performance of private work for employees only, provided that work is not performed by the employee during working hours, the machine and tools can be spared for such use, and the use of them for the purpose will not result in their being injured.

GEO. W. GOETHALS,
Governor.

Leave Regulations—Relief Days.

THE PANAMA CANAL,
OFFICE OF THE GOVERNOR,
CULEBRA, C. Z., April 14, 1914

CIRCULAR No. 602-4:

1. Paragraph 17 of Circular No. 602 reads, as follows: "Hereafter, all days or half days off with permission or reserve days must either be charged against the annual leave of employees or be without pay. In case a monthly employee regularly employed in the daytime works at night, he may be allowed time off the following day if needed for rest or recuperation."

2. The following exception to this rule is authorized for the classes of employees who work regularly on Sundays and holidays:

3. When heads of departments or divisions can arrange without increasing the force to allow such an employee a Sunday or holiday off, pay will be allowed and the day will not be charged against annual leave.

GEO. W. GOETHALS,
Governor.

Appointment—Acting Superintendent, P. R. R.

THE PANAMA CANAL,
OFFICE OF THE GOVERNOR,
CULEBRA, C. Z., April 22, 1914.

CIRCULAR No. 661-6:

During the absence of Lieut. Frederick Mears, on leave, Mr. F. R. Blunt will act as Superintendent of The Panama Railroad Company, effective April 21, 1914.

GEO. W. GOETHALS,
President.

Measuring of Sand, Gravel, and Stone.

THE PANAMA CANAL,
OFFICE OF THE GOVERNOR,
CULEBRA, C. Z., April 1, 1914.

CIRCULAR No. 637:

The following quantities will be standard for measuring carloads of sand, gravel, and crushed stone for The Panama Canal:

	Cu. Yds.
Standard or large coal cars.....	25
Rodger ballast cars.....	25
P. C. wooden and steel flats, without sideboards	10
P. C. wooden and steel flats, with sideboards	15
Oliver dump cars.....	12
Western dump cars (large).....	20
Western dump cars (small).....	12

GEO. W. GOETHALS,
Governor.

Interference with and Use of Equipment.

THE PANAMA CANAL,
OFFICE OF THE GOVERNOR,
CULEBRA, C. Z., April 1, 1914.

CIRCULAR No. 654:

INTERFERENCE WITH EQUIPMENT.

1. Unauthorized persons are forbidden to touch or approach closely any parts of the mechanical or electrical equipment of The Panama Canal.

ELECTRICAL OPERATING EQUIPMENT.

2. The general instructions contained in Circular No. 492, issued by the Isthmian Canal Commission under date of July 19, 1913, will be continued in force until further notice.

GEO. W. GOETHALS,
Governor.

Buildings on Public Lands.

THE PANAMA CANAL,
OFFICE OF THE GOVERNOR,
CULEBRA, C. Z., April 1, 1914.

CIRCULAR No. 647:

The construction of buildings or houses of any kind upon the lands of the United States or the Panama rail-

road and the occupancy of such lands are prohibited, except under authority of a license or lease therefor duly issued by the Governor of The Panama Canal and in accordance with the regulations prescribed by him, provided that this rule will not apply to reservations of the Army and Navy or other Executive Departments of the Government.

GEO. W. GOETHALS,
Governor.

Appointments—Surveying Officer.

THE PANAMA CANAL,
OFFICE OF THE GOVERNOR,
CULEBRA, C. Z., April 21, 1914.

CIRCULAR No. 661-5:

SURVEYING OFFICER.

Mr. Charles L. Parker is appointed surveying officer, The Panama Canal, effective April 22, 1914, vice Mr. H. S. Farish.

GEO. W. GOETHALS,
Governor.

Appointments.

THE PANAMA CANAL,
OFFICE OF THE GOVERNOR,
CULEBRA, C. Z., April 9, 1914.

CIRCULAR No. 661-4:

1. The following appointments are hereby made:
BOARD OF LOCAL INSPECTORS.

Commander Douglass E. Dismukes, Chairman.
Lieut. Commander H. V. Butler, Member.
Mr. J. Macfarlane, Member.

BOARD OF ADMEASUREMENT.

Capt. Hugh Rodman, U. S. N., Chairman.
Commander Douglass E. Dismukes, Member.
Lieut. Commander H. V. Butler, Member.
Commander Dismukes, Deputy Inspector of Boilers.

Lieut. Commander Butler, Inspector of Hulls.
GEO. W. GOETHALS,
Governor.

Hand Cars.

THE PANAMA CANAL,
OFFICE OF THE GOVERNOR,
CULEBRA, C. Z., April 1, 1914.

CIRCULAR No. 667:

1. Hand cars may be run over mainline tracks only when their use has been approved by proper authority, or in case of absolute necessity.

2. Seats shall not be built on hand cars, and those now in use must be removed.

3. The practice of leaving hand cars in isolated places is a temptation to unauthorized persons to use them, and this must be discontinued. When not in use, hand cars should be left at railroad stations or section houses, and locked with a chain and padlock.

GEO. W. GOETHALS,
Governor.

Material and Equipment Turned in to Stores.

THE PANAMA CANAL,
OFFICE OF THE GOVERNOR,
CULEBRA, C. Z., April 15, 1914.

CIRCULAR No. 630-1:

1. Referring to all instructions which have heretofore been issued, stating that certain articles, such as hand and push cars, padlocks, etc., should be turned in to Empire store or Empire shops.

2. These instructions are now changed to cover the turning over of these articles to Balboa store or Balboa shops, instead of Empire.

GEO. W. GOETHALS,
Governor.

Transportation on Panama Railroad Steamships to Employees on the Gold Roll and Members of their Families.

THE PANAMA CANAL,
OFFICE OF THE GOVERNOR,
CULEBRA, C. Z., April 1, 1914.

CIRCULAR No. 610:

UPON TERMINATION OF SERVICE.

1. Free transportation will be granted, as follows:
To employees who are citizens of the United States appointed on or after April 1, 1914, who did not serve under the Isthmian Canal Commission up to and including March 31, 1914, who resign or are discharged for any cause after three years' service; to employees who on March 31, 1914, were entitled to free transportation for service under the Isthmian Canal Commission but did not avail themselves of the same on account of reemployment under The Panama Canal; to employees who are citizens of the United States, appointed in the United States, whose employment is terminated by or at the instance of the Governor of The Panama Canal with less than three years' service for any reason other than inefficiency or misconduct; to employees who are citizens of the United States, appointed on the Isthmus, whose employment is terminated by or at the instance of the Governor of The Panama Canal after less than three years' but more than six months' service for any reason other than

inefficiency or misconduct; to employees who on March 31, 1914, had served less than two years under the Isthmian Canal Commission, who resign or are discharged for any cause after serving a sufficient length of time under The Panama Canal to complete two years' service.

2. The twenty-dollar rate will be granted, as follows:

To aliens appointed on the Isthmus prior to January 1, 1909, who served under the Isthmian Canal Commission up to and including March 31, 1914, and were reemployed under The Panama Canal April 1, 1914, who resign or are discharged for any cause.

3. The thirty-dollar rate will be granted, as follows:

To employees who are citizens of the United States who resign or are discharged for inefficiency or misconduct after serving more than six months but less than three years; to employees who are citizens of the United States, appointed on the Isthmus, whose employment is terminated by or at the instance of the Governor of The Panama Canal after serving less than six months; to aliens appointed in the United States whose employment is terminated by or at the instance of the Governor of The Panama Canal for any reason other than inefficiency or misconduct, regardless of length of service; to aliens appointed in the United States who resign or are discharged for inefficiency or misconduct after serving one year; to aliens appointed on the Isthmus who resign or are discharged for inefficiency or misconduct after serving three years.

4. The forty-five-dollar rate will be granted, as follows:

To employees who are citizens of the United States who resign or are discharged for inefficiency or misconduct after serving less than six months; to aliens appointed in the United States who resign or are discharged for inefficiency or misconduct after serving less than one year; to aliens appointed on the Isthmus who resign or are discharged for inefficiency or misconduct after serving less than three years.

5. The fifteen-dollar steerage rate will be granted, as follows:

To all employees on the gold roll, and citizens of the United States on the silver roll, who may apply for it.

6. Employees entitled to free transportation to New York on the Panama Railroad Steamship Line may be granted, instead, free transportation to any port of the United States on any other line, provided such transportation does not cost the Government more than forty dollars; if the cost exceed forty dollars, the employee must pay the excess.

7. An employee who originally sailed from San Francisco under regular appointment from the Washington Office of the Isthmian Canal Commission or The Panama Canal will be granted free transportation to that port upon termination of service under the conditions outlined in paragraph 1 of this circular.

ON LEAVE OF ABSENCE.

8. Employees appointed prior to January 1, 1909, for service under the Isthmian Canal Commission, whose service was continuous up to and including March 31, 1914, and who were reemployed April 1, 1914, under The Panama Canal, will be granted a reduced rate of twenty dollars each way between Cristobal and New York on regularly authorized leave of absence.

9. Employees whose service has not been continuous since December 31, 1908, will be granted a reduced rate of thirty dollars each way between Cristobal and New York on regularly authorized leave of absence.

10. Request for reduced-rate transportation on lines other than the Panama Railroad Steamship Line will be issued upon application. (For conditions and rates see Circular No. 611).

FAMILIES OF EMPLOYEES.

11. The twenty-dollar rate will be granted, as follows:
To the following members of the families of employees appointed prior to January 1, 1909, for service under the Isthmian Canal Commission, who served continuously up to and including March 31, 1914, and were reemployed April 1, 1914, for service under The Panama Canal: wives and dependent children, brothers, sisters, and sisters-in-law, who intend to make the Isthmus their home; parents of employees and of employees' wives, upon certificate that they are dependent upon such employees and intend to make the Isthmus their home (males over 21 years of age, except parents, not to be considered dependent.)

12. The thirty-dollar rate will be granted to the relatives indicated above of all employees who have not served continuously since December 31, 1908.

13. The twenty and thirty-dollar rates will be granted to relatives of employees approximately once a year.

14. The forty-five-dollar rate will be granted to the relatives indicated above who request transportation oftener than once a year; to relatives of employees who desire to visit such employees on the Isthmus, regardless of dependency.

15. Residence of less than six months on the Isthmus will be regarded as a visit.

GENERAL.

16. No charge will be made for the children of employees under six years of age; half fare will be charged

for children over five years of age but less than twelve; children twelve years of age or over will be charged full fare. No children under twelve years of age will be permitted to travel on vessels of the Panama Railroad Steamship Line unless accompanied by an adult passenger. Members of the ship's crew are not allowed to assume responsibility for children under twelve years.

17. The names and ages of children must always be given when requesting transportation, except upon termination of service.

18. Reduced rate transportation will not be granted families of employees in advance of assignment of family quarters unless the employee agrees to waive all right to such quarters until regularly assigned.

19. Transportation for families is arranged by the Washington Office of The Panama Canal, upon application to the Governor's office, through the head of department.

20. Reduced rates are granted on lines other than the Panama Railroad Steamship Line in accordance with the provisions of Circular No. 611.

21. The servant of an employee will be granted the rate to which the employee is entitled on leave of absence.

22. Requests for steamship transportation will not be issued more than thirty days in advance of the date upon which it is desired to sail.

GEO. W. GOETHALS,
Governor.

Photographs and Blue Prints.

THE PANAMA CANAL,
OFFICE OF THE GOVERNOR,
CULEBRA, C. Z., April 1, 1914.

CIRCULAR No. 617:

All photographs for official purposes will be issued by the Office Engineer, Executive Office, and certain authorized photographs, not to exceed a selection of more than fifty, will be sold to employees at twenty cents gold each.

All requests for photographs will be made in writing to the Executive Office.

Copies of blue prints will be sold at fifty cents gold each, on written request approved by the Governor, or by his direction.

GEO. W. GOETHALS,
Governor.

Artificial Limbs and Appliances.

THE PANAMA CANAL,
OFFICE OF THE GOVERNOR,
CULEBRA, C. Z., April 1, 1914.

CIRCULAR No. 620:

An employee furnished with any special appliance or apparatus, as spectacles, etc., shall be required to pay the cost thereof, plus 15 per cent, unless such special appliance or apparatus is made necessary by injury sustained or illness contracted in the performance of duty. Peg legs and crutches, at the expense of The Panama Canal, may be furnished to either an employee or a nonemployee in any case in which it is considered that the interests of The Panama Canal will be benefited thereby.

GEO. W. GOETHALS,
Governor.

Interments and Cremation.

THE PANAMA CANAL,
OFFICE OF THE GOVERNOR,
CULEBRA, C. Z., April 1, 1914.

CIRCULAR No. 624:

1. Before the burial of a body in any cemetery in the Canal Zone, certificate of death must be presented to the authorized representative of the Chief Health Officer of The Panama Canal in charge of the cemetery wherein the burial is desired.

2. A permit will be issued for the burial of each body upon the payment of two dollars (\$2), U. S. currency, to cover the cost of interment. When a body is disinterred, a charge covering the actual cost of the work involved will be made against the responsible person.

DISPOSITION OF BODIES OF AMERICAN EMPLOYEES.

3. In case of death of an American employee on the Isthmus of Panama, the body will be embalmed and placed in a hermetically sealed casket, and returned to the home of such employee in the United States, subject to such quarantine regulations as may exist at the port of entry, and the cities and towns through which it may have to pass, and of the place of destination. The expense of embalming, casket, and transportation from the Isthmus to the home of such employee will be paid from funds available for The Panama Canal.

4. No body having been interred in a public or private cemetery shall be disinterred until after the expiration of eighteen months from the date of interment.

CREMATION.

5. With the exception of bodies embalmed for future disposition, the bodies of persons dying while in the military or naval service of the United States, and the bodies of American employees which can not be embalmed, the bodies of those dying in Ancon Hospital or

brought there for disposal will be cremated, unless taken away within twenty-four hours after death.

6. The ashes of those cremated will be placed in suitable receptacles and delivered to relatives or friends of the deceased, provided such relatives or friends make application therefor to the superintendent of Ancon Hospital in advance; otherwise, the ashes will be placed in a common grave.

7. Bodies embalmed for future disposition must be removed as soon as possible; if not removed within 90 days from date of embalming, they will be cremated.

8. The bodies of American employees which can not be embalmed will be buried immediately, but can not be disinterred for a period of 18 months, in accordance with the laws of the Canal Zone.

9. The following scale of charges for cremation will govern:

- (a) For bodies buried in Ancon Hospital prior to February 1, 1914.....No charge
- (b) For all other bodies, as follows:
 - Of employees.....No charge
 - Of families of employees whose pay is more than \$50 a month.....\$10.00
 - Of families of employees whose pay is \$50 a month or less.....2.00
 - Of nonemployees.....30.00
- (c) For receptacles as, follows:
 - For ashes of adults other than employees 1.00
 - For ashes of children......75
 - For ashes of employees.....No charge
- (d) No burial fee will be charged for bodies cremated. Coffins will be charged for as at present.

GEO. W. GOETHALS,
Governor.

Seniority.

THE PANAMA CANAL,
OFFICE OF THE GOVERNOR,
CULEBRA, C. Z., April 1, 1914.

CIRCULAR No. 605:

1. The Executive Order of February 2, 1914, provides:

SEC. 5. When employees in the present organization are transferred to the permanent organization, they shall retain their seniority as regards questions of Civil Service, quarters, and other privileges or considerations, provided, however, that the seniority granted to employees by this Order shall not be operative in any case, so as to form any claim involving the payment of funds of the United States.

DEFINITION.

2. In general, seniority will be determined by the date of entry into the service in the particular class in which one claims seniority privileges.

CIVIL SERVICE.

3. The purpose of this provision is to make it clear that persons in the classified civil service will not lose any rights pertaining to their civil-service status by reason of the change of organization.

PROMOTIONS.

4. It is the policy to promote employees according to seniority, other conditions being equal. In all cases, however, greater weight will be given to effectiveness in the class of work to which an employee is assigned than to mere considerations of longevity in that class of work, or in the service in general.

REDUCTION OF FORCE.

5. Seniority in a particular class of work will be given weight in reduction of force. (See Discharge—Reduction of Force.) In this connection "length of service" does not mean total continuous service on the Canal or railroad force, but in a particular class of employment. The seniority of clerks is determined by the length of service in clerical positions; the seniority of foremen by length of service as foremen in the same general line of work, but the dates of promotions from grade to grade do not affect the question. If an employee were transferred from a clerical position to shop work or outside construction work and the question of his seniority came up, his service as a clerk would not be counted. Previous service in a class of employment closely related to the class in which a reduction is made may be given consideration when other conditions and the qualifications of the men concerned are approximately equal.

TRANSFERS.

6. The Panama Canal service will be considered as a unit, and men transferring from one department to another will carry with them seniority privileges, subject to other qualifications as herein specified.

TRANSPORTATION MEN.

7. Seniority of locomotive engineers and railway conductors will be determined, as follows:

(a) The seniority of engineers and conductors will be determined by the date they entered the service as engineers or conductors, regardless of transfers from one division to another. Increase to qualified pay will depend on the date the employee started on main-line work.

(b) When additional qualified men are needed, the senior unqualified man in the service (all divisions)

will be given an opportunity to qualify, provided he has the requisite railroad experience.

(c) If it becomes necessary to qualify a man, and the employee entitled to promotion is sick or on leave of absence, a temporary promotion of the man next on the list may be made with the understanding that the senior man will supersede him on his return to duty. In such case, the date the temporary man qualifies will also be given the senior.

(d) Seniority will not hereafter be affected by absence from duty so long as the employee's service is continuous.

(e) In case of reduction of force, discharges will be made as follows, all divisions being considered as one service:

- (a) Aliens.
- (b) Men who have been reported for being in the hospital for alcoholism.
- (c) Men habitually sick, or physically unfit for Isthmian service, as shown by repeated absences from duty.
- (d) Men with unsatisfactory records.
- (e) Men at the foot of seniority list.
- (f) The seniority of a qualified man transferred to the Panama railroad will date from his transfer.
- (g) The conductors and engineers who served on the P. R. R. relocation work will be included in the seniority lists, and will be subject to these rules the same as though they had served as employees of the Isthmian Canal Commission.
- (h) If a qualified man refuses an offer to transfer to the Panama railroad operating department, he will thereafter have no right to such a transfer and his name will be marked on the seniority list as having refused transfer.
- (i) In case of reduction of P. R. R. force, qualified men may be transferred to the Canal force and resume their seniority standing.
- (j) Personnel of crews in charge of existing runs will not be changed by this seniority order except as vacancies occur.

GEO. W. GOETHALS,
Governor.

Official Circulars.

THE PANAMA CANAL,
OFFICE OF THE GOVERNOR,
CULEBRA, C. Z., April 1, 1914.

CIRCULAR No. No. 614:

1. The head of a department may issue circulars to his department, but circulars of a general nature, affecting other departments, will be issued from the Office of the Governor. Department circulars in conflict with higher authority will require the approval of the Governor.

2. Two copies of each circular or general order issued by heads of departments shall be furnished to the Office of the Governor.

3. The Office of the Governor will furnish each department a sufficient number of copies of each circular so that it will not be necessary for a department to re-issue the same instructions as its own. A mailing list setting forth the requirements of each department will be kept in the Office of the Governor.

GEO. W. GOETHALS,
Governor.

Family Quarters for Silver Employees.

THE PANAMA CANAL,
OFFICE OF THE GOVERNOR,
CULEBRA, C. Z., April 1, 1914.

CIRCULAR No. 628:

1. Housekeeping quarters at points where rental is charged will be assigned to married silver employees, and the rental for the same will be fixed and collected in accordance with the following rules and regulations:

2. The district quartermasters will maintain a regular list of applicants whose applications will be filed in the order in which they are received. They will make assignments, subject to the general rules governing the assignment of family quarters for silver employees.

3. The quarters may not be sublet and may be occupied only by the employee to whom assigned, and the immediate family or dependent relatives of such employee.

4. The apartment occupied, and the surrounding premises, must be kept in a clean and sanitary condition. Employees and their families will be required to comply with all sanitary regulations and to conform to the rules governing the occupancy of quarters.

5. Employees occupying quarters who leave the service, either by discharge or of their own accord, will be permitted to retain their quarters until the end of the period for which rental was paid prior to such separation, at which time they must vacate.

6. A monthly rental will be charged for each apartment. The rates, with the effective dates thereof, shall be shown on a copy of these regulations posted in each rented building.

7. The rental period will begin on the 16th day of one month and end on the 15th day of the following month. The monthly rental must be paid to the authorized

representative of The Panama Canal in advance, that is, prior to the first day of the monthly rental period. Receipt for payment must be given on the prescribed form and should be retained by occupant as evidence of right to occupancy. These receipts must be shown upon demand to authorized representatives of The Panama Canal.

8. In case occupancy begins at any date other than the 16th of the month, a daily rate equal to one-thirtieth of the monthly rate will be charged for each day the quarters are occupied, except that rental for a fractional part of a monthly period beginning after February 16, shall be determined by deducting from the monthly rental one-thirtieth thereof for each day between February 15 and the date the occupancy begins.

9. Should any of the above rules and regulations not be complied with the employee will be compelled to vacate his quarters at once, and no allowance will be made on account of rental paid by him for the unexpired balance of the month.

GEO. W. GOETHALS,

Governor.

Deportation of Invalids.

THE PANAMA CANAL,
OFFICE OF THE GOVERNOR,
CULEBRA, C. Z., April 1, 1914.

CIRCULAR No. 619:

1. The Chief Health Officer of The Panama Canal is authorized to certify for deportation from the Canal Zone employees known to be chronically sick and incapacitated for further work, provided such persons voluntarily consent to deportation.

2. The Chief Health Officer will designate a medical examining board composed of physicians employed by The Panama Canal, which will examine and report to the Chief Health Officer on the fitness for further work of all patients who come before it.

GEO. W. GOETHALS,

Governor.

Employment—Physical Examination.

THE PANAMA CANAL,
OFFICE OF THE GOVERNOR,
CULEBRA, C. Z., April 7, 1914.

CIRCULAR No. 603-1:

Effective April 15, 1914, an examining physician will be located at the Tivoli dispensary, Ancon, for the purpose of examining employees hired on the Isthmus for service at the southern end of the line.

Until further notice, the examining physician at Culebra will continue to make physical examinations in cases where it is more convenient for the employee to report to him; in other words, employees will report for physical examination to the nearest examining physician.

GEO. W. GOETHALS,

Governor.

Hunting in the Canal Zone.

THE PANAMA CANAL,
OFFICE OF THE GOVERNOR,
CULEBRA, C. Z., April 1, 1914.

CIRCULAR No. 645:

1. Hunting on the watershed of any reservoir in the Canal Zone is prohibited.

2. Hunting within that part of the Canal Zone lying west of the Canal line, between the Mandingo River and the Cocli River, is prohibited.

3. In order to protect that arm of Gatun Lake from which a portion of the water supply for Brazos Brook is drawn, hunting is prohibited within that part of the Canal Zone lying north of the bascule bridge and east of the Panama railroad.

4. Employees of The Panama Canal or Panama Railroad Company who violate the above regulations will be subject to dismissal from the service.

GEO. W. GOETHALS,

Governor.

Contracts.

THE PANAMA CANAL,
OFFICE OF THE GOVERNOR,
CULEBRA, C. Z., April 1, 1914.

CIRCULAR No. 636:

Contracts made by The Panama Canal, or by the Panama Railroad Company on the Isthmus, will be prepared by the Chief Quartermaster, who will advise with the district attorney or the auditor when necessary.

GEO. W. GOETHALS,

Governor.

Inflammable Liquids.

THE PANAMA CANAL,
OFFICE OF THE GOVERNOR,
CULEBRA, C. Z., April 1, 1914.

CIRCULAR No. 629:

The following rules are prescribed in respect to the sale by commissaries, and the use by occupants of Panama Canal quarters, of grain alcohol, denatured alcohol, gasoline, and naphtha, for use as fuel:

1. Sales of any of these liquid fuels from the commissaries (at present, alcohol alone is offered for sale)

shall not be made in excess of one quart to any person at one time, and the containers in which sold shall have pasted thereon a warning label reading, as follows: (Name of Liquid Fuel)

POISON

DANGER!!

NOTICE

This container must be kept in a cool, well-ventilated place, removed from lights or fire. Lamps or burners must never be filled while lighted. Only one quart will be sold to a purchaser at one time.

2. Employees of The Panama Canal are forbidden to keep more than one quart of any one of the liquid fuels above listed in the quarters occupied by them, and will be expected to observe strictly the provisions of the warning label above quoted.

3. The Supply Department will see that there is posted conspicuously in kitchens and other places where liquid fuels may be used, a warning notice, printed on heavy durable paper or cardboard, reading, as follows:

WARNING NOTICE.

Alcohol, gasoline, benzine, naphtha, or kerosene are easily ignited. They must be kept in a cool, well-ventilated place, removed from lights or fire. Lamps or burners must never be filled while lighted. The pouring of any of these fluids on a lighted fire or live coals, or on inflammable substances which it is the purpose to ignite, is dangerous to life and is absolutely prohibited.

GEO. W. GOETHALS,

Governor.

Dentists.

THE PANAMA CANAL,
OFFICE OF THE GOVERNOR,
CULEBRA, C. Z., April 1, 1914.

CIRCULAR No. 622:

1. Dentists may be employed without salary, but will be privileged to charge certain fees for services, and will be entitled to privileges accorded employees on the gold roll. During the first two years of service, they shall be entitled to privileges and allowances of employees on the gold roll drawing eighteen hundred dollars a year, and after two years' satisfactory service may be assigned to the same class of quarters to which an employee drawing two hundred dollars per month is entitled. Office room and office furniture will be supplied by The Panama Canal.

2. In return for these allowances, they shall be subject to all the rules and regulations of The Panama Canal, and shall do dental work for employees of The Panama Canal and their families, and for employees of contractors for The Panama Canal, and members of their families, at rates to be fixed by the Chief Health Officer. These rates shall be posted conspicuously in each office, as follows:

FEE TABLE.

GEO. W. GOETHALS,

Governor.

Discipline.

THE PANAMA CANAL,
OFFICE OF THE GOVERNOR,
CULEBRA, C. Z., April 1, 1914.

CIRCULAR No. 606:

1. The Executive Order of February 2, 1914, provides:

SEC. 2. Service must be satisfactory to the head of the department in which employed, and employees are subject to the regulations of the Governor.

SEC. 9. Assignment to duty is vested in the respective heads of the departments, and employees will be expected to perform such duties as may properly be assigned to them. The Governor may discharge an employee at any time for cause

and terminate a provisional appointment when the exigencies of the service require.

GIFTS.

2. Section 1784 of the Revised Statutes provides: No officer, clerk, or employee in the United States Government employ shall at any time solicit contributions from other officers, clerks, or employees in the Government service for a gift or present to those in a superior official position; nor shall any such officials or clerical superiors receive any gift or present offered or presented to them as a contribution from persons in Government employ receiving a less salary than themselves; nor shall any officer or clerk make any donation as a gift or present to any official superior. Every person who violates this section shall be summarily discharged from the Government employ. (R. S., Act of February 1, 1870.)

LOANS FROM SUBORDINATES.

3. An employee who borrows money from another employee over whom he exercises supervision, control, or authority, will be subject to dismissal from the service.

LOTTERIES.

4. The selling of lottery tickets is forbidden by law in the Canal Zone. No person shall enter a building of the Canal administration, nor approach an employee at his work in any place, for the purpose of selling to him a ticket in any lottery or raffle whatsoever, no matter how worthy the purpose for which the lottery is intended.

DEBTS.

5. An employee must pay his just debts. Refusal to do so will be cause for dismissal.

SUSPENSION, REPRIMAND.

6. The head of a department may suspend an employee, or write a letter of reprimand or caution to him. In either case a copy of the order of suspension, showing period and cause, or letter of reprimand, should be sent at once to the office of the Executive Secretary, for the information of the Governor, and in order that it may be affixed to the personal file of the employee.

PROFANE AND ABUSIVE LANGUAGE.

7. The use of profane or abusive language by those in authority in addressing subordinates is forbidden. Violation of this rule will be sufficient cause for dismissal from the service.

COMPLAINTS TO SUPERIORS.

8. Officials and employees acting in supervisory capacity will hear complaints of subordinates, and, where within their power, will make a proper adjustment. Any complaints may be referred to higher authority, or an appeal may be taken to higher authority by an employee. Appeals to the Governor may be made only after decision by intermediary officials.

9. In formal administrative hearings or investigations, an employee affected may be present, and call and interrogate witnesses.

REDUCTION IN PAY.

10. The pay of an employee is determined by the character of his work, and under no circumstances will any infraction of discipline be punished by a reduction in pay.

PRIVATE USE OF GOVERNMENT MATERIAL OR LABOR.

11. An employee will work only for the Government during regular working hours. With the consent of the head of his department, division, or shop, he may do private work outside of regular hours, using Government tools or machines, provided these can be spared, and with the understanding that he will bear all expense of damages incident to his work.

12. Any employee who converts to his private or personal use or gain any material or supplies, the property of the United States, without proper written authority, shall be subject to discharge, and may be subject to prosecution. This refers both to new and used material. The use of such material or property, when not authorized to make improvements or changes in official quarters or grounds, will be considered private use.

13. No employee is authorized to use other employees under his supervision for personal errands or private work except on time for which the United States does not pay. When so used on outside time, the employee must pay for the service rendered. Violation of this order will, as in the past, subject the offender to immediate discharge and possible prosecution.

TRANSPORTATION MEN.

14. The Brown system of discipline was discontinued on March 1, 1914, and the discipline of transportation forces is now handled on the merits of each case. This is in accordance with the provisions of Panama Railroad Company joint transportation bulletin No. 29, of February 24, 1914.

NEPOTISM.

15. No persons related by blood or marriage may be employed in positions where the official authority of either can be used to the advantage of the other.

GEO. W. GOETHALS,

Governor.

LOST—Chagres Society pin, on Sunday, April 24, on trip from Cristobal to Paraiso and return. Finder please return to F. F. Stewart, Box 147, Cristobal, C. Z.

CANAL CLUBHOUSES.

Activities of the Young Men's Christian Association.

GENERAL.

The schedule for moving pictures May 4 to 9 is, as follows: Monday, Gatun; Tuesday, Culebra; Wednesday, Balboa and Pedro Miguel; Thursday, Corozal; Friday, Empire; Saturday, Cristobal.

The schedule for Miss MacLaren's imitative readings of "Peg o' my heart" is, as follows:

Tuesday, May 5, Cristobal; Wednesday, May 6, Gatun; Thursday, May 7, Culebra; Friday, May 8, Empire; Saturday, May 9, Pedro Miguel; Monday, May 11, Balboa; Tuesday, May 12, Corozal.

The dates for "The misleading lady" will be given in next week's CANAL RECORD.

A meeting of the directors of the public school athletic league of the Canal Zone was held at the Pedro Miguel Y. M. C. A. on Saturday, April 25. The following were elected officers of the league:

Mr. John E. Talbot, president; Mr. A. N. Kjellander, vice-president; Mr. H. Darnell Britton, secretary; Miss Marie E. Bayless, treasurer.

A constitution was adopted and a committee, consisting of Messrs. Warr, Britton, Kjellander, Talbot, and Dickson, was placed in general charge of the proposed athletic meet in June.

The allsthian duckpin tournament was finished on Saturday night, April 25, Cristobal winning the deciding game from Empire by three pins. The following is the standing:

	Won	Lost	P. C.
Cristobal.....	18	12	.600
Empire.....	17	13	.567
Pedro Miguel.....	16	14	.533
Corozal.....	16	14	.533
Culebra.....	15	15	.500
Gatun.....	8	22	.267

COROZAL.

The four-team local indoor baseball league has aroused much interest in the Corozal clubhouse. Two games were played Tuesday and Thursday evening of last week, when the Naps and Red Sox were victors over the White Sox and Cubs. Each team will play every other team three games.

The entertainment given Friday evening by the magicians, Olms and Nelly, was attended by a large audience.

The following are the scores made in the duckpin tournament on Saturday evening:

	Corozal.	Gatun.
Davis.....	79 93 106	Dumville... 80 83 89
Steele.....	79 83 96	Kiger..... 107 83 82
Thirsk.....	85 82 92	Conley..... 75 84 105
Kiley.....	80 76 85	Richardson.. 95 77 69
Parkis.....	97 90 79	Claherty.... 87 89 97
	420 424 458	444 416 442

PEDRO MIGUEL.

In the local ragtime duckpin tournament, 18 men are entered. The leaders up to date are, as follows:

High double score—Landers and Dougherty, 569. High individual score—Dougherty, 118.

Scores of 100 or more for the past week are: Davis, 102, 102; Landers, 102, 109, 102, 101; Vandeburgh, 105; Dougherty, 109, 118.

At the "Shipboard social" held on Wednesday evening, April 22, over 170 people attended. The social consisted of a program of games and a homemade lunch furnished by the ladies. The hall was decorated to represent a ship, with ship's signal flags, lanterns, port lights, and the captain's bridge arranged on the stage, with the steering wheel, bells, and wireless outfit. The officers were chosen for the good ship *Peter McGill*. During the intermission the first and second group of games, the luncheon, consisting of sandwiches, cake, sea biscuits, and grog was served. These social times will be made a regular affair each month.

On Friday evening from 5 to 7.30, there will be a May party held for all the children of Paraiso and Pedro Miguel. One feature of this party will be the May pole dance by the children.

CULEBRA.

High scores in duckpins for the past week were, as follows: Barnes, 106; Koperski, 100, 100; Schmack, 102; Ellsworth, Sr., 100, 101; F. Moore, 103.

On Wednesday night, April 22, the special reels of the "Passion play" were shown with three other reels. Mrs. E. S. Randolph furnished piano music.

The exhibition of the colored and sepia slides, "The political world in Christ's time," accompanied by a descriptive lecture, on Sunday night, April 24, was well attended. On Sunday night, May 3, the last set in the series, "The religious world in Christ's time," will be shown. All are invited.

A local handicap pool tournament with 12 entries will begin May 1.

A new supply of Culebra Y. M. C. A. pennants has been received. The price is 75 cents each.

EMPIRE.

The smoker held on April 23 was attended by 200

men. The following program was given: Music by Gray's orchestra; Mr. Cantor, soloist; Mr. Emery in a bit of nonsense; Mr. Burkett, reader; Herr Olms and Fraulein Nelly, magicians; Mr. Brennan, juggler; Schaeffer and McMahon, piano and songs; Mr. DeFeet, flying rings and hand-balancing; 10-minute wrestling between Mr. Conner and Mr. Jordan. Tobacco and refreshments were served.

On account of so many of the people moving from Empire it was thought best to hold a farewell reception at this time. A special program was prepared for Friday, April 24, and a special train was run from Panama to Empire and return. There was an attendance of 500 people, 200 coming from other towns. The following program was given: Music, by the Tenth Infantry band; invocation, Rev. H. R. Carson; violin solo, Mr. Waitehead; the Empire Y. M. C. A., Mr. H. A. A. Smith; solo, Mr. Cantor; the old days, Mr. W. W. Warwick; piano solo, Mrs. Randolph; soprano solo, Mrs. Emma Hume Arthur; greetings from Culebra Y. M. C. A., Mr. E. E. Lee; greetings from Gatun Y. M. C. A., Mr. W. C. Gayer. After the program, a general reception with refreshments took place on the lower floor.

In the last games of the present duckpin league the Empire team took two out of three games from the Cristobal team, the scores being, as follows:

Empire.....	429	444	448
Cristobal.....	438	439	451

GATUN.

A night of motion pictures and magic was held on Monday evening, April 27, when Herr Olms and Fraulein Olms performed feats of magic and illusion, and three reels of comic motion pictures were shown.

Through the generosity of one of the members of the Y. M. C. A., 50 of the children of Gatun were given tickets of admission on April 21 to see the motion pictures illustrating the "Life of Christ." There was also a good attendance of the older people.

The Gatun clubhouse has, as members, 64 per cent of the men now living in Gatun.

A matinee social was held by the boys' and girls' gymnasium classes on Friday afternoon, April 24. The program was, as follows:

Part 1.

1. Grand March.....Gymnasium classes
2. Conversational game.....Everybody
3. Indian club drill.....Girls' class
4. Violin solo.....Mr. F. G. Smith
5. Serenade.....Seventh and Eighth Grades
6. Vocal solo.....Miss Maude Cheatham
7. Vocal solo.....Morris Witt
8. Trio.....Alice Holbrook, Maude Cheatham, Lula Pullig
9. Recitation.....Miss Ethel Turner

Part 2.

1. Dumbbell drill.....Special Girls' class
2. Piano solo.....Miss Winnie Mae Stevenson
3. Vocal duet.....Morris Witt and Wm. Christian
4. Recitation.....Miss Maude Cheatham
5. Vocal solo.....Miss Marie Dirkes
6. Basketball song.....High school
7. Basketball game.....Boys vs. Girls
8. Trio.....Morris Witt, Marie Dirkes, Wm. Christian

Refreshments of homemade cakes, ice cream, and punch were served.

The result of the basketball game was a tie, score 4 to 4. The hall was decorated with American colors and college pennants. About 150 parents and friends of the boys and girls were present.

A class in "first aid" instruction as taught in the U. S. Army Hospital Corps will begin on Tuesday evening, April 28.

The Gatun Y. M. C. A. extends a very cordial welcome to the officers and men of the Tenth Infantry at Gatun to make use of the privileges of the clubhouse.

The "Musical five" scored a second victory when on Wednesday evening, April 22, the team defeated the "Multimillionaires" with a score of 24 to 4. The lineup was, as follows:

Musical Five.	Multimillionaires.
Smith, F. G.....	L. F..... Kerruish
Stutcliffe.....	R. F..... Griffith
Wright.....	C. G..... Godwin
Shepard.....	R. G..... Heslop
Conkerton.....	L. G..... Twitchell

Referee, Conley; timer, Gilbert; scorers, Sisson and Pentz.

Unusual interest was shown in the single folks' duckpin tournament on Monday night, April 20. The alleys were crowded with spectators, and 24 young people participated in the tournament. Winners were: Mr. D. V. Raymond and Miss G. Butler, with a score of 483.

The bowling alleys were recoated with shellac during the past week and the pool and billiard tables were recovered.

Captain Mowbray of the steamship *Colon* delighted a large audience at the discussion club on Thursday night, April 23, with an interesting account of his recollections of Colon twenty years ago. The captain also gave a brief outline of the laws governing ships

at sea. The meeting for May 7 will be the monthly current events meeting, at which will be discussed the Mexican situation and the Canal toll repeal Act, now before Congress.

The circus will be held on Friday and Saturday, May 15 and 16. The various gymnasium classes connected with the association will participate.

The C. A. C. team of the boys' department defeated the C. T. C. team, on Saturday April 25, taking two straight games of duckpins.

Team No. 1 defeated team No. 3 in the boys' indoor baseball league; score, 22 to 8.

The single men took five out of six games from the married men in a duckpin tournament on Wednesday night, April 22. The scores follow:

Married Men.	Single Men.
Pinney.....	86 82 92
Weaver.....	93 90 86
Claherty.....	83 94 80
Bullard.....	83 94 95
Collins.....	74 87 87
	79 85 83
Totals....	415 438 443
	83 97 84
	83 94 80
	98 90 94
	91 93 92
	96 95 75
	451 469 415

Married Men.	Single Men.
Scheid.....	89 87 76

Will of William Telfer.

FIRST JUDICIAL COURT,

ANCON, C. Z., April 20, 1914.

Notice is hereby given that the will of William Telfer who died in this circuit on the 16th day of November, 1913, has been presented by the Administrator of Estates for probate in the Circuit Court of the Circuit aforesaid, and the Court has appointed the 9th day of May, 1914, at 9 o'clock a. m., in the courthouse at Ancon for all to appear and contest the allowance of said will.

E. M. GOOLSBY,
Clerk of said Court.

COMMISSARIES.

The commissary stores are open during the following hours:

Cristobal, 8 a. m. to 12.30 p. m., and 2 to 7 p. m.
Balboa, 8 a. m. to 12.30 p. m., and 2.30 to 7 p. m.
Ancon, 8 a. m. to 1 p. m., and 3 to 6 p. m.
All others, 8 a. m. to 1 p. m., and 3 to 7 p. m.

Sale of Steam Launch and Gasoline Launch Engine.

Sealed proposals will be received at the office of the Chief Quartermaster until 3 p. m., Saturday, May 2, and then opened, for the purchase of the steam launch *Q.* and the gasoline engine taken from the launch *Pratique*. Full information concerning above can be secured upon application to the storekeeper at Balboa, at which point this equipment is open for inspection. Proposals must be accompanied by certified check, postal money order, or cash, for five per cent of the amount bid. Proposals should be marked "Proposals for the purchase of launch and engine," and addressed to Capt. R. E. Wood, Chief Quartermaster, Culebra, C. Z.

On Sale at Medical Storehouse.

THE PANAMA CANAL,
OFFICE OF THE CHIEF QUARTERMASTER,
CULEBRA, C. Z., April 24, 1914.

The Panama Canal has on hand at the medical storehouse at Colon a quantity of surplus supplies which are available for sale. These include medical and surgical supplies, medical books, beds, mattresses, pillows, and some articles of furniture. All will be sold at a reduced price. Prospective purchasers can inspect these supplies on Monday, Wednesday, and Friday afternoons. R. E. Wood,
Chief Quartermaster.

Examination by Board of Local Inspectors

THE PANAMA CANAL,
BOARD OF LOCAL INSPECTORS,
ANCON, C. Z., April 24, 1914.

The Board of Local Inspectors will conduct examinations at the Administration Building, Ancon, on Wednesday, May 6, beginning promptly at 2 p. m., for persons desiring the following classes of licenses: Pilots, masters, mates, marine engineers, chauffeurs, and navigators of motor boats. All applicants for licenses must procure from the office of the Local Board, Ancon, forms of application and information respecting the filling out of the same, not later than the day previous to the examination. In addition, all persons desiring chauffeurs' licenses must provide themselves with automobiles with which to demonstrate their ability properly to operate the same.

NOTE—The demonstration test for applicants for chauffeurs' license will be given on Tuesday, the day previous to the regular examination, at 2 p. m., at the Administration Building, Ancon; on Wednesday, the day of the regular examination, for out-of-town applicants, at 2 p. m., at the Administration Building, Ancon. No demonstration tests will be given at Cristobal, except by appointment.

HUGH RODMAN,
Chairman, Board of Local Inspectors.

Captain Rodman an Accountable Official.

THE PANAMA CANAL,
ACCOUNTING DEPARTMENT,
EMPIRE, C. Z., April 18, 1914.

All accountable officials—Effective this date, Capt. Hugh Rodman, Superintendent of Transportation, is designated as an accountable official.

H. A. A. SMITH,
Auditor, The Panama Canal.
Approved: GEO. W. GOETHALS,
Governor.

Total const. miscellaneous items.....		\$586,858.99			\$962,866.81			\$1,549,725.80	
148 Plant and equipment to be absorbed in construction costs after Dec. 30, 1913..								\$48,671.28	
Total expenditures misc. items.....								\$1,598,397.08	
Total construction expenditures ..								\$197,965,955.18	

Item 26 and 99—Charges to masonry in this quarter represent, to a great extent, work done in finishing, chipping, etc., and the cost has no direct relation to the yardage placed.

Item No. 57—Represents operation cement gun used in facing walls of cut.

Item No. 54.—Hydraulic Excavation—This work was done on the upper banks of the Canal north of Gold Hill.

Item No. 91—Hydraulic filling Miraflores West Dam—Expenditures represent cost of pipe lines, flumes, etc. 661,048 cubic yards have been deposited in the dam from dredges and hydraulic excavation in lock chambers and in prism below the locks. The expense thereof has been charged to "Excavation."

Items 113, 114, and 145—La Boca locks and dams—These expenses were incurred prior to the adoption of Miraflores as the site for the lower locks and dams at the Pacific entrance of the Canal.

Item 119—Preliminary work and dredging.

Items 143 and 147—Includes charges to plant account for this work.

Items 51, 58, 117, 133, and 148—The expenditures for Plant and Equipment are absorbed in the construction costs on the basis of the estimated cost of plant and the estimated quantities of work to be done. The amount under these items represents the balances which are to be absorbed into construction costs of December 31, 1913.

General—When excavated material is used for filling, such as dams, backfilling, etc., the cost of dumping only is charged to the item benefitted, other expenses being charged to "Excavation."

Due to changes in organization, this statement no longer represents the work done by the various construction divisions, the divisions shown thereon being geographical.

The Canal Record

Official publication of The Panama Canal.

The Canal Record is published weekly free of charge, one copy each, to all employees of The Panama Canal and Panama Railroad Company whose names are on the gold roll. Extra copies and back numbers can be obtained from the news stands of the Panama Railroad Company for five cents each.

Address all Communications,

THE CANAL RECORD,

Ancon, Canal Zone,

Isthmus of Panama.

No communication either for publication or requesting information, will receive attention unless signed with the full name and address of the writer.

NOTES OF PROGRESS.

Pontoon Bridge Swung Into Position.

The pontoon bridge over which trains are to cross the Canal at Paraiso was towed from alongside the Dredging Division's repair wharf to the site of the crossing, in the morning of Monday, May 4, and connected by its massive hinge to the abutment on the east bank of the Canal. It was later swung back into the recess excavated for it along the side of the Cut, and about 4.30 p.m. of the following day, Tuesday, May 5, it was swung across the Canal into the position it will occupy when in use. An attempt was made to tow the structure into position by steam and motor launches, but owing to the strong wind blowing their combined power was not sufficient to bring it around, and the services of a tug were enlisted.

The adjustments of the steel apron girders at the two ends, by which connection with the land approaches is effected; the electrical connections to the motors, by which the aprons will be raised and lowered, and to the motor which will actuate the machinery for swinging the bridge, were practically completed on May 5. The laying of the track on the aprons and on the trestle on the barge is in progress, and it is probable that the pontoon will be ready for train service about the first of the week. As soon as it is ready for use, work on the removal of old bridge No. 57½ will be begun.

Proposed Hospital for Cristobal.

Capt. R. E. Wood, Capt. L. P. Williamson, and S. M. Hitt have been appointed a committee to investigate and submit recommendations for a suitable site in Cristobal upon which to construct a new 50-bed hospital, with provision for future extension in case experience demonstrates the need thereof. Plans and specifications, and an estimate of the cost, are to accompany the committee's report. The proposed hospital is designed for the treatment of all emergency cases among employees at the Atlantic terminus, and of Panamanians in Colon and vicinity, who require treatment, as well as to take care

of the work at present done by the Cristobal dispensary.

In the meantime an arrangement has been approved whereby Panamanian citizens residing in Colon and vicinity may receive treatment at Colon Hospital at the same rates as are now charged at Ancon Hospital, and indigent Panamanian citizens will be admitted upon request of the authorized representative of the Republic of Panama, bills for the expense incurred in their treatment to be made against the Panama Government.

Offices of Port Captains Established.

The offices of the captains of the ports at Ancon and Cristobal, in the Panama Canal organization, were formally established on Monday, May 4. Two pilots, one gold clerk, and the silver force, formerly employed by the Panama railroad in this service, were taken over as of that date. The office of the captain of the port of Cristobal, Com. Douglas E. Dismukes, U. S. N., will be for the present in the rooms adjoining the quarantine office above the Panama railroad freight station, which were formerly occupied by the captain of the port at Colon. It is probable that later on a more suitable office will be constructed for this and other port purposes at Cristobal. The office of the captain of the port at Ancon, Lieut.-Com. H. V. Butler, U. S. N., will be for the present in the Panama railroad building at the Balboa wharves.

Second 15-Yard Dipper Dredge on Way to Colon.

The 15-cubic yard dipper dredge *Paraiso*, twin of the *Gamboa*, now at work in Culebra Cut, and built under the same contract, sailed from Port Richmond, New York, in tow of a tug, on April 26. No word has been received from the vessels since their departure. The voyage of the *Gamboa* from the same port to Colon consumed 26 days. The boom and two dippers of the *Paraiso* were shipped separately in advance; the boom has been delivered at the Paraiso shops, and one of the dippers has been placed in use on the *Gamboa*.

Prevention of Mosquito Breeding in Miraflores Lake.

Pipeline suction dredge No. 82, with about 1,000 feet of discharge pipe, mounted on pontoons, was transferred from Cucaracha slide to Miraflores Lake on Sunday, May 3, and has begun work south of Pedro Miguel Lock to supply spoil to a fill to be made in the area between the southeast wing wall and the Panama railroad embankment. This area includes the edge of the lake, and has a natural slope so gentle that slight fluctuations in the lake's surface make considerable variations in the shore line. This condition interferes with effective prevention of mosquito breeding.

An abrupt shore line, around the edge of the arm of the lake adjoining the village of Pedro Miguel, is being attained by excavation. During the recent lowering of the lake, forces of the Division of Municipal Engineering,

under work request from the Health Department, have been cutting a berm around the sides of the lagoon, leaving a vertical bank, so that when the lake rises to normal elevation, the water will be several feet deep at the shore. This will afford a regular shore line for oiling, and will give the benefit of wave action in the prevention of mosquito breeding.

Widening Streets of Panama at Sharp Corners.

Work of grading for street use a triangular plot at the junction of Sixteenth street and Central avenue, Panama, in order to relieve congestion of traffic and decrease the sharpness of the turn at this point, was begun by forces of the Division of Municipal Engineering on Saturday, May 2. This plot was formerly in the yard of St. Paul's Anglican church, and was recently acquired by the city of Panama by purchase. It is about 35 feet long, and the street will be widened accordingly, leaving a 4-foot strip, next to the present limit of the churchyard, for a concrete sidewalk. The area for vehicular traffic will be paved with vitrified brick, similar to the present paving of the adjacent streets.

Similar improvements are to be made at triangular corners on Nineteenth, Twentieth, Twelfth of October, and Third of November streets.

Canal Pilots.

The following arrangement has been approved in connection with the handling of applications for the position of Canal pilots:

The Washington office of The Panama Canal will handle all applications for the position of Canal pilot from the region of the Great Lakes, obtain as much necessary information in regard to their qualifications as practicable, arrange an eligible list in the order of merit, and submit it, through the Governor, to the Superintendent of Transportation on the Isthmus, accompanied by the full file of the applicant, to be returned later. The Washington Office will then make the appointments, when notified by the Governor to do so.

All other applications will be handled direct on the Isthmus by the Superintendent of Transportation. There are already on file a great many applications from employees on the Isthmus, from officers of the Panama Railroad Steamship Line, and from officers of other vessels running to Isthmian ports, most of whom the Superintendent has examined in person. The result is that ample material has been found for the complement of pilots that will be necessary for the opening of the Canal. In view of the large number of applications already received, and of the fact that they are still coming in, it is believed that there will be no difficulty in increasing the complement of pilots as the trade of the Canal warrants.

No applicant is considered eligible for ex-

amination unless he holds a master's license for the Great Lakes or ocean going vessels; he must be under 45 years of age, and an American citizen.

Visit of the "Montcalm."

The iron armored French cruiser *Montcalm*, L. G. Viaux, commander, the flagship of Admiral A. L. M. Huguet, commanding the French naval division of the Extrême Orient, with station at Saigon, Indo-China, arrived in Panama Bay on Wednesday, April 29, from Punta Arenas, Costa Rica, with the Admiral and his staff, consisting of Maj. M. M. E. Lagorio, Chief of Staff; L. A. Halter, chief mechanic; Mertian de Muller, division commissary, and A. M. J. Willm, *aide de camp*, on board. The vessel is about 460 feet long, has a depth of 27 feet, and is of about 9,000 gross tons. It has a complement of about 600 officers and men. The Admiral and party were presented to President Porras of Panama by the French Charge d'Affaires, M. Bizel, and later met Colonel Goethals, who furnished both the officers and men with every facility for seeing the Canal. The cruiser will sail on or about Thursday, May 7, for Talcahuano, Chile, returning to Callao, Peru, after which it will probably leave for its eastern station.

Explosion of Panama Powder Magazine.

Eight persons were killed, and about 15 injured, by the blowing up of the powder magazine located in an old stone building on the Corozal road, a short distance from its intersection with the Sabanas highway, at about 3.15 a. m., on Tuesday, May 5. One of the injured died on Wednesday, making the number of fatalities nine. The building is a relic of the early history of the city, and served during that period as a fortified outpost; it was a mamposteria built structure, surrounded by a wall, and was provided with watch towers, or turrets, and loopholes for firing at an enemy. For some time past it has been used as a storehouse for explosives, and was known as El Polverin. The explosives, consisting for the greater part of black powder and dynamite, were set off by a fire, the origin of which has not yet been clearly established. It communicated with a wooden lean-to attached to the building, and later, the roof of the main structure caught fire.

The concussion produced by the explosion was felt over a very wide area. It awoke the greater part of the inhabitants of Panama City, Ancon, and environs, and appears to have had almost as startling an effect in Culebra, Empire, and other towns on the Pacific slope in the Canal Zone. The shock was nearly as pronounced at Naos Island. The explosion completely destroyed the powder magazine, tore a great hole in the ground upon which it stood, and sent large pieces of rock several hundred yards away. It did considerable damage in shattering windows, and twisting doors in Panama and Ancon, and the soap factory, butter factory, Plaza de Toros, and other buildings in the vicinity of the magazine suffered severely. Windows were broken in the Administration Building at Ancon, and in nearly every house in the settlement, articles were shaken off the shelves, and in some cases the sleeping inmates were thrown from their beds.

The killed, with the exception of two, were

members of the Panama paid fire department, who were endeavoring to extinguish the fire when the explosion occurred. The two others were a man, who was employed as caretaker at the Plaza de Toros, and his wife, who lived on the premises. They had left their room and three children, and had gone into one of the boxes evidently for the purpose of witnessing the fire. They were killed by masses of flying rock, but the children escaped injury.

All the killed were given a public funeral Tuesday afternoon, and the procession was one of the largest ever seen in Panama. President Porras issued a decree proclaiming it a day of mourning in the Federal District, and calling upon business men to close their stores during the afternoon, a suggestion which was carried out to the letter. Flags were displayed at half mast on the public buildings, and at the offices of the foreign diplomatic representatives.

Annual Dinner of 1904 Men.

The seventh annual dinner of the members of the Society of the Incas, composed almost exclusively of Canal employes and others whose term of service with The Panama Canal and Panama railroad began during the year 1904, was held at the Hotel Tivoli on Saturday evening, May 2. The dinner, as usual, was in honor of the anniversary of the taking over of the French canal property by the United States Government, which took place on May 4, 1904. Although there have been numerous separations of 1904 men from the two services during the past 12 months, there were present 39 persons, only five short of the number at the dinner last year, representing about four-fifths of the 1904 employes still on the Isthmus. Mr. J. J. Meehan presided. The principal speaker was Judge H. A. Gudger, who described the events that led up to Panama's secession from Colombia on November 3, 1903. Mr. A. B. Nichols, on behalf of the committee appointed at the last dinner, to confer with Colonel Goethals, with a view of procuring his consent to allow the 1904 men still on the Isthmus to pass through the Canal on the first ship, reported that he had taken the matter up, but that the Colonel had considered it too early to make an announcement. The committee will continue to serve. Mr. A. B. Nichols was elected president of the society for the ensuing year, Mr. Milo C. Pratt was reelected secretary-treasurer, and Mr. J. J. Meehan was elected toastmaster for next year's dinner. By an unanimous vote, the following ladies were admitted to membership: Anna R. Turner, Marietta Meech, Mary Prial, Amy E. Todd, Eleanor Smith Albin, and Jessie M. Murdock. The members present at the dinner were: J. J. Moran, D. F. Donahue, J. S. Kirk, W. L. Power, R. W. Bergin, C. L. Bleakley, D. W. Dennis, R. P. Dixon, O. S. Boyd, D. E. McDonald, Henry Anderson, F. E. Moore, L. E. Dubois, C. C. J. Wirz, W. C. Haskins, J. J. Reidy, G. W. Wonson, C. L. Stockelberg, Max Herz, A. A. Lundishef, Frank Loulan, Numa Nunn, R. E. Laughlin, James Macfarlane, M. B. Connolly, Hartley Rowe, Dan E. Wright, R. H. Wardlaw, George Buchan, W. H. Davies, George M. Wells, Dr. M. E. Connor, J. J. Meehan, A. B. Nichols, Judge H. A. Gudger, M. C. Pratt, Dr. A. B. Herrick, Walter Emery, Chas L. Parker. Letters containing the well wishes of the society were ordered written to Gen. W. C. Gorgas and Mr. Tom M. Cooke, now in the United States.

EXECUTIVE ORDER

Establishing Regulations Relative to the Payment of Tolls and of Bills for Materials, Supplies, Repairs, Harbor Pilotage, Towage, and Other Services, Furnished to Vessels by The Panama Canal.

By virtue of authority vested in me under the Panama Canal Act, the following regulations, relative to the payment of tolls and of bills for materials, supplies, repairs, harbor pilotage, towage, and other services, furnished to vessels by The Panama Canal, are hereby prescribed:

1. The payment of tolls by vessels using the Panama Canal, and the payment for fuel and for other material and supplies sold, and for repairs, harbor pilotage, towage, and other services furnished by The Panama Canal to vessels, shall be made to the Collector of The Panama Canal at either the port of Balboa or Cristobal, except that deposits for tolls may be made with the Treasurer or an assistant treasurer of the United States to the official credit of the Collector of The Panama Canal, as authorized in Paragraph 6 hereof.

A vessel may enter Gatun Lake from either end of the Canal and may, without passing through the locks at the other end, return to the original point of entry of the Canal without payment of additional tolls.

2. All payments shall be made in lawful money of the United States, but, in order to facilitate such payments, drafts may be accepted for conversion into lawful money under the conditions provided for in Paragraph 5 hereof.

3. Payment of tolls shall be made, or fully secured as provided for in either Paragraph 5 or 6 hereof, before the vessel is allowed to enter any lock of The Panama Canal. All bills for materials, supplies, repairs, harbor pilotage, towage, and other services furnished by The Panama Canal to vessels shall be paid, or fully secured, as provided for in either Paragraph 5 or 6 hereof, before clearance papers are issued from the port of departure.

4. A certificate that the vessel is entitled to pass through the locks of the Canal may be issued to the officer in charge of the operation of the locks, and, if desired, to the master of the vessel by the Auditor of The Panama Canal. The Auditor shall certify that the tolls have been paid to the Collector, or that their payment has been secured as provided in either Paragraph 5 or 6 hereof, or that the vessel is entitled to passage. Before a vessel that passes through the Canal is cleared from the port of departure, all statistical data in regard to cargo and passengers required by the Governor of The Panama Canal shall be furnished to the Auditor, or arrangements to furnish same satisfactory to the Auditor, shall have been made through an agency on the Isthmus. When all bills are paid, or secured, as provided in either Paragraph 5 or 6 hereof, and the statistical data furnished or satisfactorily arranged for, the Auditor will issue a certificate to that effect to the port captain charged with the duty of clearing the vessel.

5. Unless, in the opinion of the Governor of The Panama Canal, payment in cash to the Collector of The Panama Canal is necessary for Canal purposes, drafts on banks in the United States under the supervision of the Comptroller of the Currency and otherwise satisfactory to the Governor of The Panama Canal, may be accepted for conversion into cash to effect payment of tolls and for bills for materials and supplies, repairs, harbor

pilottage, towage, and other services, provided the payment of such drafts is secured by deposit of high grade bonds with the official of The Panama Canal designated by the Governor of The Panama Canal, under the following conditions:

Bonds will be acceptable only from steamship companies having frequent sailings through the Canal, or from the agents of several vessels or steamship companies. The bonds deposited by any one agency or company shall be sufficient to cover the tolls on a minimum number of vessels, as fixed by the Governor of The Panama Canal. Bonds of the United States, the Philippines, Porto Rico, and the District of Columbia will be accepted at their par value. If otherwise satisfactory to the Governor of The Panama Canal, or his representative, bonds of the Hawaiian Territory, the Philippine Railway Company, and those of States, municipalities, and high grade railroads, such as are legal investments for savings banks in the States of New York, Massachusetts, Connecticut, or New Jersey, will be accepted at 90 per cent of their market value, but not exceeding 90 per cent of their par value.

The Governor of The Panama Canal may refuse to accept coupon bonds and may limit exchanges of bonds by depositors.

6. Steamship companies or agencies may make deposits to the official credit of the Collector of The Panama Canal with the Treasurer or any assistant treasurer of the United States to be applied in payment of tolls. The treasurer or assistant treasurer receiving a deposit will forward a copy of the receipt direct to the Auditor of The Panama Canal at Balboa, Canal Zone. The receipt shall specify the vessel or vessels the tolls on which are to be charged against the deposit. Upon request, a cable notice will be sent to the Auditor of The Panama Canal. Request in writing that cable notice be sent will be made upon the treasurer or assistant treasurer receiving the deposit. He will telegraph the Washington Office of The Panama Canal, giving the number and date of the certificate of deposit, the amount paid, and the vessel or vessels for which the deposit is made, and state that cable notice is requested. The cost of sending the cable will be paid by The Panama Canal and the fees prescribed for such services will be charged against the deposit. The Auditor of The Panama Canal will issue monthly a certificate of the amount of tolls and fees charged against deposits with the Treasurer or Assistant Treasurer of the United States. Upon such certificate the Collector of The Panama Canal will draw his check for the proper part of the deposits to be covered into the treasury as moneys received in payment of tolls, or as a credit to The Panama Canal funds, as the case may require.

7. A refund of any excess amount deposited in payment of tolls with the Treasurer or Assistant Treasurer of the United States will be made when the steamship company, or other agency making the deposit, ceases to act for the vessels passing through the Canal, or, when on notice to the Governor, the amount is to be withdrawn.

Application for refund shall be made to the Auditor of The Panama Canal who, upon approval of the Governor, will state the account and certify the amount to be refunded to the Collector of The Panama Canal, who shall then draw his check for the amount of the refund to be made.

8. The Governor of The Panama Canal

may prescribe such additional detailed regulations as may be necessary and proper.

WOODROW WILSON.

THE WHITE HOUSE,

April 16, 1914.

[No. 1917.]

PERSONAL.

Lieut.-Col. George D. Deshon, accompanied by Mrs. Deshon, arrived on the Isthmus on the *Turrialba*, on Thursday, April 30, to take up his duties as superintendent of Ancon Hospital.

Mr. Thomas Edwin Brown, Jr., associate justice of the Supreme Court of the Canal Zone, returned to Colon from a three weeks' special leave of absence, on the *Metapan*, on Wednesday, April 29.

Rebekahs to Move to Ancon.

Isthmian Canal Rebekah Lodge, No. 1, I. O. O. F., will move its lodge to the lodge hall in Ancon on May 14. Thereafter, meetings will be held in that place on the second and fourth Thursday evenings in each month, at 8.15 o'clock. Members are urged to be present at the meeting on May 14, or to send their addresses to the secretary, Mrs. S. E. Calvit, Corozal.

A Charity Donation.

A donation of \$50, Panamanian silver, has been made for charitable purposes in the Canal Zone, by Mr. G. M. Eichlon, through the alcalde of Panama, Mr. E. Adams V. The amount has been turned over to the Collector of The Panama Canal, and will be distributed by him, in accordance with Mr. Eichlon's wishes, as follows: Ten dollars to the chief of the police and fire division, for distribution among the prisoners at the Gamboa stockade; \$10 to the superintendent of Ancon Hospital, for distribution among the inmates of the insane asylum; \$20 to the Chief Health Officer, for distribution, \$10 among the inmates of the Palo Seco leper asylum, and \$10 for the helpless blind; and \$10 to be retained by the Collector in trust until such time as an association is formed for the purpose of organizing a fund for the erection of a monument in memory of those who have given their lives in the building of The Panama Canal.

Knights of Columbus Degree Work.

The New Jersey degree team of the Knights of Columbus, in charge of National Warden T. J. McLoughlin, arrived on board the *Alliance* on April 13. The team consisted of T. J. McLoughlin, E. J. Sweeney, J. F. O'Neil, George Cox, K. M. Ford, F. J. Moore, J. Kane, J. Slattery, F. Sexton, J. Rowe, J. Fitzpatrick, L. Hughes, and Hon. Allan B. Walsh, United States Congressman, from New Jersey. On Wednesday, April 14, they were the guests of Panama Council, who took them to Taboga Island and Old Panama; and on Thursday, April 15, through Culebra Cut. On Friday, April 16, they were the guests of Cristobal Council, who took them on a picnic to Fort San Lorenzo.

On Saturday, April 18, the fourth degree was exemplified at Cristobal, followed by a buffet lunch at the Strangers Club. On Sunday, April 19, the third degree was given to over 100 candidates at Cristobal, and in the evening a banquet was held at the Hotel Washington, with over 250 present.

The guests sailed for the United States on Monday, April 20, on the *Alliance*.

SOCIAL LIFE OF THE ZONE.

Church Notes.

The children of St. Luke's Sunday school, Ancon, were organized into a junior auxiliary of the missionary branch of the Episcopal church on April 22. The title of the society will be the St. Luke's Junior League. There were 16 children and two organizers present. The Sunday school room in the chapel will be used for the clubroom, and meetings will be held on Wednesday afternoons. The purpose of the auxiliary is to study and work for missions. A class in physical culture will be a feature of the work. The officers chosen are, as follows: President, Hazel Cummings; vice-president, Louise Dexter; secretary, Julia Heald; treasurer, Lillian Smith. The honorary president is the chaplain of the hospital chapel, the Rev. H. R. Carson.

The activities of St. Ferdinand's church, Empire, continue in spite of the changes that are taking place in the village. The priest in charge, the Rev. Father Allot, is in San Salvador at present and will be absent until about the middle of May. Various projects are under consideration for the future of the church, but these are dependent upon the return of the bishop of Panama, who is in Europe. It is possible that the church, with the parish house, will be removed to Guachapali, to be located on a site near the Panama Exposition grounds. St. Ferdinand's Society, composed of West Indians, will give an entertainment in the parish hall on May 30. The soldiers of Camp Otis will also hold an entertainment in the hall in May. The altar society of American women, assisted by the Catholic club, held a euchre party in the hall on Saturday evening, April 18. This was the first entertainment since the beginning of the Easter season.

Dr. A. P. Funkhouser, a minister and member of the commission engaged in the work of federating the Congregational, United Brethren, and Methodist branches of the Protestant church in the United States, was a visitor to the Isthmus during three weeks in April. He preached at Gatun, Pedro Miguel, Cristobal, and Empire. He preached in the Empire chapel in the morning and evening of Sunday, April 19, the Union churches of Empire and Culebra uniting in worship at that place. The Empire and Culebra congregations together adopted a resolution, sending greetings and best wishes of the Union Church of the Canal Zone to the new federation in the United States. At a later meeting in Cristobal, the local section of the Union Church ratified the resolution.

During the visit of Dr. Funkhouser, he was engaged by the Union Church of the Canal Zone to advise with the members of the executive council and local officers in regard to perfecting the organization of the church. The organization of the Union Church has so far advanced that negotiations are now pending, under which it is hoped that the church will soon call a pastor to be its religious head.

The Woman's Foreign Missionary Society of the Methodist Episcopal Church has arranged for a special meeting to be held in the church on Sunday morning, May 10. The speaker for the day will be Mrs. D. E. Fulton, for three years city missionary in Des Moines, Iowa, and state lecturer on temperance and related subjects. Mrs. Fulton will speak on domestic missions.

NEW HYDROELECTRIC STATION

Description of Building which Houses Equipment for Generating Power for Canal.

The hydroelectric station at Gatun Spillway, the gate control house at the spillway, the four substations of the transmission system at Gatun, Miraflores, Cristobal, and Balboa, and the three lock control houses, comprise the principal buildings connected with the actual operation of the Canal. These structures are designed on simple lines in harmony with the unbroken surfaces of concrete of the adjacent engineering works, and for the same reason are devoid of all modeled ornament; the plain wall surfaces are re-

towns and, if desirable, the power for the electrification of the Panama railroad.

The building which houses the station equipment is designed on the unit principal, to admit of future extension, and consists of a single room open to the roof, exposing the trusses upon which is laid the reinforced concrete roof slab, which, in turn, receives the red Spanish tiles. The walls are of poured concrete, 30 inches thick to the level of the crane rails, near the cornice. The exterior overhang of the main roof is 13 feet two inches and that of the monitor roof four feet eight inches, the exceedingly large projections having been generally adopted for all the perma-

ning to require a severe treatment of the structural materials in it. The dead surfaces of the concrete or stuccoed walls, which will probably be improved when weathered, are further relieved on the exterior by the red tile roofs. The principal field of ornament occurs in the soffit, or under side of the broadly projecting cornice, which is broken up into paneled coffers; a number of these contain light outlets which cast light down on the walls and throw the structure into strong relief at night. Interest also results from the breaking up of the large glass surfaces into smaller panes. Little wood is used anywhere, but for economy, it is utilized in the large side frames

WEST ELEVATION, GATUN HYDROELECTRIC STATION.

lieved only by the restrained mouldings of the bases and cornices, and architraves bounding the openings. This has the effect of enlarging the scale, or apparent size of the buildings, though they appear dwarfed by their proximity to large masses of concrete.

The hydroelectric station, illustrated herewith, with dimensions of 61 by 137 feet, and an extreme height of 74 feet, shelters the turbines which will generate the power for the operation of the machinery at the locks, machine shops, dry docks, pumping plants, and coal-handling plants. In addition, it will furnish light for the Canal and the Zone

buildings in the Zone as a shelter from tropic rains, as well as from the heat of the sun.

In few features of the exterior or interior can one of the historical styles of architecture be recognized in this structure, which is devoted to a use unknown a few years ago. Beyond a general use of tile for flooring, and an interior white enameled brick wainscot 14 feet high, to relieve the coarseness of the walls, there is no difference in the finish of the concrete surfaces within and without, the scale of the nearby spillway, the uses of the building, and its isolated position, all combi-

and sash, the end frames and sash being of iron.

The interior has four principal elevations, namely, a pit for the three 2500 K. V. A. turbines, a main floor, and two galleries. The turbine pit, with an area of over 2,100 square feet, is located six feet below the level of the main floor, and is reached from it by iron stairs situated alongside the turbines. From the pit, other stairs lead down to the store-room on the north side, and to the air compressor and oil pump compartments at the ends. The pit is lined with white enameled brick, which is not only attractive, but is adapted to the purpose of the space, where

cleanliness is a necessity. A 14-foot wainscot of the same material extends from the main floor to the first gallery elevation on the south wall of the pit, and the other parts of the room are, for the sake of harmony, treated with the same material. The simple pattern of the curb

are toilets in the southeast corner of the building, giving separate accommodations for white and colored employees. The walls are treated in enameled brick, similarly to the turbine pit, and the rooms are equipped with modern fixtures and separate shower compartments.

gitudinal axis of the building, terminating with the two large entrance doors at either end of the building. Easy access to railway cars is afforded by means of a track which enters this floor from grade through the northwest door, thus giving every facility for the

around the pit and the cap of the tile wainscot are illustrative of the decorative use of the brick.

Intermediate between the pit and the main floor, and reached by stairs from the latter,

The main floor divides into two parts, one being partitioned off and devoted to the use of the electrical equipment, and the other forming an uninterrupted passage on the long-

handling of heavy machinery by the 30-ton electric crane running the length of the building overhead.

Concrete stairways at either end of the

building give access to the mezzanine and second galleries, which are devoted to the

south corner are superimposed two smaller ones used as a machine shop, and an office.

It is expected that the station will be entirely ready to be turned over for operation

equipment was published in THE CANAL RECORD of July 3, 1912.

Elysium James Trust Committee Formed.

At a meeting of the Elysium James education committee, held at the Hotel Tivoli on April 17, action was taken on forming a board of trustees to handle the fund, now at interest in the treasury of the committee, to be used for the support of the blind boy on his return to the Isthmus. The names of the following were submitted and approved by the committee, and they will be the Elysium James trust committee: Lieut.-Col. Charles F. Mason, Dr. Charles A. Hearne, Mr. W. C. Todd, and the Cristobal Woman's Club, to be represented by its president. The

board will control the fund and disburse it for the use of the boy on his return to the Isthmus from the Perkins Institute for the Blind, Boston. In the event of the death of the boy before his return to the Isthmus, the board is empowered to use the money for philanthropic purposes on the Isthmus, preferably for the relief of some blind person, or persons.

Scores in Indoor Pistol and Revolver Matches.

The following are the results of the indoor championship pistol and revolver matches held at the range of the Ancon Pistol and

Rifle Club from April 18 to 26, inclusive:

Match A, any revolver, 50 shots—M. E. Woodward, 407; J. Bernson, 400; E. S. Maloy, 311.

Match B, pistol 50 shots—J. Bernson, 415; M. E. Woodward, 400; E. S. Maloy, 348.

Match F, pocket, 25 shots—M. E. Woodward, 160; E. S. Maloy, 132; J. Bernson, 128.

Match G, novice—E. S. Maloy, 191; Miss Shellie Duan, 181; D. T. Baker, 169.

Hotel Aspinwall, Taboga.

Families of employees are entitled to the employees' rate of \$2.25 per day, per person, at the Hotel Aspinwall, Taboga.

Launch tickets to Taboga are on sale at all P C hotels and the Hotel Washington.

OFFICIAL CIRCULARS.

Organization of Department of Operation and Maintenance.

THE PANAMA CANAL,
EXECUTIVE OFFICE,
CULEBRA, C. Z., April 27, 1914.

CIRCULAR No. 660-9:

GENERAL CONSTRUCTION DIVISION.

1. The forces engaged in sluicing at Gold Hill, grading and filling at the locks and dams, constructing Naos Island breakwater, and in connection with the construction transportation at the Atlantic end are hereby united as the General Construction Division, under the direct supervision of the Governor.

2. The Culebra section, engaged in lightening the banks by dry excavation, the Miraflores section, engaged in grading and filling, the Ancón quarry section, the breakwater and dump section at Balboa, and the water service section, each in charge of a general foreman, are under the supervision of General Superintendent G. A. Greenslade, reporting to the Governor. Headquarters, Culebra.

3. The Gatun section, engaged in grading and filling at Gatun and the inspection of the Caño saddle work, is in charge of Foreman John J. Walsh, reporting to the Governor. Headquarters, Gatun.

4. The Atlantic transportation section, in charge of construction transportation by rail for the Gatun grading and filling work and the east breakwater work, is in charge of Yardmaster R. E. Hopkins, reporting to the Governor. Headquarters, Gatun.

5. The Gold Hill sluicing section, engaged in sluicing north and south of Gold Hill, is in charge of General Foreman Harry McAdams, reporting to the Governor. Headquarters, Gold Hill.

GEO. W. GOETHALS,
Governor.

Organization—Electrical Division.

THE PANAMA CANAL,
OFFICE OF THE GOVERNOR,
CULEBRA, C. Z., April 16, 1914.

CIRCULAR No. 660-6:

1. Effective this date, the work of electric wiring heretofore carried on under the resident engineer of the Supply Department is transferred to the Electrical Division of the Department of Operation and Maintenance.

2. Transfer of employees engaged in this work is also effective this date.

GEO. W. GOETHALS,
Governor.

Examination, Treatment, and Care of Water Supplies.

THE PANAMA CANAL,
OFFICE OF THE GOVERNOR,
CULEBRA, C. Z., April 1, 1914

CIRCULAR No. 646:

1. These rules and regulations shall cover all regular, auxiliary, and emergency water supplies for domestic and industrial use under the jurisdiction and control of The Panama Canal.

ANALYSES.

2. A complete chemical, microscopical, and bacteriological analysis of the raw, untreated waters of all reservoirs or other sources of water supply shall be made at least once each month.

3. A bacteriological and microscopical report of all filtered waters, including the results of such examinations of the bacterial content, alkalinity, and color of both raw and filtered water shall be made each day.

4. A bacteriological analysis shall be made of condensed water, both as it goes from the condensers and in the distributing cart.

5. When any marked change of any nature occurs in the water supply it shall be reported at once.

6. The methods of analysis are to be those of the American Public Health Association.

CARE AND MAINTENANCE.

7. An inspection shall be made at least twice a month of all reservoirs and a report made thereon in writing, covering such matters as condition of water supply, manner of drawing water from reservoirs, and treatment of waters. The amount and character of chemicals to be used in treating water, and the method of applying the same will be subject to the supervision of the physiologist.

8. As little water as practicable will be allowed to flow over the spillways. When the water in the reservoir reaches the crest of the spillway, the main blow-off valves shall be opened upon orders from competent authority, and water from the lower parts allowed to escape until the level drops to a short distance below the spillway crest.

9. Water drawn from any reservoir for domestic use shall be taken from as near the surface as practicable.

10. Hunting and picnicking on reservoir watersheds, and fishing or boating on reservoirs is absolutely forbidden.

Custodians and others connected with water supplies will see that this rule is enforced. The Police Department will inspect all reservoir watersheds at least three times each month, at regular intervals, to prevent trespassing thereon.

11. The Department of Health shall submit to the Governor comments or recommendations based upon the reports regarding water supplies.

12. The head of a department shall report the use of water from any other than a regular source of supply. No new source of supply for domestic purposes shall be used, except after approval of the Division of Municipal Engineering.

GEO. W. GOETHALS,
Governor.

Requests for Manufacture of Material.

THE PANAMA CANAL,
OFFICE OF THE GOVERNOR,
CULEBRA, C. Z., April 1, 1914.

CIRCULAR No. 640:

1. In submitting work requests for the manufacture of material at shops operated by The Panama Canal, the following rules in regard to indicating thereon the time of delivery desired will be observed:

(a) When the material is required for future use the date on which it should be delivered will be stated on the request for each item.

(b) When material is urgently required the word "Rush" will be placed on the request. Such material will be worked on 16 hours per day (Sundays excepted), until completed.

(c) When an emergency exists that requires the completion of the material at the earliest possible date, the words "— hours overtime per day authorized" will be placed on the request, and if Sunday work is desired the words "Including Sundays" will be added. The overtime authorized per day will be in excess of the 16 hours worked by the day and night shifts.

2. If material cannot be finished by the desired date of delivery, even when worked on 16 hours per day, the Superintendent of the Mechanical Division will promptly notify the head of the department or division concerned and request instructions as to whether or not overtime is required.

3. Upon receipt of each work request the Superintendent of the Mechanical Division will determine whether or not the work covered by it can be completed by the date specified for its delivery without delaying the delivery of other work under previous requests. If the work cannot be finished within the time limit without delaying other work beyond the date fixed for its delivery, he will so inform the head of the division or department concerned and arrange for such extension in delivery on that or on some other work for that division or department as will enable specified dates of delivery to be met.

4. In case early delivery is required, one copy of form IC 159, with drawings, should be sent direct to the Superintendent of the Mechanical Division and that fact noted on the remaining copies, which will be sent to this office.

5. It is enjoined that future needs be anticipated as much as possible and that the date of delivery be fixed as far in advance as the uninterrupted prosecution of construction work will permit.

6. While sufficient employees will be kept on the night shift under the Mechanical Division to reduce overtime work to a minimum, it should be borne in mind that night work is generally more expensive than that performed in daytime; therefore, rush work should be requested only when necessary. For similar reasons, overtime, including Sunday, work should be required only in case of emergency, or when apparatus cannot be spared for repairs at hours other than during overtime hours and on Sundays.

GEO. W. GOETHALS,
Governor.

Recovery of Scrap.

THE PANAMA CANAL,
OFFICE OF THE GOVERNOR,
CULEBRA, C. Z., April 1, 1914.

CIRCULAR No. 633:

1. Inspections will be made under the direction of the Chief Quartermaster to see that all scrap is recovered around shops, power houses, engine houses, field repair shops, and localities where construction work is in progress or has been carried on.

2. The construction and shop forces are primarily responsible for keeping premises clean and seeing that all scrap and usable material is picked up and turned over to the Supply Department.

3. The district quartermasters, storekeepers, and material foremen of the Supply Department will call the attention of responsible officials of the construction and shop forces to any scrap or material that is not being picked up or properly handled, and if no action is taken within a reasonable time they will report the matter to the Chief Quartermaster.

4. No tracks are to be taken up, leaving scrap in an isolated locality where it will be expensive to recover.

In loading scrap in the field, a reasonable amount of care should be taken, so as to save the expense of unloading. For instance, rail and track fittings should not be loaded together on the same car unless in cases where only one carload of material is picked up.

5. Serviceable material, so far as practicable, should be kept separate from scrap and turned in to the nearest storehouse.

6. In handling scrap around shops, care should be taken, as far as practicable, to keep brass, babbitt, and iron and steel borings and chips separate. By mixing babbitt with brass borings, the value of the borings is reduced at least one cent a pound. By mixing iron and steel chips with brass borings, the value of the borings is reduced two or three cents a pound. Cast-iron scrap should be kept separate from other iron scrap.

7. Electric light, telephone, and power lines should be taken down as soon as no longer required.

8. Brass and copper should be kept in a secure place to prevent theft or loss.

9. In cleaning up around work, care should be taken to see that copper wire and small pieces of brass and copper scrap, and rope, hose, and scrap rubber are not picked up with dirt and thrown on the dump.

10. Track gangs should pick up all scrap, such as tie plates, bolts, rail, etc., collect same at some central point, and make shipments to Mount Hope at least once a month, or oftener if necessary. The track gangs on dumps should see that all scrap rail, car axles, and scrap of all kinds are picked up.

11. Scrap receptacles should be placed at all section houses on the main line of the Panama railroad, and section gangs should turn in all scrap recovered on or in the immediate vicinity of the right-of-way.

12. The powder foremen will see that scrap fuse wire used in excavation work is picked up.

13. Heads of the departments will see that their men are informed as to the value of scrap and that they understand the importance of taking care of it and keeping it picked up. The following is the approximate value of the various classes of scrap:

	Per pound.
Copper	10 cents to 15 cents
Brass	9 cents to 12 cents
Lead	4 cents to 5 cents
Rope	2 cents to 3 cents
Hose and rubber	1 cent to 3 cents

	Per ton.
Serviceable rail	\$20
Cast iron	\$12 to \$14
Steel and iron scrap	\$4 to \$12

14. In addition to scrap recovered there is always a portion of serviceable material which finds its way into the scrap pile. By keeping the scrap cleaned up, this material will be recovered and put back in service while it is still in a usable condition.

15. Scrap iron and steel cable, scrap galvanized iron pipe, and scrap galvanized iron roofing have no scrap value and no money should be spent in recovering them.

GEO. W. GOETHALS,
Governor.

Citizenship.

THE PANAMA CANAL,
OFFICE OF THE GOVERNOR,
CULEBRA, C. Z., April 1, 1914.

CIRCULAR No. 607:

1. The Executive Order of February 2, 1914, provides:

SEC. 6. All employees who receive over \$75 per month, or over 40 cents per hour, must be citizens of the United States, or the Republic of Panama, and such citizens will be given preference for employment in all grades. Aliens may not be employed in such grades unless

(a) They have occupied similar positions during the construction of the Canal for two years or more, or

(b) In case of emergency, in which latter case, they must be replaced by citizens of the United States, or Republic of Panama, as early as practicable.

NATURALIZED CITIZENS.

2. A foreign born citizen must establish his citizenship, as follows:

(a) If naturalized directly, he must submit his final certificate of naturalization.

(b) If naturalized by the naturalization of a parent during the minority of the employee, he must submit the certificate of naturalization of the parent.

(c) If a foreign born child of American citizens temporarily domiciled abroad, he must furnish affidavits of two disinterested citizens as to the facts claimed.

(d) Declaration of intention to become a citizen will not be accepted in lieu of a certificate of naturalization.

LABORERS.

3. Laborers who are American citizens shall be paid in gold. Timekeepers will stamp "American citizen," on pay certificates of all such employees, in order that they may be identified by the paymaster.

4. Irrespective of nationality, a laborer who accepts a position in the "Silver" classification will not be permitted to transfer to the "Gold" roll as long as he re-

mains in that position. Citizens of the United States and Panama will not be carried on the "Gold" rolls unless they have done work of the grade and character commonly performed by "Gold" employees.

CITIZENS OF PANAMA.

5. Employees who are citizens of Panama are entitled to certain privileges extended to American citizens, except that only those whose pay is in excess of \$75 a month or 40 cents an hour are entitled to annual, cumulative, and travel leave.

6. Decree No. 11 promulgated by the President of the Republic of Panama, February 22, 1909, states:

Article 1. Native Panamanians who aspire to be employed in the service of any of the official departments of the Canal Zone must previously present to this office (Secretary of Foreign Affairs of the Republic of Panama) their certificate of baptism, or a judicially acknowledged sworn declaration drawn upon stamped paper of the first-class, if such certificate is not available, by which the Panamanian nativity is established. The said certificate of baptism or judicial declaration will be exchanged at this office (*supra*) by a certificate setting forth the identity of the applicant.

Article 2. Naturalized Panamanian citizens who desire employment with any of the official departments of the Canal Zone shall address a petition to this office on which they must state the date on which they obtained their naturalization papers, and this office (*supra*) will then issue the corresponding certificate, attesting to the Canal Zone authorities their Panamanian citizenship by adoption.

Article 3. The office of the Secretary of Foreign Affairs shall keep a record of all certificates issued by it, in which shall be set forth all the details regarding the Panamanian citizens in whose favor they are issued.

7. No Panamanian will be appointed to a position on the "Gold" rolls until he has presented one of the two forms of certificate provided for in this decree. The certificate should be forwarded to the office of the Executive Secretary, attached to the application for increase of force or change of rating.

ALIENS.

8. Transfer from one department to another of an alien on the "Gold" roll, except a citizen of Panama, may be effected only after a statement of the reasons therefor has been approved by the Governor.

GEO. W. GOETHALS,

Governor.

Employment, Transfer, Promotion.

THE PANAMA CANAL,
OFFICE OF THE GOVERNOR,
CULEBRA, C. Z., April 1, 1914.

CIRCULAR No. 505:

AGE LIMITS.

1. The Executive Order of February 2, 1914 provides:

Section 1. * * * * * The age limit shall in all cases be under 45 years, but the Governor may waive this limit, when, in his judgment, such action is for the good of the service.

2. The minimum age limit for all positions (except physician, which is 22 years) is 20 years. The maximum age limit for entering the service for rodman, hydrographer, and physician is 30 years; fireman (fire department), policeman, hostler, locomotive engineer, trainman, nurse, levelman, transitman, 40 years.

PHYSICAL EXAMINATION.

3. Before entering the service on the Isthmus, employees on the gold roll must submit to a physical examination to determine their fitness for this service.

REEMPLOYMENT.

4. The employment of a person formerly in the Canal or Panama railroad service will be effected through the office of the Executive Secretary and the Washington office. Former employees will be subject to all conditions of employment in effect as regards new employees, except:

(a) The age limit will not be effective until after six months' separation from the service.

(b) One whose record in the Canal or Panama railroad service was "Excellent" or "Very good," as to workmanship and conduct, will be entitled to preference in employment, and his application will be placed on the list of preferred eligibles in the Washington office, provided the head of the department in which he formerly worked approves of his reemployment.

(c) Reemployment in positions in the classified civil service is subject to the general rule, that eligibility expires one year after termination of service.

(d) An employee who voluntarily leaves the service without giving five days' notice in advance to his immediate superior will be ineligible for reemployment for 30 days thereafter, and if reemployed may not be paid at a higher rate than he was receiving when he left the service.

WOMEN.

5. Women will be employed only in the following positions: Cook, at \$75 per month, or less; dietist, housekeeper, laundress, matron, schoolteacher, trained nurse, telephone operator, and saleswoman. Women for the position of clerk will be employed only on the Isthmus.

INTERDEPARTMENTAL EMPLOYMENTS.

6. No officer nor employee of one department shall offer inducements to an employee in another department to transfer, or to resign with the expectation of reemployment.

INTERDEPARTMENTAL TRANSFERS.

7. Transfers from one department to another may be made only with consent of the department from which the employee is to be transferred. The transfer will be effected through the office of the Executive Secretary, and must be approved by the Governor.

TRANSFER TO CLASSIFIED SERVICE IN THE UNITED STATES.

8. An employee who has occupied a classified position in the Canal service for three years or more may apply for transfer to a position in the classified service in the United States if at the time of application he has a classified status, i. e., has passed an examination for the position occupied and has been certified. The employee himself must make the arrangements for transfer.

ARTISANS.

9. An Executive Order of February 18, 1913, provides:

All artisans, citizens of the United States, who are now, or who may hereafter be, in the service of the Isthmian Canal Commission, and who have rendered one year's satisfactory service on the Isthmus of Panama, and who may be recommended, upon discharge, for transfer, may be transferred within three years to corresponding positions in the classified service under the several Executive Departments and independent Government establishments, without examination, subject to the other provisions of the civil service rules.

10. To be entitled to the benefits conferred by this Executive Order, an employee must fulfill all of the following requirements, viz:

(a) Have worked in the Canal or Panama railroad service in a position covered by the term "Artisan."

(b) Be a citizen of the United States.

(c) Have been in the service on or subsequent to February 18, 1913.

(d) Have rendered one year's satisfactory service, part of which may have been rendered prior to February 18, 1913.

(e) Have been discharged on account of "Reduction of force" or "At his own request" (that is, by resignation, and not "For cause.")

(f) Be specifically recommended for transfer to a corresponding position in the classified service under the several Executive Departments and independent Government establishments in the United States.

DUTIES TO CORRESPOND WITH RATINGS.

11. An employee is assigned to a certain position in the authorized organization, and the position is rated as worth a certain wage or salary. When the work he is doing is changed in nature, the employee must be transferred to a position corresponding to the work to be done, and the change will be noted on the organization records in the office of the Executive Secretary.

12. Especial care must be observed in applying this rule to artisans, because they are employed to do a definite class of work. When there is no work for an artisan in his special class, he may be assigned temporarily to other work for which he is qualified and where his services are needed, and if he is either not competent or is unwilling to do the work of another class, he will be discharged.

HOURS OF WORK.

13. The Executive Order of February 2, 1914, provides:

Section 11. Employees whose salaries are fixed on a monthly or annual basis will receive no pay for overtime work.

Section 12. Employees above the grade of laborer, appointed with rates of pay per hour, or per day, will not be employed over eight hours in any one calendar day, except in case of emergency. The time such employees work over eight hours in one calendar day, and time worked on Sundays and regularly authorized holidays, including January 1, February 22, May 30, July 4, Labor Day, Thanksgiving Day, and December 25, shall be considered overtime for which time and one-half will be allowed. Such employees who work on the days prior and subsequent to the holidays specially named above, will be allowed their regular pay for eight hours for such days, in addition to pay for any work performed.

Section 41. Office hours and hours of labor will be fixed by the Governor within the limits prescribed by law.

14. Hours of work will remain unchanged for the present.

15. Variation in hours of work must depend upon the exigencies of the service, but as far as possible these hours must be regular, and not subject to change from day to day arbitrarily in the discretion of officials or employees in supervisory capacities.

PROMOTIONS.

16. (a) Efficiency in the particular position to which an employee is to be promoted will be given first consideration in the making of promotions. Seniority will be a secondary consideration.

(b) No promotions, or other changes in rating, shall be made while an employee is on leave of absence, or is

absent on account of injury or sickness through no fault of his own.

(c) Promotion to a position in which the former incumbent has resigned with accrued leave shall not be made until 30 days after the end of the former incumbent's service.

(d) An employee temporarily assigned to perform the duties of a man in a higher grade who is absent on vacation leave with pay, or on sick leave with pay, shall not be allowed the salary of the higher position, except that an artisan on an hourly basis, temporarily performing the duties of a foreman, may be transferred to the monthly basis with foreman's pay to avoid excessive overtime.

(e) When an employee is absent without pay for more than 30 days, the substitute assigned to perform his duties may be paid the usual entrance salary of the position during such temporary assignment.

GEO. W. GOETHALS,

Governor.

Transfer and Marking of Rolling Stock and Other Equipment.

THE PANAMA CANAL,
OFFICE OF THE GOVERNOR,
CULEBRA, C. Z., April 1, 1914.

CIRCULAR No. 665:

REQUESTS FOR TRANSFERS.

1. Requests for transfer of equipment chargeable to plant account and of shop machines, between the various departments and divisions of The Panama Canal and between The Panama Canal and the Panama Railroad Company, will be submitted to the Governor of The Panama Canal, on form PC 299-1, seven copies to be forwarded for each request. This procedure is not required on transfers within departments and divisions of The Panama Canal or the Panama Railroad Company, or for items not chargeable to plant account.

ACTION TAKEN ON REQUESTS.

2. The surveying officer is charged, under my direction, with investigation and recommending action to be taken on requests for the transfer of equipment.

INVOICING OF EQUIPMENT.

3. Equipment belonging to the Panama Railroad Company that is loaned to The Panama Canal will be covered by memorandum receipt taken from the department or division of The Panama Canal using it. Equipment belonging to The Panama Canal that is loaned to the Panama Railroad Company will be invoiced to the Depot Quartermaster, who will in turn obtain memorandum receipt therefor from the Superintendent of the Panama Railroad Company.

MARKING EQUIPMENT.

4. Equipment owned by The Panama Canal, such as cars, locomotives, and other rolling stock, hand and push cars, also floating equipment, will be lettered "U. S.," while equipment owned by the Panama Railroad Company will be lettered, "P. R. R." Such "U. S." equipment as is loaned to the Panama Railroad Company should be further marked with a yellow ball, while "P. R. R." equipment loaned to The Panama Canal should be marked with a white diamond, with letter showing department or division in whose service the same is operating, these letters to be indicated from from time to time by the surveying officer.

CONDEMNED CAR BODIES.

5. Box cars or other car bodies removed from condemned cars, and utilized for other service such as sleeping quarters, tool storage, or other similar purposes, shall be stenciled "I. & C.," showing that the same have been inspected and condemned as cars.

REPORTS OF EQUIPMENT.

6. The Superintendent of the Panama Railroad Company and the head of each department and division of The Panama Canal having Panama Railroad Company equipment in its possession will submit a monthly report to the Chief Quartermaster on S. D. form 61, showing this equipment by classes and numbers. Form S. D. 61 will also be submitted monthly to the Superintendent of the Mechanical Division, with copy to the Chief Quartermaster, by departments and divisions of The Panama Canal, showing numbers and classes of Panama Canal equipment in their service, and the Panama Railroad Company will submit a monthly report on the same form, showing all Panama Canal equipment in its service, to the Superintendent of the Mechanical Division, furnishing copy of the same to the Chief Quartermaster.

TOOLS ON EQUIPMENT.

7. Each unit of equipment, wherever practicable, shall have a complement of tools, and such complement of tools shall be transferred with the equipment and be charged to the employee having the custody of the equipment. All tools assigned to any piece of equipment will be properly branded, showing to what piece of equipment the same is assigned, unless it is determined that this is impracticable in any particular case.

RECORD OF EQUIPMENT.

8. Copies of all forms S. D. 4, covering transfers of plant units, copies of all completed surveys, covering

demolition, destruction, dismantling, or return to stock will be submitted by the accountable officers to the Chief Quartermaster as soon as the transfer or other change of status in equipment is effected, so that the permanent equipment record will at all times be complete.

CHARGES FOR REPAIRS AND DEPRECIATION.

9. For use of equipment belonging to The Panama Canal permanently assigned to the service of the Panama Railroad Company, and reversely, a monthly charge shall be made, based upon the annual depreciation and repair rates established for such equipment. The cost of repairs of equipment belonging to The Panama Canal shall be paid by it and charged against the reserve for repairs; likewise, the Panama Railroad Company shall pay the bills for repairs to its equipment. When one interest performs work for the other, the regular rates for depreciation and repairs on equipment used shall be charged. No equipment will be dismantled or remodeled so that it loses its identity, without securing an approved survey request.

TRANSFER PRICES.

10. All equipment will be transferred from one custodian to another at the value at which it is taken up in the accounts of the transferer. After equipment is taken up in the accountability records, the value at which it is carried will remain unchanged.

EQUIPMENT SECURED FROM STOREHOUSE FOR OBSOLETE MATERIAL.

11. This circular does not apply to the obtaining by departments and divisions of articles in the storehouse for obsolete material of the Supply Department, which articles will be secured by making formal requisition for the same on form PC 907 in like manner as other supplies received from that department.

TRANSFERS EFFECTED ON ORAL AUTHORITY.

12. Transfers effected by oral authority of the Governor must in every case be confirmed by formal request on form PC 299-1, which will be submitted by the division receiving the equipment. No transfer will be considered as officially authorized until this shall have been done.

GEO. W. GOETHALS,
Governor, The Panama Canal,
President, Panama Railroad Company.

Supply Department.

THE PANAMA CANAL,
OFFICE OF THE GOVERNOR,
CULEBRA, C. Z., April 17, 1914.

CIRCULAR No. 600-7:

PLUMBING.

Effective at once, all plumbing work in connection with buildings of The Panama Canal will be performed by the building division of the Supply Department.

Any transfers of force necessary in carrying out the above will be arranged at once by the departments concerned.

GEO. W. GOETHALS,
Governor.

*Rates of Pay, Silver Roll.

THE PANAMA CANAL,
OFFICE OF THE GOVERNOR,
CULEBRA, C. Z., April 1, 1914.

CIRCULAR No. 666:

1. Effective May 1, 1914, all employees on the silver roll of The Panama Canal or Panama Railroad Company shall be rated as hereinafter shown. These ratings and rates of pay have been prepared with a view to limiting the maximum pay that can be given to this class of help, without the necessity of obtaining prior authority, and to eliminating, so far as possible, all unnecessary ratings. It is also desired to establish a uniform rate of pay for work of a similar nature in different departments and divisions.

2. An employee's rating shall in all cases correspond with his duties. Where it is considered desirable to pay a higher rate or to use a different rating than shown each case should be taken up separately and authority secured to use the higher rate of pay or different rating. It is thought that the ratings and rates of pay hereinafter shown will be sufficient to meet all ordinary requirements, and no changes should be requested unless absolutely necessary, in order to make the employee's pay commensurate with the work done, or to make the rating correspond with the duties performed.

3. An appointment or a reappointment shall not be made at a higher rate of pay than that authorized as the maximum entrance salary for the class of work to be performed, without special approval from the Governor. Unless otherwise specified, the maximum entrance salary shall be the lowest rate of pay given under the authorized ratings, and roll timekeepers must see that new employees are not started at higher rates unless special authority has been obtained. However, an employee may be regularly transferred from one department, division, or gang, to another without reduction, and an employee, absent for not more than 30 days, with the prior consent of competent authority in his department or division, or an employee discharged on account of reduction of force or lack of work, may be reinstated within 30 days, at his former rate of pay.

4. All employees leaving the service, or transferring from one department, division, or gang, to another, with the exception of Boys A, Laborers A, and Laborers B, will be furnished with "Silver employees service slips," form No. PC 262-2, properly filled out.

5. Office timekeepers will see that no employee is carried on the rolls who does not comply with these rules.

6. The maximum monthly rate of pay for silver employees shall be \$60, U. S. currency, except where special authority has been granted to pay a higher rate. The monthly silver rates of pay are intended for those employees whose hours of work are more or less irregular, or whose time it would be difficult to check up on an hourly basis. The rate of pay per month shall not exceed the pay which would be received for the number of hours worked at the hourly rate of pay established for the same class of work. Whenever practicable, an hourly rate should be applied in preference to a monthly rate. The following table shows the corresponding monthly amount, at the different standard hourly rates of pay, based on eight, nine, ten, and twelve hours work per day:

STANDARD RATES OF PAY.
(U. S. CURRENCY.)

5 cents	\$10.20
7 cents	14.28
10 cents	20.40
12 cents	24.48
15 cents	30.60
16 cents	32.64
18 cents	36.72
22 cents	44.88

7. Unless otherwise specified, employees will be required to serve at least three months before being promoted to a higher grade. Promotions shall always be made to the next higher grade.

8. In all timebooks, and on all payrolls, the designations used will be Laborer A, Laborer B, Laborer C, Helper, Artisan A, Artisan B, or Artisan C, as the case may be. The term "Artisan" will cover the various ratings as shown under this heading.

9. When necessary to change the rate of pay of an employee to make it agree with the rates given hereinafter, the next lower rate should be used; provided, however, that promotion may be made to the next higher authorized rate after at least three months have elapsed.

10. The standard hourly rates of pay for silver employees shall be five cents, seven cents, ten cents, twelve cents, fifteen cents, sixteen cents, eighteen cents, and twenty cents, U. S. currency. The duties to be performed under each grade are, as follows:

11. *Boy A—Five cents per hour*—This is the entrance rate of pay for all boys (including water, shop, and messenger). They may be promoted to Boy B at seven cents per hour after six months' satisfactory service.

12. *Boy B—Seven cents per hour*—This rate can be used as the entrance rate only in cases where prior authority has been obtained from the Governor's office.

13. *Laborer A—Ten cents per hour*—This will cover all common labor, except as hereinafter specifically authorized.

14. *Laborer B—Sixteen cents per hour*—Only white labor is included in this class. Whenever it becomes necessary to employ laborers, it is desired that colored labor, at 10 cents per hour, be used whenever and wherever practicable.

15. *Laborer C—Thirteen cents per hour*—This is a special rate and can be used only where the work is specially difficult, extra hazardous, or particularly disagreeable, as work that requires the men to be in mud continuously, caisson work, cleaning sewers, etc. Prior authority must be obtained in each case where it is considered necessary to use this rate, and a statement should be furnished showing the nature of the work to be performed and the approximate length of time that this class of labor will be required.

16. *Helper—Twelve cents per hour*—This rating can be applied only to those performing the duties of helpers to shop or other mechanics, such as machinist, car repairer, carpenter, plumber, etc.

17. *Artisan A—Fifteen cents per hour*—Those employees performing the duties of shop, building construction, and other mechanics and artisans, shall be given this rating. It is the standard rate of pay for this class of help and shall be the maximum entrance rate for artisans. This designation covers employees performing the following services:

Blacksmith, boilermaker, carpenter, car repairer, calker, cement finisher, coppersmith, drill runner, ironworker, lineman, machinist, mason, molder, painter, pipefitter, pressman, planing mill hand, plumber, upholsterer, wireman.

18. *Artisan B—Eighteen cents per hour*—Artisans can receive this rate only after demonstrating that the

quantity and quality of their work is such as would, in the opinion of the foreman in charge, entitle them to a higher rate than Artisan A. Promotion shall not be made in any case until after six months' satisfactory service. This designation covers employees performing the same services as under Artisan A.

19. *Artisan C—Twenty-two cents per hour*—This rate of pay shall be given only to those artisans whose services are particularly satisfactory, and who show an especial fitness for the work performed. Under no circumstances shall an employee be given this rate of pay until he has served at least one year in the lower grades. This designation covers employees performing the same services as under Artisan A.

DESIGNATIONS AND RATES OF PAY.

HOURLY RATES.

Artisan A, 15; B, 18; C, 22 cents per hour.

(NOTE—For explanation of duties to be performed under this designation see Paragraphs Nos. 17, 18, and 19.)

Bookbinder, 25 cents per hour.

MONTHLY PAY EQUIVALENT TO DIFFERENT
HOURLY RATES. SUNDAYS NOT INCLUDED.

8 hrs. daily, 204 hrs. per month.	9 hrs. daily, 230 hrs. per month.	10 hrs. daily, 255 hrs. per month.	12 hrs. daily, 306 hrs. per month.
\$10.20	\$11.50	\$12.75	\$15.30
14.28	16.10	17.85	21.42
20.40	23.00	25.50	30.60
24.48	27.60	30.60	36.72
30.60	34.50	38.25	45.90
32.64	36.80	40.80	48.96
36.72	41.40	45.90	55.08
44.88	50.60	56.10	67.32

Boy A, five; B, seven cents per hour.

(NOTE—See Paragraphs Nos. 11 and 12.)

Cementman, 13 cents per hour.

(NOTE—This rate shall apply only to men handling dry cement in cars and cement sheds.)

Checker, 20 cents per hour.

Compositor, 20 and 25 cents per hour.

Concrete man, 13 cents per hour.

(NOTE—This rate shall apply only to men handling concrete materials to mixers, and to men placing concrete in forms.)

Diver, 20 and 44 cents per hour.

Helper, 12 cents per hour.

(NOTE—For explanation of duties to be performed under this designation see Paragraph No. 16.)

Laborer A, 10; B, 16; C, 13 cents per hour.

(NOTE—For explanation of different grades see Paragraphs Nos. 13, 14, 15.)

Laundress, eight, nine, and 10 cents per hour.

Laundryman, 10, 12, 15, 18, and 22 cents per hour.

Operator (crane), 16 and 20 cents per hour.

Packer (female), seven cents per hour.

Paper cutter, 20 cents per hour.

Pitman, 13 and 16 cents per hour.

Rigger, 13 cents per hour.

Rubber stamp maker, 25 cents per hour.

Shoemaker, 16 cents per hour.

Scythe man, 13 cents per hour.

MONTHLY RATES.

Attendant, \$15, \$20, \$40, \$45.

(NOTE—The rate of \$40 is exclusively for morgue attendants, and the rate of \$45 is exclusively for operating room attendants, and also laboratory attendants, working in filtration plants.)

Baker, \$37.50, \$50, \$75.

Barber, \$25.

Boatman, \$25, \$30, \$37.50.

(NOTE—This rating is for the crews of cayucas and row boats only.)

Boatswain, \$45, \$55.

Boy, \$10, \$12.50.

(NOTE—Water boys and shop boys shall be employed at hourly rates only. Cabin boys and mess boys shall be rated as waiters.)

Cableslicer, \$60, \$75.

Captain: Dredge, \$100, Clapet, \$85, Steam launch, \$75.

(NOTE—Masters will be known and rated as captains; ratings above \$75 per month are for white employees only.)

Cartman, \$30, \$35.

Cemeteryman, \$32.50.

Chainman, \$30, \$37.50.

(NOTE—The \$37.50 rate is only for employees required to work on both land and water.)

Chainman, foreman, \$45.

Checker, \$40.

Clerk, \$30, \$35, \$40, \$45, \$50, \$60.

Coalman, \$30.

Coalpasser, \$40.

(NOTE—Coalpassers shall be employed only on sea-going dredges.)

Cook, \$20, \$25, \$30, \$35, \$40, \$45, \$50, \$60, \$75.

(NOTE—The maximum entrance rate for cook on

marine equipment in the Dredging Division is \$40. In all other cases the maximum entrance rate shall be \$25.)
 Dairyman, \$25, \$30.

Engineer:

Marine (dredge), \$67.50, \$75.
 Marine (clapet), \$65, \$75.
 (steam launch), \$75.
 Steam, \$30, \$35, \$40, \$45, \$50, \$55, \$60.
 Farrier, \$40, \$50.

Fireman, \$25, \$30, \$35, \$40, \$45, \$50, \$60.

(NOTE—The maximum entrance salary for fireman on dredges, tugs, and clapets shall be \$45; for fireman at the Cristobal power plant \$40; and for standard gage locomotives \$35.)

Foreman, \$25, \$30, \$35, \$40, \$45, \$50, \$60.

(NOTE—The maximum entrance rate for white foreman shall be \$50.)

Gardener, \$30.

Helper, \$10, \$12.50, \$15, \$17.50, \$20, \$25.

(NOTE—The designation 'Helper' will apply to cooks' helpers, kitchen helpers, scullions, scrubbers, and other employees performing helpers' duties for which distinct designations are not provided.)

Hostler, \$25, \$30, \$35, \$40.

Janitor, \$17.50, \$20, \$25, \$30.

Janitor, head, \$37.50.

Laundress, \$15, \$17.50, \$20, \$22.50, \$25, \$30, \$35.

Laundryman, \$25, \$30, \$35, \$40, \$45, \$50.

Luggerman, \$25, \$30, \$35, \$40, \$45.

(NOTE—The rating of luggerman shall be confined to men handling ice, meat, and other cold storage.)

Maid, \$12, \$15.

(NOTE—The \$15 rate shall be confined to maids at the Ancon insane asylum and the quarantine station on Culebra Island.)

Mate:

Dredge, \$80.

Clapet, \$75.

Messenger, \$17.50, \$20, \$25, \$30, \$35, \$40.

(NOTE—The maximum entrance rate for messengers shall be \$25.)

postal money order deposits, or any other moneys due them, should be presented at that office at once, in order that the estate may be settled as soon as possible. All claims should be itemized, sworn to before a notary public, or other public officer having a seal, and submitted in duplicate. These names will be published but once:

CANAL CLUBHOUSES.

Activities of the Young Men's Christian Association.

GENERAL.

The Porto Bello clubhouse was closed on May 1. The equipment attached to this building will be stored by the depot quartermaster at Mount Hope until final decision is made as to disposition of the clubhouse.

The schedule for moving pictures for the week of May 11 to 16 is, as follows: Monday, Empire and Balboa; Tuesday, Culebra; Wednesday, Corozal; Thursday, Pedro Miguel; Friday, Cristobal; Saturday, Gatun.

Miss MacLaren will give an imitative recital of "The misleading lady" on the following dates, at the towns indicated: Wednesday, May 13, Cristobal; Thursday, May 14, Gatun; Friday, May 15, Empire; Saturday, May 16, Culebra; Monday, May 18, Corozal; Tuesday, May 19, Pedro Miguel; Wednesday, May 20, Balboa.

The feature motion picture, "Hiawatha", in four reels, will be shown on the following dates: May 8, Corozal; May 9, Gatun; May 11, Cristobal; May 12, Pedro Miguel; May 13, Empire; May 14, Culebra. A date for Balboa will be announced later.

Messrs. Davis and Sims of the Corozal and Empire duckpin teams are tied for high average in the tournament just closed, each having an average of 95.23; this tie will be rolled off to decide the winner.

Work on the playground systems is now being actively carried on. Tennis courts are in process of construction at Cristobal and Pedro Miguel, and the preliminary grading for the baseball diamond at Pedro Miguel has been finished.

Messrs. Warr, Brittain, Kjellander, and Dwell have been appointed to take general charge of the proposed public school athletic meet, to be held in the latter part of June.

COROZAL.

High scores in tennis for the past week were, as follows: Parkis, 215, 207, 208, 210, 203; Thirsk, 218, 214.

In duckpins, high scores were, as follows: Thirsk, 105; McDonald, 101; Dunlop, 104; Parkis, 103; Ruggles, 100; C. Sims, 108.

The standing in the local indoor baseball league is, as follows:

	Won	Lost	P. C.
Red Sox.....	3	0	1.000
Naps.....	2	2	.500
Cubs.....	1	2	.333
White Sox.....	0	2	.000

Colored slides illustrating a lecture on the political and social world in Christ's time were shown on Sunday night, May 3. Mr. Whitehead, accompanied by Mrs. Strong, gave two violin selections.

PEDRO MIGUEL.

Interest is being manifested by the men in the local ragtime duckpin tournament. High score in doubles was made by Murray and Whiston, 587, and high in singles, by Dougherty, 118. The high scores for the past week were: Orr, 116, 111, 100; Davis, 113, 101; Murray, 102, 110, 108; Braw, 110, 101; Nicholson, 104; Vandeburgh, 104; Whiston, 100, 113.

The high scores made by the ladies in the new rubber banded duckpin were: Mrs. Landers, 123, 103, 122, 114; Mrs. Fostrom, 109, 107; Mrs. Grover, 102; Mrs. Hensecker, 102; Mrs. Thibault, 101.

In the boys' duckpin tournament, the single high score was made by Pfisterer, 109.

On Friday evening, May 1, 120 of the children from Paraiso and Pedro Miguel attended the May party. After a number of games, and a generous lunch, a May-pole dance was given by about 80 of the children.

A "Smoker" was given on Wednesday evening for the men of Paraiso and Pedro Miguel. The program included selections by Gray's orchestra; parallel bar stunts by Williams and Russell; comic songs, with guitar accompaniment, by De La Mater; magical acts, by Olms; comic songs, by Shaeffer and McMahon; illuminated club swinging, by Williams and Russell and juggling by Brennan.

CULEBRA.

High scores in duckpins for the past week were, as follows: Ellsworth, Sr., 100, 109, 121; DeCorra, 107; Wood, 101; Palmer, 108; Wittman, 104. Mr. Ellsworth won the prize for high score for the month, with a score of 121, and R. Koperski won the second prize, with a score of 110.

A checker club is being organized. All interested in this game are requested to hand their names to either Mr. Rattimer, or Mr. Wilson, who will furnish information as to dates of meeting, etc. The first meeting is to be held on Wednesday night, May 6.

On Wednesday night, April 29, an entertainment of magic and illusion was given by Herr Olms and Fraulein Nelly, which was attended by 140 people. Two moving pictures were also shown.

A local tenpin tournament will begin soon. All who

are interested are requested to practice.

Arrangements are being made for an anniversary celebration on May 20, 21, and 22. Moving pictures with special features, Miss MacLaren and a special anniversary and farewell program, respectively, on the dates named, will be the attractions. A souvenir program, illustrated, with a brief history of the seven years' existence of the association is being prepared for each member of record on May 12. The names of all members on this date will be included in the program, and it is requested that all who are interested enroll their names with the secretary at once. Memberships will be transferable to other clubhouses when Culebra is abandoned.

There was a good attendance at the service on Sunday night, May 3. Slides showing the religious world in Christ's time were thrown on the screen, as well as songs which were sung by the congregation. The program for next Sunday night will be announced during the week.

GATUN.

"Among the pygmies and cannibals of the Congo," will be the subject of a lecture to be given by Mr. S. P. Verner at the Gatun clubhouse on Monday evening, May 11. The lecture will be illustrated with about 100 views of the interior of Africa. The charge for admission for adults will be 25 cents; for children, 15 cents.

Mr. Carl Neiderstadt, a German medical student, who is traveling through South American countries on foot, gave a talk on first aid work to the boy members of the first aid class, on Saturday afternoon, May 2.

Mr. J. King, a private in the Tenth Infantry, will assist in the lectures which are being given each week to members of the senior first aid class. Army first aid work will be demonstrated. The first aid class meets one hour before the regular gymnasium class every Tuesday evening. Any member of the association, or the Tenth Infantry, is invited to join.

Indoor hockey is at present the most popular game among the members of the gymnasium classes.

The boys of the gymnasium class have organized two separate clubs. This has been done for the purpose of competition in basketball, baseball, hockey, and general athletics. Essex Griffith is captain of team No. 1, and Francis Loulan of team No. 2.

The "National duckpin tournament" was organized on Thursday evening, April 30. Mr. B. B. Dumville, is president, and C. V. O'Meara is secretary-scorer. The tournament began on Monday evening, May 4, and will run for a period of two weeks. Each team will play every other team twice. The first prize to be presented to the winning team will be a pennant. A pennant will also be given as a booby prize. There are four teams of six men each, as follows:

Pirates.	Red Sox.	Superbas.	Tigers.
Dumville	Conley	Richardson	Coleman
Walsh	Easter	Kiger	O'Meara
Walker	Wright	Rogers	Gray
Roberts	Farley	Gilbert	Ottman
Kerruish	Jenkins	Sutcliffe	Cotton
Oram	Arthur	Baxter	Smith, F.

The first man mentioned in each of the above lists of players is captain of the team.

The "Old time indoor baseball tournament" will be formed on Thursday evening, May 7. It is expected that about six teams will enter. On the same evening, those interested in handball will meet and arrange for a handball tournament.

The play, "Peg o' my heart," given by Miss Gay Zenola MacLaren on May 6 was largely attended. Miss MacLaren will give a return engagement on May 14, for which reserved seats are now on sale.

Thursday evening, May 7, will be observed as "Ladies night" in the bowling alleys. There will be a contest between teams composed of men and women.

A "One week pool tournament" will be held in the near future.

Bathing suits of various sizes have been ordered from the United States and will soon be on sale.

Photographs of the various gymnasium classes have arrived and are ready for distribution.

The activities of the clubhouse have greatly increased on account of the patronage of a large proportion of the two companies of the Tenth Infantry, now stationed at Gatun. The soldiers have received a hearty welcome from the older members of the association. It is expected that they will enter several teams in the various athletic contests.

Mr. John VanDyke has been appointed instructor of the violin in the educational classes being conducted by the Gatun Y. M. C. A. Mr. VanDyke will be at the clubhouse on Thursday of each week from 1 p. m., until 10 p. m.

Former members of the Porto Bello Y. M. C. A., now living in Gatun, are invited to transfer their membership to the local association. Wives of the members who work nights are privileged to receive complimentary tickets for all entertainments.

CRISTOBAL.

Mr. A. R. Lang, superintendent of public schools,

addressed the discussion club on Thursday night, April 30, on the present trend in schooling toward vocational and cooperative education. He drew attention to the Fitchburg and Beverly systems, and stated that the present trend is toward fitting studies to the future requirements of the pupils.

Owing to the crowded schedule for this week, the current event meeting will be postponed until May 14.

High duckpin scores for the week were: Gill, 128; D. Raymond, 123; Archie Gibson, 121; G. Scheid, 108; Smith, 107; Parker, 104; Russell, 102.

A local 3-men team duckpin tournament was started on Monday, May 4, and is to end the latter part of June. The teams are, as follows:

Athletics—Smith, Drew, Page; Cubs—Gill, Weaver, Prager; Senators—Pinney, Wright, Ross; Cardinals—C. Cotton, Nash, Levy; Giants—Russell, Margon, Hines; Red Sox—W. Scheid, M. P. Bevington, C. Scheid; Yankees—D. Raymond, Patterson, Bevington; Dodgers—Collins, J. Gibson, Aanstoots; Tigers—Parker, G. Butters, Robertson; Pirates—Steele, E. Cotton, Briggs.

The Corozal indoor baseball team defeated the Cristobal team on Saturday evening, May 2, by the score of 17 to 10.

Following is the tentative program for the Cristobal circus, which will be held on Saturday, May 16: Grand parade; free hand exercises; the snake; singing games—(a) I see you; (b) Did you ever see a lassie? (c) Let the feet go tramp, tramp; the sleepy tramp dumb bell drill; Luke McGlue, champion wrestler; spring board leaping; scene in a Canal Zone barber shop; athletic drill; the hunting season; military tactics; the first boat through the canal; folk dancing; electric battery; triple horse exercises; rough riders; couple barn dance; honey bee; illuminated club swinging; Maud, the wonderful trained mule; parallel bar pyramids; scene in a bachelor house; equilibrists and tumblers; blowing up of the Gaubon dike; grand final-foot races, chariot races, horse races, etc.

BALBOA.

A brass check number has been found and turned in at the desk. The one losing it can procure same on application to the secretary.

The passion play was shown at the local clubhouse on Friday, night, May 1. Music was furnished by Mr. S. C. Fagard of Panama.

Mr. A. R. Lang, superintendent of schools, will give a talk before the discussion club on Friday night, May 8. All the men of Balboa are invited to attend and hear him.

Miss Gay Zenola MacLaren will make her first appearance at the Balboa clubhouse on Monday, May 11, presenting an imitative recital of "Peg o' my heart."

Six teams have been entered in the league pool tournament so far. F. Brugge and J. Dubendorf are leading, having won two and lost none.

Tide Table.

The following table shows the time of high and low tides at Panama for the week ending May 16, 1914:

DATE.	Low	High	Low	High	Low
	A. M.	A. M.	A. M.	P. M.	P. M.

May 16.....	2 22	8 34	2 56	8 58

75th meridian time.

Withdrawal of International Insurance Company from Canal Zone.

The International Insurance Company (Compañia Internacional de Seguros) of Panama, has advised the Executive Secretary of its intention to withdraw from the business of underwriting fire insurance in the Canal Zone. All persons having any claims against the company arising from policies issued by it upon property in the Canal Zone, or who hold the company's policies upon property located in the Zone, are requested to communicate with the office of the Executive Secretary, Ancon, C. Z.

Administrator's Sale.

OFFICE OF THE ADMINISTRATOR OF ESTATES, ANCON, C. Z., May 4, 1914.

The Administrator of Estates will sell to the highest bidders, certain diamond rings, watches, stickpins, and other jewelry, fountain pens, and safety razor blade stropers, belonging to the estate of the late John S. Wilcox, deceased. These goods may be seen any day in this office. Bids will be accepted upon the whole lot, or upon single pieces. No bids will be received after May 20. The Administrator reserves the right to reject any or all bids.

JOHN K. BAXTER,
Administrator of Estates.

COMMISSARY DEPARTMENT.

Seats in the Commissaries.

Seats have been placed in all of the commissaries for the benefit of lady patrons waiting for their orders to be filled.

Suggestions from Commissary Patrons.

The following circular letter has been sent out by the district quartermasters to the wives of employees on the gold roll in each Canal Zone settlement, inviting them to submit suggestions relative to improvements in the commissary service:

MADAM: The Supply Department includes the former Quartermaster's Department and Commissary and Subsistence Departments. To the end that the best service may be extended to employees, the Chief Quartermaster has directed me to request suggestions from patrons as to the best method of improving the service. It will, therefore, be considered a favor if you will kindly reply to the following questions relating to the commissary.

1. Can you suggest any improvement in the delivery service, or in the service within the Commissary?
 2. What articles that you wish to purchase from the commissary are not carried in stock, or are out of stock at the present time? Have you any suggestion as to changes in varieties or brands of goods sold?
 3. Is there any discrimination against or in favor of individuals; if so, in what way?
 4. Have you anything else to suggest by which you think the service would be improved?
- Replies may be handed to the order men, or mailed to the district quartermaster. This request is made solely for the benefit of the service, and it is hoped that patrons will respond in the same spirit.

A large number of replies have already been received, and a summary of the more important suggestions will be published in a future issue of THE CANAL RECORD.

Sale of Ice to Silver Employees.

THE PANAMA CANAL,
SUPPLY DEPARTMENT.

CULEBRA, C. Z., April 28, 1914.

To all concerned—Under the present rules, American employees on the silver roll are permitted to purchase ice. This privilege will, effective May 1, be extended to all European laborers, and to all employees on the silver roll at Cristobal and La Boca. Ice sold to silver employees will be ordered through the commissary storekeepers and must be called for at commissary platform.

R. E. WOOD,
Chief Quartermaster.

Fancy roasting, corn fed, about 4½ pounds, each	1.00
Fowls, each	1.10
Ducks, Western (about 4½ pounds), each	1.10
Capons, about 8½ pounds, each	3.00
Broilers, milk fed, each	75
Broilers, corn fed, each	60
Turkeys, per pound	28
Squabs, each	50
Ducks, Teal, each	40
Partridges, per pair	1.30
Grouse, per pair	1.30
Pheasants, per pair	1.30
CURED AND PICKLED MEATS.	
Ham—Real York and Cumberland, per pound	37
Genuine Westphalia, per pound	40
Sugar cured, per pound	20
Sliced, per pound	22
Half (for boiling), per pound	21
Boiled, per pound	28
Hocks, per pound	18
Beef, salt, family, per pound	12
Bacon, breakfast, whole piece, per pound	25
Sliced, per pound	26
Ham, lunch, per pound	32
Pork, salt, family, per pound	14
Ox tongue, each	1.10
Pigs' feet, per pound	7
Tongue, per pound	18
DAIRY PRODUCTS.	
Butter—Creamery special, per pound	32
Sheffield Farms, extra fancy, per pound	46
Cheese—Philadelphia cream, cake	10
Roquefort, per pound	35
Young America, per pound	24
Swiss, per pound	27
Edam, each	75
Edam, tin	25
Parmesan, per pound	35
Gouda, per pound	30
Snappy, per cake	*9
Milk (certified), per bottle	*20
Fer-mil-lac, per bottle	*20
Ice cream, quart	25
½-gallon	150
Cream (certified), per pint bottle	45
VEGETABLES AND FRUITS.	
Beets, per pound	3½
Celery, per head	9
Cabbage, per pound	*2½
Carrots, per pound	3
Green onions, per pound	8
Lettuce, per pound	7
Onions, per pound	5
Potatoes, white, per pound	3
Potatoes, sweet, tropical, per pound	2
Yams, per pound	2½
Parsnips, per bunch	2½
Squash, per pound	4
Turnips, per pound	2½
Tomatoes, per pound	*10
Spinach, per pound	*6
Apples, per pound	9
Grape fruit, American, each	9
Tropical, each	4
Lemons, per dozen	*13
Pineapples, Cuban, each	13
Oranges, Jamaica, per dozen	16

*Indicates reduction from last list.

**Indicates five cents allowed for return of bottle.

†Indicates advance on last list.

††Fowls weigh each, about, as follows: 3, 3½, 4, 4½, and 5 pounds. Prices are based accordingly; when size ordered is not in stock, next lightest weight is supplied and refund note sent for difference.

‡Sold only from commissaries; no orders taken for delivery.

§Not less than half of a fresh ham or shoulder will be sold.

MOVEMENTS OF OCEAN VESSELS.

Panama Railroad Company's steamers sail from Piers 8, 9, and 11, Cristobal, at 3 p. m.				
Royal Mail steamers leave for New York on alternate Tuesdays at 2 p. m.; for Southampton, on alternate Tuesdays at 10 a. m.				
United Fruit Company's ships for New Orleans direct, leave on Thursdays at 3 p. m.; for New Orleans, via Bocas del Toro and Havana, on Thursdays at 4 p. m.; ships for New York, via Kingston, on Thursdays at 2 p. m.; for New York direct, on Wednesdays at 2 p. m.; for Limon and Bocas del Toro on Saturdays at 4 p. m. and for Bocas del Toro direct, on Thursdays at 4 p. m. The Boston-Colon service has been discontinued.				
The Hamburg-American steamers <i>Prinz Eitel Friedrich</i> and <i>Prinz Sigismund</i> sail for New York, via Kingston and Fortune Island, on Mondays at 10 a. m.; the <i>Prinz August Wilhelm</i> and <i>Prinz Joachim</i> sail for New York, via Kingston, Santiago de Cuba, and Fortune Island, on Tuesdays at 10 a. m.				
Movements of Vessels, Port of Balboa.				
The following ships arrived at, or departed from, the port of Balboa, during the week ending May 2:				
Arrivals—April 4, <i>Rupanco</i> , from intermediate ports; <i>Luz Blanca</i> , from Talara, Peru; April 27, <i>Ucayali</i> , from Callao, Peru (P. S. N.) from Callao; April 28, <i>San Juan</i> , from San Francisco, <i>Columbian</i> , from Honolulu; April 29, <i>Montcalm</i> , (French warship); April 30, <i>Nevadan</i> , from Honolulu; May 2, <i>Salvador</i> , from Central America.				
Departures—May 27, <i>Pachita</i> , to Callao, <i>Limari</i> , to Valparaiso, <i>Luz Blanca</i> , to Talara; May 28, <i>Tricolor</i> , to Puget Sound.				

The Canal Record

Official publication of the Panama Canal.

The Canal Record is published weekly free of charge, one copy each, to all employees of The Panama Canal and Panama Railroad Company whose names are on the gold roll. Extra copies and back numbers can be obtained from the news stands of the Panama Railroad Company for five cents each.

Address all Communications,

THE CANAL RECORD,

Ancon, Canal Zone,

Isthmus of Panama.

No communication either for publication or requesting information, will receive attention unless signed with the full name and address of the writer.

NOTES OF PROGRESS.

First Operation of Gatun Control Board.

The first test operation of the control board at Gatun was made on the morning of May 9, when the entire west locks were used, and all machines operated from the control board. The test lockage was made, however, without a vessel.

The 1,000-foot chamber was used as for the passage of a vessel of the largest size.

The water in the middle level was 28.1 feet, and the lower lock was at sealevel, at the start of operations. The upper lock was then filled to lake level by opening rising stem valves Nos. 260 and 261, each valve being opened half, and then opened to the full. At 10.05 a. m., the lock was filled to lake level, and the upper guard and operating gates were opened to the lake. The lock was then ready for the entrance of the vessel, except that the fender chains, which are not yet actually installed, are to be lowered before a vessel can enter. After the entrance of the boat the chains must again be raised before the gates can be closed.

The upper gates were closed at 10.15 a. m., after the theoretical vessel had entered the lock. The lockage was then carried on step by step, as shown on the accompanying log of operations, just as for a vessel.

One of the principal features of the control board is the system of indicators, which show at each instant the position of the machine while in operation. The miter gates were represented by leaves in miniature, which moved over a blue marble slab representing the water in the chamber. The rising stem valves were represented by a shutter moving in back of an illuminated glass screen. The water levels were shown on the control board by indicators made with a scale of one inch to the foot, as described previously in THE CANAL RECORD.

An important feature of the control board is the interlocking rack, which definitely fixes the sequence of all operations and prevents the operator from error of performing operations in wrong order. The operator cannot

lower the fender chains until he has opened the miter gates. He cannot let water into a lock until the gates and valves at the lower end are closed, and similarly, he cannot let water out of the lock until he has closed the gates and valves at the upper end of the lock.

The time of the test lockage was one hour.

LOG OF OPERATIONS.

The record of the mimic lockage, all operations being performed from the control house, was, as follows:

Elevations before starting:

Lake, 47.7, Elevation 85.
Upper level, West, 56.6, Elevation, 71.6.
Middle level, West, 41.7, Elevation, 28.1.
Lower level, West, 42.9, Elevation, .4.

Operations:

9.42. Rising stem valve No. 260, opened half way.
9.45. Rising stem valve No. 261, opened half way.
9.59. Rising stem valve No. 261, opened all the way.
10.01. Rising stem valve No. 260, opened all the way.
10.05. Gates Nos. 40 and 36 opened.
10.05½. Gates Nos. 39 and 35 opened.
10.14½. Gates Nos. 40 and 36 closed.
10.15. Gates Nos. 39 and 35 closed.
10.15. Rising stem valve, No. 260 closed.
10.16. Rising stem valve No. 261 closed.
10.19. Rising stem valve No. 249 opened.
10.25. Gate No. 27 opened.
10.25:30. Gate No. 28 opened.
10.25:30. Rising stem valve No. 248 opened.
Middle level equalized at 70.4, elevation, 56.8.
10.33. Gates Nos. 23 and 24 opened.
10.37. Gates Nos. 28 and 24 closed.
10.37:30. Gates Nos. 27 and 23 closed.
10.42. Rising stem valve No. 248 closed.
10.43:30. Rising stem valve No. 249 closed.
10.48. Rising stem valve No. 226 opened.
10.51. Rising stem valve No. 227, opened.
11.03. Levels equalized at 73.5, elevation, 28.2.
11.05. Gates Nos. 15 and 16 opened.
11.07. Gates Nos. 15 and 16 closed.
11.07:30. Rising stem valve No. 226, closed.
11.08:30. Rising stem valve No. 227 closed.
11.14. Rising stem valve No. 210 opened half way.
11.25. Rising stem valves Nos. 210 and 211 opened all the way.
11.35. Gates Nos. 7 and 8 opened.
11.38. Gates Nos. 7 and 8 closed.
11.41. Gates Nos. 3 and 4 closed.

Suspension of Steamshovel Work at Rio Grande.

All steamshovel work in connection with the terracing of the west bank of Culebra Cut between Rio Grande and Culebra village is to be completed not later than June 15, and all construction tracks north of Rio Grande will be removed. A part of the spoil taken from this excavation is being used in making an embankment fill to the east of the Miraflores spillway channel, in order to protect the land in this vicinity which includes Corozal farm, and the village itself, from inundation, in case of a sudden rise in Miraflores Lake and an unusually heavy flow over the spillway.

Porto Bello Post-office Discontinued.

The post-office at Porto Bello, known as Station A, Cristobal, was closed as of April 30. It was established as an independent office on July 1, 1911. Its record month in stamp sales was October, 1911, when the total amounted in value to \$76. The largest money order business for one month was

September, 1911, when the value of the orders issued aggregated \$6,573.44. The amount on deposit in postal savings accounts at the time of the discontinuance of the office was \$3,244. These accounts have been transferred to the Cristobal post-office, where they will be closed out.

Precaution Against Plague.

Acting under the authority conferred on him by Section 129 of Decree No. 14 of 1913 of the Republic of Panama, dated March 15, 1913, the Health Officer of Panama condemned during the month of April, 129 structures in the city of Panama, and served notice on the owners to remove them, or make such alterations as will cause them to conform to the building regulations. In the majority of cases the buildings are not worth repairing. Most of them are small one and two-story dwellings, in which the menace to public health lay in their harboring rats, in the walls, or under the floors. The building regulations require single walls, and that the ground floor be of concrete, or of flooring laid directly on concrete.

In connection with these operations, the Health Officer is causing rats to be caught daily in various parts of the city, and at Balboa, and examined for infection with bubonic plague. So far, all examinations have been negative in this respect. The presence of plague at Manta, Ecuador, which is within 48 hours of Panama, and of the reported outbreak at Calamar, Colombia, makes these operations of additional importance at this time, and the authorities of Panama, as well as the property owners, are cooperating with the Health Officer very satisfactorily.

Removal of Empire Suspension Bridge.

Pursuant to a circular from the office of the Governor, published on another page of this issue of THE CANAL RECORD, the suspension bridge over Culebra Cut at Empire will be taken down at once. Traffic over this bridge was suspended during the forenoon of Wednesday, May 13, and the work of dismantling it has been assigned to General Superintendent George A. Greenslade.

The erection of the structure was begun on March 11, 1909, under the supervision of A. S. Zinn, formerly resident engineer in the old Central Division, and it was formally opened to public traffic on July 31 of the same year. It was the first bridge to be constructed across Culebra Cut, and was designed not only to furnish a means of communication between the east and the west sides of the Canal, but also to carry the compressed air and water mains over the Cut. It was built with a view of being taken down before the opening of Canal navigation, as its height above the water line is only 108.5 feet, and, therefore, would not clear the masts of the larger vessels. The towers are 60 feet high, built of creosoted timbers; the cables are of 2½-inch galvanized steel, two on each side, with a combined

length of 3,480 feet, and capable together of withstanding a strain of 2,480,000 pounds. The span is 600 feet, and the width of the roadway seven feet. The foundations at each end are built of reinforced concrete resting on the rock bank of the Cut, which, at this point, has always retained its compactness.

During the height of steamshovel work in the Cut at Empire, and before the depopulation of the Zone was begun, there was a large amount of traffic over the bridge. It served the Las Cascadas plantation road extending toward the eastern boundary of the Zone, and of a number of trails leading from this road into the interior. The removal of the structure will cause a diversion of what remains of this traffic north and south, north as far as Gamboa, when the new Empire-Gamboa road is opened to use, and south to Panama by way of the Canal Zone highway to Paraiso, Pedro Miguel, and Corozal.

Ancon Crusher.

Following is a statement of rock crushed at Ancon quarry during the four weeks ending May 9:

DATE.	Hours worked.	Cubic yards.
April 13.....	7.20	2,020
April 14.....	8.05	1,921
April 15.....	8.00	1,896

Rates on United Fruit Company's Vessels.

The General Agent of the United Fruit Company advises that, effective May 1, the rate granted to Panama Canal and Panama railroad employes on direct *à la carte* steamers to New York has been reduced to \$45, without meals. This rate entitles passengers to any available accommodations on the steamer, except rooms with private bath, and suites. The rate of \$56.25, including meals, to employes, on the regular Thursday sailing to New York, via Kingston, remains unchanged.

Fire Protection for Oil Tanks.

A fire wall has been built around the three crude oil tanks of the Health Department, and the Division of Municipal Engineering, situated on the hillside below the old French reservoir in Ancon and opposite the connected type-18 houses Nos. 260 and 261. The work required the throwing up of an earth embankment, and the installation of drainage ditches, including 80 feet of 20-inch concrete pipe required for carrying drainage past one of the houses. Two-thirds of the cost has been

charged to the Health Department and one-third to the Division of Municipal Engineering.

Interlocking Plant at Entrance to Panama Yard.

The interlocking plant at the south leg, or Panama end, of the Balboa wye was placed in service at 10 a. m., on Sunday, May 3. This plant contains a standard Saxby and Farmer improved machine, with horizontal lead out, with consists of a 24-lever frame, with 19 active levers and five spare spaces.

The territory embraced within the interlocking limits is the junction of the old single track main line from Colon with the new double track leading to Balboa. The yard lead into the Panama station is also connected to the machine. The 19 active levers handle four home signals, four dwarf signals, three switches, three facing point locks, nine detector bars, and five derails. All conflicting routes are protected by derails, and all routes are controlled by home and dwarf signals. The cabin in which the interlocking machine is installed was moved from Caimito and reerected at this point.

Boat Service to Toro Point and Porto Bello.

The boat carrying passengers from Dock 13 to Toro Point at noon on Wednesday, formerly handled by the Atlantic terminal subdivision, has been cancelled.

The boat which has been run for the convenience of passengers from Cristobal for Toro Point, at 8 o'clock Sunday mornings, and returning from Toro Point at 4.30 p. m., has also been cancelled.

No trips will be made to Porto Bello after Wednesday morning, May 13.

Settlement of an Estate.

The estate of Charles M. Ellsworth, metal check No. 55878, a native of the United States, who was employed at Culebra by the First Division, and died on May 6, is now in process of settlement by this office, and any claims against this estate, or any information which might lead to the location of heirs, or to the recovery of property, bank deposits, postal savings or postal money order deposits, or any other moneys due it, should be presented at this office at once, in order that the estate may be settled as soon as possible. All claims should be itemized, sworn to before a notary public, or other public officer having a seal, and submitted in duplicate. This notice will be published but once.

JOHN K. BAXTER.

Administrator of Estates.

ANCON, C. Z., May 11, 1914.

Eligibility of Canal Pilots.

No applicant for the position of Canal pilot is considered eligible for examination unless he holds a master's license for unlimited tonnage for the Great Lakes or ocean going vessels; he must be under 45 years of age, and an American citizen. In an article on the method of handling applicants for the position of Canal pilot, published in THE CANAL RECORD of May 6, the words for *unlimited tonnage* were inadvertently omitted.

Pontoon Bridge Nearly Ready for Use.

The work of placing the pontoon bridge at Paraiso in readiness for operation has been prosecuted steadily since the structure was first swung into position on Tuesday, May 5. The track has been laid, and the mechanism by which the rails are connected up and

kept in alignment with those on the land approaches to the bridge has been inspected and passed. Forces of the signal department of the Panama railroad are preparing to install a 12-lever interlocking plant in a cabin, which has been built to one side of the center of the bridge. One or two motor cars have already passed over the pontoon, and it is expected that the first train will go over it on Thursday, May 14. A site for the new Panama railroad station in Paraiso has been selected near the laborers' barracks, a short distance south of the Dredging Division shops.

Uniforms for Canal Pilots.

Canal pilots will be required to wear uniforms when on duty. The material selected is cream colored Palm Beach cloth, plain, without stripes or figures. The caps are to be stiff, after the pattern of those worn by the petty officers of the United States Navy, and will be of the same color as the uniforms. They will have a device in front consisting of a partly closed wreath containing the word "Pilot." The coat will be a plain blouse, without braid, with stiff, standing collar, fastened by hooks and eyes, and will be provided with two upper pockets with button flaps. It will be fastened down the front with five buttons, all buttons to be of brass with the letters "C. P." on their face, removable, and held in place by lugs. The trousers are to be plain. The Chief Quartermaster has been requested to take steps to supply the material, and arrange to have the uniforms made, either on the Isthmus, or by contract in the United States, after the pilots have been measured.

Work Begun on Balboa Substation.

Excavation for the foundation of the proposed substation at Balboa, in connection with the 44,000-volt transisthmian transmission line, was begun on Friday, May 1. One steamshovel is at work, and the requisite excavation is estimated at approximately 1,000 cubic yards. The site selected is at the base of Sosa Hill, on the east side, near the present Balboa dispensary and opposite building No. 9—the galvanizing plant of the Balboa shops. The substation is to be situated between the highway and the hill, and this necessitates cutting back into the base of the hill to give the desired clearance.

This site was adopted on the recommendation of a committee consisting of Edward Schildhauer, chairman; D. C. Nutting, Jr., Frank Holmes, W. H. Rose, and F. H. Cooke, appointed by the Governor on April 2. The committee considered the plan of installing the substation equipment and an air compressor plant in the same structure, but voted unanimously against it. The building to be erected will be like the substations now in course of erection at Gatun, Cristobal, and Miraflores. The foundation and building will be constructed by the Supply Department, except the steel, which will be erected by the United States Steel Products Company. The electrical installation will be performed by the Division of Erection.

Order of Isthmian Conductors.

*The next regular meeting of the Order of Isthmian Conductors will be held in Ancon lodge hall on Sunday, May 17, at 9.30 a. m.

The Pedro Miguel dancing club will hold a dance in the clubhouse on Saturday evening, May 16.

SOCIAL LIFE OF THE ZONE.

Church Work.

Sunday, May 10, was celebrated as Children's Day in the Union Sunday school at Empire. The school met at the usual hour, 9.30 a. m., and a suitable program was given. In spite of the changes at Empire, the attendance at the sessions of the Sunday school continues to be high; 92 persons were present at the meeting on Sunday, May 3.

The adult Bible class at Las Cascadas celebrated Mother's Day on May 10, with a suitable program. The members of this class, which consists of 85 enlisted men of the Tenth Infantry, wore white carnations in honor of the day. The class was organized in January, 1914, and, in addition to its regular sessions in the Government chapel at Las Cascadas on Sunday mornings, holds a business meeting on the first Thursday evening, and a social meeting on the third Thursday evening, in each month. The class director is Mrs. E. H. Ash of Empire. The international lessons are used, but the work of the class in session consists mainly in discussion of the practical ideas presented in the lessons.

The ladies' auxiliary to the Empire Union church held its final meeting in the chapel on Friday, May 1, when the study of the book, *The New America*, was completed. It was decided to hold meetings at the homes of members, and the next will be on June 5, at the home of the president, Mrs. Phil Kelly, in Paraiso. Although the Empire Christian Endeavor Society has formally ceased to exist, meetings are held under the late officers in the chapel on Sunday mornings. These meetings are attended by many of the Empire residents.

At the meeting in the Cristobal Union Church on Sunday evening, May 10, Mrs. D. E. Fulton delivered a lecture on temperance. The Sunday school of the church is preparing to celebrate Children's Day on the first Sunday in June. The officers of the church are arranging to have a bazaar in the Cristobal clubhouse in June, the proceeds to be used for the purchase of new books for the library. Further details, including the date of the bazaar, will be given later. On Sunday evening, May 31, the church will celebrate Memorial Day with appropriate exercises. An address will be made by Judge Thomas E. Brown, Jr.

The Gatun Sunday school is preparing a program for Children's Day, June 7. There will be a musical program with recitations, and Mrs. A. C. Arthur is rehearsing the children in the music. Since its reorganization, the Sunday school has prospered; the present enrollment is 100, and the average attendance is 80. There are nine teachers and four substitute teachers. The school has six officers in charge of its various departments. These are arranging for an old-fashioned Sunday school party, to be held in the clubhouse in the near future. The hour of the sessions has been changed from 9.30 to 10 a. m.

At the moving picture entertainment in Gatun on Saturday, May 9, when the story of Hiawatha was shown, special features were added, in which the pupils of the public school took part. Miss Maud Cheatham recited the opening stanza of Longfellow's poem at the beginning of the entertainment. Indian songs were sung, and Indian dances were given in costume. The stage setting showed

a wigwam in a forest, with groups of Indians seated about.

The Gatun girls' basketball and indoor hockey team is practicing in the clubhouse on Tuesday and Thursday afternoons. The team will challenge other basketball teams in the Canal Zone within a few weeks.

Washington Cotillion Club.

Capt. F. O. Whitlock has been elected president of the Washington Cotillion Club, vice Lieut.-Col. W. V. Judson, resigned. The other officers of the club are: First vice-president, D. W. MacCormack; second vice-president and treasurer, J. S. McCarthy; third vice-president, Edward Schildhauer; governors, Geo. L. Hughes and O. J. Kirch.

Formation of a Masonic Club.

A meeting to organize a new Masonic club, or reorganize the old Masonic club of Empire, will be held in the Canal clubhouse at Balboa on Thursday evening, May 14, at 8.15 o'clock. All master masons are invited to attend.

Results in Singles, Tennis Tournament.

The following are the results of the singles tournament in tennis, held at Culebra on May 3:

Preliminaries—Pedro Miguel (Bartholomew) defeated Camp Otis (Stewart), 7-5, 7-5; Pacific (Fechtig) defeated Empire (Newbold), 6-2, 6-3.

Second round—Culebra defeated Corozal by default. Pedro Miguel defeated Gatun (Wells), 4-6, 6-3, default; Pacific defeated Ancon Hospital (Fessler), 6-2, 4-6, 7-5; Colon (Wechsler) defeated Tivoli (Poltrino), 1-6, 9-7, 6-3.

Semifinals—Pedro Miguel defeated Culebra (Van Zandt), 6-1, 8-6; Pacific defeated Colon, 6-0, 6-2.

Finals—Pacific defeated Pedro Miguel, 6-1, 6-2.

The next Isthmian Tennis Association's tournament will be the "Free for all singles," at Ancon on May 30-31. Any member of a club affiliated with the association may enter on the payment of \$1 entrance fee, which should be in the hands of Mr. E. F. Ohlson, secretary-treasurer, Ancon, not later than May 27, when drawing will be made.

Drowned in the Canal.

Charles M. Ellsworth, an employe of the Division of Erection, living at Culebra, was drowned on Wednesday, May 6, while swimming in the Canal, near Station 1745. He was born at Raleigh, N. C., in 1895, was unmarried, and had been on the Isthmus 22 months. His father, Charles B. Ellsworth, resides at Culebra. The funeral services took place on Sunday afternoon, May 10, at Ancon.

Obituary.

Carl J. Isgren, father-in-law of M. J. Duey, residing at Ancon, died at Ancon Hospital on Thursday, May 7. He was 60 years of age, married, and had been on the Isthmus two months.

Mrs. Margaret V. French, wife of M. A. French, residing on the corner of Fifth and G streets, Colon, died at her home on Friday, May 8. She was a native of the United States, and was 28 years of age.

Missing Men.

Any one having information concerning the whereabouts of C. P. Burke of Bridgeport,

Conn., a machinist, supposed to be on the Isthmus, is requested to communicate with THE CANAL RECORD.

Any one having information regarding the present whereabouts of Mr. John J. Kelly, who left The Panama Canal service on August 13, 1908, is requested to communicate with his brother, Mr. Hugh Kelly, 941 West Van Buren Street, Chicago, Ill.

Any one having information regarding the whereabouts of Thomas H. Dagley who, it is thought, may be on the Isthmus of Panama, is requested to communicate with Mrs. T. M. Dagley, 458 West Pine Street, Canton, Ill.

PERSONAL.

Capt. L. P. Williamson, formerly superintendent of Colon Hospital, will sail for New Orleans on the United Fruit Company's steamer *Abangarez* on Thursday, May 14, and from there will proceed to Galveston, Texas, and report at Evacuation Hospital No. 1.

Mr. Edward Schildhauer, accompanied by Mrs. Schildhauer, will sail for New Orleans on the *Abangarez*, on Thursday, May 14, on leave of absence. While in the United States he will attend the annual convention of the National Electric Light Association, which meets in Philadelphia, June 1 to 5.

Postal Savings Transactions.

A statement of postal savings transactions at Canal Zone post-offices for the month of April, follows:

April 30, Balance on hand.....		\$4,030.10
Approved:		T. L. CLEAR,
EDW. SCHILDHAUER,		Treasurer.
Chairman.		

CANO SADDLE DIKE.

Work of Raising Section of Gatun Lake Rim has been Completed by Contractors.

The construction of the dike at Caño saddle, No. 4, along a ridge on the Gatun Lake rim, about 12 miles southwest of Gatun, was reported completed by the contractors, R. W. Hebard and Company, Incorporated, and Thomas R. Lombard, on April 27. Since then all of the equipment used on the work by the contractors has been withdrawn. The contract became effective on December 28, 1913, and expired in three and one-half months, or on April 13. Shortly before the latter date, the contractors asked for and were granted an extension of time of six weeks in which to complete the task, on the ground of delays caused by sickness among their employes, and the time lost in making extensive repairs to plant and equipment.

The dike as built is about 1,175 feet long, with a crown width of 19 feet (an increase of four feet from that originally planned) at elevation 105 feet above sealevel, and with a slope of one on three on each side. The contractors were required to first clear the ground of all trees and jungle growth, to pull the stumps, and fill all the holes left; it was also necessary to break the ground thoroughly for a depth of six inches between the slope stakes, and to remove such top soil as was found unfit. A base ditch for the impermeable core, four feet wide at the top, two feet at the bottom, and with a depth of three feet, was dug along the axis of the dike; the core fill was then placed and carried up to elevation 92 feet above sealevel on the water side. Some difficulty was encountered in obtaining the right kind of material for the core, as the greater part of it, which was obtained from a nearby hill, proved to be a hard lumpy clay. No material was permitted to be borrowed below the 105-foot contour.

Under the contract, the men, material, and equipment were allowed free lake transportation to the site of the work, but rent was charged for all equipment used, as well as the cost of putting it in repair. A 45-ton steamshovel, No. 56, was taken to the site, together with a quantity of narrow-gauge steam equipment. The greater part of the dike was built by dumping from a trestle. In this work 4-yard dump cars, hauled by three 36-gauge locomotives, were used. Later, Decauville equipment was employed to some extent. In one place a depression developed, which the contractors subsequently brought up to grade again. The laborers suffered severely from the attacks of mosquitoes, and the sick rate was high. There were other obstacles, notably the loss of a boatload of

provisions, in tow of a launch, on March 27. In trying to save the cargo, Mr. Lombard and his men were thrown into the lake, but all were safely rescued shortly afterward.

The last earth was placed in the dam on April 29; slopes were all finished on May 7, and Mr. George L. Hughes, the Government representative, inspected the work and made final report on the same date. An estimate of the fill placed is, as follows: Yardage in dike fill, 69,642; yardage for base ditch, or core, 309; yardage for filling of stump holes, 114; extra yardage placed in sink, 2,040. Total 72,105 cubic yards, as compared with the original estimate of 71,500 cubic yards. The contract price was 68 cents a cubic yard.

Changes in Sites of Buildings.

The removal of the tuberculosis and isolation wards, situated on the west side of Ancon Hill at the extreme end of the Ancon Hospital reservation has been ordered. The tuberculosis ward will be converted into married quarters for silver employes and re-erected at La Boca; the isolation ward will be reerected on the hospital garden site.

The general location of the residence of the Governor will be on the present site of the tuberculosis ward. The work of removing the present residence of the Governor at Culebra to this site will be begun about June 15.

The location of two Type-22 quarters in Block C of the new Balboa townsite has been approved.

Commutation of Annual Leave Into Cash Payment.

CULEBRA, C. Z., May 7, 1914.

MR. H. A. A. SMITH,
Auditor.

EMPIRE.

SIR:

I have your letter of the 6th instant relative to the interpretation which should be placed on Section 34 of the Executive Order covering conditions of employment, the question being whether annual leave may be commuted into a cash payment at termination of service when not taken in conjunction with cumulative leave.

The intention of the paragraph in question was that commutation for annual leave should only be paid when such annual leave was added to the cumulative leave due.

As a matter of fact, it is very likely that most employes will want to use up what annual leave is due them before they leave the service. This is a matter, however, for administrative control. In meritorious cases where employes have rendered faithful service

and can be granted the annual leave due them without detriment to the work, of course, the head of the department or division may approve such a request. However, if the employe's services have not been particularly satisfactory, or he is to be discharged for cause, no annual leave should be granted to him at the termination of service.

By commuting any annual leave due an employe into a cash payment, it would immediately become in his eyes a vested right, which all employes would insist upon having at the termination of their service, under all circumstances. This I wish to avoid and to keep the leave in a class where it can be controlled by the heads of departments and divisions, to be granted to the employes as a vacation only in meritorious cases.

Respectfully,

GEO. W. GOETHALS,
Governor.

Emigration in April.

The emigration from the Isthmus during the month of April showed a marked increase over the preceding month. According to the figures of the quarantine service, 3,553 persons landed from foreign ports, with the intention of remaining, as compared with 4,970 embarkations, making the net emigration for the month, 1,417, as against 397 in March. The total net emigration for nine months ending April 30, 1914, was 14,257, the greater part of which consisted of Canal employes.

The total number of steamship passengers embarking from the ports of Colon and Cristobal for foreign ports during April, was 4,450, consisting of 2,257 cabin, and 2,193 steerage passengers. The number of persons landing from foreign ports was 2,962, consisting of 1,323 cabin, and 1,609 steerage passengers. The number of persons who embarked over those who landed was 1,488. Immigration from all of Europe, in the steerage class, amounted to only 35 persons; Jamaica and the other West India islands contributed 1,161 deck passengers, Colombia, 93, Guatemala, 72; Costa Rica, 106, and the United States 37. The number of persons arriving at Atlantic ports "In transit" was 1,512, nearly all tourists, as compared with 3,211 in March.

The number of persons arriving at the ports of Panama and Ancon from foreign ports during April was 591, consisting of 449 cabin, and 142 steerage passengers. The number of persons embarking for foreign ports was 520, consisting of 364 cabin, and 156 steerage passengers. The number of those who landed over those who sailed was 71.

The total number of vessels arriving at Colon during the month of April was 98; at Ancon, 26.

CLASSIFIED EXPENDITURES—ISTHMIAN CANAL COMMISSION.

A statement of classified expenditures of the Isthmian Canal Commission to January 31, 1914, follows:

OFFICIAL CIRCULARS.

Organization of Executive Department.

THE PANAMA CANAL,
EXECUTIVE OFFICE,
CULEBRA, C. Z., April 29, 1914.

CIRCULAR No. 660-10:

1. The Executive Department embraces the general office business of the Governor, the work under the supervision of the Executive Secretary as given in the Executive Order of January 27, 1914, the Courts, and the offices of the Special Attorney, the District Attorney, and THE CANAL RECORD.

2. The following is the skeleton organization of the Executive Department:

(a) Executive office—

- (1) Clerical bureau.
- (2) Personnel bureau.
- (3) Timekeeping bureau.
- (4) Costkeeping bureau.
- (5) General bureau.
- (6) Bureau of clubs and playgrounds.

(b) Division of Civil Affairs.

(c) Police and Fire Division.

(d) Division of Schools.

(e) Division of Posts.

(f) Courts—

(a) Supreme Court.

(b) District Court.

(c) Magistrates' Courts.

(g) Special Attorney's office.

(h) District Attorney's office.

(i) THE CANAL RECORD office.

3. The Executive Office will be in charge of the Executive Secretary, assisted by the chief clerk. He will be charged with keeping the time of employees; maintaining files, records, and libraries of The Panama Canal; all matters relating to the personnel of employees; the supervision of clubs and playgrounds, and the general office business of the Governor, under the latter's direction.

4. The Division of Civil Affairs is under the direction of a chief of division who is charged with customs inspection for the Canal Zone, and the issuance of all licenses, except those issued for the Board of Local Inspectors by the Superintendent of Transportation. The chief of division is also administrator of estates of deceased and insane employees, and shipping commissioner for the Canal Zone.

5. The Police and Fire Division is under the direction of a chief, who is charged with the maintenance of the peace and order required by the laws of the Canal Zone, the protection of life and property, and the proper care and custody of prisoners and convicts. He is coroner of the Canal Zone and warden of the penitentiary. He is charged with the duty of protecting from fire both Government and private property.

6. The Division of Schools is under the direction of a superintendent of schools, who, under the supervision of the Executive Secretary, shall select and assign the force of teachers, govern the schools, prescribe the courses of instruction, and administer the affairs of the division.

7. The Division of Posts is under the direction of a director of posts, who shall administer the affairs of the Canal Zone postal system, and transact business between that system and other postal systems.

8. The Courts of the Canal Zone, consisting of a Supreme Court, which will cease to exist after the completion of the business now pending, a District Court and two Magistrates' Courts, are charged with the adjudication of civil and criminal cases, as provided by the laws prescribing the duties and limitations of the Courts. The expenditures for the courts, except as fixed by law, shall be made by the Executive Secretary, and the Courts shall furnish to him such reports, statistics, or other data as may be required. The organizations of the Courts are extra-departmental, and are embodied herein only to indicate the method adopted for taking care of the material business needs of the courts.

9. The Special Attorney's office is under the supervision and direction of the Special Attorney, reporting to the Governor. He is charged with the purchase, under the Governor's direction, of the land within the Canal Zone necessary for the construction, maintenance, operation, sanitation, or protection of The Panama Canal, and shall represent the Government before the Joint Land Commission, or other courts or tribunal in the settlement of land or property claims, or claims against the Government for damage to or destruction of private property. He is also charged with the duty of codifying the various laws, Executive Orders, and ordinances in effect for the Canal Zone.

10. The District Attorney's office is under the supervision and direction of the District Attorney, who shall conduct all business, civil and criminal, for the Government, except that assigned to the Special Attorney, and shall advise the Governor on legal questions

touching the operation of the Canal, and the administration of civil affairs.

11. THE CANAL RECORD office is under the direction of a special secretary, who shall edit and publish THE CANAL RECORD and perform such other duties as may be assigned to him by the Governor.

GEO. W. GOETHALS,
Governor.

Accounting Department.

THE PANAMA CANAL,
OFFICE OF THE GOVERNOR,
CULEBRA, C. Z., April 1, 1914.

CIRCULAR No. 660-2:

AUDITOR OF THE PANAMA CANAL.

1. The Auditor of The Panama Canal is charged with the immediate direction and control of accounting, and the auditing and settlement of claims for The Panama Canal and Canal Zone and for the commissary department of the Panama Railroad on the Isthmus. He has supervision and control over the acceptance of bonds, the methods of keeping records and accounts of receipts and disbursements of moneys received by all officers and agents of The Panama Canal and Canal Zone by virtue of their offices or positions, and the methods of safeguarding such moneys. He shall prescribe all forms for recording the receipt and disbursement of moneys and property, and all forms necessary for use in accounting for money and property, except as otherwise prescribed in accordance with law. He is authorized, and it shall be his duty, to examine the books, contracts, records, and accounts of money and property in the possession of all officers and agents of The Panama Canal and Canal Zone, and of the commissary department of the Panama Railroad on the Isthmus. He shall perform all the duties heretofore assigned to the Examiner of Accounts or to the Auditor of the Canal Zone Government, and the additional duties prescribed by the Executive Order of January 27, 1914.

DISBURSEMENTS—PAYMASTER.

2. The Paymaster is charged with the payment on the Isthmus of all moneys appropriated for The Panama Canal and expendable under the direction of the Governor. The Paymaster will make payments only on vouchers or pay rolls, time vouchers or pay receipts, which have been examined and audited by the Auditor. All collections made by the Paymaster on the pay rolls shall be paid by him to the Collector, upon the certificate of the Auditor specifying the amount and the source from which derived, except refundments of over-payments and amounts due the Panama Railroad Company for supplies or services rendered employees, and except other deductions authorized to be made and to be paid to other branches of the service, to contractors or other persons. All other duties performed by the Disbursing Officer of the Isthmian Canal Commission prior to April 1, 1914, to will be performed by the Collector.

RECEIPTS—COLLECTOR.

3. The Collector shall perform all duties heretofore performed by the Treasurer of the Canal Zone, and in addition, shall collect or receive all amounts due The Panama Canal and Canal Zone. He shall transfer all cash received by him and not required for the performance of his duties, to the Paymaster. For the funds of The Panama Canal, he shall take the Paymaster's receipt; for Canal Zone, money order, postal savings bank, clubhouse, and other trust funds and security deposits, he shall take the draft of the Paymaster on the Treasurer of the United States, and shall deposit same in depositories under the contracts entered into by the Secretary of War. He shall have such number of deputies or assistants as may be assigned to him. All moneys, records, and papers of the Collector of Revenues and his deputies, in so far as they relate to the collection of moneys, shall be transferred to the Collector of The Panama Canal.

4. The Collector will render an account for all public moneys of the United States received by him to the Auditor for the War Department, through the Auditor of The Panama Canal. The account will be forwarded to the Auditor of The Panama Canal within 10 days after the close of each month, and will be forwarded by the Auditor of The Panama Canal to the Auditor for the War Department within 10 days thereafter.

5. All amounts due The Panama Canal or Canal Zone will be collected by the Collector, or his deputies, whenever practicable. Bonded employees of the various departments and divisions, designated by the Auditor, may make collections for minor services or sales. In performance of their duties in connection with receiving, handling, and refunding cash, such employees shall be subject to the direction of the Auditor. Such bonded employees shall issue receipts in triplicate, giving the original to the party making deposit and sending the duplicate to the Auditor.

6. All collections for The Panama Canal or Canal Zone will be remitted to the Collector, The Panama Canal.

7. Remittances should be made to the Collector at least once each week, and when the cash on hand amounts

to \$50, except that the retention of a larger balance may be specifically authorized by the Auditor.

8. All funds shall be remitted by registered mail with the original copy of remittance letter, the duplicate thereof being retained by the remitter. Receipt in favor of the remitter will be issued by the Collector as soon as a remittance is received.

9. All amounts greater than \$50 deposited as security for the payment of supplies or rendition of service will be deposited with the Collector or his deputies.

10. The Collector shall have the custody and issue, upon requisition approved by the Auditor, of coupon books, meal tickets, stamps, and similar money values.

11. All checks, drafts, money orders, or any form of remittance, except cash, should be made payable to "Collector, The Panama Canal," and if otherwise made payable should be endorsed in his favor.

12. Monthly abstracts covering all receipts, remittances, or refunds, in detail, will be prepared and forwarded to the Auditor of The Panama Canal promptly at the close of each month, supported by all receipts issued or taken. Forms of such abstracts have been prepared and will be furnished all collecting officers, with full information, prior to the time it is necessary to render April accounts.

RESPONSIBILITIES OF EMPLOYEES.

13. All pay rolls, time vouchers, and pay receipts, and all vouchers and claims, bills, and accounts receivable of all kinds shall be examined and audited and checked against the proper records, contracts, or other authorizations in the auditing divisions of the Accounting Department, and otherwise completed with the proper papers attached, prior to submission to the Collector or Paymaster for collection or payment.

14. Two signed copies of all contracts relating to the disbursement of public moneys will be forwarded to the Auditor as soon as executed, one for his office, and one for transmittal to the Auditor for the War Department.

15. All employees of The Panama Canal who examine, check, and verify the correctness and validity of pay rolls, time vouchers, and pay receipts, vouchers and claims, bills or accounts receivable, or any paper or record authorizing or necessary to support any collection or payment, shall be financially responsible for errors of calculation and any other errors apparent upon the face of the papers examined or checked by them, and for errors that would be apparent upon investigation of the personnel or other records available to them.

16. Employees who prepare pay rolls and time vouchers, and bills and other accounts receivable in any form, shall be financially responsible for errors in preparation of such papers, due to failure to make the entry thereon correspond with the facts disclosed by time books, time rolls, rate and price authorities, stock and price cards, and other records and papers in their office, or which may be available to them for comparison and check; also, for errors in the delivery of pay receipts, time vouchers, coupon books, meal tickets, and other money values.

EMPLOYEES REQUIRED TO GIVE BOND.

17. The following classes of employees on the Isthmus shall give bond to the United States for the faithful performance of their duties, in such form and in such amount as may be fixed by the Auditor, with the approval of the Governor, and with sureties satisfactory to the Auditor, except the Collector, the Paymaster, and the employees bonded to the Paymaster, and any others who may be required by law or specific instructions to give bond to the United States for the faithful performance of the same duties:

(a) All employees of The Panama Canal who collect or disburse moneys of the United States, the Canal Zone, the Panama Railroad Company, or any other moneys by virtue of the offices or positions held by them.

(b) Timekeepers who prepare time rolls, pay rolls, time vouchers, or pay receipts.

(c) Employees having custody or authority to issue commissary or hotel coupon books, or meal tickets.

(d) Storekeepers and others so acting who are the custodians of material and supplies, and property of the United States, the Canal Zone, or the Panama Railroad Company of a value in excess of a minimum amount which is held for issuance to departments.

(e) Postmasters and postal clerks.

GEO. W. GOETHALS,
Governor.

Preparation and Rendition of Bills.

THE PANAMA CANAL,
EXECUTIVE OFFICE,
CULEBRA, C. Z., April 30, 1914.

CIRCULAR No. 659:

1. Effective May 1, 1914, bills for work performed by The Panama Canal for employees, other individuals, vessels, or their agents, the Panama Government, or other departments of the United States Government, will be rendered immediately upon completion of the work.

2. Bills against the Panama Railroad Company and

bills payable from Canal Zone funds will be rendered at the end of the month during which the work is completed.

3. The rendition of bills for work performed during any month, and not completed in that month, will be discontinued, except for long continued jobs and where special request for a bill is made.

4. All bills should show the period during which the work was performed, the nature of the work, and the total charge therefor, with reference to the number of the work request or shop order, and the authority under which the work was performed.

5. The proper surcharges will be included in the total of the bill.

6. If request is made for detail of charges included within a bill, such detail shall be furnished upon payment of the cost of preparing same, plus approximately 10 per cent.

7. Bills covering sales of material and supplies will be detailed, so as to show date of sale, items sold, unit and total prices, authorized surcharge, and total of bill. This detail may be on the bill itself, or on attached papers.

8. All invoices issued to cover material and supplies sold to any branch of the United States Navy Department must be prepared, so as to show the total charges for material and supplies furnished, including the authorized surcharges.

9. The present rates and surcharges will be used until further notice for all work done for outsiders.

10. Invoices for manufacturing or construction work performed by one department or division for another shall be rendered at the end of the month during which the work is completed, except for long continued jobs, to cover which monthly bills are desired by the Department or division for which the work is performed.

GEO. W. GOETHALS,
Governor.

Boundary Monuments and Bench Marks.

THE PANAMA CANAL,
EXECUTIVE OFFICE.

CULEBRA, C. Z., April 1, 1914.

CIRCULAR No. 651:

CARE AND MAINTENANCE.

1. The Engineer of Maintenance shall be responsible for the care and maintenance of the monuments marking the Canal Zone boundary and the precise level bench marks, and other permanent boundary monuments and bench marks.

2. In case it becomes necessary to move or replace any of the monuments or bench marks, the Engineer of Maintenance must be notified in advance, so that a competent person may be detailed to arrange for and supervise the work of replacing.

3. Whenever any monument or bench mark shall be found to be in need of repairs or attention, the Engineer of Maintenance must be notified at once.

PENALTIES FOR INTERFERENCE.

4. Section 429 of the Penal Code of the Canal Zone provides, as follows:

Every person who either—

(a) Maliciously removes any monument erected for the purpose of designating any point in the boundary, or any lot or tract of land, or a place where a subaqueous telegraph cable lies; or

(b) Maliciously defaces or alters the marks upon any such monument; or

(c) Maliciously cuts down or removes any tree upon which any such marks have been made for such purpose, with intent to destroy such marks, is guilty of a misdemeanor.

5. Section 436 of the same Code, as amended, provides, as follows:

Every person who wilfully injures, defaces, or removes any signal, monument, building, or appurtenance thereto, placed, erected, or used by persons engaged in the United States Coast Survey, or by the Isthmian Canal Commission, or any public service company within the Canal Zone, knowing the same to be a boundary or survey monument, is guilty of a misdemeanor.

6. Articles 908, 909, and 910 of the Penal Code of Panama, imposing a penalty on any person who removes or alters boundary monuments are, as follows:

(a) ARTICLE 908. Every person who knowingly removes any monument, tree, wall, border, fence, ditch, palisade, landmark, or any other sign placed or known as a point in the boundary limit between land, field, or any other property and that belonging to some other person; and every person who removes any of the said monuments shall be liable to arrest for a period not less than six days nor more than one month, and a fine of from 10 to 80 pesos; such person being under the obligation of replacing the monument which was destroyed or removed; and in case this is not possible, he shall erect a like monument.

(b) ARTICLE 909. Every person who knowingly commits any such offense with respect to the property of another shall be liable to a fine amounting to one-half of the abovementioned penalties.

(c) ARTICLE 910. Every person who knowingly takes away or removes any monument erected for the purpose of designating the boundaries of a department, province, district, police district, or any

other territorial division, as provided by the Constitution and by-laws, shall be liable to arrest for a period not less than 10 days nor more than two months, and to a fine of from 20 to 100 pesos.

7. The above provisions of the laws of the Canal Zone and the Republic of Panama are quoted for the information and guidance of all concerned.

GEO. W. GOETHALS,
Governor.

Coupon Books and Meal Tickets.

THE PANAMA CANAL,

EXECUTIVE OFFICE,

CULEBRA, C. Z., April 1, 1914.

CIRCULAR No. 663:

Effective April 1, 1914, the following rules and regulations shall govern the issue, use, and accounting for coupon books and meal tickets:

1. The duties in connection with the purchasing, issuing, and accounting for commissary coupon books will be transferred from the Panama Railroad Company to the Accounting Department of The Panama Canal, effective May 1, 1914.

2. All books and meal tickets will be provided by the Auditor, upon whom requisitions should be made by issuing clerks, approved by the head of the department in which employed.

3. Distribution will be made to issuing clerks and others by the Collector upon the approved requisition forwarded him by the Auditor.

4. The following denominations of coupon books and meal tickets will be issued:

Commissary books.—\$5 and \$15.

Hotel books.—\$4.80 and \$15.

Meal tickets.—27 cents and 40 cents.

5. Hotel books will be issued to all gold employees and white employees on silver rolls and such nonemployees as may be authorized by the Governor, except that \$4.80 hotel books will be issued only to new employees who have not earned a sufficient amount to pay for a \$15 book; to such married employees whose duties necessitate their absence from the town in which they are officially stationed, and to unmarried employees whose duties require their absence from official station, and who regularly subsist themselves by boarding by the month other than at hotels of The Panama Canal; provided, that not more than two \$4.80 books shall be issued to any employee during a month. All requests for the issue of \$4.80 hotel books must be approved by the head of the department or division in which the applicant is employed.

6. Commissary books will be issued to all employees and such others as may be authorized by the Governor.

7. All coupon books will be issued to employees for cash at such places as may be designated, and issued for pay roll deduction on application to the chief timekeeper. Books issued to gold employees will be stamped "Gold roll," on the front cover.

8. Books sold to other than employees must be obtained from the Collector on approved request to the Auditor.

9. The value of all books issued to silver employees will be carried to the pay rolls for collection.

10. Books will not be issued by pay roll deduction after the 25th nor before the 10th of each month, and employees are required to make one application for sufficient books to last one month. Issuing clerks are instructed to see that books are issued to employees with as little delay as possible.

11. The value of commissary books issued to a silver employee shall not exceed \$50 for any one month, and no books should be issued to such employees until the full amount, in excess of any meal ticket charge, has been earned.

12. All books issued, whether for cash or pay roll deduction, shall be validated by the issuing clerk, showing date of issue, and bear the name and metal check number of the employee to whom issued. The duplicate, or issuing coupon No. 2, must be detached and forwarded to the Auditor, The Panama Canal, with the monthly report of issues.

13. Deductions should not be made for undelivered books. If delivery cannot be effected before collection reports and pay rolls are completed, the book should be cancelled.

14. Issuing clerks are held responsible for all books and meal tickets entrusted to their care and for the proper handling and accounting for the same. When, for any reason, it becomes necessary to transfer the stock of books and tickets on hand, the Auditor should be promptly notified, in order that a representative from his office may be present and officially effect the transfer.

15. When a coupon book is lost, the owner should at once notify the issuing clerk from whom the same was obtained. The issuing clerk shall issue the regular notice of loss on form provided for that purpose, sending one copy to the Auditor and one to the Assistant Chief Quartermaster. In addition to this, the issuing clerk should at once notify the commissary storekeepers or hotel stewards in the vicinity, pending the issue of regu-

lar bulletin, but it is understood that The Panama Canal or Panama Railroad Company will not reimburse the owner for the value of lost or destroyed books.

16. Employees of The Panama Canal leaving the service can have unused coupons in commissary or hotel books redeemed by presenting them to the Paymaster at time of final payment. Unused books held by employees of the Panama Railroad Company will be redeemed at termination of service by the Local Treasurer.

17. The provisions of the contract and instructions printed on the inside of the front and back cover of all coupon books, relating to the transfer of coupon books, or the misuse of hotel or commissary privileges, remain in force and effect.

18. Meal tickets of the denominations of 27 cents and 40 cents will be issued daily to colored or European laborers upon request to the foreman or timekeeper and charged on the time books on the day of issue, collection therefor being made on the monthly pay rolls. Unused meal tickets will not be redeemed.

19. On and after April 10, 1914, coupon books will be sold for cash only to those employees of The Panama Canal who present an authority card, Form A 47, properly validated and showing name and metal check number.

20. Cash sales will not be made thereafter upon identification by metal checks. All employees of The Panama Canal and Panama Railroad Company charged with the duty of selling coupon books for cash are instructed to see that identification card is presented by each employee applying for books.

21. These cards are not transferable and must be presented by the employee whose name is written thereon, or a member of his family. If presented by any other person, the card must be taken up, cancelled, and further privileges of the commissaries denied.

22. Lost cards must be immediately reported to the Auditor, when a new one will be issued, and the issuing clerks notified not to honor the old card.

GEO. W. GOETHALS,
Governor.

Treatment in Hospitals and Elsewhere.

THE PANAMA CANAL,
OFFICE OF THE GOVERNOR,
CULEBRA, C. Z., April 1, 1914.

CIRCULAR No. 618:

EMPLOYEES.

1. Employees in case of illness and injury will receive free treatment in the hospitals, except in cases of alcoholism or venereal disease.

2. Employees will be admitted to the hospitals of The Panama Canal only upon request made by a physician in the employ of the Department of Health, or the official head of the department or division in which they are employed.

3. In sending sick employees to local physicians for treatment, request form must always be properly filled in, so as to give the physician the necessary information in case he wishes to send the employee to the hospital. The necessities of patients will always be given first consideration, and no one in urgent need of hospital care will be refused admission.

4. Officials who issue forms for admission to hospitals will see that they bear not only the brass check number, but the name of the employee as it appears on the pay roll. Special care should be used in case of foreign names, as much difficulty is experienced in identifying employees (on account of incorrect names being given), who have been sick, or who have died in hospitals.

5. A charge of \$1 shall be made for each visit by a physician of the Health Department to an employee at his home or quarters; provided, that if he is unable to go to dispensary no charge will be made for the first visit to such employee. Employees living with their families in Government quarters, who, in the opinion of the visiting physician, cannot safely or conveniently report at the dispensary for treatment shall, if they so desire, be treated at their homes without charge, except when, in the opinion of the district physician, convalescence may be unduly prolonged.

6. Employees who, at their own request, are treated in a special ward shall be charged \$1 per day for such treatment, and employees who, at their own request, are treated in a private room shall be charged \$1.50 per day for such treatment.

7. Special nurse will be charged for at the rate of \$3 per day; special servant at the rate of \$1 per day.

FAMILIES OF EMPLOYEES.

8. The family of an employee shall be understood to include those persons who are members of his immediate household, and dependent upon him. A male over 21 years of age will not be considered a dependent member of an employee's family.

9. The members of families of employees may consult any of the physicians of the Health Department at any of the hospitals or dispensaries, free of charge.

10. A charge of \$1 shall be made for each visit of a physician to a member of an employee's family at his or her home.

11. Members of the family of an employee whose pay

Is more than \$50 gold per month may receive treatment in any of the hospitals for a charge of \$1 per day. For families of employes receiving \$50, or less, per month, the charge shall be 30 cents per day.

12. Members of the family of an employe occupying a private room in hospital, shall be charged \$2.50 per day, which includes hospital treatment.

13. A charge of \$15 shall be made for each obstetrical case outside of hospital for members of the family of an employe whose pay is more than \$50 per month; for families of employes receiving \$50 per month, or less, the charge will be \$10, except that no charge will be made for such cases, other than the regular charge for hospital treatment, when such cases are treated in hospital.

ARMY, NAVY, AND MARINE CORPS.

14. Officers and enlisted men of the United States Army, Navy, and Marine Corps, stationed for duty in the Canal Zone, or cruising in waters adjacent thereto, shall be admitted to and treated in the wards of The Panama Canal hospitals at the rates provided for families of employes. The rates for special nurses, special servants, and private rooms, shall be the same as for employes of The Panama Canal. Families of the above shall be treated at the same rates as for families of Panama Canal employes.

15. Civilian employes attached to any of the above services:

(a) Civilian employes, salary over \$50, \$1 per day.

(b) Families of civilian employes, salary over \$50, same as for families of Panama Canal employes.

(c) Civilian employes, salary \$50 and less, 30 cents per day.

16. Treatment will consist of medical attendance, operations, when necessary, medical supplies, subsistence, and transportation on hospital car. Rates for special nurses, special servants, and private rooms shall be the same as for employes of The Panama Canal.

DIPLOMATIC AND CONSULAR CORPS.

17. Members and employes of the American diplomatic and consular corps shall be treated on the same basis as families of employes of The Panama Canal.

AMERICAN SEAMEN.

18. The charge for American seamen shall be \$1 per day.

EMPLOYEES OF CONTRACTORS.

19. Unless otherwise provided in the contract, employes of any corporation or firm having a contract for work to be performed on the Isthmus under The Panama Canal, receiving more than \$100 gold per month, and members of families of such employes, shall be treated as pay patients. Those receiving \$100 gold per month, or less, shall be treated as employes of The Panama Canal, and their families shall be treated as families of employes of The Panama Canal.

INIGENT SICK, LEPROS, AND INSANE PERSONS.

20. The indigent sick, lepers, and insane of the Republic of Panama shall be admitted to such hospital as may be designated for their reception and shall be treated, upon request of authorized officials of the Republic. A charge of 75 cents gold per day shall be made for the medical and surgical treatment of such persons, bills being rendered against the Republic of Panama.

21. The indigent sick, insane persons, or lepers of the Canal Zone shall be admitted to such hospitals as may be designated for their reception. A charge of 30 cents per day shall be made for the treatment of any such person, bills being rendered against The Panama Canal, by the Chief Health Officer.

PERSONS WITH CONTAGIOUS OR INFECTIOUS DISEASES.

22. Persons having, or suspected of having, contagious or infectious diseases, who are sent to hospital for the protection of the public, shall receive treatment without charge.

PAY PATIENTS.

23. Pay patients shall include all persons treated by physicians of the Health Department, or admitted to the hospitals of The Panama Canal, not otherwise described above. They may be treated by Panama Canal physicians, or admitted to Panama Canal hospitals, so far as the facilities may permit, and without interfering with the treatment of employes. Charges for such patients shall be, as follows:

(a) Professional visit at hospital or dispensary.....	\$3.00
(b) Professional call.....	5.00
(c) Consultation.....	5.00
(d) Hospital treatment in ward, per day.....	2.00
(e) Hospital treatment in private room, per day.....	6.00
(f) Special nurse, per day.....	3.00
(g) Special servant.....	1.00

(h) Cost of an operation will be determined by consultation with the Superintendent of Hospitals.

(i) Relatives or friends accompanying a non-employe pay patient to hospital shall be charged at the rate of \$4 per day, whether cared for in a separate room, or in the same room with the patient.

(j) In special cases, the charges shown above may be reduced by the Chief Health Officer, with approval of the Governor.

EXCEPTIONS TO RULES.

24. In case of an emergency, and where humanity

or the public good requires it, a physician may depart from these regulations, but in each case a written report shall be made immediately to the Chief Health Officer.

GEO. W. GOETHALS,
Governor.

Stock Reduction.

THE PANAMA CANAL,
OFFICE OF THE GOVERNOR,
CULEBRA, C. Z., April 1, 1914.

CIRCULAR No. 631:

1. To avoid a large accumulation of material, it is necessary to reduce the stock carried even at the risk of occasionally running short of some article. It is not intended to embarrass the work for lack of material, but on "Nonactive" stock, substitutions and emergency requisitions will be resorted to, when necessary, to avoid accumulating a large reserve supply of material for which there is only an occasional call.

2. The Supply Department will make substitutions in filling requisitions and foreman's orders, after consultation with the interested department or division. If it is not practicable to confer with the department which places the order, the substitution is authorized with the understanding that the material may be returned if it cannot be used. Substitutions will be issued at the standard price in the price book.

3. The practice of drawing from storehouses spare parts and material for anticipated future needs, and the retention thereof either on the work or in storehouses not under the Supply Department, results in the accumulation of a larger stock of some articles than is necessary, and in the making of articles of which an adequate supply is on hand, but the existence of which is not known to the proper officials.

4. It is, therefore, directed that all such spare parts and material not required for immediate use be turned over to the nearest storehouse, and that, in future, no spare part or material shall be drawn from the Supply Department until actually required.

GEO. W. GOETHALS,
Governor.

Standardization of Stationery.

THE PANAMA CANAL,
OFFICE OF THE GOVERNOR,
CULEBRA, C. Z., April 1, 1914.

CIRCULAR No. 664:

The stationery for use of The Panama Canal shall be standardized, as follows:

SIZES FOR GENERAL FORMS.

1. The following shall be standard sizes for general reams, with special sizes permitted if necessity requires:

8 by 3½—One-third letter size.
8 by 5½—One-half letter size.
8 by 7—Two-thirds letter size.
8 by 10½—Letter size.
8 by 14—One and one-third letter size.

The above sizes shall be strictly adhered to, except in such cases as come under "Special size forms."

SPECIAL SIZE FORMS.

2. Special size forms, which, for any reason, cannot be made to conform to the standard, shall be arranged for between the requisitioning official and the depot quartermaster. However, this is not intended to mean sizes varying one-eighth, one-quarter, or one-half inch from standard, unless they are to be used in card cabinets.

STOCK FOR GENERAL FORMS.

3. The following weights in white paper shall be standard for general forms. For comparative purposes only, the weights in each instance refer to a ream of 17 by 22-inch stock. The Supply Department will purchase stock in sizes which will cut and print to the best advantage the standard sizes given above, but same will equal the weight mentioned in 17 by 22-inch sheets:

32-pound—Extra heavy. Same as present daily leave order.

24-pound—Heavy. Will make about one good carbon copy.

20-pound—Same as that on which PC 292a is printed.

16-pound—For forms requiring three or four carbon copies.

13-pound—For forms requiring five to seven carbon copies.

7½ to 8-pound—Un-glazed tissue.

7½ to 8-pound—Glazed tissue.

The depot quartermaster will keep in stock the best grade and a medium grade in all the above weights, except the first and last.

COLORED PAPERS.

4. The standard colored papers to be kept in stock by the depot quartermaster shall be blue, pink, and buff, in the 20 and 16-pound weights. Other colors and weights will be considered special.

STOCK FORMS.

5. All stock forms (those used in common by two or more departments or divisions) shall be approved and ordered by this office, and before any such form is reprinted copy of the same shall be submitted to this

office for any necessary revision. Forms in use by two or more departments or divisions carrying but slightly different matter shall be made into stock forms, if possible, the matter to be taken up by the depot quartermaster with the requisitioning officials with this end in view, whenever he finds such forms are being ordered.

FORM NUMBERS.

6. All forms will be numbered by this office under one general series, prefixed with the letters "PC," except those departments for which provision is made in circular letter of March 27, 1914.

LETTERHEADS.

7. A stock letterhead (form PC 292a for ordinary weight, form PC 292b for medium weight, and form PC 292c for glazed tissue), printed on 8 by 10½-inch stock in black ink, shall be used by all departments and divisions, except in such special cases as may be authorized by the Governor.

SECOND SHEETS.

8. The quality and weight of paper for second sheets (used for carbon copies, etc.), shall be left to the requisitioning official, to be chosen from the standard stock.

ENVELOPES.

9. The following shall be the standard sizes for envelopes:

No.	White	Inches.
6½.....	3½ x 6½
9½.....	4½ x 6½
.....	Manila
6½.....	3½ x 6½
9.....	4½ x 9½
11½.....	5 x 11½
12½.....	9½ x 12½
15.....	10 x 15

10. One form of printing shall be used on envelopes for all departments and divisions. In the upper left hand corner will be printed:

"The Panama Canal
Canal Zone

Official Business

and in the upper right hand corner, the penalty stamp. The printing of addresses on envelopes will be permitted only after approval of the Governor.

MEMORANDUM LETTERHEADS. White.

11. All departments and divisions using memorandum letterheads shall use a stock form (PC 292d), printed on 8 by 5½-inch paper of the same quality as the regular letterhead (PC 292a), and put up in pads of 50 sheets each.

REFERENCE SLIPS.

12. Reference slips, if used in lieu of letters of transmittal, shall conform to the standard sizes—half-letter size, two-thirds letter size, or, preferably, letter size.

TELEGRAPH BLANKS.

13. A stock telegraph blank (Form PC 202) shall be used by all departments and divisions.

COLORED INKS.

14. Copying and colored inks shall be used only when absolutely necessary.

INFORMATION TO BE GIVEN ON REQUISITIONS.

15. Requisitioning officials should state whether a form is to be used with pencil, typewriter, or pen, and the number of copies it is desired to make at one time. Title as well as form number must be stated, and a copy of the form accompany the requisition. In giving sizes of forms, always state width first; for example, eight inches by 10½ inches (meaning eight inches wide by 10½ inches long).

SPECIAL AND UNNECESSARY PRINTING.

16. Unless authorized by the Governor, the material and size of type to be used shall be determined by the depot quartermaster, having proper regard for economy, workmanship, the purposes for which the work is needed, and the requirements of the requisitioning official.

17. Requisitions for apparently unnecessary printing, or for printing, which, it is believed, would be unnecessarily costly, shall be brought to the attention of the Governor.

GEO. W. GOETHALS,
Governor.

Electrical Division.

THE PANAMA CANAL,
OFFICE OF THE GOVERNOR,
CULEBRA, C. Z., April 25, 1914.

CIRCULAR No. 660-8:

Supplementing the provisions of Circular No. 660-1, dated April 1, 1914, the following duties are hereby assigned to the Electrical Division of the Department of Operation and Maintenance:

The operation and maintenance of the steam driven electric power plants at Gatun, Miraflores, Empire, and Balboa, and of all substations, transmission and distribution lines connected with these stations, except distribution systems in locks, spillways, and other structures which have been or may be assigned to other departments for operation and maintenance.

The operation and maintenance of the hydroelectric station at Gatun, and of all substations, transmission

and distribution lines connected with the hydroelectric station, when these structures shall have been completed by the Division of Erection, Department of Operation and Maintenance. Distribution systems in locks, spillways, or other structures assigned to other divisions or departments for operation and maintenance are excepted, as in the preceding paragraph.

The operation and maintenance of the air compressor plants at Miraflores, Empire, and Balboa.

The design, construction, operation, and maintenance of lighting systems on all permanent and temporary buildings and other structures in charge of the Supply Department, and of such other departments and divisions as are not specifically authorized from time to time to do such electrical work.

The design, construction, operation, and maintenance of underground and overhead distribution lines for light and power in all towns, and of all street, yard, wharf, and pier lighting systems, unless such work is specifically assigned to some other department or division.

The operation and maintenance of the cargo handling cranes on the Panama railroad pier at Balboa.

In addition to the above duties, the Electrical Division shall take over such other work in connection with the permanent electrical system of The Panama Canal as may from time to time be directed by the Governor.

GEO. W. GOETHALS,
Governor.

Charges and Credits, Republic of Panama.

THE PANAMA CANAL,
OFFICE OF THE GOVERNOR,
CULEBRA, C. Z., April 1, 1914.

CIRCULAR No. 657:

1. Charges against and credits to the Republic of Panama on account of the installation, construction, maintenance, operation, and repairs of the water and sewer systems, and pavements, of the cities of Panama and Colon shall be distributed, kept, and stated, by the Auditor, separately for each city, in accordance with contracts dated September 30, 1910, as follows:

SUMMARY OF ACCOUNTS.

2. (a) *Water and sewer systems*—
 - 1 Capital cost.
 - 2 Operation and maintenance.
- (b) *Reservoirs, pipelines, and filtration plants*—
 - 1 Interest on capital cost.
 - 2 Maintenance and operation.
- (c) *Pavements*—
 - 1 Capital cost.
 - 2 Repairs and maintenance.

DEFINITION OF ACCOUNTS.

3. (A) *Water and sewer systems* (1 Capital cost)—
(a) This account will be charged with the entire cost of the installation of water and sewer systems within the city up to June 30, 1910, and quarterly thereafter with all expenditures on account of new construction work, and with replacements costing \$1,000, or more, for a job, together with one-half per cent per quarter interest on debit balances.

(b) This account will be credited quarterly, proportionately with account C-1, with the balance of amounts collected, after proper credits to accounts A-2, B-1, B-2, and C-2, whether such balance be more or less than the quarterly capital installments with interest, as provided in the contracts.

(c) (2 Operation and maintenance)—
This account will be charged quarterly with all expenditures during the quarter on account of operation and maintenance of the water and sewer systems. This account will be credited quarterly with an amount equal to the total expenses.

4. (B) *Reservoirs, pipelines, and filtration plants* (1 Interest on capital cost)—

(a) This account will be charged quarterly with such proportion on the quarterly interest at one-half per cent on the entire cost of reservoirs, pipelines, and filtration plants as the amount of water consumed in the city during the quarter bears to the total consumption from the reservoir, or total amount of water filtered.

(b) This account will be credited with collections for water rentals quarterly by an amount equal to the interest charge.

(c) (2 Maintenance and operation)—
(d) This account will be charged quarterly with such proportion of the expenditures during the quarter, for the operation and maintenance of the reservoirs, pipelines, and filtration plants as the amount of water consumed in the city during the quarter bears to the total consumption from the reservoir, or to the total amount of water filtered.

(e) This account will be credited quarterly with an amount equal to the total charges.

5. (C) *Pavements*, (1 Capital cost)—
(a) This account will be charged with the entire cost of paving up to June 30, 1910, and quarterly thereafter with all expenditures during the quarter for new construction work, and with replacements costing \$1,000 or more, for a job, together with one-half per cent per quarter interest on debit balances.

(b) This account will be credited quarterly proportionately with account A-1 with the balance of amounts collected, after proper credits to accounts A-2, B-1, B-2, and C-2, whether such balance be more or less than the quarterly installments with interest, as provided in the contracts.

(c) (2 Maintenance and repairs)—

(d) This account will be charged quarterly with all expenditures during the quarter on account of maintenance and repairs of pavements.

(e) This account will be credited with collections from water rentals with an amount equal to the total charges.

6. The collections made on account of water rentals will be credited in the following order:

(a) First: To account A-2, maintenance and operation; B-1, interest on capital cost; B-2, maintenance and operation; C-2, repairs and maintenance. Amounts equal to the total expenditures.

(b) Second: To account A-1, capital cost; C-1, capital cost.

(c) Amounts equal to their proportion of balance of collections remaining after credits to accounts A-2, B-1, B-2, and C-2.

7. The contracts between the United States of America and the Republic of Panama, dated September 30, 1910, contemplate a quarterly statement of the accounts on water works, sewers, and pavements; that operating expenses, interest, and one-fourth of the year's capital cost shall be settled from collections, and a new capital cost determined each quarter, beginning July 1, October 1, January 1, and April 1, of each year.

GEO. W. GOETHALS,
Governor.

Hotel, Mess, and Commissary Accounting.

THE PANAMA CANAL,
OFFICE OF THE GOVERNOR,
CULEBRA, C. Z., April 1, 1914.

CIRCULAR No. 662:

Effective April 1, 1914, the Auditor of The Panama Canal will have charge of the hotel and mess accounting which has heretofore been in charge of the Subsistence Department, and will also have charge of the accounting division of the Panama railroad commissary department, which has been under the direction of the Examiner of Accounts. These duties will be performed by the commissary accountant, under the direction of the Auditor, in building No. 2, Cristobal.

All correspondence, reports, and papers pertaining to matters of accounting from storekeepers and warehouses of the commissary department, and from stewards of all hotels and messes of the Subsistence Department, will be addressed to the commissary accountant. This will include daily reports, invoices, transfers, debit and credit sheets, sale slips, reports of sale, and such accompanying papers from the commissary branches, warehouses, and manufacturing plants. It will also include daily reports, abstracts of issues, and other similar reports, and papers from the hotels and messes, formerly addressed to the Subsistence Officer.

Hotel and mess stewards will continue to send the same daily reports of coupons, cash, etc., to the Auditor's office at Empire that they formerly sent to the Examiner of Accounts.

Correspondence and inquiries by individuals and companies, or by other departments and divisions of The Panama Canal or The Panama Railroad Company regarding the commissary department's accounts receivable and accounts payable, will be addressed to the commissary accountant.

The Auditor is authorized to modify the above instructions as circumstances may require.

GEO. W. GOETHALS,
Governor.

Field Accounting of Property.

THE PANAMA CANAL,
OFFICE OF THE GOVERNOR,
CULEBRA, C. Z., April 1, 1914.

CIRCULAR No. 656:

1. Foremen's orders, requisitions, inspection calls, or other evidences of debits against accountable officers; also, credits to accountable officers' accounts, will be given voucher numbers.

2. In all cases where debits are received by an accountable officer, the property clerk will immediately make an abstract of the charges on form PC 395 and transmit the same to the responsible officer in duplicate. The responsible officer will, in turn, sign and return one copy of this receipt to the accountable officer, if the property has been received as invoiced, retaining one copy as an initial charge against his responsibility. These forms PC 395 will be numbered from one upward, and on the division of accountability sheets maintained by property clerks, voucher numbers and serial numbers assigned to each form will be shown, so that ready reference can be had to all papers for inspection. Accountable officers will attach the signed forms to the particular vouchers to which same refer, and maintain

a complete file of vouchers with the forms attached thereto.

3. Responsible officers, on receipt of property, will take receipt for same on form PC 401 from the employee actually having the property in his possession. All employees to whom property is entrusted must be furnished with books form PC 401, which books must show what property is actually charged to the employee, the yellow copies to be retained in the books, and the white copies to be retained by responsible officers as a charge against each employee. White slips covering all debits and credits must be maintained for each employee, and new receipts taken from each employee at least semiannually.

4. As regards property in shops of the Mechanical Division, the foregoing instructions will not be applicable. The accountable officer of the Mechanical Division will take receipts (form PC 395) from tool room foreman, who, in turn, will issue tools on metal checks as at present, except in cases where gangs are on detached service, when form PC 401 must be secured, as covered by Paragraph 3.

5. Property in use by families will be held on memorandum receipt given district quartermasters, and district quartermasters will not use form PC 401, except where property is issued to foremen, sanitary inspectors, and others, in which cases, the same procedure will be followed as provided for in Paragraphs 2 and 3.

6. No employee leaving the service or entering on leave will be paid off unless a release from property is furnished. As regards employees to whom property is actually entrusted, releases will be issued by responsible officers; releases to responsible officers will be issued by accountable officers, and releases for accountable officers will be issued by the Auditor after audit of his property accounts is completed, or complete transfer effected to his predecessor in office.

GEO. W. GOETHALS,
Governor, The Panama Canal,
President, Panama Railroad Company.

Official Correspondence.

THE PANAMA CANAL,
OFFICE OF THE GOVERNOR,
CULEBRA, C. Z., April 1, 1914.

CIRCULAR No. 616:

Officials and employees will be guided by the following in the preparation and handling of official correspondence.

SUBJECT.

1. The subject shall be stated in each communication, either in the body thereof, or near the top of the first page; and no communication shall embrace more than one subject unless absolutely necessary, as in the case of a general report.

NAMES.

2. Names of persons shall be stated in full, or with initials, at least once in each communication concerning them.

DATES.

3. All correspondence, statements, reports, etc., shall bear dates, to facilitate filing and recording.

ENCLOSURES.

4. When enclosures accompany a communication, a notation setting forth the number shall appear at the end of the communication. Thus: "3 encls." If, however, the enclosures are not definitely described in the text of the letter, they shall be listed at the end of the communication. Thus:

Mr. Cole's letter 10/6/13.

Duplicate of this letter.

Work request C. E. 1231.

Blue print 6625.

Etc.

5. Enclosures shall not be separated from communications of which they form a part unless absolutely necessary. When detached, they shall bear a notation with date of the communication to which they belong, and the communication itself shall likewise bear some notation concerning the disposition of the detached enclosures.

ENDORSEMENTS.

6. Endorsements shall not be written on the back of official correspondence, but may be noted on or pasted upon the face thereof.

PREVIOUS CORRESPONDENCE.

7. When there has been previous correspondence from an office concerning a particular subject, reference shall be made thereto by stating the date of the communication under reply, as well as the file number, if given. The file number may be written near the top on the left hand side of the letter. Thus: "Your file No. 23-36." A space with the words "Refer to file No." is provided on the opposite side of official letterheads for the file number of the sending office.

REFERRED OUT.

8. Papers referred to other offices for notation shall be returned promptly to the office to which they belong, properly noted.

SIGNATURES.

9. Heads of departments and divisions shall not delegate to minor officials the signing of official corre-

correspondence between departments and divisions without first securing the approval of the Governor.

IMPORTANT MATTERS.

10. There are many minor transactions among departments in which the Office of the Governor is interested only to the extent of knowing that they are being attended to methodically, but matters affecting the physical condition of Panama Canal property shall pass through the Office of the Governor. The head of each department, however, is directed to exercise careful discrimination in the use of authority affecting such matters.

WITH REPUBLIC OF PANAMA.

11. Correspondence of The Panama Canal with the Republic of Panama will be handled through or by the Executive Office, except that routine matters between officials of the Republic of Panama and The Panama Canal may be handled direct by such subordinate officials as the Governor may designate.

REQUISITIONS.

12. Correspondence with the Purchasing Department, or with contractors relative to requisitions covering purchases in the United States, shall be conducted through the Supply Department. Copies of communications of this nature which pass between the office of the Governor and the Purchasing Department direct will be furnished the Supply Department.

UNNECESSARY CORRESPONDENCE.

13. (a) The number and length of letters shall be minimized as much as practicable.

(b) Unimportant matters, which require no record, should preferably be handled by telephone.

(c) Letters which merely acknowledge receipt of communications are unnecessary.

(d) Letters of transmittal will be used only when necessary, and must refer only to the matter transmitted. They are not required with requisitions, work requests, form letters, or periodical reports.

(e) Whenever information of the same substance is to be conveyed to more than one person, carbon copies, joint letters, or circulars will be used.

REPLIES.

14. Communications requiring replies shall receive prompt attention, and it should not be necessary for the sending office to remind the office addressed of its failure or delay in replying to a letter. Each communication shall be replied to separately.

COPIES.

15. Letters prepared for the signature of the Governor, or submitted through the office of the Governor, shall be accompanied by duplicates, in order that proper record may be kept. A carbon copy shall also be forwarded with the original of any communication, if there is reason to assume that the information contained therein is to be transmitted by the official receiving it to some other department or division.

GEO. W. GOETHALS,
Governor.

Removal of Empire Suspension Bridge.

THE PANAMA CANAL,
OFFICE OF THE GOVERNOR,
CULEBRA, C. Z., May 11, 1914.

All concerned—Notice is hereby given that arrangements are being made to take down the Empire suspension bridge, and all traffic on this bridge will be stopped within the next few days.

GEO. W. GOETHALS,
Governor.

Volunteer Fire Drills.

THE PANAMA CANAL,
OFFICE OF THE GOVERNOR,
CULEBRA, C. Z., April 1, 1914.

CIRCULAR No. 652:

Members of volunteer fire companies shall be excused by their immediate superiors, not exceeding two 1-hour periods per month, for the purpose of attending fire drill, except in cases of emergency, or where their absence would seriously interfere with work, and shall be paid their regular pay while attending such drills.

GEO. W. GOETHALS,
Governor.

Appointment.

THE PANAMA CANAL,
OFFICE OF THE GOVERNOR,
CULEBRA, C. Z., April 24, 1914.

CIRCULAR No. 661-7:

The appointment by the President of Mr. William K. Jackson, Jr., as District Attorney for the Canal Zone, is announced, the duties of the position having been assumed by Mr. Jackson on April 8, 1914.

GEO. W. GOETHALS,
Governor.

Leave Regulations.

THE PANAMA CANAL,
EXECUTIVE OFFICE,
CULEBRA, C. Z., April 25, 1914.

CIRCULAR No. 602-5:

RELIEF DUTY—SILVER EMPLOYEES.

1. A silver employee on a monthly pay basis who

works on Sundays and holidays may be granted one-half day off with pay for each Sunday or holiday he works, provided the work on which he is engaged will not suffer thereby and no increase of force will be necessary. This time off is not cumulative and not more than two days shall be granted in any month.

2. Heads of departments or divisions are authorized to use their discretion in granting this leave.

GEO. W. GOETHALS,
Governor.

Publication of Circulars.

THE PANAMA CANAL,
OFFICE OF THE GOVERNOR,
CULEBRA, C. Z., April 17, 1914.

CIRCULAR No. 614-1:

1. The series of circulars for the permanent organization has been started with No. 600, to avoid confusion with old series.

2. Subjects will be indicated for each circular, and a subsequent circular on the same subject will bear the same number, with a series number, thus: Leave regulations 602, 602-1, 602-2, etc.

3. All Acts of Congress relating to The Panama Canal approved after April 1, 1914, and those relating specifically to the permanent organization approved prior to that date, will be published by this office hereafter, under circular series 600.

4. All Executive Orders relating to The Panama Canal promulgated on or after April 1, 1914, and those applying specifically to the permanent organization promulgated before that date, will be published by this office under circular series 601.

5. Circulars are perforated to be bound in stiff covers, a limited number of which, for the initial distribution, will be furnished by this office. Additional covers, if necessary, may be obtained from the Supply Department.

6. An index to circulars will be published in the near future, with blank spaces for additions, and the index should be kept up to date by indexing each future circular received. The index is to be bound with the circulars.

GEO. W. GOETHALS,
Governor.

Coal.

THE PANAMA CANAL,
OFFICE OF THE GOVERNOR,
CULEBRA, C. Z., April 1, 1914.

CIRCULAR No. 634:

Coal will be purchased by the Supply Department, the weights to be certified by that department's weighmaster, and accepted as final by all concerned. The Supply Department will invoice coal to the various departments and divisions the same as other material and supplies.

GEO. W. GOETHALS,
Governor.

Charge of Cristobal Coaling Plant Construction.

CULEBRA, C. Z., April 28, 1914.

To all concerned—Effective at the close of business May 2, Assistant Engineer F. C. Stanton will, in addition to his other duties, assume local charge of construction work in connection with the Cristobal coaling plant, Atlantic terminals, vice Mr. R. B. Tinsley, resigned.

H. H. ROUSSEAU,

Approved: *Engineer of Terminal Construction.*
GEO. W. GOETHALS, Governor.

"Radio Station" Changed to "Darien."

PANAMA RAILROAD COMPANY,
OFFICE OF SUPERINTENDENT,
COLON, R. P., April 29, 1914.

CIRCULAR No. 427:

All concerned—Effective at once, the station on the Panama railroad, now known as "Radio station," is changed to "Darien," in accordance with the designation given by the Navy Department to the wireless installation at that point.

F. R. BLUNT,
Acting Superintendent.

Appointments.

THE PANAMA CANAL,
OFFICE OF THE GOVERNOR,
CULEBRA, C. Z., May 5, 1914.

CIRCULAR No. 661-8:

The appointment is announced of Com. D. E. Dismukes, U. S. N., as captain of the port of Cristobal, and Lieut.-Com. H. V. Butler, U. S. N., as captain of the port of Balboa.

GEO. W. GOETHALS,
Governor.

Quarters for Gold Employees.

THE PANAMA CANAL,
OFFICE OF THE GOVERNOR,
CULEBRA, C. Z., April 1, 1914.

CIRCULAR No. 627:

APPLICATIONS.

1. A list showing all applications on file for each district will be posted in the office of the district quartermaster and will be open to inspection. District quartermasters will furnish copies of these lists on the first of every month to the Chief Quartermaster.

2. Applications will be placed on file, as follows:

(a) List No. 1. Applications from employees who entered the service prior to January 1, 1908, and whose services have been continuous so far as quarters are concerned.

(b) List No. 2. Applications from employees who entered the service subsequent to January 1, 1908. No assignments will be made from List No. 2 until all applicants on List No. 1 have been assigned.

PREFERRED LIST.

3. An employee tendered quarters on an original application from the list must accept or reject the tender, in writing, within 10 days after date of tender. If he declines the assignment, he will be carried on the "Preferred list" for 30 days, provided he makes written application requesting such action. At the end of 30 days, he will again be offered quarters of his class, provided they are available. If quarters are not available at the end of 30 days, he will again be offered the first available quarters, and if he refuses, he must file a new application and take his place at the foot of the list.

TRANSFERS OF QUARTERS OR APPLICATIONS THEREFOR.

4. Applications for family quarters from employees who are transferred to another district, either after tender of assignment or occupancy of quarters, will be placed above all applications on the waiting list. Applications on the transfer list will be filed according to date of transfer.

5. Unassigned applicants, transferred from one district to another, will take rank on the list at point of transfer according to date of original application.

6. Transfer of quarters must be requested by the head of the department in which the applicant is employed, and will be made only for the benefit of the service.

7. An employee may file an application at or transfer his application to a point other than that at which he is employed, provided—

(a) This is requested by the head of the department.

(b) That he will not be entitled to quarters in the district from which transferred until applications antedating his own have been taken care of.

HOLDING QUARTERS.

8. Family quarters may be held for nine weeks during the absence either of an employee to whom they are assigned or his family, or of both simultaneously, provided that this privilege shall not be granted for more than one period of nine weeks in any service year. If vacated a second time during the service year, either by the employee, his family, or both simultaneously, quarters will be held for not more than 30 days.

9. An employee whose service is terminated will be required to vacate family quarters within 10 days after termination of service.

ASSIGNMENTS.

10. No new assignment of family quarters shall be made to an employee within 15 days after the quarters previously assigned are forfeited or released.

FAMILY QUARTERS SURRENDERED THROUGH INJURY OR DISEASE CONTRACTED IN LINE OF DUTY.

11. As it is at times necessary for employees, in order to hasten recovery from injury or disease contracted in line of duty, to return temporarily to the United States, and by reason of such absence to surrender family quarters, the application of such employees may be placed at the head of the list for assignment to the first quarters vacated after their return to duty, provided their sojourn in the United States was upon recommendation of the Medical Examining Board.

GEO. W. GOETHALS,
Governor.

Retention of Family Quarters During Leave of Absence.

THE PANAMA CANAL,
OFFICE OF THE GOVERNOR,
CULEBRA, C. Z., May 8, 1914.

All concerned—Circular No. 627, dated April 1, 1914, "Quarters for gold employees," provides that "Family quarters may be held for nine weeks during the absence of either an employee to whom they are assigned or his family, or of both simultaneously, provided that this privilege shall not be granted for more than one period of nine weeks in any service year."

As the above circular was issued some time after April 1, a number of transportation requests have been issued to employees and their families occupying quarters, which provide for the retention of quarters for only 56 days. The time limit on all such requests is automatically extended to cover the period of nine weeks provided for in Circular No. 627, and the Washington Office of The Panama Canal will be so instructed, in order that return transportation may be arranged accordingly.

GEO. W. GOETHALS,
Governor.

Increase of Force Papers, Army and Navy Officers.

THE PANAMA CANAL,
OFFICE OF THE GOVERNOR,
CULEBRA, C. Z., May 7, 1914.

All concerned—Attention is called to the fact that

CANAL CLUBHOUSES.

Activities of the Young Men's Christian Association.

GENERAL.

The schedule for moving pictures for the week May 18 to 23 is, as follows: Monday, Cristobal; Tuesday, Gatun; Wednesday, Culebra; Thursday, Pedro Miguel; Friday, Empire and Balboa; Saturday, Corozal.

Transfer of the Empire clubhouse to Balboa has been approved. It is probable that a basement of concrete will be constructed to support the building, thus giving the clubhouse a more substantial appearance and adding considerably to the space in the building.

The transfer of the Porto Bello clubhouse to LaBoca, and its recreation for the use of the colored employees at that place, have been approved.

Miss MacLaren's dates are, as follows: Thursday, May 21, Culebra; Friday, Gatun; Saturday, Cristobal; Tuesday, May 26, Corozal; Wednesday, Pedro Miguel; Thursday, Empire; Friday, Culebra. She will give the "Misleading lady" at all of these performances, except at Culebra on the 21st; on this date, she will give "The man from home." This date will mark the anniversary of the opening of the Culebra clubhouse, and will also be Miss MacLaren's one hundredth appearance in imitative recitals in the Canal Zone. During the week May 13 to 20, Miss MacLaren gives "The auctioneer" instead of "The misleading lady," as previously announced.

The committee on games of the public school athletic league met on May 7 and decided to hold an indoor telephone athletic meet on Friday evening, June 19, at 7.30, in the various clubhouses. Events will be, as follows:

Boys—Seventy-five pounds and under—Standing broad jump, 10-yard dash, potato race (4); **90 pounds and under—**Standing broad jump, 15-yard dash, potato race (5); **110 pounds and under—**Running broad jump, 15-yard dash, potato race (5); **140 pounds and under—**Running broad jump, 15-yard dash, potato race (8).

Girls—Seventy-five pounds and under—Standing broad jump, 10-yard dash, potato race (4); **90 pounds and under—**Standing broad jump, 15-yard dash, potato race (4); **110 pounds and under—**Standing broad jump, 15-yard dash, potato race (5); **140 pounds and under—**Standing broad jump, 15-yard dash, potato race (6).

*The figures in parentheses indicate the number of potatoes to be used in the event.

COROZAL.

The bowling activities resulted in the following high scores for the week ending May 9: *Tenpins*—Parkis, 229; Thirk, 221, 213; Edwards, 212, 203. *Duckpins*—McDonald, 108, Ruggles, 105, Phillips, 100. *Baltimore duckpins*—C. Sims, 100.

A suitable float for bathing in the Canal opposite Corozal has been authorized, with an approach walk leading to it from the old railroad embankment. This work is to be performed by the Quartermaster's Department, at private expense. Local persons interested in swimming are contributing to carry on the necessary construction, having pledged \$80 so far. The list for donations is open at the clubhouse, and all those expecting to use these facilities are invited to share in paying for the expense. One hundred and sixty dollars remain to be collected. A committee, consisting of F. W. Hatten, Arthur Hanson, and A. R. Mitchell, is receiving contributions.

The standing of the local league indoor teams is, as follows:

Teams.	Won.	Lost.	P. C.
Red Sox.....	3	1	.750
Naps.....	3	2	.600
White Sox.....	1	2	.333
Cubs.....	1	3	.250

PEDRO MIGUEL.

Davis and Sims rolled off the tie in duckpins on the Pedro Miguel alleys on Saturday night, Sims winning 5 16 pins. The score by games was:

Davis, 84, 89, 91—264.
Sims, 87, 105, 88—280.

A beginners' class in Spanish was started on Monday night.

A gymnasium class for men will be started on Wednesday night. This class will meet twice a week.

During the absence of Mr. C. B. Russell on vacation, Mr. P. T. Woolworth will act as secretary of the Pedro Miguel clubhouse.

CULEBRA.

The old Culebra checker club was reorganized on May 6, under the auspices of the Culebra Y. M. C. A., with the following enrollment: Lieut. A. H. Acher, Dr. Dunn, J. F. Warner, A. E. McClure, C. C. McColley, A. Wilson, W. R. Armitage, P. C. van Rosmalen, V. S. Kundriotis, B. A. Armstrong, and W. H. Rattiner. Dr. Dunn was elected president, and Mr. Rattiner, secretary. Challenges will soon be sent out to the other Y. M. C. A. checker clubs.

On Sunday evening, May 17, a set of slides on Swit-

zerland will be shown. All are invited to attend.

EMPIRE.

Mr. Sims of Empire and Mr. Davis of Corozal, who were tied for first place in the Isthmian duckpin league have rolled the tie off, and Mr. Sims won by eight pins. Three games were rolled on the Corozal alleys, three, at Empire, and three at Pedro Miguel. Mr. Sims receives the medal for the highest average for the Isthmian duckpin league.

On Tuesday evening, May 5, a duckpin match was bowled between a team composed of married men and one of single men. The single men won two out of three games.

Mr. King, who has been in charge of the bowling alleys part of the time for the last year, has resigned, and sailed for the United States. Mr. Drake will take his place on the alleys.

GATUN.

Interest in the game of bowling has been stimulated by the duckpin tournament recently organized. At present the "Tigers" are leading, with the "Pirates" a close second, the "Red Sox" third, and the "Superbas," fourth.

"Ladies' night" was observed on the bowling alleys on Thursday evening, May 7, when a ragtime tournament was held. The prize for high score was won by a team composed of Mr. Coleman and Mrs. Conley.

Some of the high scores in rubber band duckpins among the women for the week ending May 9 were: Mrs. Tricker, 151, 143, 133, 116, 112; Mrs. Conley, 136, 128, 119, 117; Mrs. Walsli, 119, 112; Mrs. Crosscup, 136, 133; Mrs. Logan, 107, 106.

The *American Year Book* has been added to the library.

The "Old time handball tournament" was formed on Thursday evening, May 7. Following are the officials: President, Laurence Wright; secretary-scorer, John Loulan; official referee, Nat Gilbert; committee on schedule and rules, Perry Twitchell, A. N. Kjellander. The entrance fee is 10 cents, and the prize a pair of gymnasium shoes. Any member of the association may enter. The following have already done so: Heslop, Wright, Sutcliffe, Smith, F., Peters, Godwin, Lailor, Dustheimer, Feehan, Twitchell.

Five members of the clubhouse have, so far, started the course in violin instruction begun recently, with Prof. Van Dyke as teacher. Seven of the members are taking piano lessons under the supervision of Mrs. E. T. Gilbert and Mrs. D. R. Walker.

CRISTOBAL.

The following new magazines will be found in the reading room: *National Geographic Magazine*, *Country Gentleman*, *Independent*, *London Illustrated News*, *Country Life In America*; also, the following daily papers: *Baltimore Sun*, *Cincinnati Enquirer*, *Columbus State Journal*, *Cleveland Plain Dealer*, *Detroit Free Press*, and *Philadelphia North American*.

The C. A. C. team was defeated by the C. T. C. boys' team in a dual athletic meet on Saturday, May 9. The score was 44 to 36. Following were the events: Standing broad jump relay; running hop, step, and jump; running broad jump; 5-boy medley relay, and modified street Marathon.

The single folks' bowling tournament will be held on Monday night, May 18.

There will be an invitation duckpin tournament on the Cristobal alleys on May 30, Decoration Day, to which all Y. M. C. A. bowlers in the Zone are invited.

Misdirected Letters.

ANCON, C. Z., May 11, 1914.

Lost—Black leather billbook, containing \$60 in United States paper money. Reward for return to G. R. Jasper, Balboa shops.

COMMISSARY DEPARTMENT.

New Commissary Storehouse.

The erection of a new storehouse and warehouse for the use of the commissary division of the Supply Department at Cristobal has been authorized. It will be of fireproof construction, 60 by 200 feet in plan, and its estimated cost, including foundations, is \$70,000. It will be situated to the south of warehouse No. 2, which is in the building housing the cold storage plant, and upon its completion, will take care of the stores now housed in the building adjacent to the present Cristobal commissary.

Sale of Corozal Farm Products at the Commissaries.

Attention is called to the fact that fresh eggs from the Corozal farm are now on sale at the commissaries at 60 cents per dozen. Other produce on sale from the farm consist of lettuce, papaya, radishes, and mangoes. Roses, grown on the farm, are sold at 50 cents a dozen. The announcement is made that horses and cattle can be pastured at the farm at the rate of \$2 a head per month.

Sales of Gasoline to Employees.

Hereafter, gasoline will be sold to employees of the Canal through the retail commissaries. Deliveries will be made by district quartermasters.

Fresh Fruit and Fish.

THE PANAMA CANAL,
SUPPLY DEPARTMENT,
CULEBRA, C. Z., May 11, 1914.

CIRCULAR No. 67:

All district quartermasters and all commissary storekeepers—It is desired that the retail stores carry an assortment of all fresh fruits and vegetables for which there is any demand.

Fresh fish must be stocked on Friday, and every day, if warranted by the demand. Special orders for fresh fish placed with you by any of the commissary patrons will be filled by the local buyer at Panama, as follows:

Orders received by the local buyer before 9 a. m., will be shipped on train No. 6, leaving Panama at 11 a. m., and arriving at Colon at 12.50 p. m., or train No. 44, leaving Panama at 12.15 p. m., and arriving at Bas Obispo at 1.15 p. m.

Orders received by the local buyer before 11 a. m., will be shipped on train No. 46, leaving Panama at 2.45 p. m., and arriving at Bas Obispo at 3.40 p. m.

Orders received by the local buyer before 4 p. m., will be shipped the following morning on train No. 4, leaving Panama at 7.30 a. m., and arriving at Colon at 9.20 a. m., or train No. 42, leaving Panama at 8.40 a. m., and arriving at Bas Obispo at 9.40 a. m.

Fish arriving after departure of cold storage wagon may be sent out with grocery delivery at customer's risk.

To facilitate placing orders, the local buyer will call each commissary in turn immediately after the storekeepers have telephoned their daily cold storage orders to Cristobal.

Storekeepers will arrange to dispose of all perishable fruits and vegetables each night, as provided in circular No. 52, dated May 2, 1914.

R. E. Wood,
Chief Quartermaster.

Change in Name of "Retail Stores."

CRISTOBAL, C. Z., May 4, 1914.

CIRCULAR No. 45:

All concerned—Effective May 1, the designation of "Retail stores," Cristobal, in changed to Cristobal commissary, and the term "Retail stores" will be used to designate the retail stores as a whole. The initials of Cristobal commissary will be "C.C.," instead of "R.S.," as formerly.

R. E. Wood,
Chief Quartermaster.

Commissary Purchases by Servants.

SUPPLY DEPARTMENT,
OFFICE OF THE CHIEF QUARTERMASTER,
CULEBRA, C. Z., May 6, 1914.

CIRCULAR No. 62:

All district quartermasters and all commissary storekeepers—There is occasional complaint that the servants of gold employees are not promptly waited on; that

errors are made in putting up their orders, and that too many coupons are taken from their books.

Usually, the first is due to their not announcing who sent them, the second to their forgetting what they were sent for, and the third to their making unauthorized purchases.

Patrons may insure prompt service and assist in preventing mistakes and unauthorized purchases by giving servants a note to present to storekeeper, specifying what is wanted. The note will be O. Kd. by storekeeper, and each item crossed off as filled, and the note taken up by last sales person handling.

R. E. Wood,
Chief Quartermaster.

Commissary Cold Storage.

Retail prices of cold storage provisions for the week beginning May 14, 1914:

FRESH MEATS.		Price.
Mutton—Stewing, per pound.....	7	
Shoulder, neck trimmed off (4 pounds and over), per pound.....	9	
Entire, forequarter (not trimmed, 10 pounds and over), per pound.....	8	
Legs (8 to 10 pounds), per pound.....	17	
Cutlets, per pound.....	18	
Short cut chops, per pound.....	20	
Lamb—Stewing, per pound.....	8	
Entire forequarter, neck trimmed off, per pound.....	10	
Legs (5 to 8 pounds), per pound.....	20	
Chops, per pound.....	24	
Cutlets, per pound.....	24	
Veal—Stewing, per pound.....	10	
Shoulder, for roasting (not under 4 pounds), per pound.....	13	
Chops, shoulder, per pound.....	17

Oranges, Jamaican, per dozen.....	16

*Indicates reduction from last list.
 **Indicates 5 cents allowed for return of bottle.
 †Indicates advance on list.
 ††Fowls weight each, about as follows: 3, 3½, 4, 4½, and 5 pounds. Prices are based accordingly; when size ordered is not in stock, next lightest weight is supplied and refund note sent for difference.
 †Sold only from commissaries; no orders taken for delivery.
 †Not less than half of a fresh ham or shoulder will be sold.

Supplies for the Canal.

The following steamers with supplies for the Panama Canal and Panama Railroad Company arrived at the ports of Colon and Cristobal during the week ending May 2:

Prinz Eitel Friedrich, April 28, from New York, with 54 pieces steel rods, for Pacific terminals; 164 packages bolts, for stock.

Ancon, April 27, from New York, with 416 crates roofing tile, 10,500 pieces hollow tile, 200 bundles reinforcing bars, steel, 117 bundles steel bars, for permanent buildings; 100 crates roofing tile, nine reels insulated wire, four towing locomotives, for First Division; 38 packages drugs and medical supplies, for Health Department; 93 packages pipe and fittings, for Division of Municipal Engineering; 362 packages structural steel, for Second Division; one dredge boom, for Dredging Division; 137,100 pounds coke, 40 bales excelsior, 58,160 bags cement, 30 cases hardware, 75 rolls wire cloth and fencing, 53 bales rubber hose, 100 crates buckets, 20 cases lampblack in oil, 210 pieces steel plate, 100 bundles coal baskets, 423 bags oats, for stock; and a miscellaneous cargo, the whole consisting of 60,160 packages, weighing 3,976 tons.

Metapan, April 29, from New York, with 21 packages window glass, for permanent buildings; 150 crates iron valves, 65 pieces cast iron pipe and fittings, for Division of Municipal Engineering; 29 packages chain fender material, 62 packages electric material, for First Division; three packages electric material, for Mechanical Division; 500 kegs track spikes, 172 bundles galvanized pipe, 1,276 pieces galvanized pipe, for stock.

Parismina, April 29, from New Orleans, with 48 pieces untreated yellow pine piling, 302 pieces cast iron pipe-fittings, for stock.

Turrialba, April 30, from New Orleans, with 57 boxes marble, for permanent buildings; 393 barrels paving brick, for Division of Municipal Engineering; 490 bags feed, 146 rolls cotton duck, 137 pieces untreated yellow pine piling, 25,799, board feet, yellow pine ceiling, 767 pieces sewer pipe, 25 bundles cypress doors, for stock.

Tenadores, May 1, from New York, with 63 packages chain fender material, for First Division; 82 packages valves and fittings, for Division of Municipal Engineering; nine packages structural material, for fortifications; 10 barrels castor oil, 50 cases caustic soda, 10 barrels pitch, 14 cases rubber packing, 150 cases putty, 400 bundles steel bars, 300 pieces steel plates, for stock.

MOVEMENTS OF OCEAN VESSELS.

The following is a list of sailings and scheduled arrivals of the Panama Railroad Steamship Line; of the Royal Mail Steam Packet Company; of the Hamburg-American Line, and of the United Fruit Company's Line:

 †Will carry mail to the United States.
 ‡Will carry mail for Alabama, Arkansas, Louisiana, Mississippi, and Texas.

Panama Railroad Company's steamers sail from Piers 8, 9, and 11, Cristobal, at 3 p. m.

Royal Mail steamers leave for New York on alternate Tuesdays at 2 p. m.; for Southampton, on alternate Tuesdays at 10 a. m.

United Fruit Company's ships for New Orleans direct, leave on Thursdays at 3 p. m.; for New Orleans, via Boca del Toro and Havana, on Thursdays at 4 p. m.; ships for New York, via Kingston, on Thursdays at 2 p. m.; for New York direct, on Wednesdays at 2 p. m.; for Limon and Boca del Toro on Saturdays at 4 p. m.; and for Boca del Toro direct, on Thursdays at 4 p. m.

The Hamburg-American steamers *Prinz Eitel Friedrich* and *Prinz Sigismund* sail for New York, via Kingston and Fortune Island, on Mondays at 10 a. m.; the *Prinz August Wilhelm* and *Prinz Joachim* sail for New York, via Kingston, Santiago de Cuba, and Fortune Island, on Tuesdays at 10 a. m.

Withdrawal of International Insurance Company from Canal Zone.

The International Insurance Company (Compañía Internacional de Seguros) of Panama, has advised the Executive Secretary of its intention to withdraw from the business of underwriting fire insurance in the Canal Zone. All persons having any claims against the company arising from policies issued by it upon property in the Canal Zone, or who hold the company's policies upon property located in the Zone, are requested to communicate with the office of the Executive Secretary, Ancon, C. Z.

CANAL

RECORD

Volume VII.

ANCON, CANAL ZONE, WEDNESDAY, MAY 20, 1914.

No. 39.

The Canal Record

Official publication of The Panama Canal.

The Canal Record is published weekly free of charge, one copy each, to all employees of The Panama Canal and Panama Railroad Company whose names are on the gold roll. Extra copies and back numbers can be obtained from the news stands of the Panama Railroad Company for five cents each.

Address all Communications,

THE CANAL RECORD,

Ancon, Canal Zone,

Isthmus of Panama.

No communication either for publication or requesting information, will receive attention unless signed with the full name and address of the writer.

NOTES OF PROGRESS.

Towing Ship's Cargo through the Canal.

The tug *Mariner*, towing barges No. 11 and No. 15, left Cristobal at 6 a. m., Tuesday, May 19, and arrived at Balboa at 6.40 p. m. the same day. This is the first direct voyage of vessels from ocean to ocean, by way of the Canal. These barges are to be loaded with sugar transferred to them from the steamship *Alaskan* at Balboa, and towed back to Cristobal.

Three other barges, so loaded, started through the Canal to Cristobal at 2.40 o'clock in the afternoon of Monday, May 18. They reached Pedro Miguel Lock at 6.25 p. m., and tied up for the night. They were locked through next morning, leaving the upper end of the lock at 9 o'clock. They passed Caimito at noon, and reached Gatun Locks at 4 p. m. They were locked through, and reached Cristobal at 9 p. m. The barges were towed by the tug *La Boca* from Balboa to Gatun Locks, and by the *Porto Bello* from Gatun Locks to Cristobal.

A second loaded tow will probably be ready in the afternoon of May 20, and the *Mariner* will take it through direct.

The *Alaskan* is a vessel of the American-Hawaiian Steamship Company, diverted to the Isthmus in consequence of the interruption of traffic on the Tehuantepec railway. It arrived at Balboa on May 7, loaded with 12,100 tons of sugar and 200 tons of canned pineapples. On account of the heavy shipments already at hand from vessels regularly making the port, the project of lightering the *Alaskan's* cargo through the Canal was adopted. Seven barges have been diverted to this service, and it is hoped that five more can be spared from the Atlantic entrance. The discharge of the cargo began on Sunday, May 17, and has advanced at the rate of between 1,000 and 1,200 tons per day; the rate will depend on the availability of barges, and the degree of interference by rain.

The Panama Railroad Company, as agent for the American-Hawaiian Company, is in charge of the stevedoring, and has between

45 and 50 men regularly engaged in unloading the *Alaskan*. When the *Columbian*, of the same line, was at Balboa, its cargo was unloaded on to the concrete wharf at a rate as high as 1,800 tons a day.

Operating Force Takes Charge of Gatun Spillway.

Effective Saturday, May 16, the operation of the Gatun Spillway was turned over to the Electrical Division by the Division of Erection. This is the first of the spillways or locks to be completed and placed in charge of the permanent operating organization.

Final Test Operation of Gatun Locks.

The first trial test of the control board of Gatun Locks, which consisted of a test lockage, was made on May 9, 1914, and was described in THE CANAL RECORD of last week.

As a final test of the control board and lock equipment, an actual lockage was made on Monday, May 11. Two vessels, the floating crane *A. La Valley* and the tug *Exotic*, were locked up from the sea to the lake. All operations were made from the control board. The time of the lockage was one hour and 12 minutes. The facility of operation showed the advantage of the system of remote control.

In the above lockage, the boats were under the motive power of the floating crane. On Tuesday, May 12, a lockage was made using the control board and towing the vessels by means of the towing locomotives. The vessels were a derrick barge and a scow, which were lashed together for towing, and were towed by locomotives Nos. 641, 642, 643, and 644. The lockage, which was from the lake to the sea, was completed in one hour and six minutes. This operation was not the first in which the locomotives were used, but was the first in which both the control board and the locomotives were used. The operation employed all the essential features of the system of towing and lock operation to be used at the locks and demonstrated the effectiveness of the system.

Operations of the Dredges in Culebra Cut.

Excavation in the Canal channel at Cucaracha slide is being carried on by pipeline suction dredge No. 86, in the center of the channel, near the south end of the slide; the dipper dredge *Gamboa*, working approximately opposite the center of the slide; and the dipper dredges *Cardenas*, *Chagres*, and *Mindi*, working on the north side of the slide. On Tuesday May 19, the channel at the slide had a minimum width of 140 feet, and a minimum depth of 30 feet, the surface of the water in the Cut being slightly below 85 feet above sealevel.

Ladder dredge No. 5 is excavating at the base of the east Culebra slide, north of Gold Hill, and the ladder dredge *Corezal* is maintaining and deepening the channel at a point off Hagan's slide, approximately opposite the Culebra passenger station.

TEN YEARS OF CANAL WORK.

Tenth Year Closes with Practical Completion of the Canal, and Marks the Beginning of Use.

Ten years of American occupation of the Canal Zone were completed on May 4, 1914, the transfer of Canal property from the second French company to the United States having been effected on May 4, 1904. The three first years of the American occupation were devoted principally to preparation. Excavation in the Culebra Cut section, continued from the first with such equipment as was available, was not well under way on the American plan until the first part of 1907; and the only dredge at work up to May 20, 1907, was the old French ladder dredge *Mole*, maintaining the channel between the ocean and the steel wharf at Balboa.

The decade has seen the virtual completion of the Canal, and the beginnings of its commercial and naval use. During the past year, the sealevel channels have been opened to Gatun and Miraflores Locks; Gatun and Miraflores Lakes have been filled to normal height; Culebra Cut has been flooded; all of the locks have been operated repeatedly; and a number of vessels in the Canal service, as well as several rafts of piles under tow, have passed from ocean to ocean through the Canal.

Atlantic Entrance.

In the Atlantic entrance, a year ago, a barrier lay across the channel, about 1,000 feet north of Gatun Locks, to support a railway track connecting the west side of Gatun Locks, and Gatun Dam, with the east, or Panama railroad, side of the Canal. The track across this dike was taken up on September 2, 1913, and the pipeline suction dredges completed its excavation in October. Construction excavation in the Atlantic entrance channel was completed in December, and subsequent excavation in that section has been for maintenance, in the removal of silt.

Pacific Entrance.

Two dikes across the Pacific entrance channel were separating the sea from Miraflores Locks, a year ago. One of these, about a mile and a half south of the locks, was blown up on May 18, and the dredges proceeded to clear the channel to the second, which was about 5,000 feet south of the locks. The second dike was blown up on August 31, opening the channel to the lower guard gates of the locks, which had been closed on August 20. Dredges proceeded with the removal of the spoil, and on May 1, 1914, the Pacific channel was at full depth through all of its 8½-mile length, with the exception of 8,000 feet. The excavation remaining to be done in this part of the channel, on May 1, 1914, included 511,444 cubic yards of rock and 1,535,048 cubic yards of earth.

Gatun Lake.

Filling Gatun Lake to final level began on June 27, by the closing of the sluice gates in

the ogee of the spillway dam, by which the surface had been regulated around an elevation of 50 feet above sealevel. The surface was at that time 48.25 feet above sealevel. On August 1, it was at 54.4; September 1st, 60.6; October 1st, 66.2; November 1st, 72.6; December 1st, 82.2. On December 29, when the surface had attained an elevation of 84.8, one of the 14 gates of the spillway was opened to lower it to 84 feet, to prevent danger of overflowing at Caño saddle, No. 4, where the natural rim of the basin was as low as 87.4 feet above sealevel. The work of raising the saddle to 105 feet, by means of an earth embankment, was let to contractors, who began the task in December and have now practically completed it. Forces of the Canal Commission had completed in November a dike at the headwaters of Las Gauchas creek, half a mile east of Gatun, which was the only other point in the perimeter of the basin, exclusive of the site of Gatun Dam, which required raising. The surface of the lake has been maintained around 85 feet above sealevel since December.

Miraflores Lake.

Dry excavation of the channel between Pedro Miguel and Miraflores Locks was completed in September, and the formation of Miraflores Lake began on October 1, when the drainage culvert left in the ogee of the spillway dam during its construction was closed. The dam was built across a part of the Río Grande subject to tidal inundation, and the culvert was closed when the water stood at about five feet above mean tide. On November 1, the surface of the lake was at 45.4 feet. On November 20, the surface had risen to 51.4 feet. Since that date, it has been controlled around a level of 50 feet, by letting water out through Miraflores Locks when necessary. This was resorted to in lieu of discharging at the spillway, on account of excavation in progress in the spillway discharge channel, which was completed in the latter part of April, 1914. On May 1st, 328,872 cubic yards remained to be dredged from the Canal channel in the lake.

Flooding Culebra Cut.

The flooding of Culebra Cut began on October 1, when the pumping station at its north end, adjoining the dike at Gamboa, which had kept the waters of the Chagres River out of the Cut, was closed down, and water was admitted through the six 24-inch discharge pipes, formerly used for pumping drainage water out of the Cut. On October 10, when the surface of the water in the Cut had risen to 61.7 feet above sealevel, which was about six feet lower than the surface of Gatun Lake, the dike was blown up and the Cut became, hydrographically, a part of Gatun Lake. At this time the channel was blocked by the base of Cucaracha slide. Water was passed to the south end of the Cut by ditching, sluicing, and pumping, and even level on both sides of the slide was attained on October 28, at elevation 71.92 feet.

Excavation in Culebra Cut.

Steamshovel excavation in the lower levels of Culebra Cut ceased on September 11, the last shovel working at the base of Cucaracha slide to keep the tracks clear while equipment, used in other parts of the Cut to September 10, was withdrawn. Eleven shovels were then engaged for a while on the higher levels of the sides of the Cut. After the completion of minor tasks, four remained at the top of the east Culebra slide, and two on the west

Culebra slide. One was withdrawn from the east side in November, the three others working there to April 1. Two shovels were operated on the west Culebra slide until the middle of December. They were withdrawn, but two others resumed excavation there on April 1, and are now at work. Total steamshovel excavation in the Culebra district in the year ending May 1, 1914, amounted to 4,771,411 cubic yards.

Dredge excavation in Culebra Cut began on October 23, at the bases of the east and west Culebra slides. Dredging at the base of Cucaracha slide began on October 26, and the principal work of the dredges since those dates has been in connection with these three slides. About nine dredges have regularly been employed in the Cut. Up to May 1, 1914, they had excavated 1,688,278 cubic yards from Cucaracha slide, and a total of 2,428,229 cubic yards from all parts of the Cut.

Hydraulic monitors, supplied with water pumped from Lirio Lagoon, which was formed by damming the upper Obispo River at a point near New Culebra station on the re-located Panama railroad, began excavating near the top of the east Culebra slide on June 17. A relay station on the east slope of Gold Hill, at elevation 425 feet above sealevel, was placed in service on November 6, to supply monitors which began cutting their way into the top of Cucaracha slide. These began the removal of material actually involved in the slide, in December. Up to May 1, 1914, the monitors of this plant had excavated a total of 1,251,494 cubic yards.

The following table summarizes the total excavation in the Culebra Cut section, by years:

May 1 to May 1	Cubic Yards.
1904-05.....	648,911
1905-06.....	1,250,570
1906-07.....	4,861,895
1907-08.....	11,285,217
1908-09.....	13,955,753
1909-10.....	14,886,427
1910-11.....	15,925,976
1911-12.....	16,448,513
1912-13.....	13,762,255
1913-14.....	8,451,144
Total.....	101,476,661

Lockages.

The first passage of a vessel through any of the Canal locks was effected at Gatun, by the passage of the tug *Gatun*, on September 26, 1913. The first passage of a vessel through Miraflores Locks was made on October 14, and the first passage through Pedro Miguel Lock on October 24. On these dates, only one side of each set of locks was in readiness for use—the west flight at Gatun and Miraflores, and the east flight at Pedro Miguel. The other flights have been completed since, and all have been used, interchangeably, for the passage of vessels.

The following table summarizes the lockages made to May 1, 1914:

Month	Gatun	Pedro Miguel	Miraflores
September.....	2	0	0
October.....	6	3	4
November.....	5	4	2
December.....	11	2	4
January.....	9	4	8
February.....	7	2	2
March.....	11	2	2
April.....	7	6	9
Total.....	58	23	31

One lockage was made at Pedro Miguel on May 3, bringing the total number, for all

locks, to May 4, 1914, to 113.

The first passage of a self-propelling vessel through the Canal from ocean to ocean was effected on January 7, by the derrick barge *Alex. LaValley*. Several barges, handled from place to place in the excavation, had been passed from ocean to ocean before this. To May 4, no vessel had gone directly through, in uninterrupted passage. The tug *Reliance*, which reached the Atlantic entrance on February 1, and had previously sailed from Colon to Balboa, via the Strait of Magellan, is the first vessel to have sailed entirely around the continent of South America by way of the Canal.

An auxiliary service separate from the primary function of a lock has been exacted from Gatun Locks, by dry docking in the upper level vessels which could not be handled conveniently at the Mount Hope dry dock, and for which the new and larger dry docks are not ready. Five submarine vessels were docked in the upper east chamber on March 9, and the ladder dredge *Corozal* was placed in the same chamber with them on March 17. The vessels were locked up to Gatun Lake on April 11.

Lock Construction.

The mass masonry for all the locks was practically completed in May, 1913. The concrete placed since that time has been reinforced, and principally in connection with the installation of operating machinery. The work at the locks, with the exception of back-filling and grading, was transferred to the First Division on October 15. The total amounts of concrete in the locks on May 1, 1914, were, as follows: Gatun, 2,068,830 cubic yards; Pedro Miguel, 928,267 cubic yards; Miraflores, 1,507,765 cubic yards. Following the completion of the heavy work, the mixing and handling plants were dismantled; at Gatun, one of the four cableways was left until January 26, for handling material to the west side of the locks after railway connection was broken; and at Miraflores, one berm crane was continued in service in the building of the spillway, and one other was left standing for general service in handling materials. It is now unloading Chamé sand, from barges towed to the southeast wing wall.

Lock gates—A year ago, the gates at Gatun and Pedro Miguel were about 95 per cent completed, and those at Miraflores, 78 per cent. All gates were completed at Gatun on January 19, 1914; at Pedro Miguel, on January 3; and at Miraflores, on January 17. On January 23, the McClintic-Marshall Construction Company, contractor for the fabrication and erection of the gates, shipped to the United States the last of its Isthmian equipment which had not been purchased by the Canal Commission.

Gate operating machinery—Of the 92 miter gate moving machines, six had been installed at Gatun, and two at Pedro Miguel, on May 1, 1913. During the past year, all the mechanical and 98 per cent of the electrical installation on these machines was completed. One miter gate forcing machine was in place a year ago; the remaining 45 have since been completely installed.

Water control valves—All of the 116 rising stem gate valves, of which 86 had been placed a year ago, have been completely installed, tested, and accepted; and the same is true of the 120 cylindrical valves and 12 auxiliary culvert valves, of which 109 and nine, respectively, were in place a year ago.

Emergency dams—Of the six emergency

dams, the first was swung across the east approach at Gatun Locks, for test, on May 3, 1913. The last one, on the west side at Miraflores, was accepted in January, and the organization for the supervision of this work was discontinued on January 31. The emergency dams contain a total of approximately 14,000 tons of steel.

Chain fenders—Of the 24 chain fenders, one had been installed a year ago, at Gatun. On May 1, 1914, 10 machines for Gatun Locks, 10 for Pedro Miguel, and four for Miraflores, with parts of other machines, had been received. At Gatun, mechanical installation is about 50 per cent complete; at Pedro Miguel, 47 per cent; at Miraflores, 24 per cent. Of the 24 chains, two have been delivered to date.

Towing locomotives—Tests were conducted on the sample towing locomotive No. 640, between February and May, 1913.

The contractor presented an alternative design when tenders were originally called for, but thorough investigation showed that there were many requirements of the service that were not covered by this design, and, therefore, the award for the sample machine was made on the Canal Commission's design. After the test of this sample locomotive, it was found desirable to incorporate several features that were not in the original design of the Commission or in the design as presented originally by the contractor. The Commission engineers, with an engineer of the contractor, worked up these changes on the Isthmus, based on experience in testing the trial locomotive, and contract was made accordingly. The first of the accepted type, No. 641, arrived on the Isthmus on January 27, 1914, and was installed on the west side of the center wall at Gatun Locks. To May 1, six were in place at Gatun, three at Pedro Miguel, and four at Miraflores, leaving ten to be placed at Gatun, five at Pedro Miguel, and 16 at Miraflores. The first use of the locomotives in handling vessels through the locks, was made on April 1, at Gatun. On April 9, three were used for the first time at Pedro Miguel, in towing a raft of piles. Track installation, with and without rack, is about 99 per cent completed at Gatun, Pedro Miguel, and Miraflores.

Transformer rooms—The installation of transformers in the transformer rooms of all locks has been completed. Of 2,618,241 linear feet of cable ordered for the galley ducts of the locks, about 99 per cent had been delivered to May 1, 1914. Of the above cable, 1,082,187 feet had been pulled into the ducts at Gatun, and 1,119,923 at Pedro Miguel and Miraflores. The total cable pulled at all locks, hydroelectric station, spillway, Pedro Miguel and Miraflores transmission line, and Gatun duct line is 2,202,110 feet, or about 85 per cent of the quantity ordered.

Lamp posts—Of the 208 lamp posts at Gatun Locks, all but one are in place, 83 having been placed during the past year. All of the 130 posts at Pedro Miguel are in place, all having been erected since May 1, 1913. At Miraflores, out of a total of 168, of which none had been erected a year ago, the following is the status: 101 with single arms, and 60 with double arms have been erected, leaving seven double arm posts to be erected. Material has been ordered for a telephone system by which talking connections may be made from any lamp post to the control house, at each lock.

Control houses—The erection of the concrete control houses, situated on the center walls, was begun at Gatun and Pedro Miguel in June, and at Miraflores in July, 1913. The houses at Gatun and Pedro Miguel have been completely finished except the placing of windows, doors, and monitors, and that at Miraflores except placing tile roof, windows, doors, and monitors. A test of lock operation under the remote control was made at Pedro Miguel on March 28, and the system for Gatun Locks was about ready for test early in May. At Miraflores, the instruments and switches are in place, and the work of erecting and connecting the main control board is about 70 per cent completed.

Dams and Spillways.

Dams—Dry filling on Gatun Dam, for which the hydraulic fill had been completed in September, 1912, was finished on December 15, 1913, having been in progress since 1907. Additional dry fill has since been placed for grading the surface; the total fill on May 1, 1914, was: Wet, 10,728,965 cubic yards, dry, 12,195,017 cubic yards, a grand total of 22,923,982 cubic yards. The fill for Pedro Miguel Dam, all dry, was completed in August, 1913, a total of 695,938 cubic yards having been placed. Dry fill for Miraflores Dam was completed in February, 1914, and amounts to 1,758,423 cubic yards; the wet fill, 661,048 cubic yards, had been completed in December, 1911.

Spillways—On May 1, 1913, concrete work for the Gatun Spillway was 97.3 per cent completed, and one spillway gate had been installed. Mechanical installation of the 14 gates and their operating mechanism was completed on September 25, and their operation under remote control, from a switchboard in the hydroelectric station, was tested satisfactorily in February. Work of raising the crest of the levee along the east side of the discharge channel, reaching to the Mindi Hills, and of riprapping its water side, was begun in December, and occupied several months.

Concrete for the Miraflores Spillway, of which one-fourth had been placed a year ago, was completed on August 27, and on August 30 the last of the eight gates was lifted into place above the ogee, ready for adjustment to the bearings between the piers. Mechanical installation of the gates was finished in September, and electrical installation is now about 85 per cent completed. The spillway gate nearest the locks was opened early in April. A new pile trestle, about 600 feet long, over the discharge channel, for the track connecting the east side of Miraflores Locks with the Panama railroad, was completed on March 30; the work of grading the approaches to this trestle is still in progress.

Electrical Supply.

The hydroelectric station at Gatun, excavation for the foundations of which was about half done a year ago, and for which 2,730 cubic yards of concrete had then been laid, is now practically finished, only odds and ends of final work remaining to be done. The turbogenerators are undergoing tests, and it is expected that the station will be placed in service this month, relieving the steam plant at Gatun.

Excavation for the substations at Gatun and Miraflores was begun in November. Foundation work for the Cristobal substation, on a fill made for the purpose, began in March, and 600 timber piles were driven. Excavation for the Balboa substation began on May 1,

1914. The steel framework for the buildings at Gatun, Miraflores, and Cristobal has been completed, and the erection of the walls, of hollow concrete blocks, is under way at Gatun and Miraflores. Approximately 80 per cent of the electrical equipment for the four stations has been received from the United States, and installation at Gatun will begin shortly.

For the transmission line of this system, construction of foundations began approximately one year ago, at New Culebra. The delivery of anchor bolts began in July, and at about the same time forces of the United States Steel Products Company began the assembly of the track-span bridges, in a shop at Gatun. The five first assembled bridges were delivered to the Canal Commission forces on September 22, and erection began on the same day; 161 foundations had been placed to that date. To May 1, 1914, all but 11 of the 917 bridges, weighing approximately 5,000 tons, had been placed, and the three conductors and one ground wire on each side were strung between Mount Hope and a point opposite the former settlement of Diable. The part of the line on the west side of the railroad between Gatun and Mount Hope was placed in service at 6,600 volts on March 29, and the corresponding section on the east side, at 2,200 volts, on April 15. A section between the Miraflores power plant and Paraiso was placed in service in April, connecting with the Gold Hill line.

The laying of underground duct lines, for local distribution in this system, was begun in April, with the line between the Hotel Tivoli and the new administration building.

Aids to Navigation.

From May 1, 1913, to May 1, 1914, the following work was done by the lighthouse division:

Atlantic section—The caisson foundation for the west breakwater light was towed from the inner end of Limon Bay, where it had been temporarily sunk, to the west breakwater, where it was sunk on its permanent site. When the caisson was practically sunk in position, the riprap foundation under it failed, and it slid into deep water. Work of raising the caisson has been in progress.

Four gas buoys were placed temporarily to mark the channel in the Atlantic entrance, and one was placed on the 22-foot shoal in the Colon harbor approach. All of these are in operation and show flashing acetylene lights.

Beacons Nos. 1, 2, 3, and 4, marking the channel from Limon Bay to Gatun Locks, were completed and are ready for the permanent light installations.

Electric pole lines were constructed from Gatun Locks to Limon Bay on the east side of the Canal, and from Mindi P. L. to Limon Bay on the west side; and from the Panama railroad to beacon No. 3.

Gatun Lake section—Range towers Nos. 4, 6, 8, 10, 12, 22, 27, and 28 were practically completed, thus completing all the 32 range towers to be used in the system of lighting the Canal.

Beacon No. 28, lake section, was completed, and the foundation for beacon No. 11 was constructed.

Acetylene gas lighting apparatuses were installed in range towers Nos. 7, 8, 9, 10, 11, 12, 17, 18, 21, 24, and 25, and certain of these were put in operation for the use of the dredging fleet. Electric pole lines were constructed

from the transmission line, at Gamboa, to range towers Nos. 25 and 28.

Nineteen of the gas buoys, which will mark the channel through the lake region, were placed on their stations.

Culebra Cut section—Beacons Nos. 1, 2, 3, 4, 5, 6, 9, 10, 11, 12, 13, 14, 15, 16, 18, 19, 20, 21, 22, 25, 27, 28, 29, and 30, were completed, and the foundations for Nos. 8 and 24 constructed. These beacons will be electrically lighted and for that purpose a pole line has been constructed from a point opposite Bas Obispo to Pedro Miguel, on the east side of the Canal, and the line to extend from Pedro Miguel to Bas Obispo, on the west side, was completed from Pedro Miguel to Contractor's Hill.

A trench containing four ducts embedded in concrete, to carry electric transmission lines across the bottom of the Cut at Bas Obispo, was constructed and one cable was pulled.

Pacific section—Six gas buoys were placed on their stations, and put in operation, to mark the channel in the Pacific entrance.

An electric cable was laid from the Miraflores power station to range towers Nos. 12 and 13, and temporary lights put in operation for the use of the dredging fleet.

Material for completing the gas generating and compressing plant at Balboa, in order that gas accumulators (tanks) may be charged at that plant, for range towers, beacons, and buoys, was installed.

Office—A sailing chart, on a scale of 1/20,000 in two sections, known as Charts Nos. 1 and 2, of the Panama Canal, each section measuring 56 inches by 72 inches over the border, and containing all the principal features embodied in standard navigation charts, was prepared and sent to the United States, where it is being photolithographed and printed in colors, on a scale of 1/40,000.

Floating Caissons.

The floating caisson for the Miraflores Spillway was completed on May 31, 1913. That for the spillway of Gatun Dam had been completed in the preceding February. Both were erected by the McClintic-Marshall Construction Company.

The keel for the first lock entrance caisson was laid on February 5, 1914, at the yards of the contractor, the Union Iron Works, of San Francisco. Since that time, the assembly of about 40 per cent of the 1,100,000 pounds of steel, and the riveting of about 30 per cent of the structure have been completed; over 55,000 rivets have been driven. Of the 115 drawings covering all the structural work and fittings, 105 have been checked and approved. Delivery of this caisson at the Pacific entrance is expected in September of this year.

Breakwaters.

Filling on the Naos Island breakwater and the west breakwater in Limon Bay, the restles for which were finished in the latter part of 1912, has continued throughout the past year. The first quarter-mile of the Naos Island breakwater, from the fill off East Balboa, kept sinking and slipping, and on October 7 the dumping of large rock along this part was begun, from a quarry at Sosa Hill. This method was effective in making the fill stable. Sufficient large rock being available from the excavation for the dry docks of the Balboa terminals, the Sosa Hill quarry was closed on March 16, and one of the steamshovels formerly engaged in it was then transferred to the dry dock site, where four others were at work. To date, over 2,000,000 cubic yards of

spoil have been dumped on this breakwater, and it is now at approximately final grade and elevation.

On the west, or Toro Point, breakwater in Limon Bay, the total fill to May 1, 1914, was 1,944,285 cubic yards. Practically all of the work done on this breakwater in the past year has been in armoring. This has been so far advanced that the quarry at Porto Bello was closed on April 30, 1914. The quarry will be left in such shape that it may be reopened later, if necessary.

Construction on the east breakwater began in October, 1913. Work has been delayed by late arrival of piles, one cargo of which was burned at sea in November. The steamship *Thor* arrived at Balboa on March 22 with a second cargo, most of which has been towed in rafts through the Canal and across Limon Bay to Coco Solo Point. These piles are now being driven, under double shifts. A considerable amount of preparatory work, including the excavation of a small harbor at Coco Solo, the erection of small shops and storehouses, and the laying of yard tracks and track connections with the Panama railroad at Mount Hope, has been accomplished, and it is expected to begin the dumping of rock in June. The first rock will be taken from the Sosa Hill quarry. A test run of 21 loaded dump cars from Balboa to Cristobal, was made on April 6; 630 Lidgerwood flat cars, retired from Canal excavation, will be overhauled for use in this service. The repairs will be made at Balboa shops.

Terminal Facilities.

Award for the machinery for the coaling plants at both ends of the Canal was made on August 22, and a 700-foot extension of the previously proposed plant for the Atlantic entrance was authorized at the same time.

Farms for fuel oil storage tanks have been surveyed in available areas at both entrances; studies have been made of the type, size, and arrangement of equipment to be adopted; specifications have been prepared for the fuel oil pumping plants; and preliminary study has been made of a gasoline storage plant. Two 40,000-barrel tanks for the Government were completed at each entrance. Construction of the fire walls was begun in April. Numerous applications from private organizations for fuel oil and coal storage concessions have been received.

Atlantic end—The 1,000-foot steel and concrete pier No. 8 of the Panama railroad, a part of the permanent terminals at Cristobal, was placed in commercial use in February; the concrete wharf, No. 9, flanking Roosevelt avenue, had been in part service since January, 1913. The outer end of this wharf, and the wharf, No. 10, connecting it with the old Pier 11, have been practically completed. The Panama Railroad Company cancelled on March 5 the contract of the Central American Construction Company, Limited, dated June 30, 1913, for the erection of the steel sheds on Nos. 9 and 10. This work had been begun by the contractor in October. The construction of an additional pier, generally similar to No. 8, to be situated about 300 feet beyond the latter, and known as pier No. 7, was authorized on December 22, and borings on the proposed site for it began immediately afterward. The dredge *Caribbean* removed 173,538 cubic yards of spoil from the proposed slip between these piers and from the site of pier No. 7 during the month of April. The mole from which the piers project

has been extended 873 feet, making its total length of 4,958 feet.

Preparations of the coaling plant site have included dredge excavation, and wet and dry filling, at the north end of Mindi Island, across the French canal from Cristobal. Piles to support the superstructure of the plant have been stored on the island, close to the site. Construction of a steel swing bridge over the French canal, half a mile south of the dry dock, for rail connection with the plant, was begun in January, with the driving of foundation piles. The superstructure and operating mechanism are to be installed by the American Bridge Company.

Pacific end—The sinking of caissons for the landward extension of the quay wall, from the inner end of the 656-foot portion, known as the lumber wharf, which was completed on February 6, 1912, and placed in commercial service on July 13 of the same year, was advanced to the outer toe of the abandoned Sosa Dam in June, 1913. The superstructure of this extension, to the head of the slip, was completed in December, and that of the 300-foot section, at right angles to this and reaching to the land end of Pier No. 1, has been completed, with the exception of the brick paving. The laying of concrete in the superstructure of Pier No. 1, the only new pier authorized under present plans, began in March. The timber sand wharf, at the outer end of the lumber wharf, was demolished in February, and the sinking of caissons for an extension of the quay wall over this area is in progress.

Excavation for the dry docks and entrance basin, and coaling plant, which began on January 1, 1913, was eight per cent completed a year ago, the total excavation to that time having been 111,246 cubic yards. During the past year, steamshovels have removed from the site 913,421 cubic yards, bringing the excavation to 73 per cent of completion, and leaving 373,324 cubic yards yet to be removed. This is in addition to the future wet excavation of the cofferdam, which was built alongside the site in July, August, and September. Excavation for the coaling pocket was carried to grade in March, and the placing of concrete for the side walls was begun in February. Part of the material was delivered for two steel gates, 55 feet high by 65 feet long, for the dry dock No. 1, contract for which was let in October, 1912, to the McClintic-Marshall Construction Company.

Shops.

A year ago, the superstructure of only one of the 28 buildings of the permanent shops at Balboa had been begun. This was for building No. 8, the planing mill, work on the foundations for which had begun in November, 1912. The first of the cement tile roofing was laid on this building, beginning June 18. On July 7, the planing mill at Gorgona shops was closed and the moving of its machines to the new building at Balboa was begun; the new mill was in active operation before the end of the month. The shipment of roofing to the terminals from the manufacturing plant at Paraiso was finished on December 22. Erection of the last of the mill-type buildings to be completed, building No. 9, the galvanizing plant, was completed in March. The only buildings yet to be erected are two small toilet houses and No. 28, the office building, which will be built of hollow concrete blocks. Foundations for this building were completed on March 5, and the erec-

tion of its steel framework is now practically completed. Standard-gage track connections have been laid throughout the shop area.

With the rise of Gatun Lake, the closing and removal of the shops at Gorgona was made necessary. The moving began on July 7 and was completed in the last part of August. The planing mill and foundry were transferred direct to Balboa, and the other work was distributed between the shops at Empire and Cristobal. The first "Blow" of steel at Balboa was made on September 5. The Empire shops resumed their former activity from September 1 to February 1, when the transfer of men and machines to Balboa was begun. The office of the superintendent and the clerical, drafting, and planning forces were transferred to Balboa on February 24. The transfer of Canal car and locomotive repair work began on March 15, and of the instrument repair shop early in May, both being now completely installed at Balboa. The only work now in progress at Empire shops, with the exception of the operation of the electric and air compressor plant, and the hostling of a few locomotives, is a slight amount of steamshovel dismantling, and the completion of the moving of the Quartermaster's store.

The transfer of Panama railroad car and locomotive repair work to Balboa began in March and was completed the same month. The Mechanical Division took charge of the roundhouse at Cristobal, and the engine house in the Panama yard, on April 1.

The transfer of the former dredging division shops at Balboa to Balboa shops was completed on January 2, and the shipways have been demolished.

The shops at Paraiso were reopened on November 1, for service in connection with the dredging operations. Two air compressors, for local use, were transferred there from Miraflores Locks, and placed in operation on April 20.

Buildings.

With the abandonment of Gorgona and Matachin, the buildings in serviceable condition were transferred to other villages, notably Corozal, Ancon, and Balboa. The transfer of quarters from these villages began in March, 1913, and was completed in August. About 600 natives living in the vicinity were transferred, through the cooperation of the Canal Commission, the Panama railroad, and the Government of Panama, to a site about 40 miles down the Bay of Panama, which was formally dedicated as *Gorgona Nueva* (New Gorgona) on December 30.

In line with the completion of work in the vicinity, and the general movement of activities toward the south end of the Canal, some of the quarters in Bas Obispo and Las Cascadas have been transferred to the villages at the Pacific end. The assignment of family quarters in Bas Obispo and Las Cascadas was discontinued in September, but the Chief Quartermaster has allowed employes of the Dredging Division to occupy quarters at Bas Obispo, without the usual privileges. Camp Elliott, occupied by a battalion of the United States Marine Corps, most of which sailed for Mexico on January 21, and the remainder on March 27, has been consolidated with the village of Bas Obispo.

Instructions were issued on January 27 to cease the assignment of family quarters at Culebra and Empire, and the transfer of quarters from these villages, and also Gatun,

to the south end of the Canal is under way.

The settlement at Diablo, with the exception of two privately owned houses, was demolished in February, the buildings being transferred to La Boca.

All quarters of United States employes in Colon and Cristobal were consolidated under one district on August 1, and general repair of the Panama railroad quarters was begun.

Erection of the first quarters of the permanent type, with walls of hollow concrete blocks, was begun at the new town of Balboa on January 5, with 20 4-family houses, which are now nearing completion. Authority was granted early in April for the erection of 10 additional 4-family, 30 2-family quarters, and two buildings of the permanent type for bachelors' quarters, and the foundation work for these has been begun.

A permanent town for silver employes, to be known as La Boca, situated on the fill between Sosa Hill and the Canal, was laid out in July, and its occupation began in December.

Municipal work for the permanent village of Pedro Miguel was begun in November and completed in the latter part of April. The commissary, clubhouse, and fire and police stations of Gorgona were transferred to Pedro Miguel.

The manufacture of hollow concrete blocks for use in the walls of permanent buildings was begun at Corozal on November 10, a plant containing 12 machines for the process having been installed in the west side of the cement storage shed. The plant has been turning out blocks of several sizes at the rate of about 2,300 in every 8-hour shift; a day and a night shift are employed. The total output of blocks to May 1, 1914, was 580,000.

The erection of the steel framework for the permanent administration building, overlooking the new townsite of Balboa, was begun in June, 1913. The laying of the roof was begun on February 10, and the building is now nearing completion.

Water Supply.

The new rapid mechanical gravity filtration plant for Colon and Cristobal was placed in use on February 24. It has a capacity of from 6,000,000 to 7,000,000 gallons daily. A 20-inch pipeline from the Brazos Brook reservoir to this plant had been completed in September. All work on the tunnel through the Quebrancha divide, for furnishing an auxiliary supply to the reservoir from Gatun Lake, was completed in June, and the valves were first opened on November 17.

Work was begun in August on a plant for pumping and purifying water from Miraflores Lake, and for a system of distribution along the south end of the Canal. The transfer of pumps from the Cocoli reservoir to the temporary pumping station on the edge of Miraflores Lake was completed on October 18, and the use of lake water, in conjunction with the supply from the Rio Grande reservoir, was begun on October 19. The 300,000-gallon wash tank for the new filtration plant was completed in February, and the filter building is now about 25 per cent completed. A new high pressure reservoir on Ancon Hill was begun in August, 1913, and completed on April 20, 1914. This gives a storage of 2,500,000 gallons. The laying of a new 30 inch main from the purification plant to the foot of Ancon Hill has been practically completed, and the construction of a new pumping station, at the foot of the

hill, near the new administration building, is in progress and is 60 per cent completed.

The pumping station at the south end of the Chagres River bridge of the Panama railroad, for supplying water to Bas Obispo, Las Cascadas, and Empire, was continued in operation. The rise of Gatun Lake made necessary its being moved to a higher elevation.

Panama Railroad.

The rise of Gatun Lake necessitated the removal of the old main line of the Panama railroad between Gorgona and Bas Obispo, which was completed in the early part of October. The permanent main line on the east side of the Canal between Gamboa and Pedro Miguel was placed in service for Colon-Panama passenger trains on September 2; it had been used by through freight trains since May 25, 1912. The final grading of the embankments across the Brazos and Quebrancha bottoms, in the Gatun River valley, was begun early in August and completed on October 30. The installation of the bascule bridge over the Gatun River was completed in November. Erection of a steel wagon bridge alongside the Chagres River bridge was begun in February and is now practically complete. Excavation of a bank between mileposts 37 and 38, liable to slide, was carried on by task work, throughout the year. The embankment through Miraflores Lake was ripped with large rock in March. A new route south of Diablo, by which trains are to run to Balboa before reaching Panama has been surveyed and is now undergoing final grading. A connecting double track was laid from Panama to the proposed site of the Balboa passenger station.

A branch line service has been maintained since September 2 between Panama and Bas Obispo. A pontoon barge for a permanent crossing of the Canal, built by Canal forces, was constructed alongside the French canal at Mount Hope, and launched on March 25. It was towed to Paraiso on March 27, and the erection of the trestle was begun on April 2. Final adjustments for service were begun on May 4.

Automatic signals were placed in service between Caimito and Pedro Miguel on April 15, giving continuous service between the latter station and Colon. The laying of a transisthmian 4-way duct line, for telegraph and telephone cables, was begun on April 14, at Gamboa, and is now in progress.

The new passenger station at Panama was placed in regular service, for both first and second-class passengers, on November 16. The demolition of the old station had been completed on September 27. Sites have been selected for new stations at Balboa and Paraiso. The stop at Diablo was abolished on January 17, and Miraflores was made a flag station in March.

Radio Stations.

Erection of a temporary radio station at Balboa, begun by forces of the Marine Corps on February 10, was completed by them in June. This station, like the Colon station, was opened to commercial service, both having wire connections with the Panama railroad telegraph. The location of the new permanent stations at both Balboa and Colon, to use 300-foot masts, has been decided, and the construction of the foundations is under way.

Bids for the erection and equipment of the high power station at Caimito, now known as Darien, were opened on May 10, 1913. Con-

tract for furnishing the equipment was awarded to the Federal Telegraph Company, and that for the erection of the 600-foot towers to the Penn Bridge Company. The locations for the buildings were staked out in October, and the operators' quarters have been completed. The first shipment of steel for the towers is expected to arrive in the near future, and erection is to begin immediately afterward.

New Equipment.

Contract for two floating cranes of 270-tons capacity was awarded in May, 1913, to the Deutsche Maschinenfabrik Actiengesellschaft, of Duisburg, Germany. The pontoons for both cranes were completed in April, and the erection of the steel above deck is well under way. Delivery of the cranes at the Atlantic entrance is expected by January 1, 1915.

The first of two new 15-cubic yard dipper dredges, ordered from the Bucyrus Company, of South Milwaukee, Wis., in January, 1913, sailed from Port Richmond, N. Y., on February 17, 1914, under tow, and arrived at Colon on March 15. This dredge, the *Gamboa*, was placed in work at Culebra Cut on April 3, its assembly having been completed alongside the wharf at Paraiso. The second dredge, the *Paraiso*, sailed from Port Richmond on April 26 and is now at sea.

Contract for six steel dump barges, each of 1,000-cubic yards capacity, to be used in connection with the large dipper dredges, was let in May, 1913, to the Maryland Steel Company, of Sparrows Point, Md. Two of the barges arrived at Colon on December 18, two on January 30, and two on March 25.

Bids for four, and for two, steel tugboats, for service in handling and docking vessels at the entrances to the Canal, were opened at the Washington office on March 23. The bids were forwarded to the Isthmus for recommendation; to May 4, award had not been made.

Two colliers, authorized in an Act of Congress dated June 23, 1913, were contracted for in April from the Maryland Steel Company. These vessels, each to have a capacity of 12,000 tons of coal, will be used to haul coal from the United States to the Canal coaling plants.

Depopulation of the Zone.

The work of removing the inhabitants from the Canal Zone, and of acquiring title in the United States to all lands in the Zone, in accordance with Articles VI and XV of the Treaty of February 26, 1904, between the United States and Panama, has been continued throughout the past year. During this period, the entire native towns at Gorgona, Matachin, Gamboa, Santa Cruz, Cruces, Juan Mina, Bas Obispo, Las Cascadas, Cerro Gordo, Cerro Salado, Cartagena, Spanish-town (at Paraiso), Mandingo Llano, Pedro Miguel, and Miraflores have been removed. The native settlements yet remaining in the Canal Zone are at Mount Hope, Majagual, New Gatun, Empire, Culebra, and a small settlement, Sweetwater, on the west side of Limon Bay, near Toro Point. Outside of the townsites named, and with the exception of several special cases, the west side of the Canal has been cleared between the Atlantic entrance and the Cocoli River, which is approximately opposite Miraflores Locks, and on the east side, the clearing is complete between Gatun and a point opposite Empire. In addition, the watersheds of the Caimitillo, Cameron, and Dominica Rivers, on the east side of the Canal and tributary to Miraflores

Lake, have been cleared of inhabitants during the past year.

In the year ending May 1, 1914, the Department of Law settled 1,928 claims, for \$147,978.50. These are in addition to the settlements made by the Joint Land Commission.

Division of Operation.

Since April 1, 1914, a Division of Operation has been making ready for the active commercial operation of the Canal. A Board of Admeasurement has been formed, and measurers are being trained for the calculation of tonnage of vessels, according to the rules prescribed in the Proclamation by the President, of November 21, 1913. Examinations for pilots have been held, and two pilots to be stationed at the Atlantic end, and one for the Pacific end, have been appointed; and a list of applicants is on file, in readiness for an increase of the force as soon as desirable. Captains of the ports of Cristobal and Balboa, appointed on April 1, have been assuming the control of navigation at the ports, and preparing systems of signals, etc., to be used when the Canal is opened to operation. Plans for operating the Canal, including a system of signals, have been devised for keeping track of vessels in transit through the Canal, and for controlling their movements. The first signal station will probably be built in the near future at Gamboa.

Organization.

Changes have been made in the organization during the past year in accord with the advance of the work toward completion. A Division of Municipal Engineering was created on July 16, 1913, to take over all municipal engineering work of the Department of Civil Administration, and of the Atlantic, Central, and Fifth Divisions, with the exception of the pumps and pipelines used in construction work in Culebra Cut. The Central Division, whose greatest work was the excavation of Culebra Cut, was abolished on October 10. The remaining steamshovel work was transferred to the resident engineer formerly in charge of the division, and the transportation was assigned to the Second Division. The Atlantic and Fifth Divisions were abolished on February 1, their remaining work being divided between the Second and Fourth Divisions. Beginning February 1, the former Sixth Division has been designated the Dredging Division.

The Isthmian Canal Commission ceased to exist on April 1, in conformance with provisions of the Panama Canal Act of August 24, 1912; an Executive Order placing the law in effect on April 1, was signed on January 27, 1914. The Canal Commission was succeeded by The Panama Canal, and all employees, except the relatively few whose service was terminated on April 1, were transferred directly to the new organization. The Panama Canal comprises a Department of Operation and Maintenance, a Purchasing Department, a Supply Department, a Health Department, an Executive Office, and a Washington Office. These departments will exist in the permanent organization.

The District Attorney has been directed to take steps to cause the removal of the native inhabitants in the vicinity of the Palo Seco leper asylum. This action is taken in order to prevent mosquito breeding around the shacks they now occupy.

PORTO BELLO QUARRY CLOSED.

Operations Began in 1907.—Crusher Closed Two Years Ago.

The closing down of American operations at Porto Bello was completed on May 13, when the tug *Mariner* brought to Cristobal the last of the employees returning to the Canal Zone. Silver laborers to the number of about 100 were residents of the native town, and they will remain there, taking up some local means of subsistence. As the *Mariner* passed out of the historic harbor, a line of signal flags strung between its masts spelled, in the international code, "The last of Porto Bello." A gasoline launch, harboring at the native town, dipped the flag of Panama flying at its stern, and with its return salute the *Mariner* signaled the end of the American occupation.

The Canal clubhouse and several quarters, and laborers' barracks will be demolished at once and transferred to La Boca. The quarry equipment and the remainder of the buildings will be left, in the care of watchmen, pending the possibility of the resumption of operations in the quarry, in connection with the building of the east breakwater in Limon Bay. The radio station equipment, in service since December 31, 1909, sent its last message on May 13, and was left intact for possible future use.

The preliminary work for the establishment of the quarry at Porto Bello has begun in 1907. Sanitary work began on March 2, 1908, and the 27,000,000-gallon reservoir for the settlement was completed in May of that year. The actual opening of the quarry began in April, 1908. Ten 42-inch gage, 40-ton locomotives were delivered there in November, 1908, and the crushing of rock, by eight crushers, with a capacity of 2,400 cubic yards a day, was begun on March 2, 1909. When the barge service to Gatun was well established, the crushers were operated 16 hours a day; but upon the installation of an additional crusher, capable of handling large rock, on September 6, 1909, the output was so increased that the working time was reduced to 12 hours. In January, 1911, the day was cut to 10 hours, and on February 16, to eight, at which it remained until the closing of the crusher plant, on April 30, 1912. The crusher plant made its best 8-hour record, 3,737 cubic yards, on March 15, 1911. Its maximum monthly output was 87,109 cubic yards, in March, 1911; an average of 403.3 cubic yards per hour of total time.

When the crusher was closed, it had crushed approximately 2,000,000 cubic yards, used in the locks and spillway at Gatun, and in auxiliary concrete and municipal work in the Atlantic section. At that time, 170,000 cubic yards of rock were stored in the stock pile on the west side of Gatun Locks. This was cleaned out in the early months of 1914.

During the height of operations, seven steamshovels were used at the quarry, and the employees numbered about 900, of whom approximately 140 were white men.

Since the closing of the crusher, the quarry was worked exactly two years, to supply large rock for armoring the fill at the Toro Point breakwater. During that time, 456,652 cubic yards of armor rock were towed to Limon Bay and placed by locomotive cranes and derrick barges. The total output of rock from the quarry has been 2,378,231 cubic yards.

SOCIAL LIFE OF THE ZONE.

Ladies' Aid Society Suspends Activities.—General Notes.

The Ladies' Aid Society of the Union Church, Cristobal, held its final meeting for the year in the church on Tuesday afternoon, May 12. The program feature for the day was an informal address by Mrs. Martha S. Gielow, founder and vice-president of the Southern Industrial Education Association, who told of the association's work among the children of the Southern Appalachian Mountains and the remote rural districts of the South. At the close of this address, the Ladies' Aid voted \$10 to the association for its work. The ladies' aid society entered into three months' vacation with this meeting, the officers holding over until the resumption of meetings in September. A program committee was appointed to outline the work for the coming year and to present such outline at the first meeting in September. This meeting marked the close of the fifth year of the society, the organization having been formed on May 6, 1909. The meetings have been held monthly from May to September in each year. Missionary studies have been pursued, and papers have been read on work in various missionary fields in Alaska, Korea, Costa Rica, Cuba, China, Hawaii, and the Philippines. Among the speakers for the past year have been Miss Annie Coope, missionary to the San Blas Indians, Mrs. Thomas Edwin Brown, Jr., Mrs. Numa Nunn, Mrs. Charles A. Hearne, Mrs. Carl H. Elliott, Mrs. Stephen Witt. Miss Mum, a nurse of the Colon Hospital staff, gave a first aid talk with practical demonstrations of emergency bandaging. Mrs. Grimes of the Salvation Army Institute in Colon spoke on the work of the army at the present time. The society has twice prepared and sent garments for babies to the city missions of New York City, and donations of money have been made for missionary work in the aid of individual missionaries. At the close of the year, there were 42 names on the society roll.

Junior Clubs in Colon.

Six junior clubs have been formed in Colon with a total enrollment of 72 boys and girls. There are four clubs of girls and two of boys. The object of these organizations is to further the spirit of social intercourse in the right way among the neighborhood boys and girls, and to hold competitive games, and debates and discussions on current events. Each club has its own officers, a president and a secretary-treasurer. Meetings are held in the Cristobal clubhouse twice a month. The clubs are designated by initial letters, the names of the organizations being kept secret, and members pledged not to disclose them. Each club has its own pennant and pin. The membership of each organization is limited to 13. Since the organization of these clubs in March, the activities have been 12 bowling contests, farewell lunches and suppers, given by the girls to department members, and debates. Two debates now in the course of preparation are on the following subjects: 1. Resolved, That winter is better than summer. 2. That iron is more valuable than gold.

The library of the Ancon Study club has been removed to the residence of Mrs. T. C. McDonald, house No. 248, Tivoli district, where members and subscribers may draw books in accordance with the rules of the

library. There will be a Memorial Day program at the meeting of the club on Thursday afternoon, May 28, at the Hotel Tivoli, after which the club will enter upon a short recess.

The Pedro Miguel Dancing Club will hold its regular dance at the clubhouse on Saturday evening, May 23, instead of May 16, as announced in THE CANAL RECORD of last week.

A special meeting of St. Luke's Altar Guild will be held at the home of Mrs. Charles F. Mason on Tuesday morning, May 26, beginning at 9 o'clock. The next regular meeting will be held at the residence of Mrs. Joseph Bucklin Bishop on Tuesday morning, June 2, at 9.30 o'clock.

The junior auxiliary of St. Luke's Hospital chapel, Ancon, is meeting weekly. On the first and third Wednesdays in each month, the mission study class meets in the Sunday school room in the chapel from 4.30 to 5.30 p. m., and on the second and fourth Wednesday afternoons in each month the club meets in Ancon hall at 4.30 o'clock for practice in physical culture. Miss Louise Dexter has been elected president of the auxiliary, vice Miss Hazel Cummings, who has left the Isthmus. The club has three committees: Outlook, visiting, and house. Study books have been sent for and a set of books suitable for mission study or reading for adults will soon be placed in the Sunday school library. Miss Julia Heald has been appointed librarian in the place of Mrs. Luce, who has removed from Ancon.

Changes in Sightseeing Service.

Effective Sunday, May 24, the sightseeing train of the Panama railroad, which was put into operation on February 5, 1912, will be discontinued.

Effective Monday, May 25, the Panama railroad will operate the launch *Louise* through Culebra Cut. For the next 10 days, the *Louise* will start from the launch landing just north of the pontoon bridge at Paraiso. Later, it is to start always from Pedro Miguel Lock.

The *Louise* will leave Paraiso daily, except Sunday, at 9.20 a. m., running through the Cut and up the Chagres River a short distance, landing passengers at Gamboa, at 11.30 a. m.

On any afternoon or Sunday, the *Louise* may be chartered for trips to any part of Gatun Lake. Rates covering these special trips will be announced next week.

Sightseeing Barge Returned to Freight Service.

The sightseeing superstructure on the steel barge No. 14 was removed at Gamboa last week in order to make the barge available for service in towing cargo through the Canal. The material and equipment removed have been stored at Mount Hope. Accommodations for seating 300 people were built on the barge in January, and the vessel was transferred to Gatun Lake on January 18.

Remittances with Requests for Reservations.

The Acting Superintendent of the Panama Railroad Company calls attention to the fact that employees are constantly requesting the steamship ticket agent to make reservations on Panama railroad steamers in advance of the issuance of regular transportation request by the Governor's office.

The steamship ticket agent has no authority to make reservations under such circum-

stances, and employees are informed that no reservations will be made on Panama railroad steamers until the official transportation request and remittance to cover are in the hands of the ticket agent.

Pontoon Bridge in Service.

The pontoon railway bridge at Paraiso was placed in regular service in the morning of Thursday, May 14, for all trains crossing the Canal. The installation of the system of central control for the operations of opening and closing the bridge, and for the signals with derails protecting the approaches, is in progress, to supersede the present temporary arrangement of local manipulation.

The removal of the pile trestle across the Canal, bridge No. 57½, was begun on May 14, as soon as the operations under actual running conditions had demonstrated the effectiveness of the pontoon bridge. The 60-foot plate girder span in the center was first removed, being lifted on to the trestle barge which was built for this service, and towed aside. Rails and ties were then removed from the west half of the trestle, and the removal of the pile bents was begun. The bents are pulled up by means of a hawser, attached to locomotive No. 661, moving along on the east half of the bridge. The piles and timbers are then towed to the east bank of the Canal, and lifted out and piled alongside the track by locomotive crane No. 62. On the morning of May 20, the demolition of the west half was nearly finished, and it was estimated that it will require about a week longer to complete the removal of the trestle.

New Dredge "Paraiso" Due.

To noon, May 20, the new 15-cubic yard dipper dredge *Paraiso* had not arrived at Colon. It is expected at any time, having, to date, been 25 days out of port. The voyage of the *Gamboa*, twin of the *Paraiso*, over the same route occupied 26 days.

Theft of Dynamite from Mindt Magazine.

Thieves broke into the Canal magazine for the storage of explosives at Mindt in the night of May 14-15, and stole 40 cases of dynamite, each containing 50 pounds. Fifty pounds, lost from cartons, were recovered at the side of the Mount Hope-Gatun road, making the actual loss 1,950 pounds.

PERSONAL.

Notice has been received of the promotion of Mr. R. Budd, at one time chief engineer of the Panama railroad, from the position of chief engineer of the Great Northern Railway Company, to that of Assistant to the President, with office in St. Paul, Minn.

A ruling has been made by the Attorney General of the United States to the effect that Judge William H. Jackson may continue to sit as a member of the Canal Zone Supreme Court, even after taking his seat as District Judge, provided he serves on the Supreme Court bench without compensation.

The sailing of the steamship *Cristobal* of the Panama Railroad Steamship Line, was delayed from 3 p. m., Monday, May 18, to 7 a. m., Tuesday, May 19, for the purpose of taking on freight. The *Cristobal* sailed with a cargo of approximately 7,100 tons.

The cement shed at Gatun will be dismantled. It was built in 1909, and had a capacity of about 100,000 barrels of cement.

OFFICIAL CIRCULARS.

Reimbursement for Personal Expenditures.

THE PANAMA CANAL,
OFFICE OF THE GOVERNOR,
CULEBRA, C. Z., April 1, 1914.

CIRCULAR No. 658

1. Effective April 1, 1914, the following regulations will govern in preparation and rendition of reimbursement vouchers covering additional expenses incurred by officers and employees of The Panama Canal while traveling on official business, under proper orders, on the Isthmus. These regulations do not apply when the order requires travel which begins beyond, or extends beyond, the Isthmus.

2. Reimbursement for expenses incurred by an employee while on duty away from his official station will be allowed only when such expenses are in addition to the ordinary daily living expenses of the employee at home and are necessitated by the performance of the duty required.

3. Expense accounts should be presented immediately after the close of each month and should cover all expenses for that month.

4. Accounts must be rendered on the prescribed form and instructions on back of the same must be followed.

MEALS.

5. In order to avoid confusion resulting by reason of various designations, meals must be described as "Morning meal," "Noon meal," or "Evening meal." The place where meal is taken must be stated.

6. (a) Employees who board at a Panama Canal hotel when at their official stations, are not entitled to reimbursement if detailed for duty at a place where there is a Panama Canal hotel.

(b) If detailed for duty at a place where no Panama Canal hotel is available, they will be reimbursed for the actual and reasonable cost of meals, less 30 cents.

7. (a) Employees who do not board at a Panama Canal hotel, but keep house or board at a monthly rate when at their official stations, are entitled to reimbursement of 30 cents per meal when detailed to a place where there is a Panama Canal hotel.

(b) If detailed for duty at a place where there is no Panama Canal hotel, they will be reimbursed for the actual and reasonable cost of meals.

8. (a) Whenever it is necessary for employees to leave their regular stations before 7 a. m., for travel on special official business, or to remain away from official station over night, allowance of 30 cents for the morning meal will be made for those who do not board at but are convenient to a Panama Canal hotel. At stations where there is no Panama Canal hotel or mess, the actual and reasonable cost of morning meal will be allowed.

(b) If, while away from his official station on official business, it is necessary for an employee who boards at a monthly rate or keeps house, to remain over night, or, if returning, it is impossible to reach his official station before 6.30 p. m., allowance of 30 cents for evening meal, if taken before returning and a Panama Canal hotel is accessible, will be allowed. If a Panama Canal hotel is not accessible, the actual and reasonable cost of the evening meal will be allowed.

(c) The necessity of incurring expense for either morning or evening meals must be explained in accordance with foregoing paragraphs.

9. The Panama Canal hotel at Ancon is to be considered accessible to employees detailed to duty at Ancon or Panama. The Panama Canal hotel at Cristobal is to be considered accessible to employees detailed to duty at Cristobal or Colon.

10. Employees who do not use hotel books for their daily subsistence, and who are frequently detailed on official business away from their regular station, may procure a 16-coupon meal book for use on such trips, and thereby avoid the necessity of paying the cash rate of 50 cents per meal at Panama Canal hotels and the disadvantage of being reimbursed for only 30 cents.

11. The limitation to reimbursement at Panama Canal hotel rates does not apply to meals taken outside of regular hours, but the necessity for taking such meals must be explained.

12. No tips of any kind will be allowed while traveling on the Isthmus.

13. Sunday and holiday expenses incurred while under oral orders require specific explanation by the officer giving such orders.

TRANSPORTATION.

14. No reimbursement will be made for transportation paid to the Panama Railroad Company.

15. Should it be necessary at any time for an employee of The Panama Canal to pay for transportation either for himself, his assistants, or necessary equipment, while carrying out official orders, he should secure receipt of the agent to whom payment is made, and present claim for reimbursement to the Panama Railroad Company.

16. Reimbursement for cab or street car fare will be made only when the incurring of such expense has

been previously authorized by the Governor of The Panama Canal. The starting point and destination must be shown, as "Panama railroad station to Administration building, Ancon," and tariff rates must not be exceeded.

SPECIAL REGULATIONS.

17. There are certain special regulations that will govern the expense accounts of policemen and others detailed to plain clothes duty. These men may be

allowed the actual cost of meals taken, even though in excess of 30 cents and when there is a Panama Canal hotel accessible, provided in each case the voucher is accompanied by a special certificate stating "That to have availed themselves of the Panama Canal hotel rate would have revealed their identity and nullified efforts in investigations."

GEO. W. GORTHALS,
Governor.

Employees' Rates on Various Steamship Lines.

THE PANAMA CANAL,
OFFICE OF THE GOVERNOR,
CULEBRA, C. Z., April 1, 1914.

CIRCULAR No. 611:

The reduced rates quoted below will be accorded employees of The Panama Canal, and dependent members of their families, by the steamship lines indicated, upon regular requests issued by this office.

It will be understood, of course, that the reduced rates quoted are granted as a matter of courtesy on the part of the steamship companies, and are subject to change or cancellation at any time.

STEAMSHIP COMPANY AND PORTS.	FIRST CLASS.		SECOND CLASS.	
	Tariff Rate.	Reduced Rate.	Tariff Rate.	Reduced Rate.
<i>United Fruit Company.</i>				
Between Colon and New Orleans—one way—direct.....	\$50.00	\$40.00		
Between Colon and New Orleans—round trip—direct.....	95.00	75.00		
Between Colon and New Orleans—via Havana.....	55.00	45.00		
Children between eight and 12 years—half fare; between three and eight years—one way, \$12.50; round trip, \$23.75; one child under three years, not occupying seat at table or berth in stateroom—free; each additional child under three years, one way, \$12.50; round trip, \$23.75.....				
Between Colon and New York.....	75.00	56.25		
Between Colon and Boston.....	75.00	56.25		
Between Colon and Havana (including meals on New Orleans steamers).....	35.00	35.00		
Between Colon and Havana (Meals not included on S. S. <i>Pastores</i> , <i>Tenadores</i> , and <i>Calamures</i>).....	42.00	42.00		
Between Colon and Limon.....	12.00	9.00		
Between Colon and Kingston, Jamaica.....	25.00	18.75		

Stopovers allowed at all ports on all one way and round trip tickets.

Sailings from Colon for New Orleans, direct, every Thursday at 3 p. m.

Sailings from New Orleans for Colon, direct, every Saturday at 11 a. m.

Sailings from Colon for New Orleans, via Havana, every Thursday at 4 p. m.

Sailings from New Orleans for Colon, via Havana, every Wednesday at 11 a. m.

Sailings from Colon for New York, via Kingston, every Thursday at 2 p. m.

Sailings from Colon for New York, via Limon and Havana, every Sunday at 5 p. m. (*a la carte* service.)

Sailings from Colon for Boston, via Port Antonio, Jamaica, every Sunday at 1 p. m.

<i>Hamburg-American Line.</i>				
Between Colon and New York—one way.....	\$75.00	\$56.25	\$45.00	\$33.75
Between Colon and Kingston.....	25.00	18.75	15.00	11.25
Between Colon and Santiago de Cuba.....	40.00	30.00	25.00	18.75
Between Colon and Bocas del Toro.....	10.00	7.50		
Between Colon and Limon.....	12.00	9.00	9.00	6.75

Children over 12 years of age, full fare.

Children from eight to 12 years of age, half fare.

From three to eight years of age, quarter fare.

One child under three years of age free in each family when occupying berth with parent or guardian and not occupying a seat at table. Additional children under three years of age will be charged quarter fare.

<i>Royal Mail Steam Packet Company.</i>				
Between Colon and New York.....	\$75.00	\$56.25	\$45.00	\$33.75
Between Colon and Kingston.....	25.00	18.75	15.00	11.25
Between Colon and Antilla, Cuba.....	40.00	30.00	24.00	18.00

Children: Same as Hamburg-American Line.

<i>Leyland Line.</i>				
Between Colon and United States Gulf ports.....	\$40.00	\$32.00		
Between Colon and Limon.....	10.00	10.00		

Children: Same as Hamburg-American Line.

<i>Pacific Mail Steamship Company.</i>				
Between Balboa and San Francisco—one way.....	\$120.00	\$85.00		

No reduction for round trip. Children between five and 12 years, half fare; between two and five years, quarter fare; one child under two years free. No reduced rates to intermediate points between Balboa and San Francisco. Sailing approximately once a week.

<i>National Navigation Company.</i>				
Between Panama and Pedregal—one way.....	\$15.00	\$13.50		
Between Panama and Pedregal—round trip.....	30.00	22.50		

Round trip for family of four, occupying one stateroom of four berths, \$20 each. Children between eight and 12 years, half fare; between four and eight, quarter fare; under four, free. Sailings approximately three times a month.

Compagnie Générale Transatlantique.

Between Colon and Bordeaux, France, via Martinique and way ports, and between Colon and Saint Nazaire, France, via Martinique and way ports, sailings each Friday, alternately, at 10 a. m.; 25 per cent reduction from tariff rates allowed employees of The Panama Canal and dependent members of their families.

Compañía Trasatlántica de Barcelona.

Between Colon and Canary Islands, Cadiz, Barcelona, Marseilles, and Genoa, 25 per cent discount from first and second-class, and 12½ per cent discount from third-class, for employees of The Panama Canal and dependent members of their families.

GEO. W. GORTHALS,
Governor.

Reemployments.

THE PANAMA CANAL,
EXECUTIVE OFFICE,
CULEBRA, C. Z., May 1, 1914.

CIRCULAR No. 603-2:

1. All applications for reemployment received by heads of departments and divisions will be forwarded to this office, with recommendation.

2. All such applications received from persons in the United States will be forwarded by the Executive Secretary to the Washington Office and the order of preference shall be, as follows:

(a) *First list.* Persons discharged on account of reduction of force, whose general workmanship was rated "Excellent," or "Very good," and who apply for reemployment within three months after discharge.

(b) *Second list.* Persons discharged on account of reduction of force who apply for reemployment more than three months after discharge, and persons who resign, whose general workmanship was rated "Excellent," or "Very good."

(c) *Third list.* The names of persons whose general workmanship was rated "Good" may, in the discretion of the Governor, be placed on the eligible list with those of new applicants, in the order of receipt.

3. No person will be reemployed who is discharged for cause, or whose general workmanship or general conduct is rated "Mediocre," or "Poor" upon termination of service.

4. This circular modifies and will take the place of Paragraph 4 (b) of Circular No. 603.

GEO. W. GOETHALS,
Governor.

Duties of Traveling Engineer.

THE PANAMA CANAL,
EXECUTIVE OFFICE,
CULEBRA, C. Z., April 1, 1914.

CIRCULAR No. 648:

GENERAL.

1. The traveling engineer will be attached to the Mechanical Division, but will act in an advisory capacity to the trainmaster of the Panama railroad and all other officials in charge of transportation, and perform such other duties as may be assigned to him.

FUEL AND LUBRICANTS.

2. The traveling engineer will make regular inspection of fuel and lubricant consumption on all stationary, rolling, and marine equipment (except vessels plying between Cristobal and New York). This inspection to include all containers, tools, etc., in connection therewith.

3. He will instruct all concerned in the proper and economical use of fuels and lubricants, and of containers, tools, etc., therefor.

LOCOMOTIVES.

4. He will examine applicants for the position of locomotive engineer and decide whether their qualifications and experience, from a mechanical standpoint, are sufficient to warrant their appointment.

5. He will, as far as possible, provide firemen and hostlers for all divisions, hostlers to be selected with a view of obtaining men capable of eventually being promoted to engineers.

6. He will instruct engineers, firemen, and hostlers on all matters pertaining to the proper handling and operation of locomotives, riding in cabs for this purpose whenever possible.

7. He will examine locomotives he rides upon and will call the engineer's attention to any defects, ascertaining from him whether such defects have been reported.

8. He will visit all engine houses and consult with the foreman of the same, relative to running repairs of locomotives, checking the work reports turned over by engineers.

9. He will promptly notify the division concerned of any improper handling or abuse of locomotives, or occurrences by which they have been damaged, stating all facts leading up to and connected therewith, thus assisting the division, so far as he may be able, in placing the responsibility therefor, which report shall, except in cases of extreme emergency, be sent through the Superintendent of the Mechanical Division.

10. He will recommend to the Superintendent of the Mechanical Division when locomotives should be taken out of service for general repairs. In making this recommendation, the work in the shops and the urgency of the repairs needed shall be considered.

11. He will make careful inspection of all locomotives turned in for repairs and will submit report relative to their condition and the amount of work to be done.

12. When casualties to locomotives have occurred, or any investigations are held relative to the handling of locomotives, the traveling engineer shall be present at such investigations and submit any evidence pertinent thereto which may be called for.

13. He will keep in close touch with repair work on locomotives and of the general condition of locomotives in service, rendering such reports as may, in his opinion, be necessary, or desirable, to insure that a sufficient

number of locomotives are always ready for service, and that the cost of maintenance and upkeep is as small as possible.

14. He will make careful inspection of all locomotives coming out of the shop, riding on the same whenever possible during the first few days of operation, and will submit a report relative to all defects in material or workmanship that he may discover.

RESPONSIBILITY WHEN RIDING LOCOMOTIVES.

15. (a). When the traveling engineer is merely running on locomotive to demonstrate a higher efficiency to the engineer, he will be responsible only for the proper and safe handling of locomotive and train, the engineer to continue responsible for the observance of rules, rights, and matters pertaining to train movement.

(b). When the traveling engineer relieves an engineer, there shall be an official transfer of all orders and instructions pertaining to the train movement, the same as in exchange of locomotives by engineers, and in this case, the traveling engineer assumes all responsibility.

REPORTS.

16. He will submit monthly reports covering inspection; instruction of crews in the use of fuels and lubricants, including tabulation of the amounts used; instruction of crews in the handling of locomotives; number of examinations held; investigations attended, and general results accomplished.

GEO. W. GOETHALS,
Governor.

Act of Congress—Disposition of Money Received, Sale of Surplus Equipment, Etc.

THE PANAMA CANAL,
OFFICE OF THE GOVERNOR,
CULEBRA, C. Z., April 1, 1914.

CIRCULAR No. 600-1:

The extract quoted below from an Act of Congress is published for the information of all concerned:

GEO. W. GOETHALS,
Governor.

AN ACT Making appropriations for certain expenses incident to the First Session of the Sixty-third Congress, and for other purposes.

1. *Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,* That the following sums are appropriated, out of any money in the Treasury not otherwise appropriated, namely:

* * * * *

THE PANAMA CANAL.

2. SECTION 2. That during the fiscal year nineteen hundred and fourteen, all moneys received by the Isthmian Canal Commission, or the Governor of The Panama Canal, from any services rendered or materials and supplies furnished employees, the Panama Railroad Company, the Canal Zone Government, the Panama Government, and other departments of the United States Government, from hotel and hospital supplies and services: from rentals, wharfage, and so forth; from labor, materials, and supplies, and other services furnished vessels and to those unable to obtain similar labor, materials, supplies, and services elsewhere, shall be credited to the appropriation from which payments for the materials, supplies, labor, or other services were originally made, except that moneys received from the sale of material and equipment purchased and used for construction purposes, and as a reimbursement for the expenditures incurred in constructing water works, sewers, and pavements in the cities of Panama and Colon, including interest on such expenditures, excluding payments on account of the expenses for maintenance of such water works, sewers, and pavements incurred under agreement with the Panama Government, and otherwise herein disposed of, shall be covered into the Treasury as miscellaneous receipts; and except that after the Canal is opened for use and operation the net profits accruing from the operations herein authorized shall annually be covered into the Treasury of the United States, as provided for the profits accruing from the business authorized in Section 6 of The Panama Canal Act.

3. That until the close of the fiscal year nineteen hundred and fourteen, when any material, supplies, and equipment heretofore or hereafter purchased or acquired for the construction of The Panama Canal is no longer needed, or is no longer serviceable, it may be sold in such manner as the President may direct, and without advertising in such classes of cases as may be authorized by him.

* * * * *

Approved, May 1, 1913.

Requests for Work.

THE PANAMA CANAL,
OFFICE OF THE GOVERNOR,
CULEBRA, C. Z., April 1, 1914.

CIRCULAR No. 642:

1. Requests for work to be performed, made between departments and divisions of The Panama Canal, or between The Panama Canal and the Panama Railroad

Company, covering manufacture, repairs, alterations, and special services which cannot conveniently be executed by the department making the request, or which are specific functions of the department on which the request is made, will be submitted on Form PC 159.

2. This form is intended to obviate requests or recommendations being made by letter covering work to be performed by another department or division, but, in addition, it will take the place of requests for special authority when the work is to be performed by the department or division making the request.

3. When the estimated cost of the work does not exceed \$50 for ordinary jobs, or \$500 for steamshovel repairs, or \$200 for repairs to unloaders, spreaders, etc., the request may be made direct without the approval of the Governor, in which case, two copies of form PC 159 will be forwarded to the department or division performing the work and two copies to the Executive Office. This shall not be construed, however, as giving authority to divide up work that would otherwise fall naturally under Paragraph 4 of this circular, into separate items.

4. When the estimated cost exceeds \$50 for ordinary jobs, or \$500 for steamshovel repairs, or \$200 for repairs to unloaders, spreaders, etc., the work must be authorized by the Governor, whether it be performed by the department or division making the request, or by another department or division. In this case, five copies of the request will be forwarded to the Executive Office.

5. Estimates will be prepared and charges rendered in accordance with directions contained in the circular covering percentages and surcharges, or as it may be modified from time to time.

6. Commencing April 1, 1914, or as soon thereafter as practicable, work requests will be numbered consecutively, beginning with one, in the upper right hand corner, and the following prefixes will be used to indicate the department or division submitting the request:

Accounting Department.....	A-1, A-2, etc.
Department of Operation and Maintenance.....	OM-1.
Mechanical Division.....	M-1.
Panama railroad.....	P-1.
Executive Office.....	E-1.
Health Department.....	H-1.
Supply Department.....	S-1.

No other prefixes will be used, except those assigned by this office, upon request.

7. Correspondence relating to any particular request shall give the number and date of same.

8. Ordinary repairs to the plumbing, painting, metal, and woodwork of buildings may be made without work request, except when the estimated cost of the work is over \$500, when authority shall be obtained in the usual manner. For all ordinary repairs not thus covered, a monthly statement shall be submitted to the Governor for approval, showing each building repaired during the month, the nature of the repairs, and the total cost of each building separately.

9. Ordinary maintenance and repairs to Canal Zone water works, sewers, and roads may be made without work request, except when the estimated cost for any piece of work is over \$500, when authority shall be obtained in the usual manner. For all maintenance and repair work not thus covered, a monthly statement shall be submitted to the Governor for approval, showing the purpose and necessity of the expenditures.

10. "Blanket orders," or work requests covering services, small repairs, and manufacturing work of a minor nature will, with the approval of the Governor, be allowed to run for the entire fiscal year, subject, of course, to termination or modification at any time on the part of the department or division making the work request.

GEO. W. GOETHALS,
Governor.

Survey Requests.

THE PANAMA CANAL,
OFFICE OF THE GOVERNOR,
CULEBRA, C. Z., April 1, 1914.

CIRCULAR No. 638:

1. Survey requests will be prepared in duplicate and forwarded to the surveying officer, and after approval by the Governor, or by his direction, the original will be returned to the accountable officer, who will then prepare the necessary certified copies to carry out the approved recommendations of the surveying officer.

2. Survey requests must in all cases show the total money value of each item; also, total value of the survey request.

3. Survey requests must show the same designations as appear on property records, giving sizes, dimensions, or descriptions, so that property may be readily identified, and prices shown must in all cases be the original cost prices. Articles presented for action of the surveying officer, when practicable, must be laid out for inspection in the same order that they appear on the survey requests, and responsible officers will be held for any discrepancies between articles listed for disposition on the request and the actual articles presented.

4. Survey requests for plant and equipment for such

items as boilers, engines, concrete mixers, rock crushers, rock drills, channellers, locomotives, pumps, steam-shovels, must show full information as regards individual numbers, type, dimensions, sizes, name of maker, capacity, French or American manufacture, horsepower developed or required to operate same, date entered service, date discontinued in service, date last inspected, and condition at time of survey.

5. Whenever it becomes necessary or advisable to change the approved disposition of equipment or property which has been surveyed, request for such change should be made direct to the surveying officer.

6. The person responsible for public property to be surveyed will, in all cases, furnish the original certificates or affidavits upon which he relies to be relieved from responsibility. Whenever loss, or destruction of, or damage to, public property requiring the action of the surveying officer, shall occur, such action will be requested by the responsible official as soon as practicable, and, in every case, within 30 days after the discovery of such loss, destruction, or damage, unless exceptional circumstances, which will be explained by the official's certificate, prevent such action within that period. Losses or damages to public property will be investigated by the surveying officer, who has full authority to question officers or employees, either orally or in writing, and all files pertaining to such losses or damages will be furnished the surveying officer, while making such investigations, on his request.

GEO. W. GOETHALS,
Governor, The Panama Canal,
President, Panama Railroad Company.

Duties of Mechanical Division.

THE PANAMA CANAL,
OFFICE OF THE GOVERNOR,
CULEBRA, C. Z., April 1, 1913.

CIRCULAR No. 660-5:

1. The Mechanical Division, which will operate the shops and dry docks, is a part of the Department of Operation and Maintenance. It will be presided over by a superintendent who will report direct to the Governor. There will be an assistant superintendent who will perform such duties as may be assigned to him by the superintendent.

2. The Mechanical Division will have cognizance of the following plants and duties:

(a) Operation of the shops at Balboa, Cristobal (heretofore known as the dry dock shops), Paraiso, Balboa dump engine house, Balboa roundhouse, and Cristobal roundhouse. The shops at Porto Bello and Toro Point will be operated under their present heads until closed.

(b) A car inspection and repair system will be maintained in the Cristobal, Mount Hope, Panama, and Balboa car yards, and at such other places as may be necessary.

(c) The dry docks at Balboa (when completed), and the dry dock at Cristobal. The docking of all vessels, or beaching them for repairs.

(d) The repair wharf at Balboa shops.

(e) The cooling plants at Balboa and Cristobal, when completed.

(f) The inspection and maintenance in proper working condition of all mechanical equipment and machinery used in the operation and maintenance of the Panama railroad and on construction work, except floating equipment and equipment used at Porto Bello and Toro Point.

(g) Repairs to all classes and kinds of floating and dredging equipment in the service of the different departments and divisions that require shop, dry dock, or repair wharf facilities. The character and extent of repairs made to marine equipment will be specified or approved by the head of the department or division using the same or by his authorized representative.

(h) Shop repairs to all machinery, mechanical apparatus, and power plants connected with the operation and maintenance of the Canal.

(i) The manufacture of such articles as time will not permit to be purchased in the United States, and such as can be made more economically on the Canal Zone than purchased.

(j) The maintenance of a boiler inspection service, for the inspection and test of all boilers, except marine boilers.

(k) The instruction of locomotive engineers and hostlers, and of all firemen, and supervision over the quality and economical use of lubricants and fuel oil.

(l) Such repairs and other mechanical work as may be required by other departments of the United States Government.

(m) Such repairs and other mechanical work as may be required by commercial vessels, individuals, and companies.

(n) Repairing all kinds and classes of instruments, clocks, typewriters, adding machines, and locks.

3. The work to be done by the Mechanical Division is divided into the following three classes:

(a) Repair work, which consists of putting into serviceable condition broken, deformed, or worn parts that

admit of such action, or replacing parts that are not repairable, or that it is not economical to repair, with spare parts drawn from store.

(b) Alteration, which consists of any change in the original design.

(c) Manufacture, which consists of making any completed article or part thereof, including spare parts for use in making repairs.

Requests for the performance of work by the Mechanical Division for other departments and divisions of The Panama Canal will be submitted on form PC 159, as follows:

(a) No article will be manufactured on the Isthmus unless by previous approval of the Governor, except in case of an emergency, which will be reported promptly in writing to the Governor, and in cases covered by Subparagraph 4-c, below. Requests covering manufacture of all kinds will be sent to the Superintendent of the Mechanical Division, with a statement of the reasons for making the material instead of purchasing it in the United States, the work for which the material is requested, and the date on which it will be actually required. The Superintendent will forward the request to the Governor, with the following data:

U. S. and Isthmian costs, or if not available, estimated purchase and Isthmian costs.

Estimated dates of delivery if purchased, and made on the Isthmus.

Action recommended.

(b) Requests covering alterations in existing material or equipment will be submitted to the Governor by heads of departments and divisions, with reasons therefor and estimated costs.

(c) Ordinary repairs to equipment in current service will be made under annual blanket work requests submitted to the Governor on form PC 159, by heads of departments and divisions not later than June 15 of each year. The heads of departments or divisions will designate which of their subordinates may order work performed under annual blanket work requests, and will communicate the names and positions of such subordinates to the Superintendent of the Mechanical Division.

(d) Equipment retired from service will not be repaired preparatory to its return into service until request for repairs has been submitted on form PC 159, and approved by the Governor. Such requests will state the reasons for returning the equipment to service, the estimated cost of repairs, and date required.

(e) When prompt action would enable employees to be kept at work, would prevent material delay in completing work, or probable injury to property, or for other reasons would be economical, work requests for manufacture or alterations will be submitted to the Governor and one copy sent direct to the Superintendent of the Mechanical Division, who will proceed with the work, provided the estimated cost does not exceed \$100. The reasons for the urgency or economy will be given on the request. Manufacture or alterations estimated to exceed \$100 in cost will not be proceeded with until definite authority of the Governor is obtained. Such authority should be obtained by telephone if necessary to prevent delay.

GEO. W. GOETHALS,
Governor.

Alterations to Vessels to Prevent Accidents During Transit of Canal.

THE PANAMA CANAL,
OFFICE OF THE GOVERNOR,
CULEBRA, C. Z., May 13, 1914.

All concerned—Many of the vessels now using the terminal ports, and which will expect to use the Panama Canal, have their boats, davits, and accommodation ladders protruding over their sides, with no provision

for rigging them in to leave their sides clear and unencumbered.

When necessary, alterations should be made to remedy such defects in order to prevent accident and save time during lockage.

GEO. W. GOETHALS,
Governor.

Purchases of Material and Equipment.

THE PANAMA CANAL,
OFFICE OF THE GOVERNOR,
CULEBRA, C. Z., May 14, 1914.

HEADS OF DEPARTMENTS AND DIVISIONS:

In view of the status of appropriations for the purchase of material and equipment, I desire that every possible effort be made to avoid purchases which are not absolutely essential, in order to properly continue the work.

Please give this matter your close attention, and do not place a requisition with the Supply Department until you have personally satisfied yourself of the actual necessity for making the purchase.

GEO. W. GOETHALS,
Governor.

Legal Holidays.

THE PANAMA CANAL,
EXECUTIVE OFFICE,
CULEBRA, C. Z., April 1, 1914.

CIRCULAR No. 671:

The following days will be observed as legal holidays in the Canal Zone:

January 1, February 22, Good Friday, May 30, July 4, Labor Day, November 3, Thanksgiving Day, and December 25.

As far as practicable all public business will be suspended on these days. Good Friday and November 3 are not included in the list of holidays for which gratuity pay is allowed, and pay for services performed on those days will be calculated the same as for Sundays.

GEO. W. GOETHALS,
Governor.

Building Lots for Churches.

THE PANAMA CANAL,
OFFICE OF THE GOVERNOR,
CULEBRA, C. Z., May 16, 1914.

To all concerned—It is desired to assign lots to such churches and religious organizations as desire them in such settlements as suitable areas are available, in general accordance with the following terms:

Lots will be leased under revocable license at a nominal rental.

Such lots may be used for the erection of church buildings by the different churches and religious societies, and for the erection of quarters for the priest, or for the minister or pastor and his family.

This revocable license will not permit the subleasing or the use of the lot by others than the person or the persons named in it.

The church or church society will be expected to bear all expense connected with the construction of the buildings on the lots and the use thereof, including payment for electric light, water, etc. The lessee will be expected to conform to all administrative and sanitary rules and regulations.

As regards the lots for church purposes in Balboa and La Boca, the committee which is considering the matter will hear any one interested at a meeting which it will hold in the office of the Chief Health Officer at Ancon on Tuesday afternoon, May 26, at 2.30.

Applications for lots for churches in any other settlement should be made to me direct.

GEO. W. GOETHALS,
Governor.

Settling Estates.

The following estates of deceased employees of The Panama Canal or Panama Railroad Company are now in process of settlement by the office of the Administrator of Estates, in the Administration Building, Ancon, and any claims against these estates, or any information which might lead to the location of heirs, or to the recovery of property, bank

deposits, postal savings or postal money order deposits, or any other moneys due them, should be presented at his office at once in order that the estate may be settled as soon as possible. All claims should be itemized, sworn to before a notary public, or other public officer having a seal, and submitted in duplicate. These names will be published but once.

CANAL CLUBHOUSES.

Activities of the Young Men's Christian Association.

GENERAL

The moving picture schedule for the week May 25 to 30 is, as follows: Monday, Balboa and Pedro Miguel; Tuesday, Empire; Wednesday, Gatun; Thursday, Cristobal; Friday, Corozal; Saturday, Culebra.

BALBOA.

A handicap pool tournament has been started with 12 entries, as follows: Young, Dents, Cone, Ashton, Brugge, Dubendorf, Lewis, Rudolf, Peterson, Miller, O'Hagan, Davison, and Smith. Entries will be open till Saturday night, May 23. A gold medal will be given for first prize and a bronze medal for second prize. All interested are requested to see the secretary.

All members who have not transferred their cards from other clubhouses are requested to do so at once.

The monthly supply of new phonograph records has been received.

COROZAL.

The following program was given on Mother's Day, May 17, at the clubhouse: Song, children's chorus; recitation, Opal Bromley; song, three Lewis sisters, accompanied by Viola Bewley; violin solo, Dr. E. W. Hill, accompanied by Mrs. Dorothy Leyland Rand; song, children's chorus; piano solo, Goldie Cranfell; reading, Mrs. Manota Perry Lang; address, S. P. Verner; violin solo, Dr. E. W. Hill. There were 225 present.

The following high scores in tenpins were rolled during the past week: Parkis, 225, 213, 214; Thirk, 211; Boessen, 236, 208, 224; Davis, 209, 202.

The standing of the local league indoor baseball teams is, as follows:

	Won	Lost	P. C.
Red Sox.....	3	2	.600
Naps.....	3	3	.500
White Sox.....	2	2	.500
Cubs.....	2	3	.400

Miss MacLaren will appear on Friday night, May 29, in the "Misleading lady."

Fifty people attended the exhibition of 101 slides, showing the scenery of Switzerland, on Sunday night, May 17.

PEDRO MIGUEL.

Much interest is being taken in the local ragtime duckpin tournament. The highest score so far has been by Murry and Whisten, 587. The highest single game is a tie between Dougherty and Vandeburgh, 118.

High duckpin scores for the week were made by: Murray, 114, 112, 104; Hallway, 108, 107; Vandeburgh, 118, 105; Landers, 101; Whiston, 105.

Ladies' high score in rubberband pins was made by Mrs. Landers, 100.

Mr. S. P. Verner of Cristobal gave a very interesting lecture at the clubhouse on Saturday night, May 16, on "Among the pygmies and cannibals of the Congo."

An exhibit of camera pictures will take place at the clubhouse in Pedro Miguel on May 25, 26, and 27. All who are interested in photography and who own cameras are invited to send in their work. Pictures must be the complete work of the exhibitor. Prizes will be offered.

The Pedro Miguel Dance Club will give a dance in the clubhouse on Saturday, May 23.

GATUN.

The Gatun clubhouse extends a very hearty welcome to the officers and men of companies I and M, Tenth Infantry, now stationed at Gatun. All are invited to take part in the various activities of the clubhouse. It is hoped that a large number will take advantage of the privileges offered.

The new handballs have been received from the United States and the handball tournament is now well under way.

The basketball game between the V. M. C. A. girls' basketball team and the Corozal-Ancon girls' team has been indefinitely postponed.

Applications for membership in the boys' or the men's first aid classes may be made at any time to the physical director.

A two-weeks pool tournament will start this week.

By request, Miss MacLaren will give "Within the law," on Friday evening, May 22. At her last appearance here, on May 14, she was presented with a handsome bouquet of American Beauty roses as a token of appreciation on the part of her many friends in Gatun.

Saturday afternoon of each week, from 2 to 4, will be set aside as the time at which the children of the Gatun schools may make use of the gymnasium of the clubhouse. The physical director will have charge of this work.

CRISTOBAL.

One hundred and sixty girls, boys, young men, and men participated in the Cristobal circus, which was held on Friday and Saturday evenings, May 15 and 16, on Pier 9. The circus, preceded by a street parade,

consisted of 26 acts. Bleachers were erected to give a circus ring effect. The seats were crowded on both evenings. Following is the circus staff, Ringmaster, B. C. Poole; ticket manager, A. E. Cotton; general manager, W. C. Poore; manager of the comics, T. A. Aanstoot; chief usher, W. H. Fredericks; music, Mrs. H. D. Brittin, A. J. Saft, and the Colonial Band.

An indoor baseball league, composed of four teams, will be formed in the young men's gymnasium class in the near future.

Mr. J. L. Weaver will report on "Recent happenings in Mexico," and Mr. S. P. Verner will give an account of the recent trouble in Ulster at the Discussion Club meeting on May 28.

Much interest is being manifested in the local 3-men team duckpin tournament. The Yankees are in the lead with five won, and one lost. High duckpin scores for the week were: Schied, 115; Steele, 107; Bevington, 102; Pinney, 102.

Miss MacLaren's last appearance at Cristobal will be on Saturday night, May 23.

Misdirected Letters.

ANCON, C. Z., May 18, 1914.

The following insufficiently addressed letters, originating in the United States and its possessions, have been received in the office of the Director of Posts, and may be secured upon request of the addressees:

Supplies for the Canal.

The following steamers with supplies for The Panama Canal and Panama Railroad Company arrived at the ports of Colon, Balboa, and Cristobal during the week ending May 9:

Advance, May 4, from New York, with 13 cases incandescent lamps, 160 crates roofing tile, 60 crates roofing tile, 28 reels copper cable, 207 pieces mahogany lumber, 67 packages stone wash tubs, for permanent buildings; 88 cases incandescent lamps, 24 packages

welding apparatus, seven reels copper cable, 101 barrels fire clay, 20 cases paint, 136 bags silica grit, 20 boxes motors, for Mechanical Division; 80 crates roofing paper, six reels copper cable, two reels cable, 43 packages asphalt mixing plant, for Second Division; 50 packages chain fender material, for First Division; 108 packages pipe and fittings, for Division of Municipal Engineering; 61 pieces signal material, 59 kegs bolts and washers, for Panama Railroad Company; 50 barrels flour, 40 bags orange shellac, 510 pigs lead, 37 cases Stillson wrenches, 166 bales hay, 110 cases brass pipe, 42 crates plumbing material, 90 cases varnish, 203 kegs bolts, nuts, and washers, 375 steel plates, 241 steel bars, 14 pieces mahogany lumber, 979 bags oats, 77 kegs steel rivets, for stock; an I miscellaneous cargo, the whole consisting of 5,391 packages, weighing 120 tons.

Prinz August Wilhelm, May 4, from New York, with one case iron castings, for First Division; 140 drums lime, for stock.

Cartago, May 6, from New Orleans, with 946 barrels paving brick, for Division of Municipal Engineering; 1,081 pieces creosoted switch ties, for Panama Railroad Company; 3,375 board feet hickory lumber, 2,360 board feet hickory lumber, 24,821 board feet yellow pine lumber for flooring, 9,639 board feet oak lumber, 33 pieces untreated piling, 167 pieces cotton duck, 2,116 pieces sewer pipe, 700 packages kerosene, for stock.

Zacapa, May 6, from New York, with 17 reels copper cable, for First Division; 12 crates meters and parts, for Division of Municipal Engineering; 60 cases putty, 20 cases paint, 18 cases hubs and felloes, 475 pieces galvanized pipe, 42 pieces steel billets, 107 crates window glass, for stock.

Abangarez, May 7, from New Orleans, with 156,230 pounds pig iron, for Mechanical Division.

Cristobal, May 7, from New York, with 109 barrels plaster, 109 bags cement, 163 crates roofing tile, 110 boxes ranges, 134 crates stone tubs, 14,000 pieces hollow tile, for permanent buildings; 45 packages chain fender material, two electric towing locomotives, for First Division; 54 pieces pipe and fittings, for Division of Municipal Engineering; 25 crates electrical material for Mechanical Division; 67,209 bags cement, 393 drums lubricating oil, 100 cases lubricating grease, 1,788 bales hay, 1,598 bags oats, 1,000 bundles plain wire, 30 barrels lead pipe and fittings, 41 crates plumbing material, 400 cases turpentine, 75 bundles sheet steel, 98 pieces galvanized pipe, for stock.

Hilding, May 8, from Mobile, with 54,451 pieces clay conduit, for Panama Railroad Company; 2,500 sacks fire clay, 348 boxes fire brick, 3,168 pieces sewer pipe, 20 barrels creosote oil, 203 barrels gasoline, for stock.

Allianca, May 8, from New York, with 50 boxes absorbent cotton, for Health Department; 20 cases batteries, 256 bundles wrought iron castings, for Panama Railroad Company; 22 boxes machine tools, 80 steel springs, 39 packages pipe and fittings, 10 cases electrical material, for Mechanical Division; seven cases electrical material, for Division of Municipal Engineering; 113 cases electrical material, 13 cases electrical material, 239 kegs rivets, for First Division; 50 crates stoves, 105 rolls wire fencing, 13 packages gasoline furnaces, 595 bundles steel bars, for stock; and a miscellaneous cargo, the whole consisting of 1,288 pieces, weighing 100 tons.

Calamores, May 8, from New York, with five packages structural material, for Division of Fortifications; 50 cases locomotive black paint, nine bundles sandpaper, for stock.

Pennsylvania, May 9, from San Francisco, with 169 board feet sugar pine lumber, for stock.

Automatic Signals at Miraflores Tunnel.

PANAMA RAILROAD COMPANY,

OFFICE OF SUPERINTENDENT,

COLON, R. P., May 18, 1914.

G. S. BULLETIN No. 69:

All concerned—Effective May 20, 1914, automatic signals will be ready for service through the tunnel, and all hand cars and push cars in use between Pedro Miguel and Corozal must be insulated before that date or taken out of service through any of this territory.

F. R. BLUNT,
Acting Superintendent.

Withdrawal of International Insurance Company from Canal Zone.

The International Insurance Company (Compañia Internacional de Seguros) of Panama, has advised the Executive Secretary of its intention to withdraw from the business of underwriting fire insurance in the Canal Zone. All persons having any claims against the Company arising from policies issued by it upon property in the Canal Zone, or who hold the company's policies upon property located in the Zone, are requested to communicate with the office of the Executive Secretary. Ancon, C. Z.

COMMISSARY DEPARTMENT.

The commissary stores are open during the following hours:

Cristobal, 3 a. m. to 12.30 p. m., and 2 to 7 p. m.
Balboa, 8 a. m. to 12.30 p. m., and 2.30 to 7 p. m.
Ancon, 8 a. m. to 1 p. m., and 3 to 6 p. m.
All others, 8 a. m. to 1 p. m., and 3 to 7 p. m.

Retail prices of cold storage provisions for the week beginning May 21, 1914:

CANAL

RECORD

Volume VII.

ANCON, CANAL ZONE, WEDNESDAY, MAY 27, 1914.

No. 40.

The Canal Record

Official publication of The Panama Canal.

The Canal Record is published weekly free of charge, one copy each, to all employees of The Panama Canal and Panama Railroad Company whose names are on the gold roll. Extra copies and back numbers can be obtained from the news stands of the Panama Railroad Company for five cents each.

Address all Communications,

THE CANAL RECORD,
Ancon, Canal Zone,
Isthmus of Panama.

No communication, either for publication or requesting information, will receive attention unless signed with the full name and address of the writer.

NOTES OF PROGRESS.

Governor's Report.

A report of the Governor of The Panama Canal to the Secretary of War, of operations in April, is published in this issue of THE CANAL RECORD. It recounts the operations on the Isthmus during April, and gives the status of the principal features of the Canal construction at the close of the month. It shows the realignment of the various forces under the permanent organization.

The Beginning of Regular Commercial Service through the Canal.

The project of lightening the cargo of the steamship *Alaskan* through the Canal, begun with the departure of barges in tow of the *La Boca* from Balboa on May 18, has developed into a regular traffic operation. Twelve barges have been diverted to the service, and the tug *Mariner* was transferred to the Division of Operation on May 21, and is now continuously engaged in handling the barges back and forth.

A schedule has been established under which approximately a third of the barges are always being loaded at Balboa, a third are in transit, and a third are discharging at Cristobal. Thus, upon its arrival at Balboa, the *Mariner* leaves its tow of empties and picks up a tow of loaded barges; and, on arrival with these at Cristobal, finds waiting a tow of empties with which it may start directly on its return trip to Balboa. An effort is being made to accomplish a complete round trip in every 24 hours.

This service is maintained for handling the cargo from vessels of the American-Hawaiian Steamship Company. The local authorities have been advised that vessels of the company will be coming to Balboa regularly until at least the end of June, by which time it is probable that steamships will be allowed to go through the Canal.

Advantage is being taken of this opportunity to allow the pilots to familiarize themselves with the courses through the Canal, and to develop a system of communication be-

tween the port captains and the locks. The departures and arrivals of the vessels are reported, as they will be when the Canal is in regular operation.

Tug Service for Vessels at Balboa.

In the line with the proposed transfer of the control of the terminal ports, and of shipping, from the Panama Railroad Company to The Panama Canal, the railroad has notified all the Pacific steamship companies that make the port of Balboa that in the future they shall communicate their requirements for tug service direct to Lieut. Comdr. H. V. Butler, the recently appointed captain of the port, under The Panama Canal organization.

Interchangeable Use of Equipment.

A committee consisting of Ad. Faure, costkeeping accountant, chairman; F. R. Blunt, acting Superintendent of the Panama railroad; and Charles L. Parker, surveying officer, was appointed on May 21 to prepare a schedule of all plant and equipment owned by The Panama Canal which will be used or operated permanently by the Panama railroad; and, similarly, a statement of all plant and equipment owned by the Panama Railroad Company which will be used or operated by The Panama Canal. The statements are to show first cost of the items and a rough approximation of their present value.

Arrival of the Dredge "Paraíso."

The 15-cubic yard dipper dredge *Paraíso* arrived at Colon in the evening of Friday, May 22. It was in tow of the tug *M. E. Luckenbach* and had been 27 days at sea. On Saturday, it was towed to Gatun Locks, and on Sunday was raised to Gatun Lake and towed to Paraíso and tied up just north of the pontoon bridge. It was towed past the bridge on Monday morning, immediately after the passage of train No. 41, and moored alongside the repair wharf. The erection of its parts is now in progress, and it will shortly be placed at work in Culebra Cut.

Progress on Transisthmian Duct Line.

In the laying of the transisthmian duct line for telegraph and telephone cables, which was begun on April 14, at Gamboa, the trench for the duct has been dug as far as Frijoles, a distance of slightly over nine miles, to the morning of May 27. The duct has been laid and concreted to within a mile of Frijoles, and has been backfilled and otherwise completed, with the exception of the manhole covers, to a point about two miles south of Frijoles, or over two miles north of Darien.

Small New Slide in Culebra Cut.

A small slide occurred in the west bank of Culebra Cut, opposite Las Cascadas (station No. 1600, mile 33 of the Canal) on May 19. About 5,000 cubic yards of earth were involved. The slide did not break far back, is now quiescent, and appears to involve no

more motion than the slight amount which took place in the one day. The channel is otherwise at full depth and width in this section.

Joint Land Commission Resumes Activities.

Following the arrival on the Isthmus of the new United States members of the Joint Land Commission, to take the places vacated by L. S. Rowe and Roland P. Falkner, the body has resumed its activities. The new members are David Marks, a retired business man of Wabash, Ind., and Levi Monroe Kagy, a practicing attorney of Salem, Ill. The representatives of Panama are the same, Federico Boyd and Samuel Lewis. J. A. Langston has been chosen secretary of the Commission, *pro tempore*.

The members made an official visit to President Porras and Secretary of Foreign Relations Lefèvre on Saturday, May 23. An informal meeting was held on May 25. A meeting for formal organization was held on May 26, and hearings will begin on May 28, at 9 a. m. The offices of the Commission have been transferred to Ancon, in the residence formerly occupied by the head of the old Department of Civil Administration.

New Water Stage Registers.

Forces of the meteorological and hydrographic section have recently installed new water stage registers at Juan Mina and Monte Lirio, in order to obtain more extensive data on the fluctuations of the surface of Gatun Lake, as affected by freshets in the several tributary rivers, and by other forces. The water stage register at Frijoles has been moved to a convenient point alongside the Panama railroad, from its former location, a quarter of a mile from the railroad station.

Canal Excavation in April.

The grand total of Canal excavation to May 1, 1914, was 220,825,562 cubic yards, leaving 11,527,438 cubic yards remaining to be excavated, under the revised estimate of July 1, 1913.

The total excavation for the month of April was 1,223,925 cubic yards, as compared with 1,226,644 cubic yards for March. The wet excavation amounted to 1,049,834 cubic yards, and the dry excavation to 174,091 cubic yards.

In the Atlantic section, the total excavation for March was 188,383 cubic yards, all by dredges. Of this amount, 186,119 cubic yards were removed from the Atlantic entrance and the site of the proposed new pier No. 7, by the suction dredges *Caribbean* and *Culebra*, and 2,264 cubic yards were taken out at the coaling basin.

Of the 648,906 cubic yards excavated in the Central section, comprising Culebra Cut and the Charges territory, 472,162 cubic yards were removed by the dredges, 117,714 by hydraulic monitors, and 59,030 cubic yards were taken out by steamshovels on the west

bank of Culebra Cut, south of Culebra village, in relieving the pressure as a preventive against slides.

In the territory of the old Pacific Division, operations by dredges resulted in the removal of 260,366 cubic yards from the inner harbor, and 11,209 cubic yards from the Pacific entrance. Dry excavation in this section amounted to 115,061 cubic yards, of which 113,461 cubic yards were excavated at the terminal site, and 1,600 cubic yards were removed from the discharge channel for Miraflores Spillway.

A total of 1,296 cubic yards of concrete was placed in the locks, in connection with the installation of machinery.

A detailed statement of excavation, and a summary of the work on the locks and dams during the month of April, follow:

Mean rainfall along Canal (nine stations), 2.40 inches.

By "Work" excavation is meant excavation actually made for one of the constituent parts of the Canal, such as prism, diversions, locks, etc.; that is, it represents material taken from the area to be occupied by the Canal and constitutes excavation useful for the completed Canal.

By "Plant" excavation is meant excavation outside

any of the constituent parts of the Canal, such as prism, diversions, locks, etc. It includes material necessary to be excavated for construction purposes only, and is chargeable against the particular plant item for which it is performed, such as prism, diversions, locks, etc.

Changes in Signaling Devices.

When the pontoon bridge was placed in service on May 14, the interlocking plants at bridge 57½ and Paraiso Junction were placed out of service. The telegraph operator will remain on duty for the present at Paraiso Junction but bridge 57½ cabin has been closed and a new office opened at Springs, which is located about one-half mile west of the pontoon bridge. The block dispatchers are to be moved from Summit and placed in the new cabin on the pontoon bridge.

The automatic signal protection for the gauntlet track through Miraflores tunnel was placed in service at 12 o'clock noon on Thursday, May 21, and the staff system and interlocking plants at both North Cabin and South Cabin have been removed.

Ancon Crusher.

Following is a statement of rock crushed at Ancon quarry during the two weeks ending May 23:

EXECUTIVE ORDERS.

Payment of Members of Joint Land Commission.

By direction of the President, it is ordered: That Levi Monroe Kagy and David Marks, who have been appointed members of the Joint Commission for the appraisal and settlement of damages to property in the Canal Zone, in accordance with the provisions of Articles VI and XV of the Convention between the United States and Panama, concluded November 18, 1903, be allowed twenty-five (\$25) dollars per day for their services, including all expenses, from the time of their sailing from New York until their return thither; provided, that they shall be granted free transportation on the Panama Railroad Steamship Line from New York to the Isthmus and return, free transportation over the Panama railroad, and such other transportation as may be necessary when traveling on official business on the Isthmus; they shall also be allowed the ordinary privileges of Government employes on the Isthmus, including employes' rates at the hotels of The Panama Canal or the Panama Railroad Company on the Isthmus.

LINDLEY M. GARRISON,
Secretary of War.

WAR DEPARTMENT,
Washington, D. C., May 8, 1914.

Approving Acts and Resolutions of the Isthmian Canal Commission Passed since February 28, 1907.

All acts and resolutions of the Isthmian Canal Commission passed since February 28, 1907, in so far as they effect changes in the "Laws of the Canal Zone" or other enactments of the Commission relative to the Government of the Canal Zone prior to March 4, 1905, in so far as they have not been specifically approved or modified, are hereby approved.

By order of the President.

LINDLEY M. GARRISON,
Secretary of War.

WAR DEPARTMENT,
Washington, D. C., May 13, 1914.

Mr. G. Arias L. has been appointed vice-consul for Brazil in Panama.

of property, bank deposits, postal savings, or postal money order deposits, or any other moneys due them, should be presented at his office at once in order that the estate may be settled as soon as possible. All claims should be itemized, sworn to before a notary public, or other public officer having a seal, and submitted in duplicate. These names will be published but once.

SOCIAL LIFE OF THE ZONE.

Seventh Anniversary and Farewell Celebration of Culebra Clubhouse.—General Notes.

The seventh anniversary of the opening of the Canal clubhouse at Culebra was celebrated in three nights of entertainment by the Culebra clubhouse last week. Music, monologue, and song, interposed among the films at a moving picture show on Wednesday night, May 20, comprised the opening entertainment; on Thursday night, there was an imitative recital of "The man from home;" and on Friday night, a formal farewell meeting was held, and numerous addresses were delivered. The activities of the association will continue, but as the village is in progress of dissolution and will not be in existence another year, the anniversary date was selected as a fit time for the exercises.

The original Culebra clubhouse was opened on May 21, 1907. It was one of the four clubhouses first authorized, buildings of the same type having been completed and opened in the first half of the year 1907 at Culebra, Empire, Gorgona, and Cristobal. The success of the associations at these points led to the erection of clubhouses later at Gatun, Porto Bello, and Corozal; and, with the transfer of force toward the south end of the Canal, to the opening of clubhouses at Pedro Miguel and Balboa. The building at Culebra was demolished in August, 1912, on account of the encroachment of the west Culebra slide. The site is now included in the slide area, and the soil on which the clubhouse rested has been hauled away on dirt trains.

Upon the demolition of the clubhouse, part of the material in it was used for the construction of a temporary recreation center beneath the west end of the Administration Building annex. It was held inadvisable to reerect the clubhouse, a large 2-story structure, on account of the impending abandonment of the village. The temporary center has housed two bowling alleys, pool and billiard tables, a library, a refreshment counter, and a barber shop. Entertainments of the association have been held in the public school building.

The farewell exercises of Friday night were presided over by Ernest E. Lee, chairman of the executive council of the local association. The program comprised vocal and musical selections; address, "Our association," by Benjamin A. Armstrong, secretary of the Culebra organization; a series of 2-minute addresses by representatives of other clubhouses; and an address by Associate Justice Thomas E. Brown, Jr. At the close of the formal exercises, a social hour was held, and refreshments were served.

The Cristobal Dancing Club will hold a special dance on Saturday, May 30, at the Cristobal clubhouse. The new board of governors of the club are Chas. L. Persons, T. A. Aanstoots, and Jos. H. Gill, and Wm. H. Marsh, secretary-treasurer.

Employees Transferring to Sanitary Work at Vera Cruz.

In response to offers from the Surgeon General of the United States Army of positions in a force to be organized for the sanitation of Vera Cruz, Mexico, E. D. Gayle, Joseph McGuigan, Charles Parker, and E. W. Mitchell have resigned from the service of the Health Department and will sail shortly for New Orleans, on their way to Vera Cruz.

Dr. L. P. Williamson, former superintendent of Colon Hospital, was transferred on his own request to field service with the army of occupation, and sailed on May 14. James T. B. Bowles, physiologist in the Division of Municipal Engineering, accepted a position at Vera Cruz, and sailed on May 21.

Rates for Launch "Louise."

The following rates will apply on special trips of the launch *Louise*, excepting special trips through Culebra Cut:

Regular rate—Per hour, \$5; minimum charge, \$15.

Employees' rate—Per hour, \$3; minimum charge, \$15.

For special trips through the Cut, the regular rate of \$1.50 per passenger should apply, with a minimum charge of \$15, all passengers over ten (10) to be charged for at the regular rate.

Independent Order of Panamanian Kangaroos.

At a meeting of the Independent Order of Panamanian Kangaroos, held at Kangaroo hall at Empire on May 9, nominations for officers for the term July 1 to December 31, 1914, were called for. Further nominations will be made and election held on Saturday night, June 6, at Empire. Refreshments will be served after the meeting.

FRANK E. GREENE,
Clerk, I. O. P. K.

EMPIRE, C. Z., May 21, 1914.

Improved Order of Red Men.

All Red Men are cordially invited to attend Ancon wigwam on the evening of May 30. Consolidation of Chiriqui, Cocoli, and Panama tribes, followed by corn and venison, and dogeating contest between Carib and Panama tribes.

R. H. HULL,
Chief of Records.

PARISO, C. Z., May 26, 1914.

Missing Man.

Any one having information regarding the whereabouts of a white man named Gordon Maddox is requested to communicate with the Chief of Police and Fire Division, Ancon, C. Z.

PERSONAL.

Frank Feuille returned to the Isthmus on Thursday, May 21, from a special leave of 42 days, spent in the United States.

Arrested on the Isthmus for a Murder in Oklahoma.

Thomas Winters, a white American who had been living in Colon and was under indictment for the murder of Arthur Hennessey at Sapulpa, Okla., on January 12, 1914, was arrested in the Canal Zone on May 2, on instructions cabled from the commonwealth of Oklahoma. Upon being advised of the arrest, Governor Lee Cruce of Oklahoma issued papers of extradition, which were brought to the Canal Zone by Sheriff Henry Clay King, of Creek county. The prisoner signed a voluntary waiver of extradition and sailed with the sheriff for New Orleans on May 21.

A Type-5 house at Porto Bello is being dismantled and will be reerected at a point near the hotel at East Balboa. A Type-18 house and five laborers' barracks in the same settlement are being moved to the settlement at La Boca, where they will be reerected into quarters for silver laborers.

MEMORIAL DAY EXERCISES.

Program for Observances at Ancon Cemetery on Morning of May 30.

Memorial Day, May 30, will be observed by special exercises held in Ancon, under the auspices of the American Veterans of Foreign Service and the Spanish War Veterans. The following program has been adopted by the united societies:

At 9.30 a. m., a procession will form at the Panama railroad passenger station. The order of formation will be: Tenth Infantry band, Tenth Infantry escort and firingsquad, American Veterans of Foreign Service, Spanish War Veterans. Capt. Charles A. Barber will be marshal and E. W. Bucklin, aide.

The line of march will be toward the Hotel Tivoli, turning to the left and proceeding through Bishop's Hollow to Ancon cemetery.

The exercises at the cemetery, at 10 a. m., will be, as follows: Prayer, the Rev. Harry Compton; dirge, the Tenth Infantry band; Lincoln's address at Gettysburg, delivered by H. A. Guder; "The unknown dead," address by W. H. Jackson; selection by the band, during the playing of which the graves will be decorated with flowers by the children of the public school; volley by the firing squad; taps.

Obituary.

Herbert C. McPhadden, an enlisted man in the Tenth Infantry, while walking guard at the lower end of Gatun Locks, during the night of May 15, fell into the water and was drowned. His body was recovered by a diver. He was 22 years and three months of age, single, and had been on the Isthmus since December 11, 1913. He is survived by his father, Douglass McPhadden, living in Richmond, Va.

Fred A. Archer, a wireman employed in the Electrical Division, died at Ancon Hospital on May 19, as the result of an electric shock and falling from a pole on which he was at work, at Las Cascadas. He had been on the Isthmus one month, was 39 years of age, a widower, and is survived by his mother, Mrs. Lizzie D. Norton, living at 58 South Sawyer street, Portland, Me.

Jay P. Miller, a wireman in the Electrical Division, was killed by electric shock at Balboa shops on May 20. He had been on the Isthmus three months, was 25 years of age, single, and is survived by his mother, Mrs. A. E. Miller, living at Glen Falls, N. Y., R. F. D. No. 1.

Edward Noonan, an employe in the Supply Department, died at Ancon Hospital on May 21. He was 44 years of age, single, and came to the Isthmus three months ago, from Brooklyn, N. Y. He is survived by a sister, Mrs. M. Leaney, living at 7032 Stoney Island avenue, Chicago, Ill.

Five Employees Drowned in Limon Bay.

Albert Dehaney, George Gale, Theophilus Turner, and Robert Woodbine, Jamaicans, and James Hosier, Antigua, negro employes of the Fortifications Division, were drowned in the morning of May 15, in Limon Bay at a point about a quarter of a mile east of Toro Point. The bodies of all but Dehaney have been recovered. These men with 11 others were crossing the bay from Colon in a privately owned sailboat, 19 feet long by five feet wide, with a round bottom. A sudden gust of wind capsized the boat and threw its occupants into the water.

RECORD OF CANAL WORK SINCE AMERICAN OCCUPATION.

TOTALS BY CUBIC YARDS OF EXCAVATION AND LOCK AND DAM CONSTRUCTION.

[All figures are of work useful for the completed Canal.]

††Total to May 1, 1914, 101,476,661 cu. yds. Excavated 1904-1906 inclusive, 3,860,717 cu. yds; by sluicing, 1,283,308 cu. yds.; by dredging, 2,396,625 cu. yds.

‡‡Total to May 1, 1914, 12,945,534 cu. yds.; 1907, 192,769 cu. yds.; 1908, 3,787,992 cu. yds.; by sluicing, 188,239 cu. yds.; by dredging, 551,160 cu. yds.

§§Dry excavation Miraflores Locks, including 256,780 cu. yds. in 1908, and 739,355 cu. yds. in 1909.

¶Excavated various points in prism to May 1, 1914, 4,819,797 cu. yds.; Balboa Locks and Dams, 1907, 78,233 cu. yds.; Outside prism 1908, 172 cu. yds.

†††Total to May 1, 1914, 6,662,779 cubic yards, including 26,628 cu. y. 1906; 1,340,179 cu. y. 1907; 2,774,561 cu. y. 1908; 793,835 cu. y. 1909.

‡‡‡Total to May 1, 1914, 1,320,063 cubic yards, including 256,780 cu. yds. in 1908, and 739,355 cu. yds. in 1909.

PACIFIC SIDE WATER SUPPLY.

Infiltration of Chlorine Leads to Abandonment of Miraflores Lake Project.

It has been decided to abandon Miraflores Lake as a source of water supply for Panama and the permanent Canal Zone settlements on the Pacific side of the Isthmus. This step is taken because of the discovery, made a few months ago, of a steadily increasing chlorine content in the water of the lake, from which most of the supply for domestic consumption at the southern end of the Canal has been drawn since October, 1913. Recent analysis of a sample of water taken 100 feet east of Cocoli spillway showed 85 parts chlorine to one million parts water at the bottom, and 77.5 at the top; at a point 100 feet west of the spillway, an analysis showed 80 parts at the bottom and 76.5 at the top; 100 feet west of the upstream side of Cocoli dam, the examination showed 75 parts at the bottom and 75 at the top, while approximately one-fourth to three-eighths of a mile up the Cocoli River, the water contained 52 parts chlorine at the bottom and 69 parts at the top, showing that the more remote parts of the lake have become impregnated. Although unnoticeable to the taste in the above proportions, the salinity at above 80 is likely to cause injury to boilers, and to be generally unfit for industrial uses.

Since the selection of Miraflores as the site of the present pumping plant for the Pacific end, and of Miraflores Lake as the reservoir, the water requirements of that section have been served by a temporary pumping station, situated near the railroad track just north of the tunnel. The consumption of water at the southern end is now about 6,250,000 gallons a day, nearly all of which is drawn from the lake. A small amount has been taken from Rio Grande reservoir during the past dry season, but owing to its present low stage, the remainder of this supply is being reserved for the use of Culebra village.

Pending the results of the investigations, a temporary pumping station was installed near the east wing wall at Pedro Miguel Lock, equipped with two pumps, formerly in use at Gatun Locks, each having a capacity of about 4,000 gallons a minute, and water was pumped from Culebra Cut into the intake basin at Miraflores, to reduce the chlorine content of the water drawn into the Panama mains. This plan decreased the salinity of the water to a considerable extent, but also increased the operating cost, and gave no hope of permanent relief.

Work on the new permanent pumping plant at Miraflores was stopped in January, soon after it became known that the chlorine in the lake was increasing. Up to this time, the small intake had been practically completed, and portions of the walls of the main building were up. Since the stoppage of construction work at that point, the matter of a new source of supply has been under advisement, and all the streams in the Pacific slope, including the Juan Diaz River, were investigated and considered, and found to be inadequate as a source of water supply without the construction of large impounding reservoirs. Upon the recommendation of the resident engineer of the Division of Municipal Engineering, the decision was finally reached to extend the pipeline to the Chagres River at Gamboa.

It is proposed to lay the new pipeline parallel to the main line of the Panama railroad

between Gamboa and Miraflores, either beneath the flow line of the roadbed drainage ditch, and inside of the transmission line tower foundations, or outside of these foundations altogether, depending upon which location will result in the least cost. It is also proposed to place the pipeline on the sides of the railroad embankment where the embankment is stable; at points where it is not suited, the pipe will be laid in original ground along the bottom of the embankment.

The plan contemplates the laying of approximately 18,000 feet of 30-inch cast iron pipe from Gamboa to a short distance north of La Pita Point, which, at 270 feet above mean sealevel, is the highest elevation between Gamboa and Miraflores; and of approximately 16,000 feet of 36-inch pipe from La Pita Point to a point just south of the continental divide; and from this point, approximately 26,000 feet of 30-inch pipe to the Miraflores purification plant. The pumping pressure will be increased by about 43 pounds per square inch over that at Miraflores, as the water will have to be lifted over the divide at La Pita; from there to Miraflores, and thence through the purification plant to Panama City and vicinity, the flow will be entirely by gravity.

In order to lay the pipe with the least possible delay, and with the least interference with the railroad, a ditch will be opened for approximately 75 per cent of the length of the pipeline, prior to the arrival of the pipe on the Isthmus. The total shipment of pipe for this purpose will aggregate about 10,500 tons, or from 350 to 400 carloads, in 12-foot lengths, each length weighing between two and three tons. The pipe will be distributed by work trains, using locomotive cranes, on the main line of the Panama railroad. It is proposed to lay the pipe at night, in case traffic in the day time should be so heavy as greatly to delay the work, and to run the joints, and backfill the pipe during the daytime. Leadite will be used in sealing all joints, except where the pipe crosses under the railroad or falls in soft ground.

It is further planned to place one main line 30 or 36-inch geared valve every one-half mile, and, by means of the steam pumping plant now in operation at Gamboa, a full working hydrostatic test will be placed on each half-mile section as fast as the line is completed. That portion of the pipeline in the immediate vicinity of Gamboa, and that between Pedro Miguel and Miraflores, will be subjected to heads as high as 300 feet. In order to protect the line against water hammers, a number of 6-inch relief valves will be placed at each end of the line. Numerous blow-off valves and both automatic and hand-operated air relief valves will be placed in the main at suitable intervals.

The change in the site of the pumping station will cause no change in the equipment ordered and delivered for the construction of the pump station building, and the pipe equipment within it. Neither will the change require any modifications in the electrical equipment already delivered. New pumps to operate under the higher head will be required.

The pump station will, in all probability, be located on the original ground at a point immediately upstream from the present steam pumping plant at the south end of the Gamboa bridge.

CANAL WORK IN APRIL.

Monthly Report of the Governor to the Secretary of War.

CULEBRA, C. Z., May 18, 1914.

The Honorable the Secretary of War,
Washington, D. C.

SIR: In accordance with the provisions of the Executive Order of January 27, 1914, the permanent organization of The Panama Canal became effective on April 1.

I have the honor to submit the following report of operations under the new organization for the month of April:

Department of Operation and Maintenance. Division of Terminal Construction.

PACIFIC TERMINALS.

Dry docks—Designing work included wall sections and emplacements for valve machinery, sewer system, drainage system, and brackets for support of the caisson seats in dry dock No. 1, and wall sections, valve emplacements, sewer and drainage systems for dry dock No. 2. Construction included 54,004 cubic yards excavated from dry dock No. 1; 17,804 cubic yards from No. 2; and 28,440 cubic yards from the entrance basin.

Quay walls and pier—Designing work included studies to adapt the cargo cranes now in use on the steel pier at Balboa to new pier No. 1, studies of pontoon anchorages, and estimates of pontoons built of wood, steel, and reinforced concrete, and computations and designs relating to floor systems. Construction on pier No. 1 included filling of 30 caissons with concrete, bringing the total to 185 and leaving 24 to be filled, and the completing of 384 linear feet of floor slab. On quay wall e-f, 180 feet of concrete pile and 13,615 feet of wooden pile were driven, and 491 linear feet of pile trestle were constructed. On quay wall i-j-m-n, two caissons were filled, making the total 51, and 136.5 linear feet of floor slab were laid. Excavation for the pier and quay walls amounted to 5,701 cubic yards; concrete placed, 5,328 cubic yards.

Coal and fuel oil plants—Designing included changes in the machinery of the Miraflores berm cranes to adapt them to use in the coal handling plant, and design of the interior walls and supports for berm cranes. Construction included 2,716 cubic yards of excavation for the coaling plant, and 782 cubic yards of concrete placed.

In the fuel oil plant work, specifications covering fuel oil pumps and auxiliary equipment were rewritten in accordance with decision to install two oil pumping units in each plant, instead of three, as originally planned. United States requisition was prepared covering equipment, special pipeline tools, and material required. Inspection was made of boilers on the Isthmus and available for transfer, resulting in the selection of one Phoenix and three Robb-Mumford, 250-horsepower horizontal return tubular boilers, to be reserved for the oil handling plants. Arrangements were made for the transfer to the oil handling plants of the 10-inch air main between Bas Obispo and Paraiso as soon as same may be retired from its present service. Investigation was made relative to the possible use of tank No. 37, capacity 4,038 barrels, now located at Aguadulce and out of service, in connection with storage of either fuel oil or gasoline at the Pacific terminal. An estimate of the cost of moving this tank from its present location at Balboa was made. A preliminary

draft of general instructions to private individuals and corporations was prepared, covering the construction of oil storage tanks by line connections. Further investigation and study relative to the location of handling plant and pipelines for the Atlantic terminal were made.

Storage tanks Nos. 3 and 4 are completed as to hydraulic test and calking and painting, and 75 per cent as to pipeline connections. No. 3 is 50 per cent completed as to construction of concrete apron and installation of drainage pipes, and No. 4 is completed in these respects; No. 4 is 50 per cent completed as to fire wall construction, while the work has not been begun on No. 3.

Shops—Work was continued on buildings Nos. 1 to 9, 12, 14, 15, 16, and 27, and on the cinder pit and water and oil cranes. Two hundred and twenty-one cubic yards were placed in building foundations, 412 cubic yards in machine foundations, 51 cubic yards in shop floors, 80 cubic yards in shop walls, 98 in shop beams, columns, and roofs, seven in shop drains, and 20 in shop tunnels. Work was also carried forward on the drainage system for the shop area.

ATLANTIC TERMINALS.

Coaling plant—Plans were issued for the construction of the pile and concrete supports for the bridge tracks and viaduct posts south of station 11 plus 69.0; various matters concerning the contract for coal handling machinery were disposed of. The design of the cylinder wharf structure was proceeded with, with a view to its advertisement at an early date.

Preparatory work was carried on at the site of the plant, pile driving by three drivers was begun, materials were received, the field office was completed, tests were made of the bearing power of the hydraulic fill, dry fill was placed, and a temporary air compressing plant was installed. The force at present numbers 20 gold and 244 silver employees.

West breakwater—During the month of April, 13,081 cubic yards of Porto Bello rock were unloaded and placed in the breakwater. The total amount unloaded and placed to April 30, 1914, was 455,101 cubic yards. One thousand one hundred and forty linear feet of breakwater were completed during the month, making the total length completed to April 30th, 10,641 linear feet, including the ell.

East breakwater—Work on the east breakwater included the completion of 900 linear feet of trestle, making a total of 1,532 feet; track work, and pile driving. Seven thousand two hundred and twenty-eight cubic yards of rock fill were received from the Mount Hope borrow pit.

LANDSCAPE ARCHITECT.

Work was continued on plans and construction at the new Balboa townsite. Work completed amounted to 10,807 cubic yards excavation; backfill, 3,160 cubic yards; pavement completed, 9,070 square yards; gutters laid, 2,224 linear feet; sewer pipe laid, 4,977 linear feet; water pipe placed, 4,658 linear feet.

RADIO STATIONS.

At Caimito, foundations for tower No. 1 were in readiness for erection of steel work. Foundation work for the other towers, and provision for carrying away surface water from all tower foundations were advanced. At the Colon and Balboa radio stations, work re-

quests were issued for the greater part of the construction work required. Plans and allotments have been received from the Bureau of Yards and Docks.

Division of Erection.

This division, formerly called the Electrical and Mechanical Subdivision, has carried on the erection and inspection of operating machinery and electrical equipment in the locks, spillways, lock gates, fenders, lock entrance caisson, and pontoon bridge for the crossing of the Canal at Paraiso.

LOCKS.

Seven lockages were made at Gatun, six at Pedro Miguel, and nine at Miraflores.

The miter gate forcing machines, the rising stem, cylindrical, and auxiliary valves, and the machines to operate them, are completely installed, track installation is practically completed, and only a small amount of work remains in connection with the illumination of the locks.

All of the 18 guard valve machines have been received, mechanical installation is 98 per cent, and electrical installation 43 per cent completed. Mechanical installation of the miter gate moving machines is completed, and 98 per cent of the electrical installation is complete.

Mechanical erection of the chain fender machines at Gatun is 50 per cent complete; Pedro Miguel, 47 per cent; and Miraflores, 24 per cent. Electrical installation is nine per cent complete at Gatun. Four sections of chain have been received; five sections are about completed.

Pumps—Pumps and motors, with float switches and starters, have been received complete. Mechanical erection is 100 per cent complete on miter gate sump pumps, drainage sump pumps, and culvert pumps; and 54 per cent complete on chain fender sump pumps. Electrical installation is 98 per cent complete on miter gate sump pumps, 100 per cent on drainage sump pumps, 20 per cent on culvert sump pumps, and three per cent on chain fender sump pumps.

Transformer room equipment—The installation of all transformer rooms at all locks is approximately 94 per cent complete.

Control apparatus—The houses for the control apparatus are practically complete, and practically all of the apparatus has been received. The Miraflores board is about 70 per cent complete.

HYDROELECTRIC STATION.

The installation of generators, exciters, main control board, oil switches, and other apparatus is about 95 per cent completed.

SPILLWAYS.

Three of the 14 spillway gates at Gatun were operated satisfactorily, with the lake at approximately 85 feet above sealevel.

All the gate machines have been received, installation at Gatun is complete, and at Miraflores, all mechanical installation, and 80 per cent of the electrical are complete.

TRANSMISSION LINE.

A total of nine and one-half foundations, involving approximately 159 cubic yards of concrete, were placed during the month. Thirty-two track-span bridges were placed on permanent foundations during the month, bringing the total to date to 807. Work on the track-span bridges is completed between Mount Hope and Balboa, with the exception of two or three structures upon which completion

is prevented by local conditions. Stringing of wire was continued during the month, the power wire from Mount Hope to Diablo being completed, with the exception of about a quarter of a mile. The stringing of ground wire practically keeps pace with the stringing of power wire, 30 miles of ground wire and 40 mile of power wire having been strung to date. On Sunday, April 26, the west line from mile post 40 to Miraflores was cut into service at 11,000 volts, to supply the relay pump load at Cucaracha, eliminating the present 11,000-volt pole line south of Pedro Miguel. The east line from Gatun to Mount Hope was also cut into service temporarily at 2,200 volts on April 22, to supply additional load at Cristobal. These services are temporary, until the 44,000-volt lines can be operated.

Electrical Division.

Power plants—The net output of the power plants was: Gatun, 550,279 kilowatt-hours; Miraflores, 1,702,400 kilowatt-hours; Balboa, 6,621 kilowatt-hours. At Miraflores, the work of installing the 1,500-kilowatt vertical turbogenerator set from Gatun was continued and almost completed. The rated capacity of this plant is now 6,000 kilowatts.

District work—In addition to the maintenance and operation in the northern district, work was continued on the installation of the underground 2,200-volt feeder to Agua Clara pumping station, the temporary 6,600-volt transmission line from Gatun to Cristobal was put out of service and connections were made over the permanent line, and connections for the 2,200-volt service from Gatun to Mount Hope pumping plant were made on the permanent transmission line.

In the southern district, the work included, in addition to maintenance and operation, underground conduit construction, line work, and wiring in the new administration building and other permanent structures.

Division of Municipal Engineering.

In the northern district, the usual maintenance work was continued. In the southern district, the extension of water and sewer lines at La Boca, and the installation of fire protection service at Balboa shops were advanced; and at Pedro Miguel, the construction of roads was completed, and the work of grading and installing water and sewer systems was continued.

In the construction of the new waterworks to supply Panama and the Pacific terminus of the Canal, work was continued on the Miraflores filtration plant and the pump station at Ancon, and was completed on the high service reservoir at Ancon.

Division of Lighthouses.

Work has been in progress completing the construction of towers Nos. 22 and 28, Gatun Lake section; moving forms, tools, etc., to Gatun; handling spar buoys from Panama railroad dock at Gatun to machine shop, preparatory to painting; constructing and painting beacons in the Culebra Cut section; running pole lines on east and west sides of the Canal between Bas Obispo and Pedro Miguel; recharging gas buoys in the Pacific entrance; making surveys at the site of the proposed dock at Gamboa, and other necessary surveys and reconnaissances.

No work was accomplished during the month in connection with raising of caisson for the west breakwater light in Colon harbor. This work will be taken in hand as soon as weather conditions permit.

Meteorology and Hydrography.

The total yield for Gatun Lake watershed was 49 per cent below the 6-year normal for April, but the lake continued to rise steadily during the month, it being necessary to open the spillway gates at Gatun to keep the level from rising above plus 85.

The rainfall for the month was above the station average at six stations, and deficient at 13 stations. The monthly total ranged from 0.49 inch, at Camacho, to 7.33 inches, at Brazos Brook. The estimated rainfall over the entire lake watershed was about 36 per cent below the April average, based on 13 years' record, being 2.71 inches, against an average of 4.24 inches.

Seismic disturbances were recorded at Ancon on the 13th and 20th of the month. The Canal work suffered no damage from either shock.

Dredging Division.

The status of dredging on April 30 was, as follows:

LOCATION.	April. Cubic Yds.	Remaining. Cubic Yds.
Miraflores Locks to Pacific.....	11,209	2,056,184
Miraflores Lake.....		328,872
Culebra Cut.....	479,646	1,537,827
Gatun Lake.....		51,000
Gatun Locks to Atlantic.....		410,973
Total Canal prism.....	490,855	4,384,856
Balboa harbor.....	258,666	5,572,936
Cristobal terminals.....	261,921	797,699
Fortifications.....	210,297	
Miscellaneous.....	21,297	
Total general.....	752,181	6,370,635
Grand total.....	1,243,036	10,755,491

Culebra Cut—Nine dredges removed 183,008 cubic yards of earth and 296,638 cubic yards of rock from the Canal prism. Dredge No. 82 sluiced 52,440 cubic yards of material from Cucaracha slide; 7,484 cubic yards were loaded into scows and reported as yardage removed, and 44,956 cubic yards were washed into the Cut and rehandled by dredge No. 86.

Following is a statement of the excavation in detail:

LOCATION.	Earth. Cu. Yds.	Rock. Cu. Yds.	Total. Cu. Yds.
Empire slide.....		16,045	16,045
Hagan's slide.....		2,415	2,415
East Culebra slide.....		17,872	17,872
West Culebra slide.....		55,606	55,606
Cucaracha slide.....	183,008	204,700	387,708
Total.....	183,008	296,638	479,646

Material excavated in Culebra Cut by the ladder and dipper dredges was dumped in Gatun Lake, north of Gamboa.

Supply Department.**FORCE.**

The force reports for the last week in April show 31,653 employees at work. Of these, 4,429 are white Americans, 1,088 are European laborers, and the balance are West Indian laborers and artisans. The occupants of Government quarters numbered 7,998 Americans, 1,808 Europeans, and 8,193 West Indians. A congestion exists in family and bachelor quarters at Ancon, Balboa, and Corozal.

BUILDINGS.

Work on the administration building has been pushed, although all overtime work has been cut out. On account of the fact that all available plasterers have been put on the administration building, work on the permanent quarters progressed but little during the month. The date of completion has been

postponed from a month to six weeks. All houses authorized have been reerected at La Boca, although there still remains some finishing work to be done.

MATERIALS AND SUPPLIES.

The transfer of supplies from Empire to Balboa continued during the month of April at a much slower rate than was anticipated. The steel racks at Balboa were not completed, and it was impossible to transfer the large stock of iron and steel at Empire to Balboa. It is anticipated that the balance of the stock will be transferred before the end of May. The value of the material received during the month was \$1,252,374.94.

SUBSISTENCE.

The 13 line hotels served 168,160 meals; 11 laborers' messes, 214,425 meals; Hotel Tivoli, 10,636; Hotel Aspinwall, 867. The net profit on subsistence operations was \$2,616.59.

Health Department.

The total number of deaths from all causes among employees was 27 (disease, 22; violence, five), an annual average per thousand of 5.52 and 1.26, respectively. The annual average death rate per thousand in the cities of Panama and Colon, and in the Canal Zone, including both employees and civil population, was 22.33. Among employees, deaths from the principal diseases were: Lobar pneumonia, two; organic disease of the heart, two; tuberculosis, four; typhoid fever, one; leaving 13 deaths from all other diseases, and five deaths from external violence. No case of yellow fever, smallpox, or plague originated on the Isthmus during the month, but one case of smallpox, removed from a ship, recovered.

Executive Office.

The new system of leave of absence was put into operation during April; work was advanced on the commutation of leave due to employees under the old regulations; the old department of Civil Administration was divided into the divisions of Civil Affairs, and Police and Prisons, under division chiefs who report to the Executive Secretary; and the routine administrative work of The Panama Canal was done.

COURTS.

For administrative purposes, the affairs of the courts are reported under the Executive Office. Seven civil cases were pending and one criminal, and four civil cases were filed during the month in the Supreme Court. No cases were disposed of. In the circuit courts, one civil and one criminal case were tried, 18 probate cases and one commitment of an insane person were settled. In the magistrates' courts, 255 criminal and 13 civil cases were tried at Balboa, and 116 criminal and six civil cases were tried at Cristobal.

POSTS AND CUSTOMS.

Money order sales for April amounted to \$294,158.91; fees, \$1,411.87; receipts from stamp and card sales, \$6,667.01; deposits in savings accounts, \$149,100; withdrawals, \$194,121.

At the port of Ancon, 25 vessels entered and 24 cleared; at Cristobal, 31 entered and 32 cleared.

POLICE AND FIRE DIVISION.

Arrests numbered 391, and which 29 were of women. One convict was committed to the penitentiary and seven were discharged; total in confinement at the close of the month, 74. The cost of guarding and subsisting the convicts was \$1,875.70, and the value of their

work on the Gamboa-Empire road was \$1,332.-80.

Thirty-four fires occurred in the Canal Zone, and two in Colon to which the Cristobal company responded. The losses in the Canal Zone were \$1,292.50.

SCHOOLS.

The net enrollment in the white schools was 1,259, the average number belonging, 930.1, and the average daily attendance, 891.1. In the colored schools, the net enrollment was 1,455, the average number belonging, 789.2, and the average daily attendance, 653.6.

Respectfully,

GEO. W. GOETHALS,

Governor.

Charts of the Canal and Approaches.

The completion of the Canal has been anticipated by the Department of Commerce in the publication by the United States Coast and Geodetic Survey office of a series of charts of the Canal and its approaches.

The general chart of the Canal and approaches, No. 954, which has recently been issued, is on a scale of 1/146,000 or one-half inch to the nautical mile, and is in colors. The soundings are given in feet. The tidal data are for mean low water springs in the Gulf and Bay of Panama and mean low water in the Caribbean Sea and Limon Bay. The mean higher high tide at Colon is only 1.2 feet above the tidal plane and the lowest tide 2 feet below that plane. At Balboa, the range of tide is much greater, the mean higher high water being 14.5 feet above the plane of reference and the lowest, four feet below it. The plane of reference is at Naos Island, and is about eight feet below mean sealevel. The surveys on which this chart is based were made by the Coast and Geodetic Survey in 1905 and 1912, but surveys made by the Isthmian Canal Commission and information obtained from other sources have also been utilized. The lighthouses and buoys for the aid of navigators in the approaches to the Canal are shown and their characteristics indicated. The elevations on land are given in feet above high water. There are two compass roses and a border scale on the chart. The magnetic declination in this region is given as four degrees 24 minutes east in 1915, with an annual decrease of one minute.

Three other charts, Nos. 950, 952, and 953, are on larger scales for special uses. Chart No. 950, of Colon harbor and approaches, is on a scale of 1/15,000. Chart No. 952, which includes Panama harbor and the Pacific end of the Canal and its approaches, is on a scale of 1/40,000. No. 953, on a scale of 1/80,000, also shows Panama harbor and the Pacific end of the Canal. Being on a smaller scale, this chart includes a larger area than No. 952. The last three charts are not colored, but they give the same data as the general chart (No. 954) on a larger scale and for a more limited area. All are on the Mercator projections. They may be obtained from the office of the Coast and Geodetic Survey in Washington or from sales agents at the principal ports in the United States, at the price printed on each chart.

A contract has been entered into with the Nassau Smelting and Refining Company of New York City, covering the sale of 40,000 pounds of scrap copper wire, at the price of \$0.1255 per pound.

OFFICIAL CIRCULARS.

Standard Shovels.

THE PANAMA CANAL,
OFFICE OF THE GOVERNOR,
CULEBRA, C. Z., April 1, 1914.

CIRCULAR No. 635:

1. Hand shovels on construction work shall be used, as follows:
2. For handling of earth—No. 2 round point, short handle, malleable iron "D"-handle shovel.
3. For general railroad construction and ordinary tamping in connection therewith—No. 2 round point, short handle shovel.
4. For railroad maintenance work—No. 2 square point, short handle shovel for tamping, and No. 2 round point, short handle shovel for ditching, weed cutting, etc.
5. For shoveling concrete material from boards, including other shoveling of sand, gravel, and broken stone—No. 2 square point, short handle shovel.
6. For mixing and placing concrete—No. 2 square point, short handle shovel.
7. No. 2 long handle, square and round point shovels respectively, shall be used whenever material is to be raised to such an elevation as will render their use economical.

GEO. W. GOETHALS,
Governor.

Sales of Material.

THE PANAMA CANAL,
EXECUTIVE OFFICE,
CULEBRA, C. Z., May 2, 1914.

CIRCULAR No. 630-1:

Paragraph 6-b of Circular No. 630 is modified by adding the following sentence:

"This privilege will apply only to shipment made at the time of purchase."

GEO. W. GOETHALS,
Governor.

Acting Electrical and Mechanical Engineer.

CULEBRA, C. Z., May 14, 1914.
To all concerned—During the absence of Mr. Schildhauer on leave, Mr. E. E. Lee will perform the duties of Electrical and Mechanical Engineer.

H. F. HODGES,
Engineer of Maintenance.

Duties of Surveying Officer.

THE PANAMA CANAL,
EXECUTIVE OFFICE,
CULEBRA, C. Z., May 7, 1914.

CIRCULAR No. 639-1:

In paragraph 2 of Circular No. 639, insert the words "for transfer" after the word "appraisals."

GEO. W. GOETHALS,
Governor.

Santo Tomas Hospital.

THE PANAMA CANAL,
EXECUTIVE OFFICE,
CULEBRA, C. Z., May 21, 1914.

CIRCULAR No. 623-1:

1. Circular No. 623 is hereby amended so as to read:
2. Paragraph 4: Instead of "two nurses, each \$720," two nurses, each \$720 or \$900.
3. Add paragraph 5, as follows: 5. Bills for the subsistence and laundry of the three nurses furnished by The Panama Canal should be rendered against The Panama Canal monthly by the Santo Tomas Hospital.

GEO. W. GOETHALS,
Governor.

Positions on Dipper Dredges.

THE PANAMA CANAL,
EXECUTIVE OFFICE,
CULEBRA, C. Z., May 8, 1914.

CIRCULAR No. 603-3:

1. Steamshovel employes in the service, and employees with steamshovel experience, will be eligible for positions on the dipper dredges operated by The Panama Canal, subject to the following requirements:
 - (a) Steamshovel engineers will be eligible for appointment to position of mate (craneman) on dipper dredges, upon passing examination before the Board of Local Inspectors and securing necessary license for the service.
 - (b) Steamshovel crane men will be eligible for appointment to position of dipper dredge engineer, upon passing examination before the Board of Local Inspectors and securing necessary license for the service.
 - (c) All applicants for positions on dipper dredges will be required to secure necessary license from the Board of Local Inspectors; marine licenses, as issued by the Department of Commerce, will not be accepted for this service.
2. All applications for dipper dredge service should be forwarded to the Resident Engineer, Dredging Division, Paraiso, C. Z., enclosing license (which will

be returned), and appointments will be made, when vacancies exist, in the order of the receipt of such applications.

GEO. W. GOETHALS,
Governor.

Leave of Absence.

THE PANAMA CANAL,
EXECUTIVE OFFICE,
CULEBRA, C. Z., May 8, 1914.

CIRCULAR No. 602-6:

1. On the new form of request for leave of absence (P. C. 194-4), spaces are provided for indicating whether the leave requested is annual, accumulative, travel, or without pay.
2. However, in entering the leave on the daily leave order, only the total number of days leave granted will be shown.
3. When the employee returns from leave, the time spent will be charged against any annual, cumulative, or travel leave due the employee at the time of entering on the leave.
4. Absences with permission without pay will not be permitted if annual leave is due the employee. The time must be charged to any annual leave due, except as provided in Paragraph 5, following; if the absence is without permission, no charge against or pay for annual leave will be made, and such other discipline shall be administered as the offense warrants.
5. Paragraph 13 of Circular No. 602 reads:

In the case of employees transferred from the Isthmian Canal Commission organization to the new organization who would have had a leave due between April 1, 1914, and February 1, 1915, under the old rules, or who shall have had no leave for approximately a year or more, and who desire to take a leave without pay within that period, 42 days without pay may be granted without any forfeiture of privileges, and only leave in excess of that amount shall be counted under item (a), Paragraph 12, above.

In these cases, any annual leave due may (1) be added to the 42 days without pay, or (2) be included in the 42 days as so many days with pay, or (3) remain to the employee's credit, as the employee may elect, subject to the approval of the head of the department or division.

6. Annual leave may not be commuted into a cash payment on termination of service except when added to accumulative leave. This is the interpretation of Rule 34 of the Executive Order of February 2, 1914.

GEO. W. GOETHALS,
Governor.

Sales of Material.

THE PANAMA CANAL,
OFFICE OF THE GOVERNOR,
CULEBRA, C. Z., April 1, 1914.

CIRCULAR No. 630:

PURCHASERS.

1. Sales of material, supplies, and equipment, including fabricated articles, rock, sand, and gravel, and excluding only sales of medical and surgical supplies, which may be made by the Chief Health Officer, and sales of school books and supplies by the superintendent of schools, may be made by the Chief Quartermaster, as follows:

(a) Material and supplies that can be spared may be sold to officers and employees of The Panama Canal and other departments of the United States Government, for their personal use, and to clubs, societies, and other organizations of such employees.

(b) Material and supplies that can be spared may be sold to the departments of the United States Government, and to steamship companies and their agents, for use on ships.

(c) Material and supplies that can be spared and are not obtainable in the local markets, may be sold to individuals and companies, except that if the value of sale in any case exceeds \$250, prior authority from the Governor must first be obtained.

MATERIALS.

2. (a) In sales of regular stock material and supplies, fabricated articles, rock, sand, and gravel, request for purchase should be made through the Chief Quartermaster, who will deliver the material through the nearest storehouse from which the material can be supplied, at price book prices, plus the usual surcharge, except in such cases as may be otherwise provided for by contract. This material will be delivered to the Panama Railroad stations nearest to the point where it lies and freight charges over the Panama railroad to its destination, will be assumed by the purchaser. This does not apply to such stock material as may be sold in connection with second hand or obsolete material.

(b) In sales of second hand lumber, second hand roofing, and other miscellaneous second hand material, request for purchase should be made through the Chief Quartermaster, who will deliver the material at the point where it is available, at prices approved by the Governor.

(c) In sales of surplus and obsolete material that has been turned into the storehouse for obsolete material

at Mount Hope, requests for purchase of this class should be made direct upon the Depot Quartermaster at Mount Hope, who will be given blanket authority to make such sales at prices approved by the Governor. A detailed report of such sales will be made monthly to the Chief Quartermaster.

EQUIPMENT.

3. (a) Sales of surplus and obsolete equipment turned in by the various departments and divisions will be handled exclusively by the Chief Quartermaster.

(b) The Supply Department will act as sales agent for the Panama Railroad Company in the sale or disposition of any surplus or obsolete equipment retired by that company.

(c) All inquiries from prospective purchasers of equipment should be referred to the Chief Quartermaster.

PRICES.

4. The Chief Quartermaster will arrange for competent appraisals of all material and supplies for sale. After such prices are approved by the Governor, sales may be made by the Chief Quartermaster without additional authority, at the prices thus fixed, to an amount in any one case of \$500. But no material shall be sold at a reduction in cost without previously having been surveyed for sale by the surveying officer.

TERMS OF SALE.

5. Sales shall be made on a cash basis unless otherwise specifically authorized by the Governor, except, as follows:

(a) Sales to other departments of the United States Government and the Republic of Panama.

(b) Sales to contractors with The Panama Canal or the Panama Railroad Company, and to steamship companies, and others, in cases where such individuals or companies secure payment for the material, supplies, and equipment, by making a deposit of cash or satisfactory certified check, or by giving a bond in form, with securities satisfactory to the Auditor of The Panama Canal, in an amount to be fixed by the Chief Quartermaster to cover the line of credit which it is deemed advisable to grant, and conditioned upon the payment for such material, supplies, and equipment within 30 days from the close of the month within which delivery of the material, supplies, or equipment is made.

(c) Sales to contractors with The Panama Canal and the Panama Railroad Company, and to steamship companies, in cases where The Panama Canal or the Panama Railroad Company is indebted to such contractors or companies for material furnished or services rendered by them to The Panama Canal or the railroad company, in an amount equal to or in excess of the value of any material, supplies, or equipment sold.

FREIGHT CHARGES.

6. (a) On second hand, surplus, and obsolete material, and equipment, shipment over the Panama railroad will be made at the expense of the purchaser, unless otherwise provided for in the terms of sale.

(b) The purchaser will, however, be granted the freight rates fixed by the tariff for Panama Canal business, effective January 1, 1907, and supplements thereto, namely, \$2.25 a ton of 2,000 pounds, minimum carload weight 20,000 pounds, and minimum charge of 20 cents, \$50 for each movement dead weight in train for special equipment, such as steamshovels, locomotives, cranes, and piledrivers, and \$5 for each empty car. If the general local tariff rates are lower than the rates specified above, such rates will apply.

DUTY PAYABLE.

7. (a) Material, supplies, and equipment sold for use within the Republic of Panama and the Canal Zone shall be subject to payment of customs duty by the purchaser to the Republic of Panama:

(b) Delivery of such material, supplies, and equipment will not be made to the purchaser until he shall have presented to the depot quartermaster at Mount Hope, or to the district quartermaster at Ancon, two copies of bill covering sale, on which are endorsed certificates signed by the Treasurer of the Republic of Panama, or his authorized representative in Panama or Colon, that customs duties on such material, supplies, and equipment have been paid or have been remitted.

(c) This provision shall not apply, however, to sales made:

(4) To individuals and companies who have been granted blanket authority by the Republic of Panama to make purchases without payment of customs duties.

(B) To the Panama Railroad Company, The Panama Canal, other departments of the United States Government, or contractors with The Panama Canal or the Panama Railroad Company, when articles purchased are for use in connection with their contracts.

(C) To steamship companies and other individuals and companies when the articles purchased are for use solely outside of the territorial limits of the Canal Zone and the Republic of Panama.

(D) To churches and charitable organizations.

(E) To officers and employees of The Panama Canal and the Panama Railroad Company, officers and enlisted men of the United States Army, Navy, and Marine Corps, or officers and employees of other depart-

ments of the United States Government, when the articles are purchased for personal use.

(F) To clubs, societies, or other organizations of such officers, employees, and enlisted men in the Government service.

GEO. W. GOETHALS,
Governor.

Discharge.

THE PANAMA CANAL,
OFFICE OF THE GOVERNOR,
CULEBRA, C. Z., April 1, 1914.

CIRCULAR No. 604:

1. The Executive Order of February 2, 1914, provides:

SECTION 9. * * * The Governor may discharge an employee at any time for cause, and terminate a provisional appointment when the exigencies of the service require.

REDUCTION OF FORCE.

2. In reducing force the following considerations will govern in selecting employees to be discharged:

(a) *Citizenship*—Persons who are not citizens of the United States or of Panama will be discharged first, regardless of efficiency.

(b) *Efficiency*—The relative efficiency of an employee in the class of work he is doing will be the second consideration. This includes personal conduct in so far as it affects the employee's work.

(c) *Seniority*—Length of service shall be considered only where a decision cannot be made by the criterion of efficiency. (See rules of seniority.)

3. An employee discharged on account of reduction of force, due to any cause, shall be allowed five days without pay in which to procure work; this, in order that, in case he finds employment, he may forfeit none of the privileges incident to continuous service.

FURLOUGH.

4. In case of a discharge on account of temporary reduction of force, if an employee cannot obtain work under the Canal organization, he may be given leave without pay for a limited period, pending reemployment. This will be known as "Furlough," and under it all privileges of continuous service will be preserved to the employee. In case of a temporary reduction of force of a class of workers, the furlough time will be distributed as equally as possible among employees of the class.

ARTISANS.

5. Whenever a reduction in the force of artisans is contemplated, the office of the Executive Secretary must be notified in writing at least five days in advance of any action toward discharge or of serving the five days notice referred to above. This, in order that an effort may be made to find work elsewhere in the organization for the men to be discharged.

SERVICE RECORD.

6. A transcript of his service record in the Canal and Panama railroad services will be issued upon request to each employee who resigns or who is discharged. It will be issued by the office of the Executive Secretary, and signed by the Governor, or such person as he may authorize. No other letter of recommendation or service shall be given by an official of The Panama Canal. Upon papers of transfer, promotion, demotion, change of rating, and termination of employment, the head of the department shall indorse a rating for "conduct" and "General workmanship." The ratings authorized are "Excellent," "Very good," "Good," "Mediocre," and "Poor," and only these terms shall be used. The rating "Good" shall indicate hereafter passably satisfactory service. Persons whose rating in either conduct or workmanship is below the grade of "Good" will not be eligible for reemployment; and only those with ratings of "Excellent" or "Very good" may be carried on the preferred list for reemployment. On this account, and in order to avoid misrepresentation regarding an employee's ability or conduct, heads of departments are directed to exercise careful discrimination in making these ratings.

SERVICE RATINGS.

7. Ratings for general workmanship and conduct will be marked, as follows:

(a) *Excellent*, when compliance with rules, punctuality, attendance, general attention to duty, and physical fitness are exceptionally good.

(b) *Very good*, when the above are not sufficiently above the average to justify the mark *excellent* but are, nevertheless, above the average.

(c) Care will be taken that markings *excellent* and *very good* under workmanship are given only to men of exceptional ability.

(d) *Good*, when the above are average.

(e) *Mediocre*, when the above are such as to render employment undesirable, except under conditions of unusual necessity.

(f) *Poor*, when the above are so bad as to render employment under any conditions undesirable.

8. The above markings shall be for general conduct. Specific instances rendering employment undesirable, but of such rare occurrence as not to be considered general, will be noted as exceptions under the marking for general conduct; as, for instance, if a man whose con-

duct is in all other respects excellent, should commit a theft and be discharged for it, his conduct would be marked *excellent*, except for case noted as cause of discharge.

9. General workmanship will be marked in the same manner as general conduct, the rules for assigning any particular marking being in general similar to those described above for conduct; and specific and exceptional cases of bad workmanship, in the same manner as explained for conduct.

GEO. W. GOETHALS,
Governor.

Duties of the Surveying Officer.

THE PANAMA CANAL,
OFFICE OF THE GOVERNOR,
CULEBRA, C. Z., April 1, 1914.

CIRCULAR No. 639:

1. It will be the duty of the surveying officer to submit recommendations to the Governor on requests for relief from accountability for lost or damaged property, and to pass upon the responsibility of officers and employees for such loss or damage.

2. He will make appraisals and will survey and submit recommendations for the disposition of tools, appliances, equipment, or material which may have become unserviceable by use, deterioration, general wear, or unfitness for the purpose for which such articles were secured, upon presentation of proper requests.

3. When questions of responsibility or property arise, due to accident, mistake, neglect, or in other ways, he will ascertain the facts and report them to the Governor with his recommendation. This will include questions involving the character, amount, and cause of damage or deficiency, and responsibility for such damage or deficiency; also, inventories of property ordered to be abandoned. He will fully investigate all matters submitted to him and call for all evidence obtainable, and will not limit his inquiries to proofs or statements presented by parties in interest. He will rigidly scrutinize all evidence, especially in cases of alleged theft or embezzlement, and will not recommend the relief of officials or employees from responsibility unless fully satisfied that those charged with the care of property have performed their duty in regard to it. He should hear in person, or by deposition, all persons concerned in the subject matter before him.

4. The surveying officer will verify discrepancies between invoices and actual property transferred from one accountable officer to another, ascertaining definitely amounts received for which receiving official must receipt, and, as far as possible, where and how the discrepancy occurred.

5. The following classes of property may be destroyed by the surveying officer:

(a) Stores which have become so deteriorated as to endanger health or injure other stores.

(b) Unserviceable property of no salable value.

6. The surveying officer will act on requests of unserviceable, obsolete, surplus, and damaged material, equipment, and supplies; also, requests for relief for lost or stolen property, only, when the same are presented on prescribed forms.

GEO. W. GOETHALS,
Governor.

Private Property Rights.

THE PANAMA CANAL,
EXECUTIVE OFFICE,
CULEBRA, C. Z., April 1, 1914.

CIRCULAR No. 653:

Private property rights must not be interfered with any more than absolutely necessary, and foremen must prevent their laborers from taking or damaging such property. In cases where it becomes necessary in connection with any of the works of the Canal or railroad to enter upon, interfere with, damage, or destroy private property such as buildings, growing crops, fruit trees, fences, or other improvements, immediate notice thereof shall be given to the owners of such property. The person in charge of such work shall make and forward to the head of his department an accurate and detailed report showing all property destroyed, its location, the date of destruction, and the names of the owners. Such reports should then be forwarded to the District Attorney, for settlement upon approved voucher forms, or for such other action as the facts may warrant.

GEO. W. GOETHALS,
Governor.

Approval of Vouchers, Pay Rolls, and Public Bills.

THE PANAMA CANAL,
EXECUTIVE OFFICE,
CULEBRA, C. Z., April 1, 1914.

CIRCULAR No. 670:

All vouchers, pay rolls, and public bills covering expenditures on the Isthmus, shall be approved for payment by the Governor, or by his direction, or by the heads of the respective departments in which and for the benefit of which the expenditures are made, except expenditures for the Accounting Department, for

which approval shall be by the Governor, or by his direction, and except that the Chief Quartermaster may approve vouchers covering purchases of material and supplies on the Isthmus, or may authorize any person in the Supply Department to approve such vouchers by his direction.

GEO. W. GOETHALS,
Governor.

Military Defense Reservations.

THE PANAMA CANAL,
EXECUTIVE OFFICE,
CULEBRA, C. Z., April 1, 1914.

CIRCULAR No. 649:

1. With the view of preventing the unauthorized obtaining of information relative to the military defenses of The Panama Canal, all hitherto existing regulations governing visitors to such defense reservations are hereby revised and published in accordance with Paragraph 347, Army Regulations.

2. Persons not employed in connection with fortification work will not be permitted to visit military reservations, except as hereinafter provided.

3. Officers of the United States Army, Navy, and Marine Corps, on identification satisfactory to the police officers or superintendents at the different localities, will be permitted to visit such reservations, with members of their families in their company and not be required to present passes.

4. Passes to visit the reservations may be issued to immediate relatives of employees of the Fortification Division; and to immediate relatives of employees quartered at Toro Point, for the purpose of visiting the residential section of Toro Point only. Excepting under unusual or exceptional circumstances, no other persons will receive permits to visit the reservations.

5. Passes to visit the reservations will be issued only by the Governor of The Panama Canal or by the assistant engineer in charge of fortification construction, except as provided in Paragraph 6. These passes will be accepted in future as authority for transportation by captains of tug boats and lunches plying between Cristobal and Toro Point. The issuing of boat passes by the office of the Division of Terminal Construction at Toro Point for trips to Cristobal, or for round trips initiating at Toro Point, may be continued until that office is abolished.

6. Inspectors, machinists, and other employees of The Panama Canal who are obliged to visit frequently the reservations during working hours on official business, will be issued limited passes upon application of the heads of their respective departments. Single trip passes to Toro Point for such purposes may be obtained from the Cristobal fortification office.

7. Superintendents, engineers, foremen, and all employees engaged on fortification work will cooperate with officers of the Canal Zone police to prevent the visits of all unauthorized persons. Such persons will be regarded as trespassers and prosecuted as provided by law.

8. The provisions of this order will remain in effect until further notice, or until the works at the various points have been transferred to the Coast Artillery Corps, United States Army. When the majority of the works at any fort have been transferred to the Coast Artillery Corps, the responsibility of issuing passes will be turned over to the commanding officer of such fort.

GEO. W. GOETHALS,
Governor.

Injury Claims.

THE PANAMA CANAL,
OFFICE OF THE GOVERNOR,
CULEBRA, C. Z., April 1, 1914.

CIRCULAR No. 668:

1. By Executive Order, dated March 20, 1914, the President, as directed by The Panama Canal Act, approved August 24, 1912, has provided:

* * * "a method for the determination and adjustment of all claims arising out of personal injuries to employees thereafter occurring while directly engaged in actual work in connection with the construction, maintenance, operation, or sanitation of the Canal or of the Panama railroad, or of any auxiliary canals, locks, or other works necessary and convenient for the construction, maintenance, operation, or sanitation of the Canal, whether such injuries shall result in death or not."

2. That Order provides that claims for compensation on account of injuries to or deaths of employees occurring on or after April 1, 1914, shall be settled by the Governor of The Panama Canal; authorizes the Governor to make all necessary rules and regulations for its proper enforcement and to decide all questions arising thereunder, or in regard to the interpretation thereof, and makes the Governor's determination of any fact, necessary to or underlying any claim thereunder, final and conclusive.

3. In accordance with the authority conferred upon me by Section 30 of the said Executive Order of March 20, 1914, the following rules and regulations are pre-

scribed for the purpose of making effective the provisions of the said Order.

NOTICE OF INJURY.

4. Immediately after an employee of The Panama Canal is injured, he shall notify his foreman or other immediate superior of the injury, if he is able to do so. This notice may be either written or oral. Upon receipt of the notice, the foreman or other immediate superior shall investigate the reported injury for the purpose of securing information necessary to the rendering of a report. If the notice herein specified is not given promptly, it may constitute a waiver by the employee of any claim for compensation under the Executive Order, in the discretion of the Governor.

MEDICAL AND SURGICAL TREATMENT.

5. Immediately after an employee is injured, he shall report for treatment to the nearest physician of The Panama Canal, and shall be subject to the orders of such physician until discharged. If any such injured employee shall refuse to submit to the medical or surgical treatment prescribed for him and determined by the Governor to be reasonable and proper, the Governor may, in his discretion, either reduce the amount of compensation to which said employee might otherwise be entitled, or consider such refusal on the part of the employee to be a waiver by him of any right to compensation under the Executive Order.

REPORT OF INJURY.

6. Immediately after an injury to an employee resulting in his probable disability comes to the knowledge of a foreman or other person charged with the making of reports, it shall be the duty of such foreman or other person to make a report, at once, upon form A-18, to the claim officer. If any officer of The Panama Canal shall witness an injury to a man on the work, he shall ascertain immediately the facts connected therewith and make a report as provided above. In order to enforce compliance with the provisions of these regulations as to the rendition of reports of accidents, the Auditor of The Panama Canal will report to the Governor the failure of any officer to render reports as required.

REPORT OF DEATH.

7. When an employee of The Panama Canal is accidentally killed, the deceased employee's foreman or other immediate superior shall make report, at once, to the claim officer on Form A-19.

NOTICE OF DEATH.

8. When an employee dies as a result of injuries received in connection with his work, one of the persons entitled to compensation, or some one on his behalf, shall give written notice of such death to the Governor.

DISPOSITION OF REPORT.

9. Upon receipt of a report of injury or death, the claim officer shall forward a transcript of the material facts to the head of the department or division in which the injured or deceased person was employed at the time of the injury. A copy will be forwarded to the chief timekeeper, or to the proper district timekeeper, who shall cause the office timekeeper charged with the preparation of the pay roll upon which the name of the injured or deceased employee is carried, to verify the name, metal check number, occupation, rate of pay, and to add to the report, the pay roll references and such other information as may be required. The completed notice of injury will then be returned to the claim officer. If the employee is paid by the output, information which is required by Paragraph F of Section 14 of the Executive Order, may be given on a separate sheet attached to the notice.

CERTIFICATE OF ATTENDING PHYSICIAN.

10. Whenever a physician of The Panama Canal shall attend an employee who is unable to perform his work, and such employee claims that his disability is due to an injury which he has received in connection with his work, the physician shall issue to the employee a certificate of disability. The following rules shall govern the issuance of certificates:

(a) After the period of disability shall have continued for seven full consecutive days following the day of the inception of such disability, the physician shall issue a certificate of disability on account of injury upon form A-24, and when issued, such certificate shall be forwarded immediately to the claim officer.

(b) When an employee is transferred to another point for treatment on account of injury, the period of continuous disability prior to his transfer, shall be certified upon the papers which accompany the employee to the point of transfer. The physician at the point of transfer shall include in his certificate, which is to be forwarded to the claim officer, the period of disability from the beginning date shown upon the transfer papers.

(c) When the period of disability is less than seven full consecutive days following the day of the inception of such disability, the time shall be certified upon the form in use for time lost on account of illness or injury, and such certificate shall be delivered to the employee.

DISPOSITION OF DISCHARGE SLIP.

11. When an employee is discharged from treatment, the physician shall instruct the employee to show the discharge slip to his foreman or other immediate superior,

upon his return to his station, then to deliver the slip to his timekeeper. The timekeeper shall attach the discharge slip to his time book and it shall accompany the time book to the timekeeping office. The office timekeeper shall add to the discharge slip such information in regard to the employee's status on the pay roll, as may be required, and when completed, it shall be forwarded to the claim officer. If the employee does not return to work, he should forward his discharge slip direct to the claim officer.

DUTIES OF SUPERINTENDENT OF HOSPITALS.

12. It shall be the duty of the Superintendent of Hospitals to require officers under his jurisdiction to submit to the claim officer reports upon the physical condition of employees, whenever such reports are requested; a notice of refusal of an injured employee to submit to medical treatment; a notice of refusal of an injured employee to submit to a surgical operation which the attending physician may deem necessary to save the life of the injured employee, or to render the disability less serious, immediately after such refusal; a notice of discharge of an injured employee who is in need of no further medical treatment, but is still incapacitated; notice that an injured employee whose disability will probably continue for a period of more than two months, is able to travel to his home, if such employee is not a permanent resident of the Isthmus of Panama; and such other information as the claim officer may require.

13. There shall be kept in Ancon Hospital separate registers, on form A-31, of all injury cases which may be under treatment. These registers of injury cases shall be available, at all times, to the claim officer and his assistants for such information as they may require.

DUTIES OF THE AUDITOR.

14. The Auditor of The Panama Canal shall designate an employee of his department to perform the duties of claim officer. The claim officer shall keep accurate records of all transactions in connection with claims arising out of injuries to employees, prepare the necessary pay rolls and vouchers, and certify the same as correct. He shall collect evidence for the proper determination of any question which may arise upon a claim for compensation, and shall exercise jurisdiction over the administrative details of the operation of the Executive Order. All claims for compensation on account of injury, in connection with which any question has been raised, shall be submitted by the Auditor to the Governor, with a brief of the facts in the case and a recommendation as to the action to be taken.

DEATH CLAIMS.

15. When an employee shall die within one year from the date of injury and such death is the result of injuries received while directly engaged in actual work in connection with the construction, maintenance, operation, or sanitation of the Canal, upon application, persons entitled to compensation shall be furnished with blank forms of claim. All persons entitled to compensation shall execute such claims before some officer who is authorized to administer oaths generally. The claim must be filed with the claim officer within one year after the death of the employee. All claims for compensation on account of death shall be submitted by the Auditor to the Governor, with a brief of the facts in the case and a recommendation as to the action to be taken.

TRANSIT TIME.

16. In addition to the time that an employee is certified for injury, he shall be allowed the time necessarily consumed in returning from the hospital, or other place in which he has been detained for treatment on account of injury, to the place of accident, or to his place of work, or to his home in the Canal Zone; provided, that payment for no part of the time has been otherwise allowed.

SCOPE OF RULES.

17. These rules and regulations shall have general application to the employees of the Panama Railroad Company, and all claims arising from injuries to Panama railroad employees will be handled under the supervision of the Auditor of The Panama Canal.

GEO. W. GOETHALS,
Governor.

Measuring of Sand, Gravel, and Stone.

THE PANAMA CANAL,
EXECUTIVE OFFICE,
CULEBRA, C. Z., May 13, 1914.

CIRCULAR No. 637-1:

Circular No. 637 is amended to read, as follows:
Western dump cars (large), 23 cubic yards.
Western dump cars (small), 15 cubic yards.

GEO. W. GOETHALS,
Governor.

Employees Whose Duties Require Their Visiting or Crossing the Locks.

THE PANAMA CANAL,
OFFICE OF THE GOVERNOR,
CULEBRA, C. Z., May 23, 1914.

HEADS OF DEPARTMENTS AND DIVISIONS:

Please furnish this office a list of officials and em-

ployes of your department or division, whose duties require them to visit or cross the locks at Gatun, Pedro Miguel, or Miraflores during the day or night, or both. This list need not include those employees who are stationed at Gatun, Pedro Miguel, or Miraflores and regularly employed on the locks.

This information is desired in order that the necessary permits may be issued.

GEO. W. GOETHALS,
Governor.

Indigent Sick of the Republic of Panama.

THE PANAMA CANAL,
EXECUTIVE OFFICE,
CULEBRA, C. Z., May 8, 1914.

CIRCULAR No. 618-1:

Paragraph 20 of Circular 618 is amended to read, as follows:

The indigent sick, lepers, and insane of the Republic of Panama shall be admitted to such hospital as may be designated for their reception and shall be treated, upon request of authorized officials of the Republic. A charge of 75 cents gold per day shall be made for the medical and surgical treatment of such persons, bills being rendered against the Republic of Panama; except that for care at Colon Hospital bill will be rendered against the Republic at the rate of the per capita cost of patients in that hospital for the preceding month.

GEO. W. GOETHALS,
Governor.

Leave Regulations—Two Days Allowed at Termination.

THE PANAMA CANAL,
EXECUTIVE OFFICE,
CULEBRA, C. Z., May 14, 1914.

Circular No. 602-7:

1. Employees who have two or more days annual leave to their credit may be excused not to exceed two days when service is terminated by resignation, or discharge on account of reduction of force, and may be paid for the same without again reporting for duty.

2. If more than two days are granted, employees are required to report for duty before payment may be authorized, except when the annual leave is added to cumulative leave.

GEO. W. GOETHALS,
Governor.

Sightseeing Service.

PANAMA RAILROAD COMPANY,
OFFICE OF SUPERINTENDENT,
COLON, R. P., May 21, 1914.

CIRCULAR No. 431:

All concerned—Effective May 24, the sightseeing train will be discontinued.

Commencing May 25, the Panama Railroad Company will resume the operation of the motor boat *Louise*. This launch, however, instead of operating between Gamboa and Gatun, as heretofore, will ply between Paraiso and Gamboa, leaving from the launch landing north of the pontoon bridge at 9.20 a. m., daily except Sunday, running through Culebra Cut and up the Chagres River, landing passengers at Gamboa at 11.30 a. m. Commencing June 1, the *Louise* will leave from Pedro Miguel Lock.

The *Louise* will be available for charter any afternoon or Sunday for trip through Culebra Cut, up the Chagres River, or on Gatun Lake.

For further particulars, apply to any agent.

F. R. BLUNT,
Acting Superintendent.

Sale of Obsolete Metal Checks.

THE PANAMA CANAL,
OFFICE OF DEPOT QUARTERMASTER,
CRISTOBAL, C. Z., May 21, 1914.

Sealed bids will be received at the office of the Depot Quartermaster, Mount Hope, until 2 o'clock p. m., Saturday, June 6, 1914, when they will be opened in the presence of attending bidders, for miscellaneous lot of approximately 1,500 old series metal checks.

These may be seen on any working day between the hours of 7 and 11 a. m., and 1 to 5 p. m., on application to this office.

Bids must be plainly marked "Proposal to purchase old metal checks, to be opened June 6, 1914," and addressed to the Depot Quartermaster, Mount Hope, C. Z. The right is reserved to reject any or all bids.

C. H. MANN,
Depot Quartermaster.

Division of Municipal Engineering.

GATUN, C. Z., May 20, 1914.

To all concerned—Mr. E. J. Tucker, chemist, will be temporarily in charge of the operation of all filtration plants and the analyses of all water supplies in the Canal Zone, during the absence on leave of Mr. Jas. T. B. Bowles, physiologist, effective May 21, 1914.

GEO. M. WELLS,
Resident Engineer, Division of Municipal Engineering.

CANAL CLUBHOUSES.

Activities of the Young Men's Christian Association.

BALBOA.

Señor Perez will be in charge of the class in Spanish which will open on Friday evening, May 29.

Beginning Monday, May 25, the barbershop in charge of Mr. Sandrock has been open daily, instead of on alternate days, as formerly.

COROZAL.

The following high scores were recorded on the bowling alleys this week:

Tenpins—Thirsk, 215, 204, 200; Parkis, 211; Garrett, 205; Davis, 203.

Duckpins—Ruggles, 111; Garrett, 101.

Moving pictures for this week have been scheduled for Friday, May 29.

The standing of the teams in the local indoor baseball tournament on May 23, was:

Team.	Won.	Lost.	P. C.
White Sox.....	3	2	.600
Red Sox.....	3	3	.500
Cubs.....	3	3	.500
Naps.....	3	4	.428

PEDRO MIGUEL.

The motion picture reels entitled "From the manger to the Cross" will be exhibited at the clubhouse, on Sunday evening, May 31. The pictures were taken in the Holy Land. Special music will be furnished by C. C. Pearsall.

CULEBRA.

All interested in entering a handicap tenpin bowling tournament are requested to indicate it at once, as the tournament will start in a few days.

Miss MacLaren will give her final entertainment on Friday night, May 29, at 8 o'clock. Admission will be 50 cents for adult nonmembers, 25 cents for children, members free. She will present "The misleading lady."

GATUN.

Miss Gay Zenola MacLaren will give an imitative recital of "The music master," on Tuesday evening, June 2. At the conclusion of the play, she will give an imitation of Sarah Bernhardt as Camille.

The tropical pool tournament started on Wednesday evening, May 20, with the following entries: Wright, Goree, Feehan, Duffy, Conley, Kerruish, Loulan, and Brown.

A collection of song books has been added to the musical library of the Y. M. C. A. It includes home songs, national songs, college songs, songs for glee club, songs for male quartets, popular hymns, and popular opera songs.

Eight reels of motion pictures illustrating Bulwer-Lytton's famous novel, "The last days of Pompeii," were exhibited at the clubhouse on Monday evening, May 25. Translations of the Spanish titles were given by Harry Feehan.

Special shelves are being constructed in the reading room to contain permanent files of the more important magazines.

Special music was given at the clubhouse on Saturday evening, May 23, by Messrs. Joseph and Polliter, of Wilkesbarre, Pa.

Among the scores above 100 made by some of the Gatun women during the week ending May 23 were the following: Mrs. Tricker, 148, 131, 122, 113; Mrs. Conley, 134, 129, 116, 108; Mrs. Crosseup, 119, 114, 111; Mrs. Walsh, 114, 110, 109, 107.

The standing in the local handball tournament is, as follows:

	Won	Lost	P. C.
Peters.....	2	0	1.000
Wright.....	2	1	.667
Lailor.....	1	1	.500
Loulan, J.....	0	1	.000
Sutcliffe.....	0	1	.000
Heslop.....	0	1	.000

The final standing of the national duckpin tournament, which began on May 4 and closed on May 21, was, as follows:

	Won	Lost	P. C.
Tigers.....	12	6	.667
Pirates.....	9	9	.500
Red Sox.....	8	10	.444
Superbas.....	7	11	.389

In a 3-game contest for the pennant awarded to the winning team, O'Meara made the highest score, 269. The "Boob" pennant awarded the Superbas was similarly contested for by the members of that team, in three games, and won by Kiger, with a score of 297.

CRISTOBAL.

Because of moving pictures on Thursday night of this week, the regular meeting of the Discussion Club will be held on Friday, May 19. The meeting for June 4 will be addressed by Mr. L. Larson on the subject of "Practical sanitation in Panama."

The scores above 500 in the single folks' duckpin tournament, held on May 18, were made by Archie Gibson and Miss Gay Butler, 526; and W. G. Russell and Miss Miriam Stevens, 514.

The Redsox now lead in the local duckpin tournament, with six games won and three lost.

Messrs. W. Russell, D. Raymond, E. MacSparron, and F. Parker have been selected as captains of teams for the local indoor baseball league.

A team from the Corozal boys' department defeated the Cristobal boys at indoor baseball on Saturday, May 23, by a score of 17 to 14.

Supplies for the Canal.

The following steamers with supplies for The Panama Canal and Panama Railroad Company arrived at the ports of Colon, Balboa, and Cristobal during the two weeks ending May 23:

Prinz Sigismund, May 12, from New York, with 17 boxes graphite, for stock.

Heredia, May 12, from New Orleans, with 744 barrels paving brick, for Division of Municipal Engineering; 75 packages wire screens, for Mechanical Division; 76 pieces untreated yellow pine piling, 44 rolls cotton duck, for stock.

Cratheus, May 12, from Port Arthur, Texas, with 200 barrels gasoline.

Almirante, May 13, from New York, with 74 packages chain fender material, 17 cases electrical material, for Department of Operation and Maintenance; five crates structural material, for fortifications; 154 cases electrical material, for Mechanical Division; 1,171 pieces galvanized pipe, for stock.

Atenas, May 14, from New Orleans, with 87 boxes doors and windows, for permanent buildings; 173 pieces untreated yellow pine piling, for stock.

Lyra, May 15, from San Francisco, with two cases dredge parts, for Dredging Division.

Colon, May 15, from New York, with eight boxes electrical material, 39 packages electrical material, 243 steel plates, 32 boxes coil and fixtures, 151 packages elevator machinery, 1,800 bags sand, 66 boxes incandescent lamps, for Mechanical Division; 13 pieces pipe, 104 pieces cast iron pipe, 16 pieces cast iron fittings, for Division of Municipal Engineering; 56 packages splice bar and bolts, for Pacific terminals; 11 cases hardware, 20,800 pieces hollow tile, eight crates incandescent lamps, for permanent buildings; 30 pieces structural material, 25 pieces angle iron, 97 packages bolts and rivets, for Department of Operation and Maintenance; 12 barrels soda, for Health Department; 87 boxes plumbing material, 40 cases polish, 290 kegs bolts and rivets, 14 barrels electric batteries, 33 cases paper, 40 cases paint, 71 boxes ink, 14 boxes hardware, 27 boxes rubber hose, 150 bundles galvanized sheets, 473 pieces galvanized pipe, 851 pieces steel bars, 1,288 bags oats, 1,500 kegs paint, 127 kegs horseshoes, 593 bales hay, 200 pieces angle iron, for stock; and a miscellaneous cargo, the whole consisting of 29,713 packages, weighing approximately 1,043 tons.

Falk, May 16, from New York, with 113 drums gasoline, for stock.

Fort Morgan, May 16, from Mobile, with 2,053 creosoted switch ties, for stock.

Naperian, May 18, from Liverpool, with 53 casks tiling, for permanent buildings; 154 barrels carbolic acid, for stock.

Prinz Joachim, May 18, from New York, with 56 bundles tool steel, for stock.

Wasgenwaldt, May 19, from Barmen, Germany, with 204 packages floating crane material, for Division of Terminal Construction.

Parismina, May 20, from New Orleans, with two pile driver hammers, for Division of Terminal Construction; 107 pieces untreated piling, for stock.

Santa Marta, May 20, from New York, with 4,701 bundles reinforcing bars, for Division of Terminal Construction; 50 bundles wire rods, for permanent buildings; 206 packages chain fender material, for Division of Erection; 100 crates, 12 boxes, 17 barrels water closets and fittings, 250 drums calcium carbide, 38 reels hoisting cable, 1,040 kegs wire nails, 287 bundles galvanized sheets, 41 bundles tire steel, for stock.

Turrialba, May 21, from New Orleans, with 13,131 feet, board measure, lumber, for Mechanical Division; 42,556 feet, board measure, lumber, 130 pieces piling, for stock.

Neisbrook, May 22, with 537 pieces untreated piling, for Division of Terminal Construction; 1,172 pieces untreated piling, for stock.

Tenadores, May 22, from New York, with 20 reels cable, 33 cases electrical material, 190 pieces channels and angles, for Mechanical Division; eight cases electrical material, 14 reels cable, 144 bundles reinforcing rods, for permanent buildings; 12 cases electrical material, nine cases lock caisson material, 13 cases emergency dam material, for Division of Erection; 950 bundles reinforcing bars, for Division of Terminal Construction; 15 cases, four crates, 12 barrels electrical material and telephone wire, for Panama Railroad Company; 165 kegs wire nails, 51 cases caustic soda, 40 cases pipe covering, 1,700 bags oats, for stock.

M. E. Luckenbach, May 22, from Port Richmond,

N. Y., with dredge *Paraiso* in tow, for Dredging Division.

Advance, May 23, from New York, with 151 barrels clay, 32 cases electric lamps, six reels copper wire, for Mechanical Division; 19 boxes water gates, for Division of Municipal Engineering; 326 barrels plaster, 50 barrels cement, 123 bundles iron pipe, seven cases sheet copper, for permanent buildings; 16 crates, two cases, ventilators, for Fortifications Division; 870 pieces steel ties, 24 kegs clips, 23 kegs bolts, for Division of Erection; 47 cases envelopes, 198 drums, two boxes welding compound, 229 bales hay, 70 galvanized range boilers, 46 kegs, 47 boxes bolts, one box valves, 80 cases alcohol, 420 bundles wrought pipe, 30 bundles brushes, for stock; and a miscellaneous cargo, the whole consisting of 3,412 packages, weighing approximately 255 tons.

75th meridian time.

Hotel Aspinwall, Taboga.

Families of employees are entitled to the employees' rate of \$2.25 per day, per person, at the Hotel Aspinwall, Taboga.

Launch tickets to Taboga are on sale at all P. C. hotels and the Hotel Washington.

COMMISSARY DEPARTMENT.

Opening of Ancon Commissary.

The new Ancon commissary store will be open for business on June 15, 1914.

Closed on Decoration Day.

The commissaries will be closed on Decoration day, May 30, 1914. Patrons will be guided accordingly in placing their orders.

Reduction in Price of Ice.

The price of ice will be reduced from 40 cents to 30 cents per 100 pounds, effective June 1, 1914.

This price change was not authorized until after most of the June ice bills were sent to and paid by customers at the 40-cent rate. This overcharge will be credited on July ice accounts, but those who desire it will be sent refund notes, upon application to the Depot Commissary, Cristobal, C. Z.

The reduction in the price of ice is in accordance with the policy recently prescribed whereby the products of each department of the commissary branch of the Supply Department will be sold at cost price, plus the cost of handling supplies and maintenance of plants. This will result in reduction of price on all articles that heretofore counterbalanced the loss sustained in others, and in raising the price of a comparatively small number of articles that were sold in large quantities far below cost. Lists of these changes will be published in succeeding issues of THE CANAL RECORD.

Transfer of Offices from de Lesseps House.

The offices of the Assistant Chief Quartermaster, the depot commissary, and the commissary accounting force have been transferred from building No. 2, the annex to the de Lesseps residence on Cristobal Point, to building No. 263, opposite the commissary laundry. This building is a Type-18 bachelors' quarters, renovated for temporary use as an office building. Authority has been granted to demolish building No. 2.

Changes in Cold Storage Price List.

The following changes have been made in the cold storage price list, and will be effective through the week beginning May 28:

Lettuce, $\frac{1}{2}$ cents per pound; onions, $\frac{1}{4}$ cents per pound; tomatoes, $\frac{1}{10}$ cents per pound; American grapefruit, $\frac{1}{7}$ cents each.

*Indicates reduction from last list.
†Indicates advance on list.

New Rules Governing Deliveries.

THE PANAMA CANAL,
SUPPLY DEPARTMENT,
CULEBRA, C. Z., May 19, 1914.

CIRCULAR No. 96:

To all concerned—The following rules, which have been approved by the Governor, will be put into effect June 1 to govern deliveries from commissary stores:

1. One free grocery delivery every week day morning.
2. One free cold storage delivery every morning.
3. One free grocery and cold storage delivery on Saturday afternoon, and the afternoon of days preceding holidays.
4. Order for morning deliveries must be placed the day previous, or at least one hour before wagon starts.
5. Orders for Saturday afternoon delivery must be received before 11 a. m.
6. Bread will be sent out with the first delivery, and on second if requested.
7. Cold storage will be sent out on grocery delivery if requested, but at patron's risk, owing to the fact that wagons are out longer and during the heat of the day.
8. Owing to their perishable nature, peaches, plums, pears, apricots, and strawberries will not be sent out on regular deliveries.
9. Any article other than the foregoing purchased

from any department of the commissary, will be delivered.

10. Ice cream will only be delivered on regular deliveries when packed in suitable containers. An extra charge will be made for packing, and the use of containers.

11. Empty milk bottles, ice cream containers, etc., will be picked up by wagon drivers on request when making deliveries.

12. Laundry will be picked up by cold storage and grocery wagons on return trip any day. Every Monday (either morning or afternoon), laundry will be collected from all bachelor quarters and from married quarter on request.

13. Laundry will be delivered on first grocery delivery when paid in advance at commissary, or to solicitors. Laundry paid for before 1 p. m. on Saturdays, will be delivered that afternoon. On Saturdays, the commissary laundry men will accompany wagon in afternoon and collect at time of delivery, if previously advised that commissary book will be left with servant or janitor.

14. Special deliveries (leaving commissary within one hour after receipt of order) will be made at any time to any one. An extra charge of 10 cents for each 20 pounds or part thereof will be made for this service.

R. E. WOOD,
Chief Quartermaster.

Handling Meat and Vegetables.

THE PANAMA CANAL,
SUPPLY DEPARTMENT,
CULEBRA, C. Z., May 22, 1914.

CIRCULAR No. 102:

Effective May 25, on every day except Sunday, meat and perishable vegetables will be put up on morning of day of delivery. Meat and vegetables for delivery on Sunday morning will be put up Saturday afternoon, as now.

Butchers and such of their assistants as may be needed will report at 5 a. m. or earlier, if necessary, in order to get the cold storage delivery—which must not be made any later than at present—out on time.

Storekeepers are authorized to give butchers and their assistants time off during the day to avoid working them longer hours than under the present system. Butchers must, however, be on duty during the rush hours in the cold storage department.

R. E. WOOD,
Chief Quartermaster.

JOINT LAND COMMISSION.

Notice.

Notice is hereby given to all land owners and landholders and to all persons having any claims to right, title, or interest in any land, or land under water, situated in any part of the Canal Zone, except in the region known as Las Salinas, now pending before the Joint Land Commission, and to all other persons interested, that the Commission has resumed its work and will proceed with the adjudication of claims.

Its hearings will be held in building No. 114, Ancon, C. Z., (known as the Governor's residence), and due notice of such hearings will be given from time to time.

By order of the Joint Land Commission.
J. A. LANGSTON,
Secretary, pro tempore.

ANCON, C. Z., May 25, 1914.

Examinations by Board of Local Inspectors.

THE PANAMA CANAL,
BOARD OF LOCAL INSPECTORS,
ANCON, C. Z., May 23, 1914.

The Board of Local Inspectors will conduct examinations at the Administration Building, Ancon, on Wednesday, June 3, 1914, beginning promptly at 2 p. m., for persons desiring the following classes of licenses: Pilots, masters, mates, marine engineers, chauffeurs, and navigators of motor boats. All applicants for licenses must procure from the office of the Board, Ancon, forms of application and information respecting the filing out of same, not later than the day previous to the examination. In addition, all persons desiring chauffeurs' licenses must provide themselves with automobiles with which to demonstrate their ability properly to operate the same.

NOTE—The demonstration test for applicants for chauffeurs' licenses will be given on Tuesday, the day preceding the regular examination, at 2 p. m., at the Administration Building, Ancon; on Wednesday, the day of the regular examination, for out-of-town applicants, at 2 p. m. at the Administration Building, Ancon. No demonstration tests will be given at Cristobal, except by appointment.

By direction of the Chairman of the Board.
W. H. HYDE,
Clerk of the Board.

MOVEMENTS OF OCEAN VESSELS.

The following is a list of sailings and scheduled arrivals of the Panama Railroad Steamship Line; of the Royal Mail Steam Packet Company; of the Hamburg-American Line, and of the United Fruit Company's Line.

Panama Railroad Company's steamers sail from Piers 8, 9, and 11, Cristobal, at 3 p. m.

Royal Mail steamers leave for New York on alternate Tuesdays at 10 a. m.

United Fruit Company's ships for New Orleans direct, leave on Thursdays at 3 p. m.; for New Orleans, via Bocas del Toro and Havana, on Thursdays at 4 p. m.; ships for New York via Kingston, on Thursdays, at 2 p. m.; for New York direct, on Wednesdays at 2 p. m.; or Limon and Bocas del Toro, on Saturdays at 4 p. m.; and for Bocas del Toro direct, on Thursdays at 4 p. m.

The Hamburg-American steamers *Prinz Eitel Friedrich* and *Prinz Sigismund* sail from New York, via Kingston and Fortune Island, on Sundays at 2 p. m.; the *Prinz August Wilhelm* and *Prinz Joachim* sail for New York, via Kingston, Santiago de Cuba, and Fortune Island, on Tuesdays at 10 a. m.

CANAL

RECORD

Volume VII.

ANCON, CANAL ZONE, WEDNESDAY, JUNE 3, 1914.

No. 41.

The Canal Record

Official publication of The Panama Canal.

The Canal Record is published weekly free of charge, one copy each, to all employees of The Panama Canal and Panama Railroad Company whose names are on the gold roll. Extra copies and back numbers can be obtained from the news stands of the Panama Railroad Company for five cents each.

Address all Communications,

THE CANAL RECORD,

Ancon, Canal Zone,
Isthmus of Panama.

No communication, either for publication or requesting information, will receive attention unless signed with the full name and address of the writer.

NOTES OF PROGRESS.

Preparations for Local Work on Floating Cranes.

Six employees of the Deutsche Maschinenfabrik Actiengesellschaft of Duisburg, Germany, to which contract for two floating cranes of 270-tons capacity was awarded in May, 1913, have arrived on the Isthmus and are engaged in preparations for the erection of the jibs. They are quartered at Gatun. A considerable part of the erection of the superstructure will take place at Dock 14, Cristobal, after which each pontoon will be towed to Gatun Locks, and its jib will be handled into place from the east side wall of the middle level. Practically all of the jib material for the first crane is at hand, a shipload of it having arrived on May 19, on the steamship *Wusgenwald*, sailing direct to Colon from Barmen, Germany. The steamship *Medea*, sailing from Amsterdam, arrived with a second cargo on May 29.

Advice has been received that the pontoon of the *Ajax*, which left the yards of the contractor on April 26, sailed, in tow, from Falmouth, England, on May 15. The pontoon of the second crane, the *Hercules*, has been launched.

The first pontoon is due to arrive at Colon on June 26, and the second on August 1.

Sanitary Conditions at Panama Public Market.

A number of suggestions made by the Health Officer of Panama looking toward an improvement in the sanitary conditions at the public market on North avenue have been approved by the Governor and agreed to upon the part of the Panama Government. Under the new arrangement, which will be placed in effect at once, it is proposed to hold the renters of tables in the market responsible for the condition in, under, and around them, and they will also be required to keep the floor pertaining to these tables free of refuse at all times. To see that this order is properly carried out, the Panama police department will detail three members of its force for duty at the market during the regular hours of

business, namely, from about 6 a. m., to 2 p. m. One of the policemen must be able to speak Spanish, another English, and the third French, fluently. In addition, the Health Officer will employ two men whose duty it will be to keep the public aisles between the tables and stalls clean. The Department of Public Works of the Panama Government has agreed to bear the cost of the two men thus employed, and an arrangement has been practically arrived at, whereby the amount involved will be collected from the official in charge of the market at the close of each day's business, and turned over to the Collector of The Panama Canal in reimbursement for the outlay.

Additional Concrete Mixers Ordered.

The Washington office was instructed by cable on May 20 to purchase immediately four Ransom No. 3, $\frac{1}{2}$ -cubic yard concrete mixers, which will be added to the equipment in the service of the building division of the Supply Department. Each mixer will be mounted on a truck, for portability, and will be driven by a 15-horsepower motor, which will also be geared to operate the charging hopper.

This purchase was made necessary by the present demand for portable mixers in connection with the Canal work, especially in the erection of permanent buildings and in the laying of foundations and side walls for the coaling plants, and in the pier construction at Balboa.

Steelwork in Shops Office Building Completed.

The riveting in connection with the steelwork at the new shops office building at Balboa, No. 28, was completed on Thursday morning, May 23, and all work pertaining to the erection of the structural steel in the building was finished at 5 p. m., on May 29, and accepted as of that date.

No Bubonic Plague in Colombian Ports.

Dr. S. T. Darling, chief of Ancon Hospital laboratory, sailed for Cartagena, Colombia, on May 23, his services having been loaned to the Government of Colombia, by authority of the Secretary of War, for the purpose of investigating a suspicious disease which was reported to have broken out in a nearby port, and which was thought at Bogotá to be bubonic plague. Upon the receipt of the first information, additional quarantine restrictions were placed in effect against Colombian ports on May 11, as a matter of precaution, which required ships from those ports to observe plague regulations. A wireless message was received from Dr. Darling by the agent of the United Fruit Company at Colon on May 31, stating that he had investigated the cases of the suspected disease at Cartagena, Calamar, and Barranquilla, and had found no evidence of plague, but that pneumonia had been found to be the cause of disease in two cases he had examined. In accordance with this information, the Chief

Quarantine Officer on June 1, lifted the recent restrictions, leaving the regulations in effect as they were prior to May 11. At the request of President Restrepo of Colombia, Dr. Darling has been permitted to remain in Colombia a few days longer, in order that the members of the Board of Hygiene at Bogotá may have an opportunity to confer with him.

Severe Earthquake Shock.

A pronounced seismic disturbance was recorded at the Ancon station on Wednesday, May 27, beginning at 10.24:50 p. m. The pens were thrown off the sheets of all instruments, and the maximum amplitude of the movement was lost, but it exceeded 150 mm. The preliminary tremors at Ancon indicated the center of the disturbance to be about 100 miles to the southwest, or in the vicinity of the coast of Los Santos province, the locality where most of the movements have had their origin since October 1, 1913. The waves on Wednesday evening traveled in a southwest-northeast direction, the seismoscope registering from both directions. All movement of the pens had ceased at 10.54 p. m., but the actual time the disturbance continued is not known. The preliminary tremors lasted for about 15 seconds. The shock was felt generally throughout the Canal Zone, and in the provinces of Panama, Los Santos, Veraguas, and Coclé. Its intensity on the Rossi-Forel scale was V or VI (scale of I to X). As compared with the notable disturbance on October 1, 1913, the shock of May 27 was of no greater intensity, but it was of a different character, having more of a vertical motion and continuing for a longer period than the earlier one.

The barograph apoid at Ancon showed a maximum amplitude of 180 mm., and the water stage registers at different places in the Canal Zone showed a movement of the pens. The register at Gatun showed a movement of the lake surface approximating .5 of a foot, while the register at Pedro Miguel showed a movement of the surface of Miraflores Lake of .2 of a foot. No disturbance of the water surface was noted at El Vigia on the Rio Chagres; at Alhajucla, the movement was very slight.

A careful survey made of the Canal structures shows that no damage whatever was caused to the locks, dams, or spillways. The shop buildings and permanent quarters likewise escaped uninjured, the damage to Canal property apparently being confined to the new administration building at Balboa, where some of the concrete blocks and stucco were cracked, and six marble slabs partly set in one of the lavatories, were thrown to the floor and broken.

The movement had no apparent effect on Cucaracha slide, but on the morning after the shock, a small additional slide developed on the north side of Gold Hill. The walls in one or two buildings in the city of Panama de-

veloped fissures. Reports from the interior, and especially from Los Santos province, indicate that while the shock was severe in that section, no damage of importance resulted.

A second, but less pronounced shock, was recorded at the Ancon station on Sunday morning, May 31, beginning at 5.34:30 and ending at 5.37. The maximum amplitude was 10 mm., and the approximate distance 100 miles. The barograph apoid recorded a maximum amplitude of four mm. This disturbance corresponds to the after shocks that were experienced after the severe movement of October 1. It was felt by a number of persons, and had an intensity of II on the Rossi-Foré scale (I to X.)

Arrival of the 119th Company, Coast Artillery.

The 119th Company, Coast Artillery, Maj. W. E. Cole commanding, arrived on the *Ancon* on May 31, and has gone into barracks at Fort Sherman on Toro Point. The company consists of six commissioned officers, three noncommissioned officers, and 104 enlisted men. The officers are: Major Cole, commanding, Capt. A. A. Maybach, Lieutenant Bartlett, Lieut. G. A. Mix, Lieut. Cedric Skeene, and Lieut. H. C. Allen. In addition, there came with the company Lieut. W. B. Borden of the Medical Corps, and five enlisted men belonging to the Hospital Corps. The company was stationed previously at Fort Washington, Md.

The 44th Company, Coast Artillery, sailed from New York on the *Cristobal*, and is due to arrive at Colon about June 10. It will also be quartered at Fort Sherman.

American Institute of Electrical Engineers.

The June meeting of the Panama Section of the American Institute of Electrical Engineers will be held in the lock control house at Gatun, on Sunday morning, June 7, 1914, at 9.15 a. m. Mr. Ernest E. Lee will present a paper entitled "Lock control." The operation of the control board and of the lock machinery will be demonstrated. Visitors including ladies will be welcome.

PERSONAL.

A joint resolution of Congress, approved on May 13, authorizes the President to detail Lieut. Frederick Mears of the Second Regiment of Cavalry, U. S. A., former superintendent and chief engineer of the Panama railroad, to perform service in connection with the location and construction of the proposed Alaskan railroad. Mr. Mears sailed for the United States on special leave on April 22, and Mrs. Mears and their children sailed on Wednesday, May 6. Mr. Mears was born at Fort Omaha, Neb., on May 25, 1878, the son of Col. Frederick Mears of the infantry. He attended school in New York City, San Francisco, and Spokane, and at Shattuck School in Minnesota. In 1897, he began work as a rodman with a field party of the Great Northern Railway. Afterward, he was connected with field parties in Idaho, British Columbia, and Arkansas. In 1899, he enlisted as a private in the United States Army, and was assigned to the Third Infantry, which was sent to the Philippine Islands. He became successively corporal and sergeant, and in July, 1901, passed an examination for appointment as second lieutenant. He was assigned to the Fifth Cavalry. He was graduated from the Infantry and Cavalry School in 1904, and from the Staff

College in 1905. He was promoted to be first lieutenant on September 20, 1906. In May, 1906, he was transferred to the Canal Zone to enter the service of the Isthmian Canal Commission, and assigned to surveying the route for the relocation of the Panama railroad. He was promoted to resident engineer, in charge of the relocated line construction, in May, 1907, and in December, 1909, he was made chief engineer of the Panama railroad. In addition to his work on the relocated line, he was placed in charge of the party which surveyed the route of the proposed railroad from Empire to David, in Chiriqui province. On December 1, 1913, he was appointed general superintendent of the Panama railroad, retaining his duties as chief engineer. He is an associate member of the American Society of Civil Engineers.

Dr. Marshal C. Guthrie, chief quarantine officer of The Panama Canal, returned on Thursday, May 28, from a few days' trip to Bocas del Toro, and Almirante, Panama, and Port Limon, Costa Rica, where he went in connection with quarantine matters. He inspected the concrete dock of the United Fruit Company at Almirante, the point from which most of the company's bananas in the Bocas district are shipped, and found it to comply with the standard as set forth in the United States quarantine regulations.

F. C. Stanton, assistant engineer in local charge of the work at the east breakwater in Colon harbor and of the construction of the Cristobal coaling plant, sailed for New Orleans on the *Cartago*, on Thursday, May 28, on 30 days' vacation leave. During his absence, Supervisor W. G. Thompson has been placed in local charge of the work at the coaling plant, and Supervisor C. C. Snedeker of the work at the breakwater.

Mr. Charles H. Motsett, who was appointed superintendent of the Panama Railroad Company, to succeed Lieut. F. Mears, arrived on the Isthmus on the *Ancon*, on May 31.

Accidental Electrocution.

George F. Cleveland, an American employed as electrician in the Division of Erection of the Department of Operation and Maintenance, was accidentally electrocuted at Miraflores Locks on Saturday, May 23. The coroner's jury found that at the time he was in the cab of towing locomotive No. 683, and that while engaged in cleaning the contact fingers of the machine, he came into contact with the current, which was on, causing death. The voltage of the current was 220. He was born at Oneonta, N. Y., was 39 years of age, and had been on the Isthmus since April 18,

Settlement of Estates.

The following estates of deceased employees of The Panama Canal or the Panama Railroad Company are now in process of settlement by the office of the Administrator of Estates, Ancon, C. Z., and any claims against these estates, or any information which might lead to the location of heirs, or to the recovery

of property, bank deposits, postal savings, or postal money order deposits, or any other moneys due them, should be presented at his office at once, in order that the estates may be settled as soon as possible. All claims should be itemized, sworn to before a notary public, or other public officer having a seal, and submitted in duplicate. These names will be published but once.

Knights of Pythias.

There will be a special meeting of the Uniform Rank, Knights of Pythias at Ancon lodge hall on Tuesday evening, June 9. All members of the Uniform Rank, and all Knights of Pythias interested are requested to attend this meeting, or communicate with A. O. Blake, P. O. box No. 250, Ancon.

Joint Land Commission.

The first of the hearings of the reorganized Joint Land Commission will be held by agreement on Friday, June 5. The commission has adopted the plan of preparing a calendar of the cases to be heard each week, and announcing it in advance in the press, in order to give the claimants and their attorneys time to prepare for them. It is proposed to call up 10 cases each day sessions are held, and if for some reason certain of the claimants are still unprepared on the date specified their cases can be reset. The cases set for next week all involve property in the Gatun Lake area, known as District No. 2, and are, as follows:

Docket No.	Claimant.	Docket No.	Claimant.

194	Cristobal Aguilar	206	Ines Benites

There are still about 400 cases remaining to be adjudicated in the Gatun Lake region. Since the dissolution of the former commission about 150 claims in the Canal Zone have been settled by the former General Counsel. Mr. William Taylor, formerly chief clerk in the Mechanical Division, has been appointed secretary of the commission, and will sail for the Isthmus from New Orleans on June 6.

Stenographers Wanted.

The services of three stenographers can be utilized for a period of not over three months. Men with experience are required. Apply in person, or by writing, to the Executive Secretary, Culebra.

EXECUTIVE ORDER

To Create a Committee to Formally and Officially Open The Panama Canal.

By virtue of the authority vested in me by the Act approved April 6, 1914, entitled "An Act making appropriations to supply urgent deficiencies in appropriations for the fiscal year nineteen hundred and fourteen and for prior years, and for other purposes," a committee of six members is hereby created to arrange and provide suitable ceremonies for the official and formal opening of The Panama Canal, as is provided for in Section 4 of the Panama Canal Act. The committee shall be composed of persons who were members of the Isthmian Canal Commission. The committee shall be known and referred to as the "Committee for the formal and official opening of The Panama Canal." It shall have a chairman and vice-chairman, but shall perform its duties under the direction of the Governor of The Panama Canal.

The persons named below are hereby appointed members of this committee:

Col. George W. Goethals, U. S. A.

Hon. Richard L. Metcalfe.

Gen. William C. Gorgas, U. S. A.

Col. H. F. Hodges, U. S. A.

Lieut.-Col. William L. Sibert, U. S. A.

Civil Engineer H. H. Rousseau, U. S. N.

Col. George W. Goethals, now Governor of The Panama Canal, shall be chairman of this committee.

Hon. Richard L. Metcalfe shall be vice-chairman.

The members of said committee shall each receive salary at the rate of ten thousand dollars per annum from April 1, 1914, to December 31, 1914, inclusive, and such necessary traveling and living expenses during the period from April 1, 1914, to January 31, 1915, when on duty connected with the work of providing for formally and officially opening The Panama Canal, as may be approved by the Secretary of War. The salary fixed as above shall include any salary to which any member of this committee may be entitled by reason of his appointment to or employment in any other position under the United States for the period above provided for, and the amount of such salary shall be deducted from the salary fixed as above. The salary to be paid May 31, 1914, shall be equal to two months' pay in a lump sum, less the amount of any other salary for the months of April and May, 1914. The word "Salary" as used herein, in determining the amount to be deducted, shall not be construed to include additional emoluments, such as quarters, heat, light, etc., but shall be confined to actual pay.

The committee is authorized to spend such sums as may be available for printing, postage, correspondence, employment of clerks, and other necessary expenses connected with formally and officially opening The Panama Canal, as may be approved by the Secretary of War, it being understood that the sum to be expended for traveling, living, and other expenses shall not exceed ten thousand dollars, and that the total expenditure authorized by this Order shall not exceed twenty-five thousand dollars.

The payments herein authorized shall be made from such appropriation or appropriations for the construction, completion, and sanitation of The Panama Canal as may be directed by the Governor of The Panama Canal.

The payments authorized hereunder shall

be made by such disbursing officer of The Panama Canal as the Governor shall designate.

The Secretary of War shall provide the manner in which the amount to be expended for traveling, living, and other expenses authorized by him shall be certified to, and, when such expenditures are so certified to, they shall be paid without further vouchers therefor.

WOODROW WILSON.

THE WHITE HOUSE,
May 20, 1914.

[No. 1944.]

EXECUTIVE ORDER

Relating to Pardons, the Remission of Fines and Forfeitures and other Subjects.

By virtue of the authority vested in me. I hereby establish the following Order for the Canal Zone:

Section 1. The Governor of The Panama Canal is hereby empowered to grant pardons and reprieves for offenses against the laws, orders and regulations of the Canal Zone; and to commute sentences, and remit fines and forfeitures. He may establish a system for paroling prisoners, and alter or amend the same from time to time.

Section 2. The Governor may establish regulations to govern the labor and employment of prisoners, and to provide awards for their good behavior, and upon other matters affecting the welfare of the prisoners and their management in the penal institutions of the Canal Zone, and may alter and amend such regulations from time to time.

The existing rules and regulations upon the subjects mentioned in this section shall continue in force until altered or amended by the Governor.

Section 3. This Order shall take effect from and after this date.

WOODROW WILSON.

THE WHITE HOUSE,
May 13, 1914.

[No. 1938.]

Immigrant Inspector Examination.

An examination is scheduled to be held, probably on June 21, for immigrant inspector. The supply of announcements received was limited and has been distributed to the club-houses at Cristobal, Gatun, Pedro Miguel, Corozal, and Balboa, and the post-offices at Empire, Culebra, Paraiso, Ancon, and Balboa; full information may be obtained from the announcement.

Applications should be secured from and filed with this office. Applications will not be received after June 15; this date may be changed if necessary.

The optional subject of stenography and typewriting will be given, probably on the morning of June 22.

A copy of the immigration laws will be sent to each person whose application is approved, after the laws are received on the Isthmus, which, it is expected, will be about June 15.

A card of admission will be sent to those found eligible to be admitted, just before the examination. The place and date of examination should be omitted in application forms.

ISTHMIAN CIVIL SERVICE BOARD.

CULEBRA, C. Z., June 1, 1914.

Seventy-seven recruits for the Tenth Infantry arrived on the *Alliance*, which docked at Cristobal on Wednesday, June 3.

SOCIAL LIFE OF THE ZONE.

Raising Funds for Union Church Parsonage.

A meeting of the executive council of the Union Church of the Canal Zone was held at Cristobal on Sunday, May 24, at which time the principal business transacted was the decision of the council to purchase a cottage from the Government of The Panama Canal to be used as a parsonage for the minister who is expected to arrive on the Isthmus soon. The cottage will be removed from the place where it stands, when purchased, and reerected in Balboa, which will be the official headquarters of the church council. The sum required for the purpose is \$1,500, United States currency. A committee has been appointed to raise this money by pledges with as little delay as possible. Subscription lists were opened on Tuesday evening and before noon of the following day \$400 had been pledged. Representatives in the local villages for receiving subscriptions are, as follows: A. H. Hackenberg, Corozal; P. T. Woolworth, Pedro Miguel; L. S. Kiser, Paraiso; H. K. Higgins, Culebra; W. H. Warr, Empire; A. H. Kjellander, Gatun; Leander Larson, Cristobal. In addition to this action, various matters of routine business were disposed of. It was decided that the members of the finance committee in each town should be responsible for the collection of pledges for the support of the church. Individuals are requested to make their monthly payments to the local representative of the finance committee who will give receipt and forward the sums to the central treasury. Mr. W. E. Hoffman of Empire has resigned as secretary of the church organization, and Mr. W. H. Kromer of Cristobal has been appointed in his stead.

Fourth Degree, Knights of Columbus.

By virtue of the power conferred upon me as temporary master of the Fourth Degree of the Isthmus of Panama, I hereby call a meeting of all members of the Knights of Columbus who have attained the honors of this degree to meet at the district court building, Cristobal, Sunday, June 7, at 1.15 p. m., for the purpose of organizing, electing officers, selecting a name, and for any other purpose incident to the formation of an assembly.

J. L. KERR,

Temporary Master.

Colon, R. P., June 3, 1914.

Fourth of July Celebration.
